EXTRAORDINARY OVERVIEW & SCRUTINY PANEL

21 NOVEMBER 2016

An extraordinary meeting of the Overview & Scrutiny Panel will be held at <u>7.00 pm on</u> <u>Monday, 21 November 2016</u> in the Council Chamber, Council Offices, Cecil Street, Margate, Kent.

Membership:

Councillor D Saunders (Chairman); Councillors: G Coleman-Cooke (Deputy Chair), Bambridge, Campbell, Connor, Curran, Dennis, Dexter, Dixon, Falcon, Grove, Jaye-Jones, Martin, Parsons and Rusiecki

<u>AGENDA</u>

<u>Item</u> <u>No</u> <u>Subject</u>

1. APOLOGIES FOR ABSENCE

2. DECLARATIONS OF INTEREST

To receive any declarations of interest. Members are advised to consider the advice contained within the Declaration of Interest form attached at the back of this agenda. If a Member declares an interest, they should complete that form and hand it to the officer clerking the meeting and then take the prescribed course of action.

- 3. THANET LOCAL PLAN CONSULTATION (Pages 1 1038)
- 4. **BUDGET STRATEGY 2017/18** (Pages 1039 1084)
- 5. FEES AND CHARGES 2017/18 (Pages 1085 1108)
- 6. COUNCIL TAX SUPPORT SCHEME (Pages 1109 1140)

THANET LOCAL PLAN – CONSULTATION

Overview & Scrutiny Panel	21 st November 2016
Report Author	Rob Kenyon, Director of Community Services
Portfolio Holder	Cllr Lin Fairbrass, Portfolio Holder for Community Services
Status	For Recommendation
Classification:	Unrestricted
Key Decision	Yes
Reasons for Key <i>(if appropriate)</i>	Significant effect on communities
Previously Considered by	None
Ward:	All

Executive Summary:

The Local Plan supports the Council's Corporate Plan priorities and is one of the Council's key strategies in delivering on its priority to promote inward investment and job creation. It helps set the strategic framework for delivery of the Council's economic ambitions. Not only does it help to deliver the economic strategy, it also makes provision for new housing to meet local needs and to support the growth of the workforce, and other development requirements, and supports the provision of key new infrastructure.

It is also a statutory document that is assessed by an independent Planning Inspector, and this report describes the legal requirements for the Local Plan at this stage, and the guidance which affects decisions through the Local Plan process.

The report also sets out the main issues raised during the Preferred Options consultation (January 2015); and provides recommended responses to those issues.

The report addresses the updating of the evidence base for the Local Plan process; and indicates key changes that are being proposed for consultation as revisions to the Preferred Option Local Plan.

On the basis of legal advice, the report proposes a focussed consultation on revisions to the Preferred Options Plan published in January 2015; with accompanying consultation relating to Sustainability Appraisal/Strategic Environmental Assessment and Habitat Regulations Assessment; the draft Infrastructure Delivery Plan and Local Green Space.

The Thanet Transport Strategy (jointly prepared by Kent County Council and Thanet District Council), which supports the draft Local Plan, will be the subject of a separate report and consultation, following a decision on the draft Local Plan.

Recommendation(s):

- 1. That the Overview and Scrutiny Panel recommends to Cabinet that the proposed revisions to the draft Local Plan, and the accompanying Sustainability Appraisal/Strategic Environmental Assessment/Habitat Regulations assessment reports, be agreed for consultation purposes for a period of 6 weeks; and
- 2. That Overview and Scrutiny Panel recommend to Cabinet that the appropriate amendments to the Local Development Scheme be agreed.

CORPORATE IM	PLICATIONS
Financial and Value for Money	The consultation is anticipated to cost about £15,000, taking into account printing costs; venue costs; etc. This is within the current budget.
	There are no specific requirements under Contract Standing Orders/ Financial Procedure Rules relating to the proposed consultation.
Legal	This report relates to the next stage of consultation on the draft Local Plan, and needs to be carried out in accordance with any relevant Regulations and Government guidance, and in line with the Council's adopted Statement of Community Involvement (SCI).
	The report includes advice from the Barrister advising the Council on the Local Plan.
Corporate	 Primary corporate risk is not having a well-evidenced Local Plan. Lack of Plan places the Council "at risk" in terms of Appeal decisions and also delays the provision of infrastructure, effectively losing control of the development process. There is also a significant risk of intervention by CLG. Any decision on the draft Plan that runs counter to the available evidence would be likely to fail at Examination and also potentially subject to Judicial Review. There is a strong "fit" between the draft Local Plan and corporate strategy priorities. Environmental implications – none directly from the proposed consultation. Environmental issues related to the provisions of the draft Plan are considered through the Sustainability Appraisal/Strategic Environmental Assessment/Habitat Regulations Assessment, which are also the subject of this consultation.
Equalities Act 2010 & Public Sector Equality Duty	Members are reminded of the requirement, under the Public Sector Equality Duty (section 149 of the Equality Act 2010) to have due regard to the aims of the Duty at the time the decision is taken. The aims of the Duty are: (i) eliminate unlawful discrimination, harassment, victimisation and other conduct prohibited by the Act, (ii) advance equality of opportunity between people who share a protected characteristic and people who do not share it, and (iii) foster good relations between people who share a protected characteristic and people who do not share it. Protected characteristics: age, gender, disability, race, sexual orientation, gender reassignment, religion or belief and pregnancy & maternity. Only aim (i) of the Duty applies to Marriage & civil partnership.

	Please indicate which aim is relevant to the report.			
	Eliminate unlawful discrimination, harassment, victimisation and			
other conduct prohibited by the Act,				
	Advance equality of opportunity between people who share a			
	protected characteristic and people who do not share it	•		
	Foster good relations between people who share a protected			
	characteristic and people who do not share it.	•		
	The PSED is engaged by the Local Plan topic. However, Memb	ers are		
	asked to approve going out to public consultation on the areas	set out		
	within the report. Officers will review representations for equality	issues		
	raised as part of the consultation in addition to those already con			
	as part of the previous 'preferred options' consultation.

Delivering value for money	
Supporting the Workforce	
Promoting open communications	✓

1.0 Introduction and Background

- 1.1 The Council's Corporate Plan sets out the Council's aspiration to grow the local economy. One of the priorities is to promote inward investment and job creation (Corporate priority 3). Part of the Council's vision is to accelerate growth and achieve greater economic prosperity for our district; seeking opportunities for inward investment and high quality job creation, and working with partners to ensure we have the right skills, infrastructure and plans in place.
- 1.2 The Local Plan is one of the Council's key strategies in supporting economic growth and regeneration and is specifically identified in the Corporate Plan priorities. Not only does it help to deliver the economic strategy, it also identifies locations for new housing to meet local needs and to support the growth of the workforce, and other development requirements. It also supports the provision of new infrastructure (such as schools, medical facilities, transport and so on) through the infrastructure delivery plan, working with key partners to ensure the infrastructure is delivered in a timely way.
- 1.3 The Local Plan also has a role in supporting the other corporate priorities by seeking to improve design and quality of new development; protecting publicly-accessible open spaces and important wildlife sites; providing a framework for the preparation of Neighbourhood Plans; and working with other statutory providers to seek to ensure that local health, education and other services are provided alongside new development.
- 1.4 The Local Plan supports the current priorities set out in the Corporate Plan, but to some extent will also help to frame future priorities beyond the current Corporate Plan period.
- 1.5 The Local Plan process is also a statutory process. The draft Local Plan is assessed by an independent Planning Inspector, and this report describes the legal processes

for the Local Plan and the guidance which affects decisions through the Local Plan process.

- 1.6 This report sets out the main issues raised at the previous Local Plan consultation; the key findings from development of the Local Plan evidence base; and proposes a number of changes to the draft Plan to be the subject of a focussed consultation.
- 1.7 The Council produces a Local Plan under the Planning and Compulsory Purchase Act 2004, and there are duties and legal requirements for the Council as local planning authority. These are also set out in the report below.
- 1.8 The issues addressed in this report have been considered by the informal Local Plan Working Group. The report is also to be considered by the Overview & Scrutiny Panel, and the views of the Panel will be reported to this Cabinet meeting.

2.0 Draft Local Plan and consultation

- 2.1 In January 2015, the Council consulted on a Preferred Option draft of the Thanet Local Plan. About 1,800 sets of comments were received, with a total of some 40,000 individual points of response to the consultation questions. The Council also received three written petitions and an e-petition relating to the draft Local Plan. These were considered at the Council meeting on 16th July 2015. The key planning issues arising from the petitions were: objections to the proposed housing allocations at Birchington; objections to the proposed strategic housing allocation on land between Dent-de-Lion and Minster Road/land bordering Minster Road, Westgate-On-Sea (two petitions); and a request for a public meeting to discuss "the consultation process, allocation of green field land and the scale of anticipated housing growth for Thanet".
- 2.2 The Council also received the results of a survey from the Thanet UKIP Group regarding the level of housing in the draft Plan. Approximately 2,200 respondents indicated that they were against the level of housing in the draft Local Plan.
- 2.3 The main issues arising from the consultation were housing numbers and sites; economic strategy and job creation; the future of Manston Airport; provision of infrastructure (social and physical); environmental protection; and retail provision and the role of Westwood. Concerns were also raised by a number of correspondents about the publication of supporting documents and whether the Council had fulfilled the "duty to cooperate".

2.4 <u>Preferred Options consultation and main issues raised & petitions</u>

The main issues raised in the previous consultation are set out in more detail at Annex 2.

These included overall housing numbers; housing sites; the future of the Airport; concerns about the adequate provision of social and physical infrastructure to support development.

Responses to main issues

The responses to the main issues are set out in the table attached as Annex 2.

However, this report addresses the key issues to be considered at this stage.

Government guidance - key requirements

It is important that the draft Local Plan meets the requirements of Government guidance; notably the National Planning Policy Framework (NPPF) and national Planning Practice Guidance (PPG). There are some key matters which must be addressed in the preparation of Local Plans.

The NPPF states (para 182) that a local planning authority should submit a Plan for Examination which it considers is "sound". In other words, draft Plans must be:

• **Positively prepared** – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;

• **Justified** – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

• **Effective** – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and

• **Consistent with national policy** – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

Specifically, in relation to Local Plans, the NPPF indicates (paras 156, 157) the way in which Local Plan ought to be prepared, and the range of topics to be addressed in Local Plans. This includes housing; employment land; retail provision; infrastructure delivery; protection of national and international wildlife sites; heritage assets (Conservation Areas, Listed Buildings, etc); pollution matters and so on. In some of these areas, the Local Plan provides the primary policy control; in others the planning authority acts in conjunction with other statutory control within the Council, or with other statutory bodies such as the Environment Agency or Natural England.

Para 158 advises that local planning authorities "should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area".

Advice of Barrister on key issues

We have sought the advice of Planning Barristers on the way forward for the Local Plan and the matters addressed in this report have been considered by the Barrister prior to this report being finalised.

The advice of the Barrister is that, given the scale of changes between the Preferred Option and what is being recommended to Members in the report, and to ensure that all requirements from legislation and Government guidance are satisfied, a further focussed stage of consultation is necessary before a final Plan for submission to the Planning Inspectorate is published.

The Barrister has also advised that the Sustainability Appraisal/Strategic Environmental Assessment/Habitat Regulations Assessment reports are published for consultation purposes at this stage, to ensure that these are properly consulted upon as part of the Local Plan process.

Relationship to Neighbourhood Plans

The draft Local Plan has an important role in setting a strategic framework for Neighbourhood Plans. There are currently five such Plans in preparation, at different stages – Broadstairs, Cliffsend, Margate, Ramsgate and Westgate – and there may be others to follow. It is therefore important that there is a clear strategy in the draft Local Plan.

This is not to unnecessarily constrain the emerging Neighbourhood Plans, but to set a clear strategic framework.

Duty to cooperate

The NPPF (paragraph 178) states that "Local planning authorities should work collaboratively with other bodies to ensure that strategic priorities across local boundaries are properly coordinated and clearly reflected in individual Local Plans".

Paragraph 181 in the NPPF further states that

"Local planning authorities will be expected to demonstrate evidence of having effectively cooperated to plan for issues with cross-boundary impacts when their Local Plans are submitted for examination. This could be by way of plans or policies prepared as part of a joint committee, a memorandum of understanding or a jointly prepared strategy which is presented as evidence of an agreed position. Cooperation should be a continuous process of engagement from initial thinking through to implementation, resulting in a final position where plans are in place to provide the land and infrastructure necessary to support current and projected future levels of development".

It should be noted that the "duty to cooperate" is not a "duty to agree" (Planning Practice Guidance, para 9-001), but that "local planning authorities should make every effort to secure the necessary cooperation on strategic cross boundary matters before they submit their Local Plans for examination".

History of cooperation

The Council has a long history of cooperation with its neighbours in East Kent, and has continued to work with neighbouring Councils and other key organisations on key aspects of Local Plan work. Recent examples include:

- Review of the Strategic Housing Market Assessment neighbouring Councils and other key stakeholders invited to participate in workshops on the methodology and findings of the SHMA review
- Worked with key organisations on the development of requirements for the draft Infrastructure Delivery Plan
- Worked with Canterbury City Council on the development of a Memorandum of Understanding for implementing their Strategic Access, Management & Monitoring (SAMM) Strategies for the protected coastal areas of the two districts
- Working with Kent County Council and other Kent authorities on best practice in development monitoring and in particular, the re-structuring of the annual Commercial Information Audit

• In March 2016, the Council adopted the East Kent Memorandum of Understanding on the Duty to Cooperate, which sets out how the various local authorities will work together on cross-boundary aspects of Local Plan work.

Sustainability Appraisal/Strategic Environmental Assessment and Habitat Regulations Assessment

The Sustainability Appraisal/Strategic Environmental Assessment (SA/SEA) and Habitat Regulations Assessment (HRA) are statutory parts of the Local Plan process. A copy of the draft SA, Non-Technical Summary of the SA, and the HRA, are attached to this report at Annexes 3-7. Please note that sustainability appraisal of the Preferred Options Revisions is currently work in process. The initial findings of the sustainability issues as part of the decision making process. The sustainability appraisal will be updated accordingly in line with any amendments to the Preferred Options Revisions and the findings of the appraisal presented within a revised Sustainability Appraisal Environmental Report. The SA/SEA and HRA need to be published for consultation alongside the draft Local Plan.

The purpose of the SA process is to assess the proposals in the Local Plan, and reasonable alternatives, against a range of social, environmental and economic criteria. The SA also deals with the requirement for a Strategic Environmental Assessment (SEA) of the draft Plan. The purpose of the HRA is to consider the Local Plan proposals in the light of international wildlife designations, and to ascertain whether those proposals are acceptable in relation to any "likely significant effect" on the international wildlife sites.

A Sustainability Report was published alongside the Issues & Options paper, and set out the relative merits of different development strategies. This concluded that an urban edge/infill strategy represented the most suitable option.

However, given the additional housing requirements and the fact that some sites had been submitted, which would effectively act as new settlements, it was considered appropriate to explore whether mitigation measures could make the option of a new settlement sustainable.

The New Settlement Mitigation Study concluded that new settlement options could be made more sustainable through the implementation of robust mitigation. These mitigation measures include increased public transport provision; provision of alternative transport such as walking or cycling; provision of green infrastructure and open space; provision of an appropriate housing mix/tenure and biodiversity considerations such as avoidance of priority species.

Findings from other studies

A number of other studies have been undertaken over the last few months, to ensure that the evidence base for the draft Local Plan remains relevant and up-to-date. The detail and outcomes from these studies, and the implications for the Local Plan process, are set out below.

Strategic Housing Market Assessment (SHMA)

The SHMA informs the housing requirements over the plan period, and has been updated to take account of the 2014-based ONS Sub-National Population Projections and CLG Household Projections. The amount of housing required is identified as an Objectively Assessed Need (OAN).

The projections show a stronger population growth, which requires a higher level of OAN at 17,140 new dwellings for the 2011-31 Plan period. The updated SHMA has revised the affordable housing target as 47% (although this will have to be considered alongside viability issues). It also identifies a need for 76 units per annum (1,522 over the plan period) of specialist accommodation for older persons in view of the projected increase in population of older persons identified in the 2014 projections.

Retail Study

The Thanet Retail and Leisure Assessment was updated to reflect the findings of the Strategic Housing Market Assessment and has taken into account all recent permissions, developments and commitments in the pipeline.

The retail need at Westwood has been revised down to 23,903sqm to the end of the Plan period from 36,280sqm. Retail need for the whole district is revised down to 39,171sqm. Both of these figures include all the A use classes (this includes shops, financial and professional services, restaurants and cafes, drinking establishments and hot-food take-aways).

This evidence requires no further change to the draft Local Plan.

New Economic Growth Strategy

Members will be aware that a significant amount of work has been undertaken to review the Council's Economic Growth Strategy. This review work has been led by consultants BBP and SQW, with input from officers, members, local businesses and other relevant organisations.

Although many of the recommendations do not relate directly to the draft Local Plan, there are undoubtedly some implications for the Plan arising from this review of the Council's role in supporting economic growth:

- (1) Ensuring that new housing development is of a type, size and quality to be able to accommodate a growing workforce;
- (2) Include reference to advanced manufacturing and other important economic sectors under the Economic Strategy section of the Plan;
- (3) Supporting tourism development;
- (4) Policy support for Port development;
- (5) The need to bring forward key infrastructure that supports economic development through the Infrastructure Delivery Plan (IDP). This is addressed elsewhere in this report;

- (6) Include a policy to support the growth and development of local university/college campuses, where needed, to improve and develop local skills base; and
 - (7) Provide policy support for long-term feasibility modelling for Margate and Ramsgate.

Key Issues to be addressed

In view of the changed circumstances surrounding the draft Local Plan, and the new evidence received regarding housing needs and requirements, and the viability of the Airport, it is recommended that the next stage of consultation should focus on some key areas of the main issues raised at consultation – housing numbers and sites; the future Airport; infrastructure provision; SA/SEA and HRA, and related matters.

Other issues raised and other changes required can be addressed at the pre-Submission publication stage (the final formal stage before the draft Plan is submitted for Examination.

Housing Numbers

As mentioned above, many objections were received to the level of housing proposed at the last stage of consultation, either in principle or because of concerns about related matters such as environmental impact or the need for social and physical infrastructure; or that the Council had come to a conclusion on housing numbers on the basis of out-of-date information.

While these concerns are noted, Government guidance on the provision of new housing through the planning system is clear. The objectively-assessed need (OAN) for housing should be determined through a Strategic Housing Market Assessment (SHMA), with other relevant population and market factors taken into account. The OAN figure should not at that stage take into account constraints, so that the figure fully reflects the housing need in the area.

The latest SHMA update (based on the 2014-based Sub-National Population Projections identifies the OAN for Thanet as 17,140 dwellings. However, it should be noted that, taking into account completions since 2011; extant planning permissions; anticipated "windfall" sites in the Plan period; and including empty homes being brought back into use, the draft Plan only needs to make provision for an additional 9,300 dwellings. Taking into account allocations in the Preferred Options Local Plan, this requires an additional 2,753 dwellings to be identified at this stage.

However, the NPPF (para 47) also requires that Local Plans should demonstrate that the supply is sufficiently flexible and resilient, "to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land", and there therefore needs to be a sufficient margin of provision above the actual requirement to deal with these circumstances. The proposed revisions set out in this report would address that issue.

It is expected (NPPF, para 47) that Local Plans will meet the full OAN for the area concerned.

The NPPF does allow for exceptions to this approach, under para 14, which states that "Local Plans should meet objectively assessed needs...unless...specific policies in this Framework indicate development should be restricted".

These primary restrictions are set out in the National Planning Policy Framework (NPPF)(under Footnote 9, p4), and indicates, for example, those policies relating to:

- sites protected under the Birds and Habitats Directives (see NPPF para 119); and/or designated as Sites of Special Scientific Interest;
- land designated as Green Belt;
- Local Green Space;
- an Area of Outstanding Natural Beauty (AONB), Heritage Coast or within a National Park;
- designated heritage assets; and
- locations at risk of flooding or coastal erosion.

Only one of these applies in any significant form in Thanet – national and international wildlife sites (Sites of Special Scientific Interest; Special Protection Areas; SACs; Ramsar Sites). However, these are all at the coast and are not directly affected by housing. Indirect effects from recreation can be mitigated, based on advice from Natural England, and this strategy forms the basis for the Thanet Coast Project.

This is set out in more detail in the Strategic Access Management and Monitoring (SAMM) strategy, which provides the mechanism to mitigate the potential incombination effect of new housing development on the Thanet Coast and Sandwich Bay Special Protection Area. Such mitigation is a requirement of the Habitat Regulations and applies to all new residential development in the district.

The mitigation takes the form of a wardening scheme, and is funded by the collection of S106 for all residential developments of 10 or more dwellings at present, later to be applied to all residential development.

The district also has areas at risk to flooding and designated heritage assets, but the draft Local Plan seeks to avoid areas at risk to flooding, and to ensure that development that could affect a designated heritage asset (including setting) is appropriately designed.

In considering site options, the Council must give consideration to these factors, and generally seek to avoid the sensitive areas referred to in Footnote 9.

During the consultation, concerns were raised about the loss of best and most versatile agricultural land in the Local Plan. This clearly does act as a constraint, but only a partial one. The NPPF states (para 112) that "Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality."

In Thanet district, there is a high proportion of best and most versatile farmland, and (according to the Defra Agricultural Land Classification map) those areas of a lower quality are located in small patches or in flood risk areas, and it is therefore very difficult to make the distinction set out in the NPPF. What is clear is that this is regarded as a less significant restriction than those listed in Footnote 9.

The provision of physical and social infrastructure, a concern of many respondents, is addressed later in this report.

Use of empty properties

The historical position has been that empty homes cannot be considered part of the housing land supply that can be offset against a local authority's Local Plan housing requirements. This is because they are already considered to be part of the housing stock.

This is compounded by the fact that in projecting future housing demand, the ratio of empty properties is applied to the new requirements as well as old stock, thereby driving up the housing requirement.

However, the Council has received advice that some empty properties can be considered as contributing to land supply, when the following criteria are met:

(1) The properties in question have been empty for a period of 4 years or more.

This is based on the position that over that period it can be argued that those properties have been vacant and unused for such a long period that they are no longer available in the housing market and therefore not part of the active housing stock; and

(2) The Council has an active and robust programme for bringing those properties back into use.

This is based on the position that such housing is returned to the market, almost as if it were new housing stock.

The Council has an Empty Homes programme which it is calculated has, over the last few years, successfully brought about 110 dwellings back into use each year, over the last 5 years.

A review of empty property has been undertaken, and (excluding properties which have been the subject of planning permission – these are already counted separately ion the housing land supply), it is believed that the Local Plan can include in the housing land supply 540 units for the Plan period arising from empty properties being brought back into use. This will need to be regularly monitored, and is dependent on the Council's Empty Homes programme continuing through at least the Plan period.

Calculation of "windfall" supply

"Windfall" sites are those sites which come forward during the Plan period, but without being specifically identified through the Local Plan process. These sites are almost exclusively previously-developed (brownfield) land. There is a long history of such sites coming forward in Thanet, and the NPPF allows a reasonable calculation of such sites to be included in the Local Plan housing land supply.

In the Preferred Option draft Local Plan, an allowance of 1,644 was made. This calculation has been reviewed and, on the basis of the history of "windfall" housing

delivery over the last 8 years, it is recommended that a figure of 2,700 is included in the housing land supply.

5-year Housing Land Supply

One of the things that local authorities should be able to demonstrate is that the sites in its housing land supply are deliverable (NPPF, para 47). This report sets out a position on housing land supply, which will enable the Council to demonstrate a proper supply of housing land through the Plan period.

