Dear Phil

Following a site visit this morning and a discussion with the applicant around Environmental Health concerns of potential for public nuisance; the applicant has agreed to the following:

- To remove live music from Section E provision of regulated entertainment. This enables the applicant to have live music internally until 11pm in accordance with the Live Music Act. In the summer I understand that the applicant may want acoustic / duets externally and I have explained that to avoid potential for nuisance this must be unamplified.
- To remove 'both' from Section F Recorded Music and replace with 'indoors'. Advice has been given to the applicant that background music is not a licensable activity; background is accepted by acoustic consultants as not exceeding a music noise level of 5dB LAeq(5mins) above background L90 when music is off in Laymen's terms a person should not need to raise their voice to be heard above the music.

Given that the venue is not adjoined to any residential property, has air condition already in place and door closures fitted and with the attachment of the following agreed condition EH have no objection to the proposed application.

Condition:

1. All windows and doors to be kept closed during regulated entertainment; other than for access and egress.

Kind regards

Amanda Berry