Residual housing requirements

Component of supply	No. of units	Residual requirement
Requirement	17140	17140
Completions 2011-16	1555	15585
Extant planning permissions as at 31/03/16	3017	12568
Windfalls	2700	9868
Empty Homes	540	9328
Extant Allocations (Preferred Options Plan)	6575	2753

However, there are a number of sites that need to be removed from the draft Plan for other reasons (either the allocations are not supported by landowners, or may be developed for other purposes, and are unlikely to be available for housing):

Site	No. Dwellings	Site Ref
1,2, 92-96 Harbour Parade	14	S219
Rear of 102-114 Grange Road	10	S316
St Benedict's Church, Whitehall Road, Ramsgate	12	SR10
Ramsgate Garden Centre, Hereson Rd, Ramsgate	62	SR57
Station Road, Minster	5	S088
Tothill Street, Minster (part)	0	S85
140 – 144 Newington Road	50	SS40
Land at Holy Trinity Primary School, Dumpton Park	33	S525
Drive, Ramsgate		
86-88 Ellington Road, Ramsgate	9	SR21
Dane Valley Filling Station, Millmead Road,	7	SR34
Margate		
6 Surrey Road	5	S348
Land adjoining Seafield Road, Ramsgate	9	SR22
Former Manston Allotments	61	S452
R/O 18-36 St Peters Road	5	SO42
Total	282	

New Housing sites

A number of new site options have been assessed through the different stages of the draft Local Plan, and these have also been subject to Sustainability Appraisal (SA). In essence, these fall into two categories:

- 1. Continue the current approach of infill and urban extensions; or
- 2. Seek a suitable location for a new settlement.

As mentioned above, the early stages of SA clearly indicated that a strategy of urban extensions was the preferable strategy in terms of the SA objectives. For this stage of the draft Plan, some additional work was undertaken by the SA advisors, which indicates that, with some key elements addressed, a new settlement in the district could be acceptable in terms of the SA objectives.

On this basis, the SA concludes that either can be a suitable strategy, subject to those conditions. The SA also indicates that, of all the land proposals that could be considered as new settlements, the Airport site would be the most sustainable site.

It is not recommended to remove any of the sites identified for housing in the Preferred Options draft Local Plan, for a number of reasons:

- (1) They are consistent with the urban fringe option identified as being the most sustainable through the SA process; and
- (2) They help to deliver key pieces of infrastructure; notably the proposed Inner Circuit road scheme.

Housing Omission sites

At the last consultation, the Council received a number of proposals for new sites that had not been allocated in the draft Local Plan. Some of these sites had been previously considered and not allocated, and some are new sites. The new sites have all been subject to the same assessment as sites submitted earlier in the "call for sites" process.

Some of these are recommended to be included at the next stage of consultation, as a result of the assessment undertaken.

Future of the Airport site

Following the closure of the Airport in 2014, Cabinet resolved on 31st July of that year to carry out a soft-market testing exercise to identify a CPO (compulsory purchase order) Indemnity Partner – a third party who could cover the costs of compulsory purchase of the Manston Airport site. Subsequently in December 2014 Cabinet resolved that no further action be taken at the present time on a CPO of Manston Airport, on the basis that the Council had not identified any suitable expressions of interest that fulfil the requirements of the Council for a CPO indemnity partner and that it does not have the financial resources to pursue a CPO in its own right.

In July 2015, Cabinet decided to review the December decision and authorised that advice be obtained to determine whether RiverOak are a suitable indemnity partner in relation to a CPO for Manston Airport and to provide advice on the indemnity agreement and CPO process generally. Subsequently, in October 2015, Cabinet

reviewed its position and decided that no further action be taken at the present time on a CPO of Manston Airport, on the basis that RiverOak do not fulfil the requirements of the Council for an indemnity partner.

In December 2015 Cabinet sought to set out a formal process for identifying interest from third parties to be a Council indemnity partner for a potential CPO for Manston Airport. Subsequently in June 2016 Cabinet considered a report which drew the conclusions that in terms of the key lines of enquiry, the market cannot deliver on the council's requirements; there is no established market which is able to deliver, or an adequate number of operators; the market has no capacity to deliver the requirements and there is no cost or other benefits in taking this matter further. Cabinet noted the results of the soft market testing assessment and decided to take no further action in respect of the interested parties.

Members will be aware that an independent study was commissioned from Avia Solutions into the viability of Airport operations at Manston, and that this report has now been submitted to the Council.

Avia Solutions conclude that "airport operations at Manston are very unlikely to be financially viable in the longer term and almost certainly not possible in the period to 2031".

This conclusion is based on an assessment of future air traffic demand. Even applying assumptions favourable to Manston Airport, the report concluded that it is most unlikely that Manston Airport would attract private investors, nor represent a viable investment opportunity in both the longer-term – after 2040 – and certainly not during the Local Plan period.

This does not meet the threshold set out in the National Planning Policy Framework (para 22), which states that sites should not be protected "for employment use where there is no reasonable prospect of a site being used for that purpose". Although the Airport site is not a typical employment site, the broad principle of deliverability of development proposals is applied through the NPPF; in particular paragraph 182, which addresses the requirement for Plan to be "sound". Para 182 advises that one of the key elements of "soundness" is that Plan should be "effective"; that is, "the plan should be deliverable over its period". The NPPF (para 22) goes on to say that proposals for alternative uses should be considered, where this is not the case.

There is, therefore, insufficient evidence to justify a policy to retain the Airport site during the period of the Local Plan.

The site therefore needs to be considered for other potential uses through the Local Plan process. The site contains a significant element of previously-developed land, and the NPPF (para 111) indicates that planning policies "should encourage the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value". This also has potential implications for the location of new housing to meet the increased housing requirement.

Members will be aware that RiverOak are currently in pre-application discussions with the Planning Inspectorate regarding a Development Consent Order (DCO) relating to their proposals for the Airport. This is a separate process and does not prevent the Council taking a decision to consult on a different approach to the site as part of the Local Plan consultation.

Proposed New Housing sites

On the basis of the assessments undertaken, the following additional sites are proposed to be included in the draft Local Plan, for consultation:

- Manston Airport site up to 3,000 dwellings (together with a range of other uses including business space; local retail provision; primary schools, etc);
- Land at Manston Road/Shottendane Road, Margate 250 dwellings; and
- Land at Manston Court Road/Haine Road 700 dwellings.

This option would be consistent with the findings of the Sustainability Appraisal and the assessment of sites.

Employment land

A number of responses were received indicating that the levels of employment land set out in the draft Local Plan were too high. Although the over-supply of employment land in Thanet is less than that in Canterbury or Dover, a review of employment sites has been carried out. As a result, the draft Local Plan proposing the removal of over 30 ha of older, less suitable, employment land for use as housing.

The Plan now proposes 56ha of employment land, in part reflecting the Eurokent Appeal decision.

This means that additional previously-developed or allocated land is now identified for housing purposes, reducing the pressure of greenfield land elsewhere.

However, it should be noted that there is still sufficient land allocate within the draft Local Plan to meet the projected job creation over the Plan period. It will not therefore inhibit the Council's emerging Economic Growth Strategy or the ability of the Local Plan to support its implementation. Adequate land has been identified to accommodate all sectors of the economy particularly the anticipated growth sectors.

Employment omission sites

As with housing sites, a number of sites were put forward for employment uses. However, in general terms, there is a significant supply of employment land already existing in the district that more than meets the requirements for the Plan period.

As an overall strategy we need to cater mainly for small to medium enterprises but we need to make a choice of land available for larger advanced manufacturing businesses.

The Airport site, as part of a sustainable mixed-use development, could potentially accommodate up to 75,000sqm of new business floorspace.

With the loss of approximately 10 hectares of employment land at Eurokent due to the previous Appeal decision the choice of sites for such businesses is diminished. The airport site presents a significant opportunity to accommodate advanced manufacturing companies (a maximum of 8.5 hectares is proposed) whilst still reducing the overall employment land surplus.

Proposed changes to draft Local Plan

The proposed changes for consultation are set out at Annex 1. These changes address some of the key issues arising from the previous consultation, but also respond to the developing evidence base, and the requirements set out in Government guidance.

In accordance with the Barrister's advice, the changes are focussed on the provision of housing and employment land, the future of the Airport, and other directly related matters.

There are other changes that may need to be made to the draft Plan, and these will be addressed when the responses from the proposed consultation are reported back to Members. These other changes will be available for people to comment on at the pre-Submission stage.

This will include such matters as updating the detailed Local Plan text to reflect the new Economic Growth Strategy; including the Council's position in relation to applying the national technical standards; and any other changes that are required as a result of changed circumstances and Government guidance.

Infrastructure provision & the Infrastructure Delivery Plan (IDP)

As mentioned above, many correspondents raised objections to the level of development because of concerns about the level of infrastructure and service provision, particularly in the context of perceived problems with the existing infrastructure.

There is no doubt that this is a critical issue in relation to new development. Members will be aware that the District Council is directly responsible for only a few areas of this infrastructure – affordable housing; open space provision; Habitat Regulations mitigation. Most of the key infrastructure is planned or delivered by other public authorities (such as Kent County Council, Clinical Commissioning Group) or by private utility companies such as Southern Water or Scotia Gas Networks. Much of this infrastructure is to be funded directly by developers.

Whether the infrastructure is physical (utilities, roads, etc) or social (education; health and so on), it is vital that the Council and its partners work together to ensure that such infrastructure is delivered alongside development in a timely manner. The Council wishes to ensure that all partners are committed to infrastructure provision and is seeking "sign-off" from all the relevant funders/providers, as part of the IDP process.

The draft Infrastructure Delivery Plan (IDP)(Annex 6) should be regarded as a working document, being used to monitor progress on delivery. It is proposed that the draft IDP is made available for people to view during the consultation, but with the caveat that it is a work in progress, which requires the cooperation of numerous other bodies.

Local Green Space - consultation

Local Green Spaces can be identified by communities through the local or neighbourhood planning processes. As set out in the NPPF, once designated, a local green space will be afforded the same protection as Green Belts and new development will not be permitted other than in very special circumstances. The NPPF sets out the circumstances under which development may be permitted.

Local Green Spaces can only be designated where all of the following criteria apply (NPPF, para 77):

- The green space is in reasonably close proximity to the community it serves;
- The green area is demonstrably special to a local community and holds a particular local significance; and
- The green area concerned is local in character and is not an extensive tract of land.

The NPPF also advises that "the Local Green Space designation will not be appropriate for most green areas or open space" (para 77).

The previous draft of the Local Plan did refer to the possibility of identifying local green spaces, but no sites were submitted for consideration through that process). A number of sites were suggested for open space protection, but these may be more suited to Local Green Space protection. It is considered that a specific opportunity should be given for local groups to identify such areas.

It should be noted that the NPPF is clear (para 76) that "identifying land as Local Green Space should therefore be consistent with the local planning of sustainable development and complement investment in sufficient homes, jobs and other essential services". In other words, the use of local green space designations should not prevent development that is necessary through the Local Plan process.

It is equally valid for such sites to be proposed through the Neighbourhood Plan process, but they would need to be subject to the same level of assessment.

Recommended approach to consultation

The recommendation is that the Council consults on some of the key issues set out in the attached schedule (Annex 1) only at this stage, following the advice of the Local Plan Barrister. This means that the consultation would be focussed on specific issues directly related to overall housing requirements; new housing sites; changes to employment land; the future of the Airport and its relationship to housing and employment provision; and infrastructure provision.

The Council would also be consulting on the Sustainability Appraisal work to date; and inviting local people to submit proposals for Local Green Space. Other studies, supporting documents and other key documents such as the draft Infrastructure Delivery Plan would be available for people to view and use to inform their comments on the draft Plan.

This means that the Council would not be consulting on the other main issues and other changes at this stage. These changes would be made at the pre-Submission stage and there would be a further chance to comment on those changes at that stage.

Other documents on which consultation is required

KCC are (subject to decisions on the draft Local Plan) preparing a Draft Transport Strategy for the district.

The Transport Strategy has a clear and important relationship with the draft Local Plan, and there is considerable value in consulting on these at a similar point in time. No final timetable for that consultation has been decided, but it is expected to follow the draft Local Plan consultation.

Options

The Council's options in terms of the proposed consultation are set out at Section 3.

Next steps

Once this consultation is complete, the comments will be considered, and a final pre-Submission draft Plan will be published to allow final comments, before submission to the Planning Inspectorate (PINS) for independent Examination.

Amendments to the Local Development Scheme

The Council reviewed the LDS in 2015, but it requires updating.

Since that time, Government guidance continues to change, and the Council's barrister has recommended a different approach. This means that the current LDS needs to be amended and published so that people have a clear idea of the proposed programme going forward.

If a focussed consultation goes ahead in January, as proposed, it is anticipated that the programme will be as follows:

- Consultation to start mid-January 2017 (exact date tbc) for a period of 6 weeks
- Publication of Submission version (full Local Plan) Summer 2017
- Submission to Planning Inspectorate/Examination end of 2017

There may be other, minor consequential changes to the LDS, but Cabinet is asked to agree the timetable for the draft Local Plan.

3.0 Options

3.1 in considering this report, there are 3 options:

(1) To publish the proposed changes to the draft Local Plan for consultation - it is recommended that Cabinet choose this option, since it responds to Government guidance, the developing evidence base, and accords with legal advice. It also

provides local communities and other stakeholders with the opportunity to comment further on key issues affecting the Local Plan;

(2) To publish proposed changes to the draft Local Plan for consultation, but in an amended form – there may be some changes that Members wish to consider before the draft Plan changes are published. However, any changes must follow Government guidance and be based on evidence. If changes are made that do not follow evidence and Government guidance, this potentially puts the Council at serious risk of the draft Plan being found "unsound".

This not only could delay the Plan, and risk intervention by the Department for Communities & Local Government, but it is likely to lead to an increase in Appeals on unallocated development sites, which might be approved against the Council's position and result in costs being awarded against the Council. It could also put at risk the provision of strategic infrastructure that is needed to support new development. The recommendation is therefore that Members agree the substantive matters as set out in the report, since those matters are seen as critical to the delivery of a sound Local Plan;

(3) Not to publish the changes for consultation – the publication of these matters for consultation is the next step in the Local Plan process. If the Council does not demonstrate that it is making progress with its Local Plan, there is a risk that the Department for Communities & Local Government could intervene in the making of the Plan. If the Council wishes to retain control of the Local Plan process, it must show that it is making significant progress in dealing with key issues and moving towards a new Local Plan.

This not only could delay the Plan, and risk intervention from DCLG, but it is likely to lead to an increase in Appeals on unallocated development sites, which might be approved against the Council's position and result in costs being awarded against the Council. It could also put at risk the provision of strategic infrastructure that is needed to support new development.

This approach is not recommended.

Option 1 is recommended for the reasons set out above, and in Section 2 of the Report.

Preferred Options Revisions

Summary Map

Summary Map

The map below shows the proposed new housing sites (the sites previously proposed for housing allocations are shown in grey) and the proposed road infrastructure from the Thanet Transport Strategy.

SP05 - Former Airport Site

Following the closure of Manston Airport in May 2014 the Council has made significant efforts to support a functioning aviation use on the site and has explored its CPO powers in seeking an indemnity partner and has carried out extensive soft market testing to seek an airport operator to run the airport.

In order to satisfy the requirements of the National Planning Policy Framework (NPPF) which states that planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose the Council commissioned an airport viability study by Avia Solutions. This was to look at whether an airport was a viable option for the site within the plan period to 2031. This report took into account national and international air travel and transport and the way in which it is likely to develop over the next 15-20 years and looked at previous reports and developments in national aviation.

The report concluded that airport operations at Manston are very unlikely to be financially viable in the longer term, and almost certainly not possible in the period to 2031.

Taking on board the conclusions of the airport viability report and given the level of objectively assessed housing need the Council considers that the best use for this 320ha brownfield site is for a mixed use development primarily focused on residential.

The policy seeks to create an attractive sustainable free standing new settlement with a district centre and featuring all the amenities needed for a town. Development will also deliver important links across Thanet and improved access to and from the site and provide open space and community facilities that the whole of Thanet can access.

SP05 - Former Airport Site

Land is allocated for a mixed use settlement at the site of the former Manston Airport as defined on the policies map. The site has the capacity to deliver at least 3,000 new dwellings, and up to 85,000sqm employment and leisure floorspace.

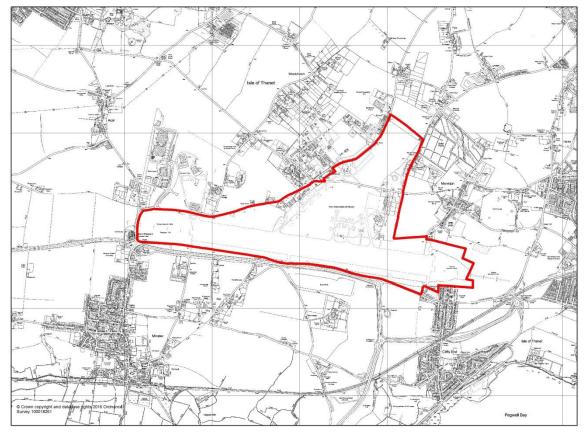

The overarching principle of development of this settlement is the creation of a single sustainable settlement that can be easily served by public transport and with good, easily walkable access to central community services and other facilities.

Contributions will be required to meet the following provisions and proposals will be judged and permitted only in accordance with a development brief and comprehensive masterplan for the whole site detailing:

- How the requirements of the Transport Strategy will be met including the upgrade of Manston Court Road and improvements to Spitfire junction.
- The relationship to the Parkway Station and Ramsgate Port including a southern bypass of Manston village and a direct link from the site to the A299 roundabout linking with the southbound dual carriageway.
- A travel plan to include a public transport strategy linking the site to existing services, demonstration of how the site links with and relates to neighbouring settlements;
- Key routes for traffic-calming measures
- Coherent phasing and evidence of deliverability
- A business plan to demonstrate how the employment will be delivered, and how it will relate and link to Manston Business Park
- The provision of a District Centre to meet the retail need of the development, fit within the retail hierarchy and serve the appropriate catchment, as well as provision of complementary uses such as community business space and leisure uses/recreational facilities.
- Provision of community facilities as outlined in the Infrastructure delivery plan (IDP) including a primary school facility at 4 forms of entry, and a Doctors Surgery
- A Landscape and Visual Impact Assessment to address
 - the visual sensitivity of the site focussing on retention of open space and protecting wide open landscape and strategic views;
 - how new built development will be designed to minimise visual impact on the open landscape of the central island. Particular attention must be given to roofscape for the purposes of minimising the mass of the buildings at the skyline when viewed from the south.
- Design and Heritage statements to include:
 - An appropriate landscaping scheme, to be designed and implemented as an integral part of the development.
 - Provision of 31.77 Ha open space in accordance with Table 7 as required by Policy Gl04, and integrated green infrastructure to include walking, cycling and equestrian routes and facilities
 - A buffer between the development and Manston Village.
 Settlement separation between the villages of Manston, Minster, Cliffsend and Acol and Thanet Urban Area
 - Pre design archaeological assessment
 - Links to the sites heritage to support tourism in Thanet, including consideration of proposals that would permit a limited element of aviation use[1]
 - Detail as to how the runway will be incorporated into the development scheme and what functions it will serve.
- Provision of surface water management/sustainable drainage schemes that will not contaminate groundwater sources, and any proposed initiatives that will improve the condition of the groundwater

Development proposals must:

- Provide an appropriate mix of dwellings to meet the requirements of Policy SP18
- Provide affordable housing to meet the requirements of Policy SP19 (**NB SP19 is being amended to request affordable housing for more than 10 units)
- Provide one electric car charging point for every 10 parking spaces provided
- Consider accommodating any self-build requirements included in the self-build register
- Contribute towards the Strategic Access Management and Monitoring scheme to meet the requirements of SP25
- Include an assessment of the sites functionality as a roosting or feeding resource for the interest features of the Thanet Coast and Sandwich Bay SPA Protection Area, including areas within 400m of the development sites boundary, and provide mitigation where necessary
- Retain existing boundary features where possible
- Provide a connection to the sewerage system at the nearest point of adequate capacity, in collaboration with the service provider
- Allow future access to the existing water supply infrastructure for maintenance and upsizing purposes
- Provide for the installation of digital infrastructure
- Provide a Statement of Social Impacts addressing any needs for community facilities identified in the Infrastructure Delivery Plan

1. Number of flights below the threshold that would require a statutory licence. [back]

SP11 - Housing Provision

Amount of Housing

The local plan must allocate enough land to accommodate the amount of housing needed by 2031. The amount of housing is known as the Objectively Assessed Need (OAN) and is calculated based on population growth and population change.

The OAN identified for the Preferred Options Draft Local Plan was 12000 additional homes between 2011 and 2031. The OAN has since been revised to reflect the 2014 population and household projections and is now identified as 17,140 additional homes over the 20 year period until 2031.

It is proposed to amend policy SP11 as follows to reflect the most recent population and household projections:

Policy SP11 - Housing Provision

Provision is made for a total of 17,140 additional homes in the period to 2031, with notional delivery across the period as indicated below.

Period	2011-16	2016-21	2021-26	2026-31	Total
Additional homes	4,285	4,285	4,285	4,285	17,140

A number of allocated sites are of strategic importance for delivering the quantity and type and variety of homes required to deliver the strategy. These are identified as Strategic Sites. The distribution of allocated housing land is illustrated in Table 2.

Within total housing provision shown below the Strategic Housing Land Availability Assessment suggests capacity to deliver some 3017 dwellings exists by way of sites which have already received planning permission. In addition some 1555 dwellings have already been delivered since the start of the plan period.

Table 2 - Total Housing Provision

Period	2011-2031
Strategic Sites	
Westwood	1450
Birchington on Sea	1000
Westgate on Sea	1000
Manston Green	700
Land at Manston Court/Haine Road	700
Former Airport Site	3000

Rural Settlements	375
Windfall Sites (based on 225 units per year, discounted for years 1-3 to avoid double counting)	2700
Completed since 2011	1555
Extant planning permissions	3017
Empty Properties	540
Total	18337

Page 26

Location of Housing

Location of Housing - Proposed additional sites

Additional sites have been identified as proposed housing allocations in order meet the new Objectively Assessed Need. Some of these sites are adjacent to existing allocations proposed in the Preferred Options draft local plan and should form a comprehensive scheme with those sites. This will ensure the delivery of associated highways and infrastructure requirements which will be set out in policies in the presubmission draft local plan. The following sites have been identified as additional housing allocations:

Site	Potential Capacity	Policy implications
Land at Manston Road/Shottendane Road	250	New non-strategic housing policy
Eurokent	Up to 550 (200 additional dwellings)	Policy SPO7 to be updated to reflect additional housing capacity as per recent appeal decision
Land at Manston Court Road/Haine Road	700	New strategic housing policy
Former airport site	3000	New strategic policy for a mixed use development to replace Policy SP05
	Total 4500 additional dwellings	

Some sites are no longer available as potential housing allocations as they are not supported by landowners or are being developed for non-residential uses. The following sites have been deleted as housing site allocations (listed in the amendments to Appendix B)

Site	No. Dwellings	Site Ref
1,2, 92-96 Harbour Parade	14	S219
Rear of 102-114 Grange Road	10	S316
St Benedict's Church, Whitehall Road, Ramsgate	12	SR10
Ramsgate Garden Centre, Hereson Rd, Ramsgate	62	SR57
Station Road Minster	5	S088
Tothill Street, Minster		S85
140 – 144 Newington Road	50	SS40

Land at Holy Trinity Primary School, Dumpton Park Drive, Ramsgate	33	S525
86-88 Ellington Road, Ramsgate	9	SR21
Dane Valley Filling Station, Millmead Road, Margate	7	SR34
6 Surrey Road	5	S348
Land adjoining Seafield Road, Ramsgate	9	SR22
Former Manston Allotments	61	S452
R/O 18-36 St Peters Road	5	SO42
Total	282	

New Policy - Land at Manston Court Road/Haine Road

Strategic Policy - Land at Manston Court Road/Haine Road

Land is allocated for up to 700 new dwellings at a maximum density of 30 dwellings per hectare net. This allocation adjoins other sites allocated for residential development (strategic sites S141, S511, S553 & S447 and non-strategic sites S535 & S549). Proposals will be judged and permitted only in accordance with a development brief and masterplan for the whole site integrating with development at the adjoining sites. The Masterplan shall incorporate:

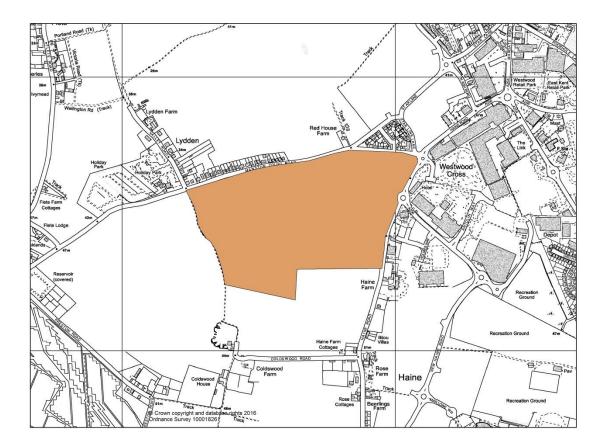

1) Contributions to highway improvements identified in the Transport Strategy

2) a minimum of 9 ha of open space in accordance with the standards set out in Table 7

Phasing of development will be in accordance with the amendments to Appendix B.

Masterplanning shall:

- Provide an appropriate mix of dwellings to meet the requirements of Policy SP18
 - Provide affordable housing to meet the requirements of Policy SP19 (**NB SP19 is being amended to request affordable housing for more than 10 units)
 - Provide one electric car charging point for every 10 parking spaces provided
 - Consider accommodating any self-build requirements included in the self-build register
 - Contribute towards the Strategic Access Management and Monitoring scheme to meet the requirements of SP25
 - Include an assessment of the sites functionality as a roosting or feeding resource for the interest features of the Thanet Coast and Sandwich Bay Special Protection Area, including areas within 400m off the development sites boundary, and provide mitigation where necessary
 - Retain existing boundary features where possible
 - Provide a connection to the sewerage system at the nearest point of adequate capacity, in collaboration with the service provider
 - Allow future access to the existing water supply infrastructure for maintenance and upsizing purposes
 - Provide for the installation of digital infrastructure
 - Provide a Statement of Social Impacts addressing any needs for community facilities identified in the Infrastructure Delivery Plan

Para 4.48 Local Green Space

Local Green Space

The Council is inviting Town and Parish Councils, Neighbourhood Forums and community organisations to submit areas for consideration as Local Green Space (LGS), during this public consultation. Paragraph 76 of the NNPF states, that local communities should be able to identify for special protection, green areas of particular importance to them. However, paragraph 77 states further that the local green space designation would not be appropriate for most green areas. For an area to be considered for the Local Green Space the NPPF identifies three instances when the designation should be made.

The green space should be in reasonable proximity to the community it serves;

- 1. The green space is demonstrably special to a local community and holds a particular local significance, for example, because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and
- 2. Where the green area concerned is local in character and is **not** an extensive tract of land.

Other issues to consider when proposing an area for inclusion in this designation:

- a. The area does not have to be in public ownership, although contact with the landowner is advisable as they will have an opportunity to make representations in respect of the proposals affecting their land;
- b. How the land will be managed in the future
- c. Local Green Space designation cannot be applied to sites which have an existing planning permission or local plan allocation
- d. All proposals must be accompanied by an ordnance survey map with the site clearly identified

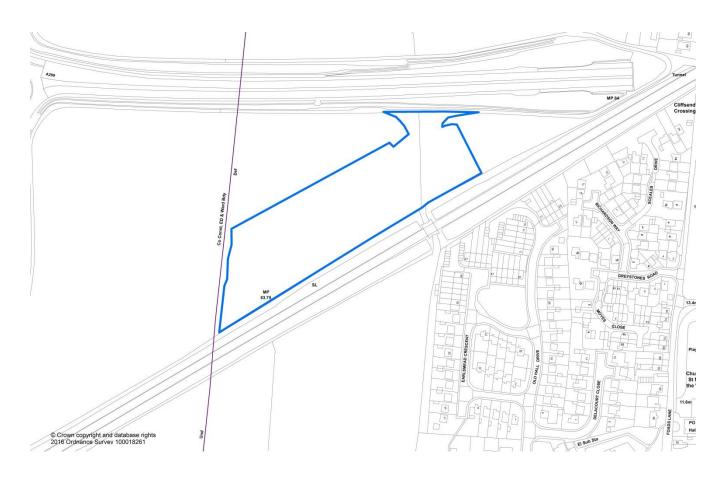

Further information is available from the following websites

NPPF web address <u>http://planningguidance.communities.gov.uk/wp-</u> <u>content/themes/planning-guidance/assets/NPPF.pdf</u> (paragraphs 76-79)

SP39 and Map 15 Thanet Parkway

The proposed location of the Parkway Station site has been revised, the wording for Policy SP39 remains unchanged.

New Strategic Routes Policy

Kent County Council and Thanet District Council have been preparing a new Transport Strategy for the district, which includes proposals for new and improved roads and junctions; enhancements to bus and train services and an expansion of the cycling/walking network.

The key element of the emerging Strategy is the development of a proposed "Inner Circuit" to serve new development and reduce pressure on the existing network (see map). This incorporates a new bypass for Birchington; a relief road for Westgate; connections to Westwood from the north-west and south; and improved connections to Manston Business Park, and should bring benefits to the wider road network. It is intended that the Inner Circuit schemes will incorporate provision for buses and cycling.

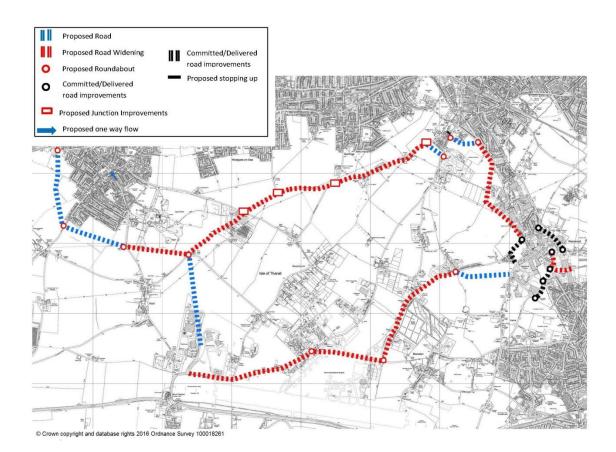

These road proposals are required to support proposed new development in the area, and the routes are safeguarded in this draft Local Plan to ensure that they can be completed in due course alongside the development set out in the draft Local Plan. As set out in the working draft of the Infrastructure Delivery Plan, this infrastructure is regarded as critical to support the development proposed in the draft Local Plan, and it is expected that all new development will contribute to the provision of all key infrastructure in a proportionate and appropriate way. The Council, with its partners, will also seek other forms of funding, to support infrastructure provision.

Strategic Policy - Strategic Routes

The following areas, as shown on the Policies Map, are safeguarded for the provision of key road schemes and junction improvements, to support the implementation of the Thanet Transport Strategy, including land at:

- 1. Birchington strategic housing site
- 2. B2050 Manston Road, Birchington
- 3. Shottendane Road (from Birchington to Margate)
- 4. Shottendane Road-Manston Road housing site
- 5. Nash Road-Manston Road housing site
- 6. Nash Road, Margate
- 7. Nash Road-Westwood strategic housing site
- 8. Manston Court Road/Star Lane (from Haine Road, Westwood to B2050 Manston Road)
- 9. B2050 Manston Road (from Manston Manston Court Road to Spitfire Junction)
- 10. B2190 Spitfire Way (from Spitfire Junction to Columbus Avenue junction)
- 11. From Columbus Way to Manston Road, Birchington
- 12. Land between A254 Margate Road and A256 Westwood Road (including Millennium Way, Broadstairs
- 13. Victoria Traffic Lights
- 14. Coffin House Corner Traffic Lights

The Council expects all new development to make a proportionate and appropriate contribution to the provision of this key infrastructure.

New Implementation Policy

The provision of infrastructure to support development is vitally important. The Council is working with the relevant agencies to ensure that it is fully informed about future infrastructure requirements and the timing of those requirements, and to make sure that this important social and physical infrastructure is provided in a timely manner alongside new development.

The Council has also prepared a draft Infrastructure Delivery Plan (IDP) in conjunction with those agencies, setting out the infrastructure requirements and the known costs; the phasing of the requirements and the body responsible for ensuring delivery. Some infrastructure would need to be provided directly by a developer on a given site; some would be off-site infrastructure funded by a developer and some would be funded by other mechanisms. The Council will also seek other forms of funding, as appropriate, to support the provision of key infrastructure identified in the working draft Infrastructure Delivery Plan.

The IDP addresses the full range of infrastructure required to support development and is the subject of ongoing independent viability assessment.

The Council is keen to ensure that the Local Plan is fully implemented, not just the housing and employment sites, but the full range of policies, so that the Plan is successful in supporting long-term economic growth and regeneration for the area, and meeting the strategic objectives of the Plan.

To this end, the Council has:

- Prepared a draft Infrastructure Delivery Plan, engaging with the relevant service providers and others to ensure that new housing development in particular, is supported by the requisite social and physical infrastructure;
- Carried out viability assessments to ensure that key infrastructure can be delivered at the appropriate time;
- Undertaken various discussions with neighbouring authorities, to ensure that wider infrastructure is considered as part of the Plan process;
- Sought to develop initiatives, outside the planning process, to encourage and attract inward investment, and in particular development investment, to the area; such as maintaining and developing partnerships with various agencies (such as the Homes & Communities Agency) and private developers groups (such as the Kent Developers Group); and
- Committed to the preparation of a robust monitoring framework.

The Council does not consider that the use of CPO powers will normally be required to implement the Plan, but it will give consideration to their use (subject to securing the appropriate indemnity arrangements with developers) if critical sites or infrastructure are delayed, to the detriment of implementing the provisions of the Plan.

The Council intends to monitor key elements of the Local Plan strategy, using the Annual Monitoring Report framework, to ensure that the overall strategy is delivered.

The Council will present a more detailed monitoring framework to the independent Examination in due course, but it is anticipated that such monitoring would focus on development implementation and economic indicators.

If monitoring through the AMR demonstrates that the implementation of the Plan is not proceeding as expected, the Council will review the implementation process and consider what measures need to be taken to progress implementation.

The Council will give due consideration to the viability of individual developments, in circumstances where independent viability appraisals indicate that a particular development cannot fully meet the infrastructure requirements set out in this Plan.

Strategic Policy - Implementation

All new development will be expected to fully meet its infrastructure requirements, whether directly on site or by contribution to that provision elsewhere, and to comply with the provisions of the Infrastructure Delivery Plan, in terms of provision of physical and social infrastructure. This provision should be made within the phasing programme set out in the draft Local Plan and draft Infrastructure Delivery Plan. Any such requirements will be secured by means of conditions, legal agreements, Community Infrastructure Levy or other appropriate mechanisms.

The Council will also, with partner organisations as appropriate, seek to obtain additional funding from other sources to support infrastructure provision, and to influence the strategic provision of services, facilities and other infrastructure by other organisations.

If necessary, the Council will give consideration to the full range of other available mechanisms (such as compulsory purchase*, Article 4 Directions and so on) to ensure the effective implementation of the overall planning strategy for the district.

[*Footnote: subject to appropriate indemnity arrangements being in place]

New Policy - Land at Manston Road/Shottendane Road, Margate

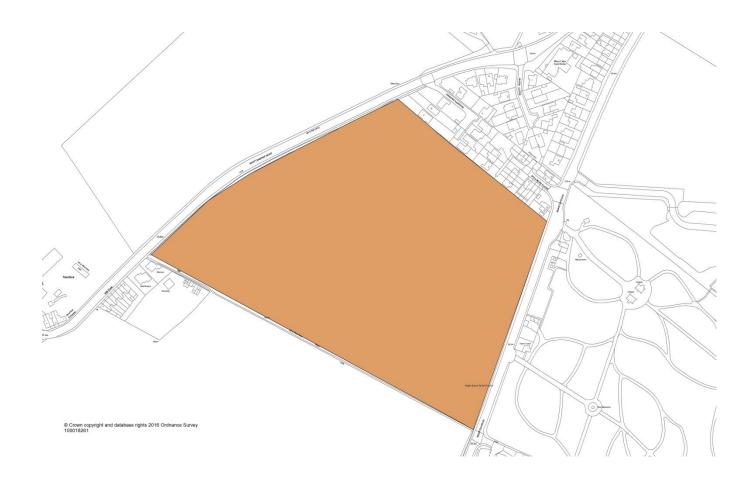

HO2 Additional Site - Land at Manston Road/Shottendane Road, Margate

Land is allocated for up to 250 dwellings at a maximum density of 35 dwellings per hectare net at Manston Road/Shottendane Road. Phasing of development will be in accordance with the amendments to Appendix B. Proposals will be judged and permitted only in accordance with a development brief and masterplan for the whole site. The masterplan should be informed by a transport assessment and travel plan including an assessment of impact on the local road network and demonstrating measures to promote multi-modal access. Development will incorporate and provide for highways improvements identified in the Thanet Transport Strategy.

Master planning will:

- Provide an appropriate mix of dwellings to meet the requirements of Policy SP18
- Provide affordable housing to meet the requirements of Policy SP19 (**NB SP19 is being amended to request affordable housing for more than 10 units)
- Provide one electric car charging point for every 10 parking spaces provided
- Consider accommodating any self-build requirements included in the self-build register
- Contribute towards the Strategic Access Management and Monitoring scheme to meet the requirements of SP25
- Include an assessment of the sites functionality as a roosting or feeding resource for the interest features of the Thanet Coast and Sandwich Bay Special Protection Area, including areas within 400m of the development sites boundary, and provide mitigation where necessary
- Retain existing boundary features where possible
- Provide a connection to the sewerage system at the nearest point of adequate capacity, in collaboration with the service provider
- Allow future access to the existing water supply infrastructure for maintenance and upsizing purposes
- Provide for the installation of digital infrastructure
- Provide a Statement of Social Impacts addressing any needs identified in the Infrastructure Delivery Plan.

Disposition of development and landscaping will be expected to enable a soft edge between the site and the open countryside

National Standards

Water efficiency:

In March 2015 the Government introduced new technical standards covering water usage, internal space requirements, accessibility and adaptability. The Planning Practice Guidance states that where there is a clear local need, local planning authorities can require new dwellings to meet the tighter building regulations optional requirement of 110 litres/person/day, rather than the 125 litres/person/day. Thanet is within a water stress area as identified by the Environment Agency in their publication "Water Stressed Areas Final Classification July 2013". Both the Environment Agency and Southern Water recommended at the last public consultation in January 2015, that authorities in water stressed areas promote higher water standards of 105 litres per person/day for internal use. The Council therefore intends to include a policy in the pre-submission draft requiring new developments to meet the higher standard of 110/person/day as set out in the technical standards.

Internal space standards:

Paragraph 50 of the National Planning Policy Framework states that local planning authorities should identify the size, type, tenure and range of housing that is required in particular locations, reflecting local demand. The National Planning Practice Guidance further qualifies this by recommending that where a local planning authority wishes to require an internal space standard they should do so by reference in their local plan (paragraph 18).

The council believes that everyone has the right to a high standard of residential accommodation with sufficient space to meet their own needs. There has been a general trend for houses today to be comparatively smaller than ones built a hundred years ago and these trends have led to calls for the introduction of national space standards for housing. The requirement of a minimum space standard can add to the attractiveness of the development thereby widening the potential sale and rental markets.

In order to ensure that new housing is built to a high standard of design and provide adequately for the changing needs of future occupants thereby improving the quality of life, the Council is intending to implement the National Described Space Standard (March 2015). These are replicated in the table below for ease of reference. It is intended to include a new policy in the pre-submission local plan which will also address other considerations such as need and viability. The policy will apply to all tenures and it will be up to the applicant to demonstrate why these standards cannot be met within their development.

Number of bedrooms (B)		,	2 storey dwellings	,	Built-in storage
------------------------------	--	---	-----------------------	---	---------------------

1b	1р	39 (37)*	-	-	1.0
	2р	50	58	-	1.5
2b	3р	61	70	-	2.0
20	4р	70	79	-	2.0
	4р	74	84	90	
3b	5р	86	93	99	2.5
	6р	95	102	108	
	5р	90	97	103	
4b	6р	99	106	112	3.0
40	7р	108	115	121	5.0
	8p	117	124	130	
	6р	103	110	116	
5b	7р	112	119	125	3.5
	8p	121	128	134	
6b	7р	116	123	129	4.0
00	8p	125	132	138	4.0

It certain circumstances it may be necessary to make an exception to development meeting these standards e.g. in the conversion of historic buildings where the implementation of the standard would be detrimental to the character and integrity of the building. In such circumstances the applicant will be required to demonstrate the case for not meeting these standards.

Accessible and adaptable accommodation:

Paragraph 7 of the NPPF states that one of the three dimensions to sustainable development is a social role which should support strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well-being. Paragraph 50 further states that local authorities should deliver a wide choice of high quality homes, widen opportunities for home ownership and create sustainable, inclusive and mixed communities. Local planning authorities should also plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes);

The District has an ageing population base and the recent 2014 based Sub-National Population Projections (published May 2016) project that the 60+ age group in Thanet will grow by 39% from 41,000 in 2014 to 57,000 by 2031. This has implications for the demand for different types of housing and meeting the needs of an ageing population in situ. An increase in the elderly population can be expected to result in an increase in people with dementia and mobility problems. The SHMA estimated that the number of people with a long term health problem or disability will

increase by 32% over the plan period. Some of these households will inevitably require adaptions to properties to meet their changing needs whilst others may require more specialist accommodation or support. There is clear evidence of need for properties which are capable of accommodating people's changing needs. This general trend can be evidenced from the Council's housing register (September 2016) which shows that there are 51 households on the register who are dependent on a wheelchair and a further 73 households who use a wheelchair for part of the day. Therefore there are currently 124 households currently in need of wheelchair adaptable accommodation. However, this may not include those households who currently have mobility problems and may become dependent on a wheelchair in the future.

The increase in persons with a long-term health problem/ disability, as evidenced by the SHMA, together with the council's own data from the housing register, provides clear evidence of a need for adaptable homes. The SHMA recommends that on this basis, the Council should consider whether it should require a proportion (such as 10%) of new homes to be wheelchair-accessible or whether new housing should be built to new National Housing Standards.

In order to meet the changing needs of this increasing age group, the Council will encourage developers to consider the future needs of households when designing residential units. The Council is currently considering whether as a minimum, a percentage (eg 10%) of all new development should be designed to building regulation optional requirement M4(2) accessible and adaptable dwellings. In respect of the new Building Regulation optional requirement M4(3) wheelchair user dwellings, the Council is intending to include a policy referring to a proportion of new dwellings to meet this standard, however, this will need to relate to the number of households requiring wheelchair adaptable homes in suitable locations, that are currently on the Council's housing register. This will be addressed by a policy in the pre-submission local plan and would support the general aim of the plan to improve the quality of life and health of the residents of the District and ensuring a high standard of design.

These standards aim to future proof new development in a sustainable way ensuring adaptability to changing needs and achieving longevity of design.

ANNEX 1: MAIN ISSUES & RECOMMENDED RESPONSES

Vision, Strategy & Strategic Objectives

Policy/Section	Issues Raised	Proposed Council response (including reason for change/no change including any relevant new guidance etc)	Proposed outline change (or say no change)
Vision & Strategy	A number of respondents have raised issues about the realism and clarity of the Vision and Strategic Priorities set out in the draft Plan.	 More detailed responses to particular housing and employment issues can be found in other parts of this Schedule relating to specific policies. However, there is a general point regarding the realism and clarity of the Vision and Strategic Priorities for the draft Plan. The Vision and Strategic Priorities set out in the draft Plan were relevant at the time of writing. The Council recognises that some significant changes have taken place in the local area of the last 2 years, which require a review of some of the detailed elements of the Strategy. However, the overall strategy to meet housing requirements and to help strengthen and diversify the local economy remain valid. The overall employment projections, in relation to housing need, are broadly consistent with the work undertaken for the Preferred Options stage, although the trend employment figure is higher. 	Amend vision and strategy section to recognise changes in the district and to set out how the Council will use the Local Plan to address changing circumstances.
		1	

Vision	The main part of the vision that we	This issue is dealt with in detail under Policy	
	disagree with is the intention of the	TC07.	
	plan to promote Westwood as a		
	new integrated community. As we		
	explain in response to Policy SP05		
	[Policy SP07] in the questionnaire,		
	we acknowledge that Westwood		
	has grown as a major retail centre		
	and that this has been designated		
	for some time as a town centre in		
	planning terms. However, it		
	functions as an out of town		
	shopping destination rather than as		
	a town centre. Because of this, we		
	consider it is inappropriate to try and		
	justify it as a town centre by		
	proposing a new residential		
	community around it. This will only		
	serve to push the urban area further		
	into the countryside and will go a		
	long way to infilling the 'horseshoe'		
	of coastal urban development that is		
	described in the plan as being		
	characteristic of Thanet. It will also		
	continue to undermine the vitality		
	and viability of the coastal		
	communities. We do not consider		
	that such further expansion of		
	Westwood to create a new		
	residential community is justified.		
	Furthermore, we believe that by		
	focusing further growth at		
	Westwood other elements of the		
	vision will be undermined, especially		

	the revitalisation of the coastal towns. Indeed, we believe that it has been the growth of Westwood that has in large part lead to the demise of the economic fortunes of the coastal towns.		
Strategic Priority 1	Comments raised about whether Manston Airport and Port Ramsgate should be included in this Strategic Priority	The Airport closed in 2014, and since that time, the Council has been investigating whether the site might be brought back into full and active Airport use. The most recent aspect of that investigation was the "soft marketing" process to invite Expressions of Interest in operating the Airport.	Airport position to be determined.
		The Harbour and Port have undergone some changes since the draft Plan was written. This section needs updating to reflect those changes.	Retain and update references to Port Ramsgate and Harbour.
Strategic Priority 3	Strategic Priority 3 – we support the stated priority and objectives, though as we have explained elsewhere in our comments the housing target is too high being based on an unrealistically high employment growth target. We believe that the priority and objectives can equally be achieved if a lower housing target is set. We also consider that an objective should be included which seeks to ensure that the many long-term vacant dwellings in the district are brought back into beneficial	The housing target aspect of this comment is dealt with in the Housing schedule. In relation to the vacant properties point, for some time the advice of the Planning Inspectorate has been that empty properties cannot be counted in the housing land supply, because they are already part of the housing stock. However, more recent advice indicates that some empty properties can be counted towards the supply, but only under strict circumstances, as follows:	Amend residual housing target to make allowance for 540 dwellings to be brought back into use during the Local Plan period.

	residential use.	 (1) The properties in question have been empty for a period of 4 years or more; and (2) The Council has an active and robust programme for bringing those properties back into use. The Council has therefore carried out a rigorous review of empty homes based on these criteria, and the likely impact of its Empty Homes Initiative over the period of the Local Plan. It has calculated that it can make an allowance of 540 dwellings coming back into residential 	
		use during the period of the Local Plan.	
Policy SP01	Policy SP01 and associated map 4 and 5 - showing the hierarchy of development, Natural England would wish the evidence base of farmland birds and functionally related habitats to SPAs to be taken into account prior to allocation this should be addressed both in the HRA and SEA, that should consider these impacts. There is data that would help with (i.e. HLS/ELS, report on where over 50% of SPA feed offsite around Pegwell Bay, the importance of Birchington and Plum pudding with regard to roosting birds etc. and farmland bird targets) and we would be happy to discuss with the LA.	The Council recognises the importance of land functionally related to the Special Protection Area, and has commissioned Golden Plover surveys in discussion with Natural England. The results of the surveys indicate that there are no significant issues in relation to the proposed site allocations. However, it is the intention to require affected sites to include mitigation measures in conjunction with Natural England.	It is proposed to delete Policy SP01.

Economic Strategy

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
SP02	Over-ambitious growth target	The Baseline scenario forecasted job growth in Thanet at 3,100 based on the economy performing as it does at the moment and therefore this scenario would maintain the status quo. This scenario would not deliver the improvements to Thanet's economy that the Council wishes to see. This target also includes an element of growth on the airport site which is a reasonable assumption over the plan period. In addition the 2015 SHMA carried out by GL Hearn looked at the employment growth scenario used by the South East LEP produced by Oxford Economics using the East of England forecasting model. This showed that the baseline forecast for Thanet at 4,800 which is close to the 5000 target.	No change
SP02	Growth target not ambitious enough	The figure is based on assessment of future employment need carried out by Experian. Three scenarios were provided and a level between the baseline figure and an optimistic level of employment growth was selected. An overly high target would not be capable of being delivered.	No change
SP02	Lack of clarity on where jobs are coming from	The job growth figures are the result from an Economic and Employment Assessment. The report breaks down the job growth figures to employment sectors (SIC level). The nature of forecasting is that detail is very difficult to accurately capture. Alongside the adoption of	No change

		the Local Plan other projects are in play that aim of to attract employment growth to Thanet, such as the Economic Growth Strategy.	
SP02	Querying growth sectors	The growth sectors identified in the "Policy On" economic growth scenario assumed enhanced performance in the tourism and green sectors. These are sectors that Thanet are currently strong in and they have also been targeted in the Councils Economic and Regeneration Strategy. Other sectors that Thanet are particularly strong on include public sector administration, education and health. Increasingly the cultural and creative sectors are growth areas, this is particularly true in Margate.	No Change
SP02	Why the differential between housing and job numbers	The housing target and job target in the Local Plan do not appear to align due to the fact that many people that need to be housed are economically inactive. There is a very large growth in the retired population that will not need a job. In addition the housing target takes account of people that are already in Thanet in overcrowded households. Many of these people already have jobs and would simply be moving out of their parents' house, for example.	No Change
SP02	Too much weight is given to growth at the airport in the jobs target	It is clear that some people refer to other documents such as KCCs Growth Without Gridlock and Infratil's Airport Masterplan that all predict job growth at the airport. The Draft Plan did not base growth forecasts on these documents but rather used the Economic and Employment Assessment 2012.	No Change

		The Council assumed that given the recent uncertainty at the airport that the low growth scenario at the airport should be assumed. This assumes 240 jobs until 2031. It was considered that it is reasonable to assume that the site will deliver a level of job growth over the plan period.	
SP03	There should be a reduction in the employment land supply	The Council is aware of the oversupply of employment land has re scored all of the allocated sites to assess their contribution to the overall employment strategy. The assessment concluded that 19.7hecatres should be released. With the subsequent removal of much of the employment allocation from Eurokent following the appeal decision released employment land has risen to over 34 hectares.	No Change
SP03	Employment sites should be used to accommodate some of the housing	The Council is aware of the oversupply of employment land has re scored all of the allocated sites to assess their contribution to the overall employment strategy. The assessment concluded that 19.7hecatres should be released. Some of these sites have been allocated for housing.	No Change
SP03	Employment oversupply is contrary to the NPPF that states we should avoid the long term protection of employment sites	The Council is aware of the oversupply of employment land has re scored all of the allocated sites to assess their contribution to the overall employment strategy. The assessment concluded that 19.7hecatres should be released. With the subsequent removal of much of the employment allocation	No Change

		from Eurokent following the appeal decision released employment land has risen to over 34 hectares.	
SP03	Some felt there should be more flexibility on allocated strategic employment sites	The Eurokent site has been identified as Thanet's flexible employment allocation and is included within the sequential test to allocate town centre and leisure uses should the scale and format preclude their location within the identified town centres. An element of development that is ancillary to the employment use would be acceptable on all employment sites.	No Change
SP04	Support from statutory authorities and a mixed response from local people. Seems to be based on a misunderstanding that it is part of the airport.	The Manston employment site is an established site and is approximately half developed. Due to the name of the business park it would appear that some people thought that this is part of Manston Airport.	No Change
SP05	Mixed response – majority indicate wish for Airport to remain open, some arguing that the Council should serve a CPO; some respondents suggest the site should be developed for housing as an alternative to other allocated sites.	Cabinet resolved on 31st July 2014 to carry out	Draft Mixed-Use policy for the airport site
SP05	The issue with the CPO needs to be resolved before the Local Plan proceeds		
SP05	Some support for alternative mixed use development as they believe the airport is no longer viable		

SP05	Some think night flights are needed	December decision and authorised that advice	
	to make the airport more viable	be obtained to determine whether RiverOak	
		are a suitable indemnity partner in relation to a	
		CPO for Manston Airport and to provide advice	
		on the indemnity agreement and CPO process	
		generally. Subsequently in October 2015	
		Cabinet reviewed its position and decided that	
		no further action be taken at the present time	
		on a CPO of Manston Airport, on the basis that	
		RiverOak do not fulfil the requirements of the	
		Council for an indemnity partner;	
		In December 2015 Cabinet sought to set out a	
		formal process for identifying interest from third	
		parties to be a Council indemnity partner for a	
		potential CPO for Manston Airport.	
		Subsequently in June 2016 Cabinet considered	
		a report which drew the conclusions that in	
		terms of the key lines of enquiry, the market	
		cannot deliver on the council's requirements;	
		there is no established market which is able to	
		deliver, or an adequate number of operators;	
		the market has no capacity to deliver the	
		requirements and there is no cost or other	
		benefits in taking this matter further. Cabinet	
		noted the results of the soft market testing	
		assessment and decided to take no further	
		action in respect of the interested parties.	
		Also in 2016 the Council commissioned an	
		airport viability study to assess whether an	
		airport was a viable option for the site within	
		the plan period to 2031.	
		The report concluded that airport operations at	
		Manston are very unlikely to be financially	
		viable in the longer term, and almost certainly	
		not possible in the period to 2031.	

		Taking on board the conclusions of the airport viability report and given the level of objectively assessed housing need the Council considers that the best use for this 320ha brownfield site is for a mixed use development primarily focused on residential.	
SP05	There is no "need" for the airport as an employment site	Partially agree. The airport site is not included as part of the employment land portfolio as it is such a unique use. A small element of the jobs target assumes the delivery of some jobs on the site over the plan period. If the site is not an airport it is considered that it shouldn't be solely residential and should be a sustainable mixed use settlement comprising employment, retail and community facilities, as well as residential.	Draft Mixed-Use policy for the airport site

Town Centre Strategy

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
SP07 (SP06?)	Objections to the role/status of Westwood. More effort should be put into the other centres	Many people have expressed concern that Westwood is identified as being at the top of the retail hierarchy. This is the case merely because it has the largest catchment of all the town centres and this catchment extends outside the District. The hierarchy reflects the	Make it clear in the text that Westwood is not prioritised over the town centres.

		inter relationship between the town centres as is required by the NPPF. The Plan does not propose to extend Westwood beyond its built up limits and has concluded that there is very little retail need to the end of the plan period and therefore any development can be accommodated by mezzanine and reconfiguration of the site. The Council have decided not to increase the market share of Westwood. Westwood's status as a town centre was established in the 2006 Local Plan as a response to the piecemeal developments taking place and the leakage of retail expenditure out of the District, and in particular to Canterbury.	
SP07	There is some misunderstanding that the Council wishes to expand Westwood Retail area. Many are against expansion making reference to the existing traffic problems around the area	Many people have expressed concern that Westwood is identified as being at the top of the retail hierarchy. This is the case merely because it has the largest catchment of all the town centres and this catchment extends outside the District. The hierarchy reflects the inter relationship between the town centres as is required by the NPPF. The Plan does not propose to extend Westwood beyond its built up limits and has concluded that there is very little retail need to the end of the plan period and therefore any development can be accommodated by mezzanine and reconfiguration of the site. The Council have decided not to increase the market share of Westwood. Any development in the vicinity of Westwood will be expected to have regard to the	No Change

		Westwood Relief Strategy and pedestrian connectivity.	
SP07	Re Westwood, some think we are putting too much faith in a failing centre	Retail need has been assessed by Nathaniel Lichfield and partners and they have concluded that 27,870 metres squared of retail floorspace is required at Westwood. 14,124 sqm of which has been taken up by the Sainsburys permission. 22,864 of the committed development is open and trading. The remaining floorspace requirements can easily be accommodated within the footprint of Westwood. The scenario of increasing the market share was tested and the Council decided against further expansion of Westwood. It is unrealistic to de allocate Westwood as it has already established its role in the retail hierarchy. Peaks and troughs of vacancy's are to be expected especially at the time of rent reviews.	No Change
SP08	Margate should not flourish at the expense of Ramsgate	The town centre policies treat all of the centres the same in terms of allocating primary and secondary frontages and highlighting specific areas of interest within the towns (Opportunity areas?) The overall town centre strategy seeks to build on the strengths of all of the town centres. In terms of tourism and leisure uses the Council sees Thanet as a destination encompassing the range of areas and assets.	No Change
SP09	General support for the policy but scepticism expressed over the future of the Port/ferry operation	The policy is supportive of development of the port which would contribute to Thanet's economy and the aspirations of the Port Masterplan. In relation to the scepticism it is	No Change

		worth noting that since the consultation period a freight operator has been found representing the car industry which is an encouraging development.	
SP09	The port should be used for leisure uses/luxury apartments rather than for concrete processing	Ramsgate Port is safeguarded for port related uses. Leisure and tourism uses are permitted within the Ramsgate Waterfront area around the Royal Harbour. The reference to concrete processing refers to a piece of pre application advice and this is not a proposal of the Local Plan.	No Change

Housing Strategy

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)	Outline change
SP11 – Ho	ousing Provision		
	 In broad terms: support for the proposed housing numbers comes from statutory bodies such as the Homes & Communities Agency, neighbouring authorities and KCC some house-builders/developers have objected because they believe the housing numbers should be higher to meet Government guidance significant volume of objections seeking lower housing figures: (see bullets in row below) 	Government guidance expects dwelling provision to be informed by Objective Assessment of Need. Housing numbers in the PO Plan were informed by scenario based dwelling forecasts (published as part of evidence base) and in light of economic aspirations. However, this evidence is being reviewed through an updated Strategic Housing Market Assessment conducted in light of government guidance and, alongside other evidence, including the Strategic Housing Land Availability Assessment, will inform review of the quantity and type of dwellings to be provided for in the pre-submission Plan.	Housing provision to be reviewed and established in light conclusions of updated SHMA and any other relevant aspects of the evidence base, in line with Government Guidance.
	Lower housing numbers - not needed – where is evidence for housing numbers?/flawed assumptions	See response above	As above
	Who is housing for? In- migration/London overspill	In line with Government Guidance the starting point for objectively assessing need will be household forecasts published by Department For Communities and Local Government. These are trend based and therefore the implied requirement can be expected to reflect an element of continuing inward migration an element of which has been from London.	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)	Outline change
	Why not use empty properties first?	In considering how much greenfield land is needed to meet total housing requirements, some allowance has been made for empty property. The Council works vigorously to bring empty property back into beneficial use. As a result of recent advice, the Council has calculated the amount of empty properties brought back into use after a vacancy of 4 years as a direct result of the Council's Empty homes programme, and projected that forward for the rest of the Plan period. This can be included as part of the housing land supply and totals 540 units.	Amend Table 2 (p54) accordingly, but no other change required.
	Should use more brownfield first – protect "green belts"	An expectation stated in the NPPF is that policies should make effective use of previously developed (brownfield) land. In identifying sites to accommodate total housing requirements the Council's approach has been to optimise the capacity of previously developed land. However, to meet the total requirement, greenfield land is also required.	No change. This aspect has already been factored into the strategy for planned location of housing.
	Loss of best quality agricultural land	While acknowledging potential economic and other benefits of best and most versatile agricultural land, the NPPF does not signify that its presence would justify reducing housing targets below objectively assessed need, and states that where significant development of agricultural land is demonstrated as necessary, the local planning	No change. This aspect has already been factored into the strategy for planned location of housing.

Policy	Issues Raised	Council response (including reason for	Outline change
		change/no change including any relevant new	
		guidance etc.)	
		authority should seek to use areas of poorer	
		quality land in preference to that of a higher	
		quality.	
		A high proportion of Thanet's greenfield land	
		consists of best quality agricultural land, and	
		identifying sufficient land to meet the total	
		housing requirement taking account of this and	
		other relevant criteria, has inevitably resulted in	
		the need to allocate some such land.	
	Schools, doctors, hospitals inadequate	Engagement of the Clinical Commissioning	No change other than to continue

	homes) is more realistic.	number of new jobs. Much of the housing	addressed.
	,	requirement for new homes stems from factors	
		such as formation of new households and is	
		not driven by employment. However, the	

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)housing provision figure also takes account of the need to accommodate the additional labour requirement to meet the level of employment growth anticipated in the District's Economic and Regeneration Strategy. It is not anticipated that a reduced employment target would reduce overall housing need which is largely	Outline change
	Utilities not capable of supply Sewerage system inadequate	driven by demographic factors including household formation.Engagement of the utility services including the agency responsible for sewerage is ongoing. The Plan will be supported by an Infrastructure 	No change other than to continue engagement to inform Infrastructure Delivery plan and Local Plan policies.
	Impacts on environment	 The process of identifying sites to accommodate future homes has included criteria to assess relative impact of options on the environment including issues such as landscape and sustainability of location. The NPPF is clear that the Plan should meet in full objectively assessed need for housing, as far as consistent with policies set out in the Framework. It identifies specific environmental features and designations where in general a 	No change as this aspect is considered to be adequately addressed through the Strategic Housing Land Availability Assessment and Strategy for Planned Location of Housing

Policy	Issues Raised	Council response (including reason for	Outline change
		change/no change including any relevant new	
		guidance etc.)	
		presumption against harmful development	
		applies: (Green Belt, National Parks, the	
		Broads, Areas of Outstanding Natural Beauty	
		and within or otherwise likely to adversely	
		affect a Site of Special Scientific Interest). The	
		only such designation applying to Thanet is the	
		SSSI (largely coinciding with European nature	
		conservation designations. However, this	
		designation is essentially limited to the	
		foreshore and housing development will be	
		subject to sufficient mitigation. On this basis	
		the policies in the Framework do not signify	
		any constraints that would justify a level of	
		housing provision below that of objectively	
		assessed need.	
	Increase in deprivation	These representations evidently reflect	No change as these factors are
	Increase in crime	concerns that providing more homes than	considered to be already
		needed by Thanet's existing population may	addressed.
		fuel in-migration by vulnerable and benefit	
		dependent households.	
		Government policy as expressed in the NPPF	
		is to boost the supply of homes, and in	
		referring to its household projections as a	
		starting point for assessing local need, it is	
		clear that objectively assessed need will	
		incorporate a continuing element of in-	
		migration.	
		The draft Plan acknowledges that the district is	
		relatively deprived and contains pockets of	
		severe deprivation. However, it aims to ensure	

Policy	Issues Raised	Council response (including reason for	Outline change
		change/no change including any relevant new	
		guidance etc.)	
		that planned development should serve to	
		improve the social and economic position of	
		the district by through a more aspirational and	
		economically independent community through	
		the measures summarised below.	
		 Adopting a positive economic and regeneration strategy to diversify and expand local job opportunities, 	
		 supporting a Parkway Station 	
		 setting out area based housing 	
		objectives including improvements to	
		the quality and configuration of housing	
		stock and environment in certain areas	
		to support a mixed, settled and	
		inclusive community.	
		The NPPF notes that the planning system can	
		serve to facilitate social interaction and create	
		healthy, inclusive communities and expects	
		policies and decisions to promote safe and accessible environments where crime and	
		disorder and fear of crime do not undermine	
		quality of life. The Plan's primary aims for	
		development include promoting inclusive	
		design, including a policy requirement that	
		development must improve people's quality of	
		life by creating safe and accessible	
		environments and promote public safety and	
		security.	
	Out of date evidence	It is acknowledged that the Strategic Housing	Content of Pre-Submission Draft

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)	Outline change
		Market Assessment (SHMA) is dated. The SHMA has been revised to provide up to date evidence for the objectively assessed housing need for Thanet and the types and affordability of homes required. These will inform the level, size, type and affordability of housing to be provided for in the pre-submission draft Local Plan. The SHLAA will be updated for the pre- submission draft Local Plan.	Plan to be informed by updated Strategic Housing Market Assessment by GL Hearn.
	12,000 far too many for the district	The Council is required to set housing provisions having regard to objectively assessed need. Previous forecasts suggested that, alongside economic aspirations, 12,000 was the appropriate requirement. This situation is under review as outlined above.	Level of housing provision proposed in the pre-submission draft to be reviewed in light of the updated Strategic Housing Market Assessment.
	Urban sprawl will have an adverse effect on tourism	In making provision to meet the housing target, the Council has assessed potential new housing locations against a variety of important criteria, including coastal wildlife designations, landscape, archaeology and conservation and transport in order to identify the most suitable and sustainable sites.	No change
	Target is not localism	Government guidance is quite clear that establishing housing requirements to be provided for should be informed by an objective assessment of need (OAN), and that the starting point in this process is Governments published household growth projections. Other than coastal wildlife designations (which are not proposed as	No change

Policy	Issues Raised	Council response (including reason for	Outline change
		change/no change including any relevant new	
		guidance etc.)	
		housing allocations in Thanet) the guidance	
		identifies no other constraints currently	
		relevant in Thanet which may justify providing	
		below the objectively assessed need.	
	More care and supported homes	The Plan acknowledges that housing	No change other than to review

In identifying the best greenfield sites selection criteria have included landscape and role of sites in maintaining separation	Outline change
	Homes will not be affordable for local people	between and identity of individual settlements. The type, size and affordability of the new homes required will be reviewed in the updated Strategic Housing Market Assessment. This will take account of data on local incomes and house prices. This will serve to inform policies regulating the type of housing to be delivered and how much should be delivered as	No change other than to review the calibration of policies regarding the type and quantity of homes required and target proportion of affordable homes in light of the conclusions of the updated SHMA.
	The location of houses does not follow the issues and options consultation as the chosen locations are villages	affordable housing. The issues and options consultation included scenarios featuring some housing at and adjoining rural settlements. The large majority of allocated housing sites are located within or adjoining the coastal urban belt containing the main Thanet towns and Westwood. A relatively modest element of housing is identified at the more sustainable rural settlements.	No change
	Unfair concentration of housing on Ramsgate	Table 12 on page 54 of the draft Plan shows an indicative distribution of housing numbers between the individual settlements. Aside from Westwood, Ramsgate has a higher notional total than the other settlements. (Much of its total figure is by way of sites in the urban area many of which already have planning consent). Reference to the map on page 226 gives a	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.) clearer picture of the broad distribution of sites including the strategic sites adjoining the urban area containing the main towns. Selection of allocated sites has been informed by a range of criteria to identify the most sustainable options. On the basis of the illustrative disposition presented on the map, the	Outline change
	Some respondents saying SHMA needs review.	distribution is not considered in any way disproportionate. Agree. The content of the pre-submission draft will be informed by the updated SHMA.	The content of the draft Plan will be informed by an updated SHMA (conducted in 2015) prior to publication of the pre-submission consultation draft Plan.
	Comments relating to environmental capacity/optimum population.	 National planning policy implies the need to provide for objectively assessed housing need, for which the starting point will be government's trend based household projections. It signifies (Footnote 9) that the specific environmental constraints which might exceptionally justify a lower housing target include various designations (such as Green Belt, AONB, National Park) which are not present in the district. It does refer to protected species and SSSI which are present in the district and protected in other local plan policies. In identifying sites to meet requirements, local assessment criteria have been applied to identify the most sustainable options including role of sites in retaining separation between settlements, biodiversity, landscape and 	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)	Outline change
		archaeology.	
	No significant objections from utilities, infrastructure providers.	Noted. However, engagement is ongoing and will be applied in reviewing most suitable sites to allocate and infrastructure requirements to be addressed.	No change (engagement ongoing)
	"In combination" recreational effects of housing sites on the SPA need to be addressed through the SAMM work.	Noted. The Mitigation Strategy reflects the overall level of housing development envisaged over the Plan period, and the Plan includes the requirement for housing developments to demonstrate sufficient mitigation.	No change
	Manston Green – building housing under the flight path could impact on airport operation and viability.	Policy SP13 relating to this site allocation clearly indicates that built development will be focused at the northern part of the site and that master planning will be expected to take account of the alignment of the airport runway and the operational needs of the airport.	No change
	(See also comments on strategic sites; majority of comments from local people living in the vicinity of the proposed sites).	Many representations oppose allocation of specific sites for housing development. The selection criteria which have informed identification of these sites is set out in the Strategy for Planned Location of Housing land. (See also section below).	See below

	Lack of community services/impact on existing services (education; health; etc.)	Engagement with community service providers is ongoing and will serve to identify the additional/augmented facilities and services needed to support development. These will be incorporated into the Infrastructure Delivery	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)	Outline change
		Plan which will support the Local Plan by identifying what is needed, when and how it will be funded.	
	Traffic/parking problems and related pollution	The Local Plan will be supported by a Transport Strategy setting out the transport improvements and infrastructure investment needed to deliver the Plan's proposals. This strategy has been informed by assessments of the impact on the road network of traffic associated with these proposals including planned future housing. The Plan includes policies regarding parking provision for new developments and to safeguard town centre parking provision in line with the Council's car parking strategy.	No change
	Inadequate services	Engagement with utility and service providers is ongoing to assess the infrastructure requirements and resources that will be needed to support development. This will inform the Infrastructure Delivery Plan which will support the Local Plan by identifying the infrastructure needed, when it must be provided and how it will be funded.	No change
	Flooding (historic) Urbanisation will lead to surface water	Flood risk is one of the principal criteria applied in assessing the suitability of sites for allocation. With the exception of the existing built up area in the vicinity of Margate Old Town, residential site allocations generally exclude land in Thanet's low lying identified flood risk areas. In relation to surface water management the Plan contains a policy	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.) expectation for development to incorporate	Outline change
		appropriate sustainable drainage systems/methods.	
	Loss of views Loss of agricultural land/"green belt" Impact on wildlife Loss of community and historic identity (e.g. settings of Dent de Lion and Quex) Hedgerows	 In identifying the most appropriate sites to accommodate planned housing requirements optimum use has been made of previously developed land. However to meet total requirements a significant call is placed on what are currently countryside sites. The Strategy for Planned Location of Housing sets out the key principles and criteria that have been applied in assessing and identifying the most sustainable sites to meet the requirement. These representations identify just some of the factors that have been taken into account (including landscape agricultural land quality, ecology, potential impact on separation between settlements, archaeology and heritage. Any new development will potentially result in loss of existing views. However, proposals will be judged against general design principles set out in the draft Plan (including high quality inclusive design, development relating to the surrounding development, form and layout, compatibility with neighbouring buildings and spaces, and landscape and boundary treatments being designed as an integral part 	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)of development and coordinated with adjacent sites).	Outline change
	Lack of jobs in area	The Council's Economic and Regeneration Strategy aims to accelerate economic growth and create more jobs. This has been taken account of in assessing how many new homes will be required. However, housing requirements are driven by a range of factors beyond employment : for example demands for additional homes from Thanet's existing population as well as from additional households who may elect to seek a home in the district over the Plan period.	No change
	Loss of walks and rights of way	The Plan recognises the recreational and health benefits of walking and refers to the local walking strategy which identified barriers to walking and specifies a network of routes to be improved. Policy SP34 states that new development must provide safe and attractive walking opportunities. Public rights of way are protected by Policy SP26 which signifies that built development or change of use will not be permitted. Where the need for development is overriding alternative provision would be required. Similar protection is also provided by policy CM02.	No change
	Housing will add to drought problem	Engagement with Southern Water has been ongoing and has informed preparation of the	No change

		site allocation (reference ST1). As indicated in	
		the site specific policy, master planning of	
		development would need to be informed by a	
		transport assessment supported by junction	
		modelling and demonstrating appropriate road	
		and junction improvements and signalling.	
	There was some support for a single	Responses to consultation at Issues and	Draft new mixed-use policy for the
	new settlement elsewhere	Options stage showed only limited support for	former Manston Airport site
		a new settlement. The interim sustainability	
		appraisal showed that the option of a new	
		settlement (and of freestanding countryside	
		sites) showed significant negative impacts	
		against various criteria compared with other	
		options.	
		Since that time the Council has received	
		additional guidance on how the negative	
		effects of new settlements can be mitigated	

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.) and the Council therefore believes that a new settlement could form a legitimate part of the housing strategy	Outline change
	There are also some objections from landowners/agents whose sites have not been allocated:	These are being considered on their individual merits in line with established assessment procedures set out in the evidence base	No change
SP19 - Aff	ordable housing		1
	Some local objections – appears to be on the assumption that such housing would be for people sent from London boroughs.	Government Policy Guidance indicates that the starting point in assessing the level of housing to be provided for is its latest household forecasts. These forecasts are trend based and thus reflect need and demand for housing from the existing local population and those who may choose to come to live in the district. In this respect an element of total provision arises from the assumption that people will continue to come to the district and some of these may be from London and elsewhere. However, neither the level of housing proposed or the site allocations are based on any assumption or intention of accommodating people sent from the London boroughs.	No change
	Objections from developers relate to viability/deliverability.	The Plan is supported by an Economic Viability Study which has appraised the development proposals including housing and demonstrates that the Plan is deliverable in these terms.	No change
	The percentage of affordable housing should be higher	The element of affordable housing to be negotiated for on housing developments has been informed by the Strategic Housing Market Assessment and the Whole Plan Viability	No change

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc.)	Outline change
		Study. It aims to accommodate forecast need as far as consistent with economic viability of such developments.	
		Review in light of conclusions of new SHMA and final whole plan viability study.	

Environment Strategy

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
SP20	Policy does not meet the test of soundness as it is not positive and lacks evidence to restrict development in rural areas. Landscape can be enhanced through proper planning	The local plan has allocated enough employment and housing land to meet the identified need, therefore it is not necessary to build in the countryside (other than on allocated greenfield sites). The supporting text to policy SP20 sets out further justification. Policy SP20 meets NPPF requirements in 'recognising the intrinsic character and beauty of the countryside' and 'should avoid new isolated homes in the countryside' Thanet's countryside has always been protected from development by planning policy in response to the pressures of development. Structure Plans have recognised the importance of the countryside and included a policy protecting it from non-essential	No change in respect of this comment, however, policy SP20 will need to refer to the Policies map rather than the 2006 Local Plan.

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
		development and protecting the countryside for its own sake. This has been implemented through local plan policies in the Thanet Urban Local Plan 1984 (policy CAC1), Isle of Thanet Local Plan 1998 (policy CL1) and Policy CC1 in the Thanet Local Plan 2006.	
SP21	Include areas between Westgate and Garlinge, and Westgate and Birchington	The area between Westgate and Garlinge is already partially built-up as part of the urban area. As there is not complete physical separation between the two, it would be inappropriate to allocate this as Green Wedge. There is already a Green Wedge between Westgate and Birchington.	No change
SP22	Policy does not meet the test of soundness as it is not positive and lacks evidence to restrict development in rural areas. Landscape can be enhanced through proper planning	The aim of this policy is not to restrict development in rural areas, but to safeguard and enhance the open and historic characteristics of Thanet's countryside and landscapes. Any development should respect the character of these landscapes	No change in relation to this comment. However, this policy may need reviewing in response to further work on landscape character.
SP24	Amendments required to ensure compliance with the Habitats Regulations.	Compliance with Habitat Regulations is addressed in other policies in the plan such as SP25. The aim of this policy is to encourage greater biodiversity through habitat enhancement, restoration and creation rather than being a restrictive policy. However the current policy wording could be improved and should be amended accordingly to refer to the joint work with KCC, Natural England, KWT and other partners on the identification of the Biodiversity Opportunity Areas.	Reword policy SP24 and supporting text with references to Biodiversity Opportunity Areas.
SP25	Amendments required to ensure	Work on a Strategic Access Management and	Rewrite Policy SP25 and supporting

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
	compliance with the Habitats Regulations.	Monitoring Strategy (SAMMS) has progressed since the draft preferred options local plan was prepared. In light of this, it is considered appropriate that policy SP25 and the supporting text be re-written.	text to reflect recent work on SAMMS and Natural England's comments and advice, to reflect the hierarchical nature of designations. Include a new policy relating to the protection of nationally designated nature conservation sites such SSSIs and Marine Conservation Zones.

Transport Strategy

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
SP36: Transport infrastructure	Transport – roads should be in place before the housing – learn from Westwood.	 The Council is preparing an Infrastructure Delivery Plan (IDP), which includes transport measures, in conjunction with KCC and others. The IDP seeks to identify all necessary infrastructure to support the development set out in the draft Local Plan, and how that infrastructure should be implemented. The recent improvements around Westwood are indicative of what can be achieved, and the IDP process should help to 	An implementation section, and new Policy should be added to the draft Plan to explain how infrastructure (including transport) will be provided and funded.
		ensure that occurs in other parts of the district as well.	An Infrastructure Delivery Plan will also
		Given the relatively low level of direct government funding for such schemes, it is unlikely that significant infrastructure can	be prepared alongside the next stage of the

		 be put in place before any development occurs. However, road infrastructure should be provided in parallel with new development, and the Council with KCC is seeking other sources of funding to support the provision of new infrastructure. In taking forward its IDP, the Council will seek to provide a reasonable balance between deliverability, affordability and residual highway impact, between the phases of implementation within the identified mitigation strategy. 	draft Plan.
SP38: Strategic Road Network	Highways England have indicated that their main concern is the impact of any planning documents or development management decisions on the M2/A2 corridor, principally M2 junction 7 (Brenley Corner) and A2/A256 junction. While these junctions are located some distance from Thanet, impacts of plans adopted and planning decisions made will be felt beyond individual district boundaries. All transport assessments for strategic sites should address this issue.	 This is a matter that Highways England have been raising for some time. The Council's view is that it is highly unlikely that developments in Thanet will have a significant impact on these two junctions. However, the Council is committed to working with neighbouring authorities to assess the potential combined impact of development in East Kent on those two junctions. 	No change required to draft Policy SP38.
SP39: Parkway station	 Impact on Cliffsend – noise traffic People using Cliffsend as free parking What benefit does it bring? Wrong location – not joined up with public transport Make journey time from Ramsgate to London longer 	 The proposal for a Parkway Station in Thanet was based on the wider economic benefits that could arise both for Thanet and Dover districts. A business case has been prepared by KCC, and Regional Growth Funding has been earmarked for the project through the South East Local Enterprise Partnership. Initially, it was seen as a driver for the Airport and Discovery Park. However, if the Airport is developed for mixed uses 	No change to principle of policy.

 Future of Ramsgate Station? Use swimming pool site for parking Will lead to pressure for housing The station should be considered at Manston 	 including commercial uses, the Parkway Station could as easily serve that development. The Council also believes that there are wider benefits for the local economy, through improving journey times to the wider South East and London. A number of potential sites were considered for the location of 	
	the Parkway Station, and this location near Cliffsend was identified as the most suitable, based on a range of factors. The Council recognises that there may be localised impacts	
	that need to be mitigated, and the draft Policy indicates that such mitigation will need to be provided.	

<u>Housing</u>

Policy	Issues Raised	Council response (including reason for change/no change	Outline change
		including any relevant new guidance etc.)	
H4 – Hous	sing at Rural Settlements		
	General objections to various rural housing sites: change character of settlement traffic/inadequate roads lack of/pressure on services loss of farmland/wildlife flooding lack of services/infrastructure	The majority of housing provision is focused within and adjacent to the urban area containing the Thanet towns. However, the rural settlements have a role not only in meeting local housing need but also in providing a degree of locational choice. As indicated in the topic paper addressing housing levels in the rural settlements, certain of Thanet's rural settlements are considered sufficiently sustainable as to be capable of accommodating development of a scale beyond minor infilling and have been assessed for potential alongside other sustainable locations. The size and location of sites allocated has been informed by the criteria set out in the Strategic Housing land Availability Assessment and Strategy for Planned Location of Housing. This includes character of locality, townscape, trees, sustainability, access, highway capacity, agricultural land quality, ecology, flood risk. Availability of services is subject to ongoing engagement with delivery agencies. Policy H04 subjects all proposals to being compatible with the size form, historic character and historic scale of growth of the settlement	No change
	Not for local people	An element of the housing need to be provided for will be to accommodate the needs of Thanet's existing population as their circumstances change. However, government policy requires that requirements be founded on trend based projection of need and this will thus reflect a continuing degree of in-migration. The Strategic Housing Market Assessment will assess affordability of homes in relation to local incomes and inform policies which aim to assist those who cannot meet their needs through the local market.	No change

Minster has had too much housing development already	A range of criteria including accessibility to services and character of location has been applied in identifying the most suitable sites to accommodate total housing requirements. These are set out in the Strategic Housing land Availability Assessment, the topic paper on Housing Levels for Rural Settlements and the Strategy for Planned Location of Housing. Within the rural settlement hierarchy Minster is a highly sustainable settlement. Total housing provided for in the draft Plan (12,000) would represent an increase of over 18% of the district's current	No change
	housing stock over the period to 2031. The provisions indicated for Minster in the draft Plan would represent a significantly lower proportion (less than 12% increase to the village's housing stock) over that period.In light of the overall level of provision and the criteria applied in selecting suitable sites, the quantity proposed for Minster is	
	considered appropriate and proportionate.	

Safe & Healthy Environment

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
Para 16.17	Objection to SuDS reference – suggested the following wording:	It is considered important to raise the issue of Sustainable Urban Drainage Systems SUDs and groundwater to increase awareness of the potential consequences of inappropriate	Reword paragraph 16.17 accordingly.
	Many parts of Thanet have vulnerable groundwater, as a consequence discharges to the ground must be	SUDs. However, agree that the paragraph could be more positive about SuDs.	

Policy	Issues Raised	Council response (including reason for change/no change	Outline change (or say
		including any relevant new guidance etc)	no change)
	carefully designed to ensure that they are appropriate and does not cause further degradation. SuDS can be designed so that pollutants are removed prior to discharge, we would recommend in sensitive areas that these are considered and properly designed in order to improve the groundwater quantity where possible. Discharges to the ground in sensitive areas should be approved by the Environment Agency.'		
CM01	New community facilities should have regard to viability	Agree that the plan should set out how new facilities will be delivered – either through developer contributions or through Community Infrastructure Levy (CIL). The viability for S106 contributions and CIL are considered in the Plan Viability Study. Viability is taken into account when planning applications are assessed in respect of the provision of new community facilities.	Additional policy to be included in a new section on Implementation and Monitoring relating to contributions via S106 or CIL.
CM02	The policy protecting community facilities is over-restrictive and unsound.	 Paragraph 70 of the NPPF states that planning policies and decisions should guard against the unnecessary loss of valued facilities and services, particularly where this would reduce the community's ability to meet its day-to-day needs; ensure that established shops, facilities and services are able to develop and modernise in a way that is sustainable, and retained for the benefit of the community 	No change in relation to this comment. However, supporting text may need to be strengthened to refer to a minimum time period for marketing the facility.

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
		It is considered important to safeguard community facilities, or land which has been occupied by a community facility, as in some areas of Thanet -particularly the villages, once a community facility site has been lost there would be little or no scope to provide new community facilities in the future. Paragraph 17.8 of the draft local plan explains how the change of use or redevelopment of a community facility can be justified to ensure that the policy does not restrict growth or have a negative impact on the community.	

Transport

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
TP05 – Coach Parking	A number of respondents have highlighted coach parking as a problem, particularly the perceived unsuitability of Barnes Avenue Car Park and coach parking in general in Broadstairs.	The draft Local Plan protects existing coach parking areas, but also recognises the problems of limited coach parking in certain areas of the district. The provision of suitable coach parking areas is important in ensuring that the visitor economy is supported.	The draft Plan should be amended to reflect the current corporate coach parking review. Draft Policy TP05
		The draft Plan also indicates that the Council will consider the need to identify a site to meet demand at Ramsgate.	should be amended once the review is complete to include any
		The Council is now undertaking a review of coach parking in	new sites that are

	the district. The draft Local Plan will be amended in due course once the review has been completed.	identified through the review process.

General points

Policy	Issues Raised	Council response (including reason for change/no change including any relevant new guidance etc)	Outline change (or say no change)
Consultation process	A number of issues have been raised by various respondents regarding the length and complexity of the consultation.	 This consultation was not a statutory part of the Local Plan process. However, the Council considered that it would be helpful to carry out an extended 8-week consultation. It is appreciated that the Local Plan is complex, so Council staff were available at a number of drop-in sessions to help people respond to the consultation. A list of Frequently Asked Questions was also produced after the consultation opened, and was revised as new questions were raised. The questionnaire for this consultation was long. This was because it set questions for each of the policies in the plan which was necessary in order to provide the Council with the most meaningful feedback. Details are given below of the methods used to inform people about the consultation: Press Coverage Press release on the website - Press briefing took place on 8 January 2015. 	No change required to draft Local Plan. With the Communications Team, a plan has been prepared for consultation and engagement at the next stage of the draft Local Plan.

Documents	Infrastructure Delivery Plan, Sustainability Appraisal, Viability assessment and Transport Modelling work should have been published as part of the consultation.	 The Preferred Option consultation is not a formal stage of consultation. However, the Council has published evidence base documents and information in the past, and is committed to continue doing so, as and when evidence is available and at the appropriate stage. The Council recognises that these are important elements of evidence for the Examination. It is the intention to publish the evidence mentioned at the next stage, if available. 	No change required. Intention to publish all available evidence at next consultation stage.
Duty to cooperate	Thanet has failed to cooperate on major cross boundary issues and evidence base documents	Do not agree. The Council has a long history of cooperation with neighbouring authorities dating back to the preparation of the South East Plan and beyond.	No change required to draft Local Plan. It is the intention to publish more information on duty to cooperate at Publication stage.
	Not meeting duty to cooperate (specifically in relation to housing numbers)	The Council has engaged with neighbouring authorities (as well as KCC and other statutory bodies) over a long period of time on a range of issues, including housing numbers, economic strategy and employment land, retail provision, transport matters, Habitat Regulations matters, social and physical infrastructure, green infrastructure and so on. The duty is supposed to focus on those matters where there is a strategic cross-boundary issue.	
		In relation to housing, the East Kent districts have co-operated on the approach to this matter over many year, including through the South East Plan process. More recently, the Council has engaged with neighbouring Councils both in relation to its	

		own Strategic Housing Market Assessment work, and the work currently being undertaken by Dover in relation to their housing requirements. That engagement is ongoing, and it is believed that any outstanding issues can be resolved prior to Submission of the draft Plan. The Council has also adopted the East Kent Memorandum of Understanding of the Duty to Cooperate.	
Infrastructure provision/ s106/CIL/ viability	Many respondents have raised concerns about the provision of various elements of key infrastructure to support the proposals in the draft Local Plan – transport, water, sewerage, education, health, and so on – either in terms of absolute provision; the viability of infrastructure provision; or the timing of infrastructure provision.	The provision of infrastructure to support development is vitally important. The Council has been working with the relevant agencies to ensure that it is fully informed about future infrastructure requirements and the timing of those requirements. The Council has also prepared a draft Infrastructure Delivery Plan (IDP) in conjunction with those agencies, setting out the infrastructure requirements and the known costs; the phasing of the requirements and the body responsible for ensuring delivery. Some infrastructure would need to be provided directly by a developer on a given site; some would be off-site infrastructure funded by a developer and some would be funded by other mechanisms. The IDP will also need to address any viability issues. The IDP addresses the full range of infrastructure. KCC have (with TDC) been preparing a new Transport Strategy for the district, the primary	It is proposed to amend the draft Local Plan to include an implementation Policy and explanatory text to explain how the Plan addresses the issues of implementation, monitoring, infrastructure delivery and viability.

		feature of which is the development of an "inner circuit" to improve traffic flows between the different parts of the district and to provide some relief to the existing road network. KCC have also sought grant funding (through the RGF) for parts of this scheme.	
Viability issues	A number of respondents have raised concerns about whether development in this area will be viable; particularly in relation to supporting infrastructure.	The draft Local Plan has been subject to a Whole Plan Viability Assessment, which will be published shortly. The Assessment indicates that, including key infrastructure, the draft Plan is viable. Some areas of the district experience higher development values than others, but as a whole it is regarded as viable. Further testing of key components will be undertaken as part of the IDP process.	No amendment to draft Local Plan.

Policy SP05 - Manston Airport

SA Objective	Proposed Policy	No policy	HRA implications
1. To provide a sustainable supply of	Permanent. Direct. ST/LT++	Unknown ?	Please see draft HRA Report
housing including an appropriate mix of types and tenures to reflect demand and need.	The proposed policy inherently provides additional housing within the District, by proposing up to 3,000 new dwellings on the site, including 30% affordable homes.	A no policy option would require housing proposed at the former Manston Airport site to be accommodated elsewhere within the District. Alternative locations and phasings have not been identified therefore it is not possible to assess the impacts of a no policy option.	
2. To maintain appropriate healthcare	Permanent. Direct. ST/LT+	Permanent. Direct LT -/?	
ovision and access to healthcare cilities for all sectors of society.	Adoption of the proposed policy requires the provision of a Doctors Surgery, ensuring the new development would have adequate and appropriate access to healthcare facilities.	Assuming additional housing is provided in alternative locations, likely to be urban edge sites, pressure would be placed on existing healthcare facilities and services as there is likely to be insufficient critical mass in particular locations to provide additional healthcare.	
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent. Direct. ST/LT+ Adoption of the proposed policy requires the provision of a primary school, ensuring the new development would have adequate and appropriate access to educational facilities.	Permanent. Direct LT -/? Assuming additional housing is provided in alternative locations, likely to be urban edge sites, pressure would be placed on existing educational facilities and services as there is likely to be insufficient critical mass in particular locations to provide additional educational facilities.	
4. To increase public safety and	Temporary/Permanent Indirect ST/LT +	Neutral 0	
reduce crime and fear of crime.	Development of new homes could contribute to the reduction of crime and fear of crime through the better design/layout of residential areas.	A no policy option would not alter the status quo.	
5. To provide appropriate key	Unknown ?	Permanent. Direct LT -/?	
facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Adoption of the proposed policy would facilitate physical infrastructure to support the provision key community services suitable for vulnerable people and users. However, no information is provided in relation to the direct services that could be provided in relation to future site uses and developments and thus cannot be assessed against the objective.	A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local population. As such by allowing uncontrolled developments, overcrowding and population rises could lead to a rise in deprivation as facilities and services would be unable to cope with the excess demand.	
6. To create vibrant balanced	Permanent. Direct. ST/LT+/	Neutral.0]
communities where residents feel a 'sense of place' and individual contribution is valued.	The proposed policy would seek to create a mixed use development that is sympathetic to the receiving environment. Through the protection of environmental and heritage assets, as outlined in the proposed policy, an appropriate community feel will be created where landscaping schemes will be designed to be integral to new developments. The policy is likely to promote strong residential amenity within a mixed land use.	A no policy option would not alter the status quo.	
7. To provide access to employment	Permanent. Direct. ST/LT+/?	Permanent. Direct LT -/?	
opportunities for all sectors of society ensuring that everyone who	The proposed policy would allow the former Manston Airport site to be developed into a mixed use facility, with 85,000sqm allocated for employment and leisure floorspace. As such	A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local population. As such residential developments	

Mitigation and enhancement measures
-
The proposed policy has the potential to significantly affect the status quo by increasing the population covered by individual healthcare facilities. The proposed policy includes provision of a Doctor's Surgery, though further assessment will identify shortfalls in local healthcare capacity and indicate the level of increased provision that may be required through developer contributions.
The proposed policy has the potential to significantly affect the status quo by increasing the population covered by individual educational facilities. The proposed policy includes provision of a primary school, though further assessment will identify shortfalls in local educational capacity and indicate the level of increased provision that may be required through developer contributions.
As part of the masterplanning process, mitigation in the form of further studies
will be required to ensure positive outcomes against this sustainability objective. This will require an assessment of how demand on community facilities may increase as a result of the additional population in the area.
A no policy option would allow current practices to ensue and thus would not impact the objective in either a positive or negative manner. However adoption of the policy would actively seek to enhance the local sense of place and community feel within the district by ensuring developments are designed in an appropriate manner.
-

Agenda Item 3 Annex 3

SA Objective	Proposed Policy	No policy	HRA implications
wants to work has the opportunity to secure appropriate paid employment.	commercial business properties could be created as could retail facilities. In turn these establishments would create jobs for the local economy.	could grow without appropriate facilities and provisions which could lead to the over saturation of employment markets and increased competition for jobs across Thanet. The impacts are questionable as future site developments are not known and the airport is a small area in relation to the wider Thanet vicinity.	
8. To ensure the sustainable	Unknown ?	Neutral. 0	
development of the proposed economic growth and encourage industrial and employment development at key sites within the District to support priority regeneration areas.	The benefits of sustainable and social housing provision provided at the former Manston Airport site could potentially be negated by the loss of potential economic activity associated with investment at the former Manston Airport. Whilst employment is included within the policy implementation is not known at this stage. Provision of housing on the former Manston Airport site would prevent the possibility of the former Manston Airport being regenerated providing associated jobs.	A no policy option would not alter the status quo.	
9. To protect and enhance the areas	Permanent. Direct. ST/LT +	Neutral 0.	
natural, semi-natural and street scene to support the tourist economy.	Under policy adoption proposals to develop the former Manston Airport site, a development will minimise the visual impact and will be well linked to existing heritage sites to support tourism in Thanet. As such this would contribute to preserving the natural environment around the site which may be utilised for the tourist industry. Similarly the roofscape of any proposals will be mitigated to ensure that they are not obtrusive which would also yield positive effects. The impacts are only minor due to the size of the site.	A no policy option could allow developments to negatively impact natural assets and reduce their economic tourist value. However existing legislation protects natural environments (such as SSSI and SPA) so it is unlikely that a no policy option would create a decline and thus would more likely yield neutral effects.	
10. To improve efficiency in land use	Permanent. Direct. ST/LT +	Unknown ?	
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Through adopting the policy the local environment could potentially be subjected to developments that create a mixed use and multifunction district, accommodating residential, commercial and leisure facilities. Due to the size of the site and that the policy is site specific, the impacts significance is minor.	It is not possible to say if a no policy choice would restrict the objective. No information is known to compare land prices between greenfield and urban spaces, whilst the details of future developments is not known yet either.	
11. To ensure that a sustainable	Permanent. Direct. ST/LT +	Neutral. 0	
pattern of development is pursued.	Policy adoption would ensure sustainability most directly through the protection of environmental, cultural and heritage assets. The integration of new settlements into existing settlement patterns is fundamentally affected by good levels of transport connectivity and treatment of green buffers and edges between built up areas. For robust implementation, the proposed policy requires the Transport Strategy to be met by upgrading local roads, travel plans for public transport and traffic calming measures for key routes.	A no policy option would not alter the status quo.	
12. To conserve and enhance the	Permanent. Direct. ST/LT +	Unknown?	
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Adopting the policy would ensure any development to or on the former Manston Airport site would be designed to minimise the visual impact on the open landscape. Additionally it would account for the local roofscape and skyline in order to minimise mass buildings when viewed from the South. The effects are only minor positive as the policy is site specific and localised.	By not adopting the policy it is unknown if the character and quality of the local spaces would decline or enhance as future plans are unknown.	
13. To preserve and enhance sites,	Permanent. Direct. ST/LT+	Permanent. Direct LT -/?	
features and areas of historic	For a development to be brought forward as part of this policy, a design and heritage statement is required to include	A lack of policy support could allow developments to be granted permission without the consideration for the impacts	

Mitigation and enhancement measures
-
-
-
It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, can be designed to limit the potential for settlements to merge.
It would be important for a future masterplanning process for this site to consider how development may effect landscape character. Development that contributes to the landscape character, rather than simply not affecting it, should be encouraged.
The proposed policy includes provision for undertaking a pre-design archaeological assessment taking account

SA Objective	Proposed Policy	No policy	HRA implications
archaeological or architectural importance, and their settings.	measures which will reduce and mitigate sites of historic archaeological and or architectural importance, and their settings, through pre-design archaeological assessment and linking the development to existing heritage sites.	upon archaeological and architectural important sites and features. As such new developments could result in adverse effects on sites, features and areas of historic archaeological or architectural importance, and their settings.	
14. To improve air quality in areas where air quality (pollutant) levels exceed national standards.	Temporary/Permanent Direct ST/LT - The proposed policy promotes development that is likely to result in an increase in car journeys within the District's Air Quality Management Areas. Not all new residents of the new housing provided on site are likely to be from outside of the District, though inter-Thanet migration resulting from the development is likely to occur.	Temporary/Permanent Direct ST/LT + The no policy option potentially limits the increase of vehicle journeys within the Districts Air Quality Management Area.	
15. To provide a sustainable public	Permanent. Direct. ST/LT+	Permanent. Direct LT -/?	-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Policy adoption would only allow mixed use of the former Manston Airport if new developments appropriately met the requirements of increased surface travel demand. This could be achieved by developments ensuring sustainable public transport networks and facilities. However the impacts are only deemed minor as it would not impact the significant wider area and is only relevant to the former Manston Airport. The impacts are undefined as the policy has no specific public transport information and states developments must meet the demands of increased surface traffic, which could be achieved by public transport infrastructure.	A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could saturate and stress current facilities and services leading to a decline in the quality of service.	
16. To develop key sustainable transport links between Thanet and the wider Kent district and beyond, including road, rail and air.	N/A		
17. To reduce waste generation and	Permanent Direct ST/LT -	Neutral 0	
disposal and achieve the sustainable management of waste.	The proposed policy will facilitate housing development, which has the potential to increase the amount of domestic waste produced in the district.	A no policy option would not alter the status quo.	
18. To ensure development within	Permanent Direct ST/LT +	Neutral 0	-
the District responds to the challenges associated with climate change.	The proposed policy designates sites for housing that are more than 100m from the coastal area, minimising risks from sea level rises.	A no policy option would not alter the status quo.	
19. To ensure appropriate	Permanent Direct ST/LT +	Neutral 0	1
development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood	The proposed policy designates sites for housing that are more than 100m from the coastal area, minimising risks from sea level rises.	A no policy option would not alter the status quo.	

Mitigation and enhancement measures
of presence of significant and sensitive remains and an assessment of the effects on scheduled monuments and the listed Dent de Lion Gateway. Undertaking these measures would help identify issues and mitigate negative effects.
As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective. This would involve maximising connectivity for alternative forms of transport (e.g. walking and cycling) and extending bus service provision.
As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective.
-
Mitigation will be required through the design of all new housing developments to ensure that waste minimisation and recycling are promoted during the operation phase of these developments. This would be achieved by maximising the outcomes of other Local Plan policies.
 In addition, Policy SP30 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy.
 Mitigating against climate change by reducing emissions. These measures will help enhance effects relating to this sustainability objective.
-

SA Objective	Proposed Policy	No policy	HRA implications
risk, in accordance with development management policies and NPPF.			
20. To conserve and enhance	Permanent. Direct. ST/LT+	Permanent. Direct. ST/LT+	
biodiversity.	Policy adoption would only allow developments that demonstrate no significant harm to Thanet's SSSI/SAC/SPA/Ramsar sites will occur. As such biodiversity would flourish due to the enhanced protection of sensitive ecological areas.	The no policy option would still offer protection to biodiversity. Current legislation and directives already manage natural assets and sensitive areas and as such the addition of a new policy would only strengthen existing practices.	
21. To protect and improve the	Permanent. Direct. ST/LT++	Permanent. Direct. ST/LT+	
quality of fluvial and coastal water resources, including European designated sites	Policy adoption would ensure development and creation of a residential, commercial and leisure mixed use site which would not contaminate groundwater resources and that appropriate mitigation measures will be incorporated to the design to prevent contamination.	The no policy option would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	
22. To reduce the global, social and	Unknown ?	Neutral 0	
environmental impact of consumption of resources by using sustainably produced and local products.	Effects against this objective are unknown at this stage as the policy does not include explicit reference to using local products or sustainable produce for development.	A no policy option would not alter the status quo.	
23. To increase energy efficiency and	Unknown ?	Neutral 0	
the proportion of energy generated from renewable sources in the area.	Effects against this objective are unknown at this stage as the policy does not include explicit reference to renewable energy or the requirement for energy efficiency measures.	A no policy option would not alter the status quo.	
Altomative aummany			

Alternative summary

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. The effects on with respect to ecology and landscape are likely to be lesser for the development on brownfiled land, when compared to development of greenfield land. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The site is well connected, with the policy requiring numerous efforts to link with and improve the public transport links, particularly with the major centres of Margate, Broadstairs, Ramsgate and Westwood.

The outcome of the HRA has not considered this policy though this will be addressed in due course.

Mitigation and enhancement measures
The proposed policy includes provision for undertaking a pre-design ecological assessment taking account of the presence of wintering and breeding birds. Undertaking these measures would help identify issues and mitigate negative effects.
-
In terms of mitigation, Policy SP30 states that new development must take account of:
• Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy.
• Mitigating against climate change by reducing emissions.
These measures will help promote positive effects relating to this sustainability objective. However, the overall effect of this would be dependent on the final design of any emerging housing proposals.
The success of the proposed policy would depend on the implementation of other Local Plan policies relating to renewable energy provision and energy efficiency. These policies would help promote beneficial effects and support this sustainability objective.

New Policy SPXX - Land at Manston Court Road/Haine Road

SA Objective	Proposed Policy	No policy	HRA implications	
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand and need.	Permanent Direct LT ++ The proposed policy inherently provides for additional housing within the District, by proposing up to 700 new dwellings on site, including 30% affordable homes and the requirement for as high a proportion of houses as possible.	Neutral 0 The omission of this policy in isolation would not significantly affect the status quo as other housing sites would provide strategic housing allocations.	Please see draft HRA report	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Neutral 0 There will not be a change in the status quo under either the pro the addition or removal of healthcare provisions.	pposed policy or the no policy scenario. Neither will result in		
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Neutral 0 There will not be a change in the status quo under either the pro the addition or removal of educational provisions.	pposed policy or the no policy scenario. Neither will result in		
4. To increase public safety and reduce crime and fear of crime.	Temporary/Permanent Indirect ST/LT + Development of new homes could contribute to the reduction of crime and fear of crime through the better design/layout of residential areas.	Neutral 0 A no policy option would not alter the status quo.		
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Unknown ? The effects on existing community facilities cannot be assessed and are therefore unknown at this stage as effects will depend upon the housing mix and tenure. However the policy does provide for a minimum of 9ha of open space to be provided.	Neutral 0 A no policy option would not alter the status quo.		
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent Indirect ST/LT + The proposed policy allocated housing on a site that is outside of the existing urban area but is located between Westwood cross shopping centre and Bradgate Caravan Park. This helps maintain a settlement pattern within Westwood, whilst maintaining green edges with the countryside	Neutral 0 A no policy option would not alter the status quo.		
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Neutral 0 There will not be a change in the status quo under either the pro the addition or removal of employment opportunities.	pposed policy or the no policy scenario. Neither will result in		
8. and 9	N/A			
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent Direct ST/LT - Implementation of the proposed policy would require the use of greenfield land and would therefore not directly support this sustainability objective.	Neutral 0 A no policy option would not alter the status quo.		

Mitigation and enhancement measures
To ensure no significant effects as a result of recreational pressure on designated sites, the policy should cross-refer to Policy SP25 and the SPA mitigation strategy.
-
-
-
As part of the masterplanning process, mitigation in the form of further studies will be required to ensure positive outcomes against this sustainability objective. This will require an assessment of how demand on community facilities may increase as a result of the additional population in the area.
It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, can be designed to fully integrate development within the existing community.
In addition, to ensure no significant effects as a result of recreational pressure on designated sites, the policy should cross-refer to Policy SP25 and the SPA mitigation strategy.
-
N/A -

SA Objective	Proposed Policy	No policy	HRA implication
11. To ensure that a sustainable	Permanent Direct ST/LT ++	Temporary/Permanent Direct ST/LT +	
pattern of development is pursued.	Due to the location of the site that forms the proposed policy, there is potential for achieving sustainable development patterns as the proposed policy advocates development within the existing urban environment, whilst maintaining green edges.	By limiting development in this location, separation of settlements is maintained, which might help focus development in previously developed areas.	
12. To conserve and enhance the	Unknown ?	Neutral 0	-
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	The effects of the proposed policy on existing landscape character are unknown at this stage as they would depend upon the ultimate design of the site.	A no policy option would not alter the status quo.	
13. To preserve and enhance sites,	Neutral 0		
features and areas of historic archaeological or architectural importance, and their settings.	There will not be a change in the status quo under either the pro- nor remove sites of historic archaeological or architectural imp		
14. To improve air quality in areas	Unknown ?	Temporary/Permanent Direct ST/LT +	
where air quality (pollutant) levels exceed national standards.	The proposed policy promotes development that is likely to result in an increase in car journeys within the District's Air Quality Management Areas. Not all new residents of the new housing provided on site are likely to be from outside of the District, though inward migration resulting from the development is likely to occur. However, there is a requirement for ongoing monitoring of local air quality attached to the proposed policy, which may inform TDC's ongoing air quality review and assessment programme.	The no policy option potentially limits the increase of vehicle journeys within the Districts Air Quality Management Area.	
15. To provide a sustainable public	Unknown ?	Neutral 0	
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy allocates new housing development in an area that has the potential for sustainable integration of public transport. The site is within proximity to public transport routes, but the design and integration of site access is important in determining overall accessibility. This is important as there is provision within the proposed policy for improved multi-modal connections for the site and to assess the potential for bus service extensions	A no policy option would not alter the status quo.	
16. To develop key sustainable	Permanent Direct ST/LT +	Neutral 0	
transport links between Thanet and the wider Kent district and beyond, including road, rail and air.	The provision of a highway improvements identified through further traffic studies will help alleviate the pressures of additional traffic on the local transport network.	A no policy option would not alter the status quo.	

Mitigation and enhancement measures
It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, in order to maximise the potential for achieving sustainable development patterns.
In addition, to ensure no significant effects as a result of recreational pressure on designated sites, the policy should cross-refer to Policy SP25 and the SPA mitigation strategy.
It would be important for a future masterplanning process for this site to consider how development may effect landscape character. Development that contributes to the landscape character, rather than simply not affecting it, should be encouraged.
In addition, to ensure no significant effects as a result of recreational pressure on designated sites, the policy should cross-refer to Policy SP25 and the SPA mitigation strategy.
-
The results of any local air quality monitoring are likely to indirectly affect performance against this objective, via TDC's ongoing air quality review and assessment programme.
As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective.
-

SA Objective	Proposed Policy	No policy	HRA implications
17. To reduce waste generation and	Permanent Direct ST/LT -	Neutral 0	
disposal and achieve the sustainable management of waste.	The proposed policy will facilitate housing development, which has the potential to increase the amount of domestic waste produced in the district.	A no policy option would not alter the status quo.	
18. To ensure development within	Permanent Direct ST/LT +	Neutral 0	-
the District responds to the challenges associated with climate change.	The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	A no policy option would not alter the status quo.	
19. To ensure appropriate	Permanent Direct ST/LT +	Neutral 0	
development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with development management policies and NPPF.	The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	A no policy option would not alter the status quo.	
20. To conserve and enhance	Permanent Direct ST/LT +	Unknown ?	
biodiversity.	The proposed policy designates a site for housing that has minor potential for ecological effects, though by keeping development away from Green Wedges, impacts on habitats are could be minimised, assuming the allocated site, ecological value is low.	A no policy option would prevent development on existing greenfield land that may have minor benefits for local ecology.	
21.	N/A	1	-
22. To reduce the global, social and	Unknown ?	Neutral 0	
environmental impact of consumption of resources by using sustainably produced and local products.	A no policy option would prevent development on existing greenfield land that may have minor benefits for local ecology.	A no policy option would not alter the status quo.	

Mitigation and enhancement measures
Mitigation will be required through the design of all new housing developments to ensure that waste minimisation and recycling are promoted during the operation phase of these developments. This would be achieved by maximising the outcomes of other Local Plan policies.
 In addition, Policy SP30 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy. Summery			I

Summary

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply. Any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The implementation of highway improvements is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

The outcome of the HRA has not considered this policy though this will be addressed in due course.

New Policy SPXX - New Implementation Policy

SA Objective	Proposed Policy	No policy	HRA implications	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand and need.	Permanent, Indirect. ST/LT + Adoption of this policy would ensure new housing would be provided with adequate and suitable access. It would also ensure the physical and social infrastructure is provided in the appropriate timeframes such that the housing supply can be made available to satisfy the relevant mix of types and tenures.	Permanent. Indirect. ST/LT ? A no policy option could result in the access to new housing locations being inadequate.	Please see draft HRA Report	-
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent, Direct. ST/LT + This policy would provide the delivery of the social infrastructure, such as healthcare, in a timely manner and in accordance with the Infrastructure Delivery Plan.	Permanent, Direct ST/LT - A no policy option would result in measures not being taken forward by the council to facilitate the provision and access of appropriate healthcare facilities for all sectors of society within the District.		-

Mitigation and enhancement measures
on designated sites, the policy should cross-refer to Policy SP25 and the SPA mitigation strategy.
N/A
In terms of mitigation, Policy SP30 states that new development must take account of:
• Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy.
• Mitigating against climate change by reducing emissions.
These measures will help promote positive effects relating to this sustainability objective. However, the overall effect of this would be dependent on the final design of any emerging housing proposals.
The success of the proposed policy would depend on the implementation of other Local Plan policies relating to renewable energy provision and energy efficiency. These policies would help promote beneficial effects and support this sustainability objective.

A Objective	Proposed Policy	No policy
	Where possible it would also mean the council seek additional funding so as to ensure the healthcare facilities with the District are adequate for all sectors of society.	
provide access to appropriate	Permanent, Direct. ST/LT +	Permanent, Direct ST/LT -
cational facilities for all sectors of ety including focus on training erable and welfare dependant kers with skills necessary to are year round employment.	This policy would bring forward the provision of social infrastructure, such as adequate educational facilities, within the District. It will also set out the timescales of delivery, and where necessary, provide consideration of alternative measures so as to ensure the effective implementation of the overall planning strategy.	A no policy option would result in measures not being taken forward by the council to facilitate the provision and access of appropriate educational facilities for all sectors of society within the District.
	N/A	
provide appropriate key	Permanent, Direct. ST/LT +	Permanent, Direct ST/LT -
ities to support vulnerable people reduce the level of deprivation ified across the wards.	The adoption of this policy would bring forward the provision of social infrastructure and facilities in the district. It will also ensure encourage collaborative working with other organisations to facilitate the strategic provision and timely implementation of key facilities.	A no policy option would result in measures not being taken forward by the council to facilitate the provision and access of appropriate facilities for all vulnerable people within the District.
reate vibrant balanced	Permanent, Direct. LT +	Permanent. Direct. ST/LT ?
communities where residents feel a 'sense of place' and individual contribution is valued.	The adoption of this policy will ensure the existing and new communities will be developed in a balanced and progressive manner by ensuring the appropriate physical and social infrastructure is implemented in accordance with one another and in with the draft Infrastructure Delivery Plan.	A no policy could result in the physical and social infrastructure for existing and new communities not being developed in a manner which contributes to the creation of a vibrant and balanced community.
	NA	
ensure the sustainable	Permanent. Indirect. ST/LT. +	Permanent. Indirect. ST/LT ?
lopment of the proposed omic growth and encourage strial and employment lopment at key sites within the rict to support priority meration areas.	Timely provision of appropriate infrastructure to new development sites will enhance the operability of new commercial sites. This will allow key industrial and employment sites across the District to optimise their economic growth.	A no policy option could result in access to new industrial and employment developments being inadequate. This would limit the ability of the District to generate new jobs and support regeneration areas.

where air quality (pollutant) levels exceed national standards.	Providing required physical and social infrastructure which is accessible to all sectors of society will reduce the reliance on personal vehicle trips and increase the promotion and use of sustainable forms of travel.	A no policy option would require promotion of additional and other measures in order to improve the air quality within the District through the use of sustainable forms of travel.		
15. To provide a sustainable public	Permanent, Direct LT +	Permanent. Indirect. ST/LT ?		-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Adherence to the policy would enable sustainable public transport provision between land uses to be enhanced. This policy would also facilitate implementation and adherence to the Infrastructure Delivery Plan, ensuring the required physical and social infrastructure is implemented to appropriate timescales.	A no policy option could result in the current transport network not being extended to facilitate access to all key facilities, services and employment opportunities.		
16. To develop key sustainable	Permanent, Indirect LT +	Permanent, Indirect ST/LT -		-
transport links between Thanet and the wider Kent district and beyond, including road, rail and air.	Implementation of the policy would allow for wider transport infrastructure to be expanded, covering the Thanet District area. This would also link up with the wider transport network of Kent and further afield.	A no policy option would result in the provision of social infrastructure within the District having inadequate access, making those facilities less accessible.		
17. to 22	NA			N/A
23. To increase energy efficiency and	Permanent. Indirect. ST/LT ?	Permanent. Indirect. ST/LT ?		-
the proportion of energy generated from renewable sources in the area.	Co-locating the provision of social infrastructure could facilitate the justification for maximising the eligibility of renewable energy sources within the District, such as district heating.	A no policy option could result in the maximisation of eligibility from renewable sources not being pursued.		

Summary

The proposed policy would ensure physical and social infrastructure provisions are adequately taken forward by the council, such that the phased implementation of the infrastructure requirements aids the efficient use of land, sustainable development and access to facilities. The policy would also be beneficial in terms of co-locating social infrastructure facilities so that the communities can get the most out of the new developments. The no policy option could result in a number of physical and social facilities not being adequately provided both to the detriment of the communities.

The outcome of the HRA has not considered this policy though this will be addressed in due course.

New Policy SPXX - Strategic Routes Policy

SA Objective	Proposed Policy	No policy	HRA implications
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand and need. Summary

The proposed policy would ensure key roads and junction improvements are safeguarded for future works, such that they can support the implementation of the Thanet Transport Strategy. This would enable the district to develop key sustainable links between the local road access for which the policy is directed at but also access to the strategic road network and wider transport links. A no policy option could result in a worsening of current traffic conditions on the roads highlighted on the safeguarding map and prevent the District from attaining a sustainable transport network which is coherent and linked up with local and wider transport networks.

The outcome of the HRA has not considered this policy though this will be addressed in due course.

Thanet District Council Thanet Local Plan - Sustainability Appraisal

Preferred Options Revisions - Non-Technical Summary

REP/228764/003

Issue | 11 November 2016

This report takes into account the particular instructions and requirements of our client. It is not intended for and should not be relied upon by any third party and no responsibility is undertaken to any third party.

Job number 228764

Ove Arup & Partners Ltd 13 Fitzroy Street London W1T 4BQ United Kingdom www.arup.com

Non-Technical Summary

Introduction

This document describes the methodology and the issues that the Sustainability Appraisal (SA) of the Thanet District Local Plan, has assessed. The Thanet District Local Plan will help to guide the future spatial development of the District up to 2031. It will be used to make decisions on planning applications and proposals for development.

Role of the Sustainability Appraisal Report the Sustainability Appraisal Process

The purpose of the SA report is to communicate to interested parties the results from the SA of draft Local Plan preferred options and to inform them about the potentially significant sustainability effects of the emerging Local Plan policies.

As a consequence, consultees have an opportunity to make a better informed response to the draft Local Plan, particularly with respect to aspects regarding the sustainability performance of the policies that have been selected for the Local Plan. It also provides consultees with a better understanding of the reasons for selecting some policies and rejecting others.

Approach to the Sustainability Appraisal

Before the SA of the draft Local Plan was undertaken, a review of the existing social, environmental and economic issues currently facing the district was carried out. This was undertaken by collecting and analysing information from a variety of sources, such as the Office of National Statistics (e.g. 2011 census data), Thanet District Council's (TDC) own data relating to housing requirements and information held by other organisations such as the Environment Agency and Historic England.

In addition to this information other plans, policies and strategy documents that were considered relevant to the development of the Local Plan were reviewed. Having gathered together all of this information, a list of key sustainability issues were identified that form the basis of the SA. The issues are set out in the baseline section of the main SA Report.

Once these key sustainability issues were identified, it was important to agree a suite of sustainability objectives that robustly covered these issues in order to assess the performance of emerging policy options. To help facilitate this assessment, a series of decision making criteria were set out for the SA that allowed the appraisal team to robustly determine whether or not the draft Local Plan was likely to have positive or negative effects. The sustainability objectives and decision making criteria are set out in the table below.

Table 1: SA Objectives and Assessment Criteria.

Concern	SA Objective	Decision Making Criteria – would the policy
Housing	1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect	• Supply an appropriate quantity of housing to satisfy demand?
	demand and need.	• Supply an appropriate mix of types and tenures of properties in relation to the respective levels of demand?
		• Supply 30% of new homes as affordable homes?
		• Reduce the prevalence of unfit and derelict dwellings within the housing stock?
Health, Safety and Security	2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	• Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?
Education and Skills	3. To provide access to appropriate educational facilities for all sectors of society including focus on training	• Improve educational levels of the population of working age?
	vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	• Improve access to educational facilities for vulnerable and welfare dependant workers?
Health, Safety and	4. To increase public safety and reduce crime and fear of crime.	Reduce levels of burglaries, violent offences and vehicle crime?
Security		• Reduce public perceptions and fear of crime?
Facilities and	5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation	 Reduce the proportion of people living in deprived areas.
Services	identified across the wards.	 Ensure new residential development is within a reasonable travel distance from key facilities.
		 Ensure existing residences are adequately served by key facilities.
		 Ensure vulnerable people within the community are adequately served by key facilities.
Community	6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution	 Result in communities where residents are satisfied with their local area as a place to live?
2	is valued.	 Result in harmonious and mixed communities?
Employment	7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants	 Increase levels of employment in the population of working age?
F	to work has the opportunity to secure appropriate paid employment.	
Wealth Creation	8. To ensure the sustainable development of the proposed economic growth and encourage industrial and	Reduce the proportion of people on unemployment benefits?
weath creation	employment development at key sites within the District to support priority regeneration areas.	• Increase the GVA per capita of the district's population?
		• Encourage sustainable development of key sites across the district likely to stimulate economic growth?
		• Encourage sustainable development of key services and facilities across the district likely to stimulate
		economic growth? Deliver industrial and employment development in regeneration areas?
		• Deliver industrial and employment development that reduces unemployment in deprived areas?
Landscape Character	9. To protect and enhance the areas natural landscape, semi-natural landscape and street scene to support the	• Encourage development that will boost the tourism sector?
	tourist economy.	• Protect and enhance natural, semi-natural and built assets that support the tourist economy?
Built Environment	10. To improve efficiency in land use through the re-use of previously developed land and existing buildings,	• Encourage locating development on previously developed land, avoiding Greenfield sites?
	including reuse of materials from buildings, and encourage urban renaissance.	• Encourage an appropriate density and mix of development that reflects the needs of the population?
		• Encourage the redevelopment of derelict land and properties, returning them to appropriate uses?
Overall Sustainability	11. To ensure that a sustainable pattern of development is pursued.	 Promote development in sustainable locations that limits the need to travel to key facilities and services?
Landscape Character	12. To conserve and enhance the character and quality of the area's landscape and townscape particularly	• Improve landscape quality and the character of open spaces and the public realm?
-	associated with town centres and coastal areas.	 Protect and/or enhance the character and appearance of the District's townscape and countryside?
Cultural and Historic	13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance,	 Preserve or enhance the character and appearance of conservation areas, listed buildings, scheduled
Heritage	and their settings.	monuments and other features of cultural, historical or archaeological value and their setting?
		• Ensure that development is sensitive towards the local environment?
		 Support the restoration and re-use of existing buildings
Air Quality	14. To improve air quality in areas where air quality (pollutant) levels exceed national standards.	 Encourage improvement in air quality within Air Quality Management Areas (AQMAs)?
Transport	15. To provide a sustainable public transport network that allows access to key facilities, services and	 Improve public transport links to key facilities for existing development?
	employment opportunities without reliance on private vehicles.	 Ensure new development is appropriately serviced by public transport to enable access to key
		facilities?

Concern	SA Objective	Decision Making Criteria – would the policy
		• Promote a sustainable public transport network that reduces reliance on private vehicles?
Transport	16. To develop key sustainable transport links between Thanet and the wider Kent district and beyond,	• Improve transport links to key facilities within the district?
	including road, rail and air.	Reduce reliance on private vehicles
		• Support the development of key transport links between Thanet and the wider south East?
Waste Management	17. To reduce waste generation and disposal and achieve the sustainable management of waste.	• Promote adherence to movement up the waste hierarchy?
		Promote reduced household waste generation rates?
		Promote increased waste recovery and recycling?
Climate Change	18. To ensure development within the District responds to the challenges associated with climate change.	• Promote a proactive reduction in the volume of greenhouse gas emissions released by development across the District?
Water	19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion,	Restrict the development of property in areas of flood risk?
	coastal and fluvial flood risk, in accordance with development management policies and NPPF.	• Reduce areas available for flood storage?
		• Ensure adequate measures are in place to manage existing flood risk?
		• Ensure that development does not increase flood risk due to run-off?
		• Ensure development is appropriately future proof to accommodate future levels of flood risk?
Biodiversity	20. To conserve and enhance biodiversity.	• Provide opportunities to develop or enhance new and existing wildlife and geological sites?
		• Avoid destruction of important habitats or unique geological features?
		• Avoid damage to designated wildlife and geological sites, protected species and their habitats?
		• Support key objectives of the biodiversity action plan (BAP)?
Water	21. To protect and improve the quality of fluvial and coastal water resources, including European designated	• Encourage Compliance with WFD?
	sites.	• Encourage compliance with the EC Bathing Waters Directive?
		Promote management practices that will protect water features from pollution?
Energy Sources	22. To reduce the global, social and environmental impact of consumption of resources by using sustainably	• Promote sustainability principles in the design, procurement, and operation of development?
	produced and local products.	• Encourage developers and operators in the District to 'green' their business operations and supply chains?
		• Reduce the consumption rates of raw materials through strong sustainability policies?
Energy Sources	23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	• Encourage reduction in energy use and increased energy efficiency?
		• Encourage the development of renewable energy facilities within the District?

Sustainability Appraisal of the Local Plan

The draft Local Plan consists of a number of policies covering a wide variety of aspects of land use planning. Table 2 below summarises the findings of the sustainability appraisal by Local Plan policy. The full appraisal, which reports the findings of the appraisal of each Local Plan policy against the individual SA objectives, is reported in the main SA Report.

Table 2: Sustainability Appraisal Summary.

Policy SP01 - National Planning Policy Framework – Presumption in favour of sustainable development

The proposed policy, through support for the promotion of NPPF, would undoubtedly enhance the District due to the positive impacts seen across the majority of the SA objectives. Commonly, a no policy option would yield neutral impacts or negative as uncontrolled developments could over saturate local services and place too high a demand upon them. As such by incorporating the NPPF sustainable practices and designs will be created whereby developers and TDC work together to create a development that sustainably meets the needs of the local population whilst also been considered for its socio-economic and environmental implications.

Policy SP02 - Economic Growth

The proposed policy has no significant negative effects and provides a number of opportunities yield of 5,000 jobs. Notwithstanding the above comments, any potential negative significant effects could be mitigated, either by other Local Plan policies and the site allocation assessment process.

Policy SP03 - Land Allocated for Economic Development

Policy SP04 - Manston Business Park

The proposed policy is predicted as having the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects could be attributed to the proposed policy, however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing by potentially allowing a greater area of land for housing and other types of development.

Policy SP05 - Manston Airport

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. The effects on with respect to ecology and landscape are likely to be lesser for the development on brownfield land, when compared to development of greenfield land. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The site is well connected, with the policy requiring numerous efforts to link with and improve the public transport links, particularly with the major centres of Margate, Broadstairs, Ramsgate and Westwood.

REP/228764/003 | Issue | 11 November 2016

Page 5

Policy SP06 - Thanet's Town centres

The proposed policy will have positive effects as it promotes a proportionate town centre hierarchy that would provide services and facilities for Thanet residents in locations that are accessible. Residential accommodation would be allowed, to a degree, so long as the viability of town centres are not detrimentally affected, which is more likely to be an issue at local town centres where shop frontages are threatened. Not all SA objectives are applicable at this level, though these are assessed further as part of policies SP07 to SP10.

Policy SP07 - Westwood

The proposed policy has potential to have positive and negative effects depending on the location of development and its relationship with the receiving environment. The proposed policy would primarily deliver these benefits at the Town Centres. Where potentially adverse effects have been predicted it is anticipated that they can be mitigated either by ensuring that development management policies are provided that counter or avoid adverse effects and/or by meeting the requirements of the National Planning Policy Framework (NPPF).

Policy SP08 - Margate

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy suitable development will be encouraged across Margate. Active support and promotion of developments will be seen to promote a contemporary seaside resort to help develop the area into a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity. Transport provisions will increase to ensure the viability of the location and facilities will grow that will be of benefit to both visitors and locals. As such the impacts of policy adoption are widely positive socio-economic factor, with local character and history preserved throughout.

Policy SP09 - Ramsgate

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of the Ramsgate district will occur with the developments taking into consideration the local maritime heritage and ensuring character is preserved in order to create a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity with the creation of retail and tourism facilities. Transport provisions will increase notably by the support of the Ramsgate Maritime Policy which will seek to build upon the conflux of a major seaport and high speed rail location. As such the impacts of policy adoption are widely positive, with local character and history preserved throughout. However it should be noted that policy adoption may be to the detriment of environmental assets and that housing opportunities are not overly supported within the policy due to the tourist and economic focus.

Policy SP10 - Broadstairs

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of Broadstairs will occur with the developments promoting the creation of employment opportunities by enhancing the existing commercial, retail and tourist infrastructure. This will add future economic resilience to the area by increasing the attraction of investors and visitors. The active support of developments along promenade and beach front will enhance the tourist economy whilst creating employment opportunities. Similarly by enhancing local character and exiting features a sense of place will be established that is attractive and in keeping with local history. Policy adoption undoubtedly meets the requirements of the SA objectives.

Z'ILONDOMPTGNCL-JOBS/60000/060167524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTS/2016 UPDATE/TDC LOCAL PLAN PREFERRED OPTIONS REVISIONS - SA NTS 2016/109.DOCX

Policy SP11 - Housing Provision

Areas of new build homes have the potential to create areas that may be perceived as being safer. This is often the case when brownfield or previously developed land is developed and brought back into active use. However, this was not factored into the assessment of the scenarios at this stage, given their strategic nature.

The development of new homes will have no direct effect on the provision of public transport links. The increase in new homes will likely increase demand on public transport facilities indirectly by increasing the population of certain areas. The extent of the effect will depend on the provision of public transport facilities and the availability of public transport options for a given area. Gathering data on capacity of existing public transport facilities will be crucial in understanding the effects increased populations will have. Many of the potentially uncertain effects and adverse effects will be mitigated by other criteria and topic specific policies as well as the site assessment criteria used to assess and select site allocations.

Policy SP12 - Strategic Housing Site Allocations.

The potential effects of SP12 are covered in detail as part of SP13, SP14, SP15 and SP16.

Policy SP13 - Strategic Housing Sites - Manston Green

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. Due to its location, the proposed policy advocates housing on sites that do not currently connect well with existing urban settlements, though design of the sites can improve urban connectivity. The sites are served by public transport and available capacity on the highway network, which enables good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP14 - Strategic Housing Site at Birchington

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of a new link road to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Z'ILONDOMPTGNCL-JOBS/60000/060167524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTS/2016 UPDATE/TDC LOCAL PLAN PREFERRED OPTIONS REVISIONS - SA NTS 2016/109.DOCX

Policy SP15 - Strategic Housing Site at Westgate-on-Sea

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of a new link road to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP16 - Westwood Strategic Housing

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities. There may be a need for a new off-site school, which would benefit from identification and implementation that aligns with a phasing programme for the site. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that cone

cts well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is largely served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs and Ramsgate.

Policy SP17 - Land fronting Nash and Haine Roads

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new school, medical centre and community assembly facility. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP18 - Type and Size of Dwellings

The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such housing sustainability is appropriately met through the adoption of policy SP18.

Policy SP19 - Affordable Housing

The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such affordable housing provision is appropriately met through the adoption of the proposed policy.

Policy SP20 - Development in the Countryside

The proposed policy is likely to have a beneficial effect on the majority of the SA objectives. Many of the potentially adverse effects associated with no policy option could be mitigated by other policies in the Local Plan, though in isolation are likely to be significantly adverse.

Policy SP21 - Safeguarding the Identity of Thanet's Settlements

The proposed policy is likely to have a beneficial effect on the majority of the SA objectives. Many of the potentially adverse effects associated with the no policy option would be mitigated by other policies in the Local Plan.

Policy SP22 - Protection and Enhancement of Thanet's Historic Landscapes

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas.

Policy SP23 - Green Infrastructure

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy SP24 - Biodiversity Enhancements

The proposed policy seeks to preserve an environmental aspect and as such commonly yield positivity on similar objectives. The no policy option largely yields negative impacts as by removing protection or having no support there is the potential for unrestricted development action which could be to the detriment of environmentally sensitive parameters. Biodiversity enhancements are clearly supportive of all of the SA objectives they relate to. Whilst focusing on species and habitats, the effects of the proposed policy are more wide reaching and affect many other aspects of the natural environment.

Policy SP25 - Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserve

The proposed policy is largely a reflection of existing legislation and will yield the most substantial environmental protection and sustainability. The protection of open spaces would yield environmental benefits. The proposed policy will be restrictive to infrastructure and housing as protecting environmental assets will mean developments upon such lands will most likely be prohibited and thus restricted to other areas of Thanet.

Policy SP26 - Protection of Open Space

The protection of open spaces would yield environmental benefits. However without mitigation and the implementation of other policies within the Local Plan, the proposed policy may be restrictive to infrastructure and housing.

Policy SP27 - Provision of Accessible Natural and Semi Natural Green Space, Parks, Gardens and Recreation Grounds

The proposed policy seeks to preserve an environmental aspect and as such commonly yield positivity on a number of the sustainability objectives.

Policy SP28 - Quality Development

The proposed policy specifies that all developments must be high quality and inclusive in design thus reduce a prominent impact of the local visual display and in fact enhance its appearance. Similarly the policy stipulates that any large developments or ones of national significance have to undergo a design review to ensure development quality does not impede the local area.

Policy SP29 - Conservation and Enhancement of Thanet's Historic Environment

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas. There is also the added ability of the proposed policy to encourage the reuse of listed buildings to aid urban renaissance and also to enhance the protection of the historical and archaeologically important sites across Thanet.

Policy SP30 - Climate Change

Generally, the proposed policy seeks to protect assets through ensuring climate change resilience for new development. The proposed policy also ensures that the design of new development should consider the effects it can have on climate change issues by helping to reduce emissions.

Policy SP31 - Healthy and Inclusive Communities

Adoption of the proposed policy would yield significant positive effects upon a variety of objectives, with regards to the improvements in available health care for the community. Whilst a no policy option is not likely to cause significant negatives the added policy and effort to enhance services would create a more robust sustainability approach. Social benefits could be seen through increased recreational provisions in an environmental conscientious manner. Through creating a healthier lifestyle approach within designs and facilities the region would significantly benefit in comparison to if a no policy option was pursued. The proposed policy also encourages environmentally sustainable mixed use areas of character and charm, alongside appropriate building practices and as such a multifaceted approach to creating an appropriate healthy and inclusive community can be achieved.

Policy SP32 - Community Infrastructure

The effects of the proposed policy are considered positive as the policy contributes towards supporting existing facilities and promoting the development of new facilities to address current and future shortages. The effects of the no policy option are adverse because over the long term would not allow the capacity of facilities to be increased. All of the other remaining uncertain effects associated with the proposed policy can potentially be mitigated by development management policies.

Policy SP33 - Expansion of Primary and Secondary Schools

The proposed policy would attribute significant success with regards to the education SA objectives. It is also likely that the proposed policy will be required over the life of the plan if there is to be sufficient school place provision to meet the anticipated growth in the residential population. The potential improvement within the community could be significant due to the utilisation of existing infrastructure at the schools. Whilst expansions can accommodate new pupils, a new purpose built facility can be tailored to the needs of the local area. There are potential society benefits under the options such as increased employment form both options alongside the opportunity to potentially offer night school as a side product of expanded facilities for the wider community. A no policy option could be generationally inhibiting as a lack of investment into the education system could cause stagnation and overcrowding of resources.

Policy SP34 - Safe and Sustainable Travel

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Policy support for the growth of sustainable transport would robustly meet the demands of the public and the SA objectives.

Page 10

Policy SP35 - Accessible location

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Additional benefits of the proposed policy are likely to stem from promoting the need for developments to be located in accessible locations. This in turn could promote public transport use and reduce the need for private vehicles whilst also ensuring that developments are appropriately situated in relation to facilities and services.

Policy SP36 - Transport Infrastructure

The proposed policy is likely to have a positive effect against a number of sustainability objectives. Furthermore, the proposed policy is likely to have significant beneficial cumulative effects when considered with policies relating to greenhouse gas emissions and efficient use of resources.

Policy SP37 - Connectivity

No SA required as policy relates to statement of intent to lobby for investment

Policy SP38 - Strategic Road Network

No SA required as policy relates to statement of intent to undertake modelling of impact on strategic road network outside the district

Policy SP39 - New Rail Station

The proposed policy is likely to result in significant beneficial effects, particularly in terms of contributing towards employment, economic growth (particularly the visitor economy) and providing infrastructure to support modal shift. However, without further details of the proposed policy it is not possible to assess whether it is likely to result in significantly greater benefits than the other. Where potentially adverse or uncertain effects have been predicted mitigation measures can be used to ameliorate the effects.

Policy E01 - Retention of existing employment sites

The proposed policy is predicted to have the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects were predicted for both options, however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing, by potentially allowing a greater area of land for housing and other types of development.

Policy E02 - Home Working

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working) and by indirectly helping to make residential areas and local centres more vibrant by increasing day time weekday activity. It should however be noted that the potential sustainability benefits of this option are only likely to be realised as part of wider sustainability interventions. Any potentially uncertain and/or adverse effects can be mitigated by the requirements of the NPPF and at the local level through development management policies.

Policy E03 - Digital Infrastructure

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy E04 - Primary and Secondary Frontages

Policy adoption has the potential to have a significant sustainability effect on towns. Whilst it restricts the housing market by only allowing residential properties upon non ground floors in the primary frontage, economic functioning will enhance. Through safeguarding primary and secondary frontages into set business activities whether tourism, retail or business the frontages will not undermine one another through a conflict of use and subsequently create areas that do not undermine one another. Indirectly by adopting the policy and creating centralised hubs of activity business opportunities could potentially grow and increase employment opportunities. As a no policy option would not alter the status quo of the local economy, policy adoption undoubtedly meets the requirements of the SA objectives.

Policy E05 - Sequential and Impact Test

The proposed policy has both positive and negative effects against the sustainability objectives. The proposed policy is likely to only support out of town centre development that contributes to sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development management type policies, the implementation of the NPPF and compliance with environmental legislation.

Policy E06 - District and Local Centres

Both the proposed policy and no policy option have positive and negative effects. However, the effects of the proposed policy are generally more certain and likely to result in a beneficial effect than those associated with the no policy option. This is because the assessment deemed that the proposed policy was more likely to support out of town centre development that contributes sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development management type policies, the implementation of the NPPF and compliance with environmental legislation.

Policy E07 - Serviced Tourist Accommodation

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. Both the proposed policy and the no policy option are likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E08 - Self Catering Tourist Accommodation

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. The protection of tourist accommodation could detract from the community sense of place due to the presence of accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However providing tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy is likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Z'ILONDOMPTGNCL-JOBS/60000/060167524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTS/2016 UPDATE/TDC LOCAL PLAN PREFERRED OPTIONS REVISIONS - SA NTS 2016/109.DOCX

Policy E09 - Protection of Existing Tourist Accommodation

The proposed policy would ensure a fair assessment of economic viability across a minimum of a calendar year. This would safeguard jobs for a period of time alongside ensuring tourist accommodation is present for at least one more low/high season cycle to assess if the tourist trade will re-establish itself and be increasingly profitable. The policy would also ensure knee jerk decisions are not made by landowners to redevelop their assets. Protection of tourist accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However safeguarding tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy likely to have a number of uncertain effects. This is particularly because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E10 - Major Holiday Beaches

Policy E11 - Intermediate Beaches

Policy E12 - Undeveloped Beaches

The proposed policy is likely to have a positive effect, on job creation, economic growth and potentially the use of previously developed land. However, without this policy there would be a greater degree of uncertainty as to whether or not these effects would be realized, and would be positive or negative. The proposed policy is likely to have uncertain effects, because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E13 - Language Schools

The proposed policy is likely to result in positive effects, particularly in terms of job creation and supporting economic growth associated with language schools. The potentially negative or uncertain effects associated with the proposed policy can be mitigated by development management policies. The no policy option would avoid a lot of the potentially adverse effects associated with the proposed policy. However, over the long term in particular it could have a negative effect on the economy, if opportunities to increase the provision in this sector are lost.

Policy E14 - Quex Park

The proposed policy and no policy option commonly reflected one another in that the impacts were the same either as the future development specifics were unknown or that national legislation that already exists ensured that the objective would be met under either option. However under policy adoption it would be ensured that a local heritage and cultural asset would be preserved with the opportunity to increase local employment and helping develop a tourist industry within Thanet. The safeguarding of Quex Park in such a way would yield significant economic benefits which may not be attained under a no policy option as it would not be known if the facility would be retained and developed or not; under this option.

Policy E15 - New build development for economic development purposes in the rural area Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from rural economic development, whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.

Policy E16 - Conversion of rural buildings for economic development purposes

The proposed policy has many positive effects and under the utilisation of existing structures in rural environments it will ensure local economy, the sense of place, sustainable transport all benefit. However the policy is limited by the locations of existing structures which may not be appropriately placed for economic development if too isolated. However utilization of existing structures would have significant environmental benefits by minimising the need for construction.

Policy E17 - Farm Diversification

Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from agricultural diversification whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.

Policy E18 - Best and Most Versatile Agricultural Land

The proposed policy has the potential to contribute towards the economy, avoiding increases in flood risk and significant benefits for the protection of greenfield land from development. All of the negative and uncertain effects associated with both the proposed option and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the volume of 'uncertain' effects.

Policy E19 - Agricultural Related Development

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option is specific about where development would occur uncertain effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy and resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the 'uncertain' effects.

Policy H01- Housing Development

Policy H02A - Land on west side of Old Haine Road, Ramsgate

Policy H02B - Land fronting Nash Road and Manston Road

Policy H02C - Land fronting Park Lane, Birchington.

Policy H02D - Land south of Brooke Avenue Garlinge

Policy H02E - land at Haine Road and Spratling Street, Ramsgate

Policy H02F - Land south of Canterbury Road East, Ramsgate

Policy H02G - Land at Melbourne Avenue, Ramsgate

Under policy adoption there are specific requirements that developments must undertake in order to be granted permission. One concerns the management of natural conservation sites and infrastructure provisions. The policy states that developments must not conflict with another policy, resultantly all SA objectives are positively met as alternative polices all provide positive impacts to the objectives. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H03 - Cliftonville West and Margate central

Under the proposed policy, housing in Cliftonville West and Margate central would have specific guidance to ensure a positive sustainability outcome was achieved and that updated or new residential accommodation actively contributed to the establishment of vibrant local communities. Policy adoption would ensure historic character and scale was preserved. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H04 - Housing at Rural Settlements

Policy H04A - Land at Tothill Street, Minster

Policy H04B - Land at Manor Road, St Nicholas at Wade

Policy H04C - Land at 71-75 Monkton Street, Monkton

Policy H04D - Land at Walter's Hall Farm, Monkton

Policy H04E - Land south side of A253, Cliffsend

Policy H04F - Land north of Cottington Rd, Cliffsend

Policy H04G - Land south side of Cottington Rd, Cliffsend

Under the proposed policy, housing in rural settlements would have specific guidance to ensure a positive sustainability outcome was achieved. The developments must also comply with guidance of Policy H01 which provides positivity to all SA objectives and as such the effects would also be felt under adoption of the proposed policy. Additionally policy adoption would ensure historic character and scale was preserved; the requirement of bird surveys also shows environmental conscientiousness. Combining the requirements of the proposed policy with positive sustainability practices in relation to rural housing will occur. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H05 - Rural Housing Need

The proposed policy would release land for appropriate residential development, yet it could be to the detriment of environmental sustainability. In addition rural locations may be isolated from provisions and facilities, which may be detrimental for certain groups of first time buyers, particularly those with young families.

Policy H06 - New agricultural dwellings

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option are specific about where development would occur, effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy an resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is predicted to have both positive and negative effects, but the balance of this is unknown at this stage, as illustrated by the 'uncertain' effects.

Policy H07 - Care and Supported Housing

The proposed policy would undoubtedly increase the provisions and facilities available across Thanet. As such levels of deprivation and access to healthcare will enhance whilst it also indirectly provides the opportunity for employment. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. This could lead to the decline in the quality of life and increase deprivation across the area.

Z'ILONDOMPTGNCL-JOBS/60000/060167524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTS/2016 UPDATE/TDC LOCAL PLAN PREFERRED OPTIONS REVISIONS - SA NTS 2016/109.DOCX

Page 127

Policy H08 - Accessible Homes

By adopting the proposed policy, deprivation has the potential to be indirectly reduced by providing access to new development homes for wheelchair users whilst the developments would also have at least 20% built to lifetime standards meaning sustainability and the quality of housing would meet the demands of the local market. Subsequently the potential for positive impacts upon the objectives is largest through policy adoption to improve accessible homes. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. Similarly A no policy option may or may not meet future housing demands as plans are not known. As such sustainability would be negligible in comparison to policy adoption.

Policy H09 - Non self-contained residential accommodation

The proposed policy would induce sustainability across Thanet and is likely to yield a controlled impact across the region without fully restricting HMO locations. The uses of HMO's would not be fully restricted through the policy option, which would be a positive impact given that HMO's often provide student accommodation and low cost housing, thus a key demographic in Thanet would be accounted for and have suitable housing provisions without being to the detriment of the local area (e.g. in Broadstairs given its proximity to East Kent College and University Campus). It would take into account the specific local housing make up to ensure there is not an over saturation of such houses in one region and thus allow their spread across Thanet. It is specific in detail and guidance as it allows a controlled utilisation of the whole Thanet area as opposed to specific locations.

Policy H10 - Accommodation for Gypsy and Travelling Communities

Adoption of the proposed policy will ensure any new gypsy and traveller communities are appropriately placed to have access to existing services and facilities without placing undue stresses upon them. However support for creating appropriate sites may be to the detriment of environmental assets yet this is questionable due to existing legislation protecting such assets. The no policy option could allow unrestricted developments that may be to the detriment of local services and facilities.

Policy H11 - Residential use of empty property

The proposed policy states that developments must be compatible with nearby uses, which in turn could act as a catalyst for the improvement of local infrastructure and services. Policy adoption implements an all-encompassing policy that will be specific to housing but will also incorporate other policy benefits for the wider promotion of sustainability. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H12 - Retention of existing housing stock

Through the proposed policy, there would be the safeguarding of existing housing stocks. This would mean that a variety of housing types would be available to the market whilst also preserving other land that has not been identified for residential purposes by ensuring utilisation of existing assets. Similarly the social benefits would be the prevention of social upheaval of residents in favour of developments whist also retaining existing services and infrastructure that will most likely currently service the area to an appropriate level without causing disruption. However the policy would not actively grow employment and economic upturn yet the clauses provide the flexibility to allow tourist developments and community facilities to grow, which indirectly would create employment. A no policy option commonly would not alter the status quo and in some cases would allow unrestricted developments which could be to the detriment of several objectives. As such adoption of the policy protects existing housing which has significant social implications whilst providing flexibility for economic growth in an appropriate sustainable manner.

Policy GI01 - Locally Designated Wildlife Sites

Adoption of the proposed policy would undoubtedly enhance the protection of wildlife sites. With that said A no policy option would not damage such assets due to existing legislation. However by adding local specificity and control through the proposed policy, adoption would ensure sustainability practices are upheld by new developments with the desire to enhance and connect designated wildlife sites.

Policy GI02 - Regionally Important Geological Sites (RIGS)

Comparably both options would offer protection to RIGS given that existing legislation is in place to protect such features. However the adoption of the proposed policy would be pertinent in order to meet specific environmentally related SA objectives. Yet if nothing is done it is unlikely severe adverse effects would occur given the existing legislation around geological areas of significance.

Policy GI03 - Protected Species and other significant species

Adoption of the proposed policy would undoubtedly enhance the protection of both wildlife and protected species. Many objectives regarding the protection of biodiversity and wildlife are met. With that said A no policy option would not damage such objectives due to existing legislation.

Policy GI04 - Amenity Green Space and Equipped Play Areas

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy GI05 - Protection of Playing Fields and Outdoor Sports Facilities

Adoption of the proposed policy would be beneficial as it could help provide social benefits through preserving recreational facilities. Similarly the policy could preserve the associated health benefits of active recreation on the protected areas by encouraging and preserving exercise spaces. A no policy option would not actively support the aims of several objectives regularly yielding neutral impacts in comparison to the significant social benefits of the proposed policy.

Policy GI06 - Landscaping and Green Infrastructure

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy GI07 - Jackey Bakers

Adoption of the proposed policy could help provide social benefits through an additional facility to utilise. Subsequent health and social benefits from exercise would also follow. The potential for expansions and increased footfall at the site could create more employment/business opportunities within the immediate vicinity. This could be through direct employment at the site or even through local business needing extra staff. A no policy option would not actively support the aims of several objectives. The overall benefits of the policy potentially outweighs the negatives as the site is not a new build and the environmental effects should not be on a large scale.

Policy QD01 - General design principles

The proposed policy will contribute towards a number of SA objectives, most notably where there is a likely improvement in the quality of housing stock. Additionally there is also the potential for increasing resilience to climate change and reducing the effect on climate change, through implementing robust design standards and reducing energy efficiency respectively. The no policy option is unlikely to impact on the SAS objectives as it will not alter the status quo

Policy QD02 - Living Conditions

The proposed policy has the potential to positive impact on the objectives by encouraging the natural drying of clothes and providing adequate space for refuse disposal. The proposed policy has the potential to have a number of positive effects, including indirect effects on a sense of place and the desire people have to live at certain location or in a given settlement, supporting the visitor economy by working with and enhancing the built environment and by requiring development to take into account and work with their setting including heritage areas and features. However the most significant effect of the proposed policy is the requirement for developments to take into account their surroundings, residential amenities and neighbouring buildings in order to have a on the landscape and townscape.

Policy QD03 - Advertisements

The proposed policy has an inherently positive effect on the creation of vibrant communities as there is a clear emphasis within the proposed policy text for the effects on amenity and public safety to be considered as part of any application for advertisements and the safeguarding of townscape character, through the consideration of specific aspects, such as the appearance and the illumination of advertising.

Policy QD04 – Telecommunications

The proposed policy has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy HE01 - Archaeology

The proposed policy has direct and indirect effects on the character and sense of place of settlements, helping to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. One major significant effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE02 - Development in Conservation Areas

The proposed policy has direct and indirect effects on the character and sense of place of settlements; helping to support the economy and visitor economy in particularly as visitor attractions in their own right; and contribute to the character of townscapes. Two significant beneficial effects were predicted on SA objectives 12 and 13 (to conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas; and to preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings).

Policy HE03 - Local Heritage Assets

The proposed policy will have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adoption of the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE04 - Historic Parks and Gardens

The proposed policy will have direct and indirect effects on the character and sense of place of settlements, will help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant effect was predicted on SA objective 13 (To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings). The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Z'ILONDOMPTGNCL-JOBS/60000/060167524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTS/2016 UPDATE/TDC LOCAL PLAN PREFERRED OPTIONS REVISIONS - SA NTS 2016/109.DOCX

Policy HE05 - Works to a heritage asset to address climate change

The proposed policy is likely to have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain, because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy CC01 - Fluvial and Tidal Flooding

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from flooding.

Policy CC02 - Surface Water Management

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk through the implementation of sustainable drainage systems, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development.

Policy CC03 - Coastal Development

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change, flood risk and coastal erosion through the implementation of restrictive criteria for new developments. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development within coastal areas, particularly within 40m of the coastline or cliff top.

Policy CC04 - Sustainable Design

The proposed policy contains explicit design criteria that are likely to have significant beneficial effects on a range of sustainability objectives relating to transport, greenhouse gas emissions, waste minimisation, efficient use of resources and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant adverse effects on housing quality, which is likely to be the most prevalent form of development within the District.

Policy CC05 - Renewable energy installations

The proposed policy explicitly states a presumption in favour of renewable technologies within developments, assuming that there are no detrimental impacts, particularly visual effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.

Policy CC06 - District Heating

The proposed policy is unlikely to have an adverse sustainability effect. It is likely to have significant beneficial effects on transport, greenhouse gas emissions, waste minimisation, and efficient use of resources, and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels as part of individual heating installations.

Policy CC07 - Solar Parks

The proposed policy will contribute towards the promotion of low carbon and renewable energy with associated benefits for environmental objectives relating to air quality, biodiversity etc. The no policy option results in neutral effects.

Policy CC08 - Richborough

The proposed policy explicitly states a presumption in favour of renewable technologies within developments at Richborough, assuming that there are no detrimental impacts, particularly biodiversity effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.

Policy SE01 - Potentially Polluting Development

The proposed policy result in beneficial effects because it would allow the District to control polluting development through the planning system. The policy will be beneficial in terms of improving air quality and the quality of water resources, as well as benefits for biodiversity. The no policy option performs negatively against the objectives as it provides no such control.

Policy SE02 - Landfill Sites and Unstable Land

The proposed policy is likely to affect the use / development of previously developed land. A beneficial effect is predicted because the proposed policy will ensure that developers have better understanding of the potential structural and design issues they will have to address during construction. As a result this could help to make development of PDL more viable and less risky for developers and give others the confidence that potential instability issues have been considered. This particularly important in areas with a dynamic coastline. The no policy option would not affect the status quo.

Policy SE03 - Contaminated Land

The proposed policy will have beneficial effect on land use by helping to provide a framework that would allow potentially contaminated previously developed land to be used for development. A no policy option is likely to have a neutral effect as other legislation would require developers to remediate their sites.

Policy SE04 - Groundwater Protection

The proposed policy would benefit objectives related to sustainable development, biodiversity and the protection of water quality. However groundwater is protected by other legislation so it is uncertain whether the no policy option would actually result in detrimental effects.

Policy SE05 - Air Quality

The proposed policy is more likely to result in beneficial effects than the no policy option because, by the use of criteria, it would allow the District to control polluting development through the planning system. The proposed policy would contribute towards promoting more sustainable, low emission forms of transport as well as providing beneficial effects in relation to both air quality and biodiversity.

Policy SE06 - Noise Pollution

The proposed policy would ensure that residents and other sensitive receptors are protected from unacceptable noise at both existing and future development locations.

Policy SE07 - Noise Action Plan Important Areas

The proposed policy would ensure that noise pollution is managed in line with the Environmental Noise Directive and ensure that that communities and residential amenity is protected from unacceptable noise.

Policy SE08 - Aircraft Noise

(Policy inclusion subject to the outcomes of the Preferred Options Revisions consultation)

The proposed policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise pollution within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy SE09 - Aircraft Noise and Residential Development

(Policy inclusion subject to the outcomes of the Preferred Options Revisions consultation)

The policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise nuisance within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy SE10 - Light Pollution

The policy supports objectives to conserve the character of the areas townscape and landscape as well as biodiversity by minimising the potential impacts of light spillage and pollution. A no policy option could lead to negative effects with respect to townscape and biodiversity.

Policy CM01 - Provision of New Community Facilities

The proposed policy supports objectives to maintain and enhance existing key facilities and services, especially local services such as those in rural areas. By protecting, and allowing for enhancement of such facilities it ensures that they are still available for the most vulnerable members of society. It also promotes more sustainable modes of travel by ensuring services are available at local level and can be accessed by cycling and walking, rather than reliance on private motor vehicles. Conversely, the no policy option is likely to perform adversely against these aspects.

Policy CM02 - Protection of Existing Community Facilities

The proposed policy supports objectives to provide and maintain appropriate access to key facilities and services, including healthcare and education. By protecting such facilities it ensures that they are still available for the most vulnerable members of society. Conversely, the no policy option would perform adversely against these objectives.

Policy CM03 - Expansion of Margate Cemetery

The policy indirectly enhance natural biodiversity by providing an increased land area that would be largely undisturbed. The no policy option would be neutral in terms of the SA objectives.

Policy CM04 - Expansion of Minster Cemetery

The policy indirectly enhance natural biodiversity by providing an increased land area that would be largely undisturbed. The no policy option would be neutral in terms of the SA objectives.

Policy TP01 - Transport assessments and Travel Plans

The proposed policy has the opportunity to promote more sustainable, low carbon modes of travel. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Z'ILONDOMPTGNCL-JOBS/60000/060167524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTS/2016 UPDATE/TDC LOCAL PLAN PREFERRED OPTIONS REVISIONS - SA NTS 2016/109.DOCX

Policy TP02 - Walking

The policy has the potential to have a positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Policy TP03 - Cycling

The proposed policy has the potential to positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access.

Policy adoption would actively seek to increase safe and appropriate cycling provisions at the earliest opportunity within new developments and grow the cycling network across the District. There are numerous sustainability benefits for doing so, particularly regarding improved travel options, improved air quality and enhanced health all indirectly via the potential to reduce road traffic and vehicle use. Under a no policy option the status quo would ensure the effects would largely be neutral.

Policy TP04 - Public Transport

Adoption of the proposed policy to support the growth and active investment into public transport provisions has the potential to yield significant positive effects. The proposed policy would increase travel opportunities and reduce the number of vehicles upon roads which would have environmental and health benefits. Additionally it would increase the connectivity across the district and ensure all members of society have access to facilities, services and employment. A no policy option would not alter the status quo and as such would not actively seek to improve the public transport network.

Policy TP05 - Coach Parking

The proposed policy seeks to maintain and potentially enhance coach parking, which will have beneficial effects to the local tourist industry and for the local road network. Any development pressures applied to these sites, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP06 - Car Parking

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP07 - Town Centre Public Car Parks

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP08 - Freight and service delivery

The proposed policy seeks to implement appropriate standards for the servicing of businesses. This would reduce on street deliveries, which would have beneficial effects relating to local air quality and traffic congestion. The no policy option would potentially lead to a comparative lack of service bays if developers are not duty bound to provide appropriate provision within developments.

Policy TP09 - Car parking provision at Westwood

The proposed policy seeks to maintain parking provision at Westwood, whilst limiting the potential for increased parking provision associated with new commercial development. This would have beneficial effects on local air quality and the local transport network, as pollution and congestion associated with private car use is limited. The no policy option would retain dependency on use of private cars, which may result an ongoing increase in pollution and congestion on the roads surrounding Westwood.

Policy TP10 - Traffic Management

There is minimal difference between the proposed policy and no policy option. Both options seek to enhance sustainability within Thanet and do so in similar ways given that the local policy regularly reflects the Traffic Management Act 2004. As such adoption of the proposed policy or the no policy option would be beneficial. Incorporating specific policy regarding traffic management would add an additional layer of protection to the District and ensure traffic management measures are implemented with the best interests of the local community at the core.

New Policy SPXX – Land at Manston Court Road/Haine Road

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply. Any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

New Policy HOXX - Land at Manston Road/Shottendane Road, Margate

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply. Any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The implementation of highway improvements is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

New Policy SPXX – New Implementation Policy

The proposed policy would ensure physical and social infrastructure provisions are adequately taken forward by the council, such that the phased implementation of the infrastructure requirements aids the efficient use of land, sustainable development and access to facilities. The policy would also be beneficial in terms of co-locating social infrastructure facilities so that the communities can get the most out of the new developments. The no policy option could result in a number of physical and social facilities not being adequately provided both to the detriment of the communities.

New Policy SPXX – Strategic Routes Policy

The proposed policy would ensure key roads and junction improvements are safeguarded for future works, such that they can support the implementation of the Thanet Transport Strategy. This would enable the district to develop key sustainable links between the local road access for which the policy is directed at but also access to the strategic road network and wider transport links. A no policy option could result in a worsening of current traffic conditions on the roads highlighted on the safeguarding map and prevent the District from attaining a sustainable transport network which is coherent and linked up with local and wider transport networks.

Sustainability of Thanet's Housing Allocation

The selection of housing allocation sites followed an allocation strategy; TDC screened sites for those that could be accepted or rejected after being appraised for their availability, suitability for development and the achievability of development. As a result of the SA process a number of the sites selected for allocation were identified as being likely to result in significant adverse effects or were not suitable in capacity and thus were rejected or mitigation was proposed.

Any sites that were 'call for site' locations (i.e. sites which are privately owned and have been proposed as potential redevelopment sites by local land owners) underwent a further appraisal to add depth to the housing land allocation process. This was to create a broad overview for potential sites which were generally larger proposals outside either the existing planning system or outside the districts urban confines.

Upon completion of the process appropriate housing developments sites have been identified and proposed as suitable for the Thanet district. To address these potential significant effects policies have been included in the draft Local Plan to ensure that if these sites are developed the relevant mitigation measures are put in place.

Sustainability Appraisal of the Employment Land Allocation

The selection of sites for employment land was subject to a single assessment stage. As a result of the assessment process a number of the sites selected for allocation were identified as being likely to result in significant adverse effects. Such sites were discounted and a final four suitable employment land allocation sites were noted and are subsequently detailed within Policy SP03 of the Local Plan. The sites considered suitable for employment land development in accordance to the assessment were:

- Manston Park;
- Eurokent Business Park;
- Thanet Reach Business Park; and
- Hedgend Industrial Estate.

To address any potential significant effects policies have been included in the draft Local Plan to ensure that if these sites are developed the relevant mitigation measures are put in place, as detailed within the Policy SP03 and other relevant policies.

In addition, employment land now proposed as part of a revised policy SP05 – Manston Airport Site has been subject to sustainability appraisal as part of these Preferred Options Revisions.

Next Steps

Following consultation it may be necessary to revise or update the SA report in response to specific comments on the SA process or its findings. The SA will also require updating if, as a result of consultation, the policies and allocations in the draft Local Plan are revised. With each revision any new or amended policies or allocations will be subject to SA and compared to the options or sites that were rejected earlier on in the plan preparation process. The SA may also require updating if the Planning Inspector makes changes to the draft Local Plan.

Once the Local Plan is adopted a Sustainability Statement will be produced. This will set out the indicators that will be used to monitor any of the significant effects identified in the SA. It will also summarise how:

- Sustainability considerations have been taken into account by the Local Plan;
- Comments on the Local Plan and SA Reports have been taken into account;
- The reasons for the choice of the preferred policies and allocations in light of the alternatives; and
- The indicators and approach to be adopted to monitor significant effects.

Draft Sustainability Appraisal monitoring framework

It is anticipated that the monitoring of the SA will take place annually alongside the monitoring of the Local Plan up to 2031 in the Annual Monitoring Report. The SA monitoring framework indicates that there is a strong overlap between the two processes.

Such monitoring will enable any unforeseen adverse effects to be identified at an early stage and necessary remedial action to be undertaken.

Contextual indicators describe the wider economic, social and environmental background in which the plan operates, such as life expectancy, unemployment rates and GCSE results. In addition some of the indicators (e.g. affordable housing completions and open space standards) have been taken directly from the Local Plan monitoring framework. The indicators will be revised following the assessment of the draft Local Plan policies and allocations in light of any specific effects that are identified during the assessment process.

Sustainability Appraisal conclusion

The Local Plan will ensure new developments across the Thanet District are designed in an appropriate manner to ensure sustainability in accordance to the Strategic Priorities of Thanet District Council. Several broad overarching policies are specifically contextualised where necessary by others to add a unified purpose across all policies and strive towards sustainable development. Mitigation processes have been proposed throughout the SA process where relevant in order to deliver a positive impact for every policy.

Page 25

The land allocations for housing and employment allocations have undergone a robust appraisal to ensure only suitable sites are selected that are appropriate for their intended function.

Upon completion of the report it can be found with confidence that the draft plan is unlikely to result in significant adverse effects. The plan will promote social, environmental and economic sustainability for the Thanet district due to the cohesive but varied nature of the policies in place in order to attain the desired outcomes for new developments across the life of the plan until 2031.

Non-Technical Summary

Introduction

This document describes the methodology and the issues that the Sustainability Appraisal (SA) of the Thanet District Local Plan, has assessed. The Thanet District Local Plan will help to guide the future spatial development of the District up to 2031. It will be used to make decisions on planning applications and proposals for development.

Role of the Sustainability Appraisal Report the Sustainability Appraisal Process

The purpose of the SA report is to communicate to interested parties the results from the SA of draft Local Plan preferred options and to inform them about the potentially significant sustainability effects of the emerging Local Plan policies.

As a consequence, consultees have an opportunity to make a better informed response to the draft Local Plan, particularly with respect to aspects regarding the sustainability performance of the policies that have been selected for the Local Plan. It also provides consultees with a better understanding of the reasons for selecting some policies and rejecting others.

Approach to the Sustainability Appraisal

Before the SA of the draft Local Plan was undertaken, a review of the existing social, environmental and economic issues currently facing the district was carried out. This was undertaken by collecting and analysing information from a variety of sources, such as the Office of National Statistics (e.g. 2011 census data), Thanet District Council's (TDC) own data relating to housing requirements and information held by other organisations such as the Environment Agency and English Heritage.

In addition to this information other plans, policies and strategy documents that were considered relevant to the development of the Local Plan were reviewed. Having gathered together all of this information a list of key sustainability issues were identified to frame the SA. The issues are set out in the baseline section of the main SA Report.

A series of criteria were set out for the SA in order to determine whether or not the draft Local Plan was likely to have positive or negative effects. These all link to a set of objectives that have been developed to reflect the key sustainability issues mentioned earlier. These objectives and criteria are set out in the table below.

Concern	SA Objective	Decision Making Criteria – will the policy?
Housing	1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Supply an appropriate quantity of housing to satisfy demand? Supply an appropriate mix of types and tenures of properties in relation to the respective levels of demand? Supply 30% of new homes as affordable homes? Reduce the prevalence of unfit and derelict dwellings within the housing stock?
Health, Safety and Security	2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?
Education and Skills	3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Improve educational levels of the population of working age? Improve access to educational facilities for vulnerable and welfare dependant workers?
Health, Safety and Security	4. To increase public safety and reduce crime and fear of crime.	Reduce levels of burglaries, violent offences and vehicle crime? Reduce public perceptions and fear of crime?
Facilities and Services	5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Reduce the proportion of people living in deprived areas. Ensure new residential development is within a reasonable travel distance from key facilities. Ensure existing residences are adequately served by key facilities. Ensure vulnerable people within the community are adequately served by key facilities.
Community	6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Result in communities where residents are satisfied with their local area as a place to live? Result in harmonious and mixed communities?
Employment	7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Increase levels of employment in the population of working age? Reduce the proportion of people on unemployment benefits?
Wealth Creation	8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Increase the GVA per capita of the district's population? Encourage sustainable development of key sites across the district likely to stimulate economic growth?

Table 1: SA Objectives and Assessment Criteria.

Concern	SA Objective	Decision Making Criteria – will the policy?
		Encourage sustainable development of key services and facilities across the district likely to stimulate economic growth? Deliver industrial and employment development in regeneration areas? Deliver industrial and employment development that reduces unemployment in deprived areas?
Landscape Character	9. To protect and enhance the areas natural landscape, semi-natural landscape and street scene to support the tourist economy.	Encourage development that will boost the tourism sector? Protect and enhance natural, semi- natural and built assets that support the tourist economy?
Built Environment	10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Encourage locating development on previously developed land, avoiding Greenfield sites? Encourage an appropriate density and mix of development that reflects the needs of the population? Encourage the redevelopment of derelict land and properties,
Overall Sustainability	11. To ensure that a sustainable pattern of development is pursued.	Promote development in sustainable locations that limits the need to travel to key facilities and services?
Landscape Character	12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Improve landscape quality and the character of open spaces and the public realm? Protect and/or enhance the character and appearance of the District's townscape and countryside?
Cultural and Historic Heritage	13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Preserve or enhance the character and appearance of conservation areas, listed buildings, scheduled monuments and other features of cultural, historical or archaeological value and their setting?
		Ensure that development is sensitive towards the local environment? Support the restoration and re-use of existing buildings
Air Quality	14. To improve air quality in the District's Air Quality Management Areas.	Encourage improvement in air quality within Air Quality Management Areas (AQMAs)?
Transport	15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Improve public transport links to key facilities for existing development? Ensure new development is appropriately serviced by public

Concern	SA Objective	Decision Making Criteria – will the policy?
		transport to enable access to key facilities?
		Promote a sustainable public transport network that reduces reliance on private vehicles?
Transport	16. To develop key sustainable transport links between Thanet and	Improve transport links to key facilities within the district?
	the wider Kent region and beyond, including road, rail and air.	Reduce reliance on private vehicles Support the development of key transport links between Thanet and the wider south East?
Waste Management	17. To reduce waste generation and disposal and achieve the sustainable	Promote adherence to movement up the waste hierarchy?
-	management of waste	Promote reduced household waste generation rates?
		Promote increased waste recovery and recycling?
Climate Change	18. To ensure development within the District responds to the challenges associated with climate change.	Promote a proactive reduction in the volume of greenhouse gas emissions released by development across the District?
Water	19. To ensure appropriate development control procedures in	Restrict the development of property in areas of flood risk?
	place to manage the risks of coastal erosion, coastal and fluvial flood risk,	Reduce areas available for flood storage?
	in accordance with PPS25.	Ensure adequate measures are in place to manage existing flood risk?
		Ensure that development does not increase flood risk due to run-off?
		Ensure development is appropriately future proof to accommodate future levels of flood risk?
Biodiversity	20. To conserve and enhance biodiversity.	Provide opportunities to develop or enhance new and existing wildlife and geological sites?
		Avoid destruction of important habitats or unique geological features?
		Avoid damage to designated wildlife and geological sites, protected species and their habitats?
		Support key objectives of the biodiversity action plan (BAP)?
Water	21.To protect and improve the quality of fluvial and coastal water resources,	Encourage Compliance with WFD? Encourage compliance with the EC
	including European designated sites	Bathing Waters Directive?
		Promote management practices that will protect water features from pollution?

Concern	SA Objective	Decision Making Criteria – will the policy?
Energy Sources 22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Promote sustainability principles in the design, procurement, and operation of development?	
	produced and local products.	Encourage developers and operators in the District to 'green' their business operations and supply chains?
		Reduce the consumption rates of raw materials through strong sustainability policies?
Energy Sources	23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Encourage reduction in energy use and increased energy efficiency? Encourage the development of renewable energy facilities within the District?

Sustainability Appraisal of the Local Plan

The draft Local Plan consists of a number of policies covering a wide variety of aspects of land use planning. Table 2 below summarises the findings of the sustainability appraisal by Local Plan policy. The full appraisal, which reports the findings of the appraisal of each Local Plan policy against the individual SA objectives, is reported in Appendix E of the main SA Report.

Table 2: Sustainability Appraisal Summary.

Policy SP01 - National Planning Policy Framework – Presumption in favour of sustainable development

The proposed policy, through support for the promotion of NPPF, would undoubtedly enhance the District due to the positive impacts seen across the majority of the SA objectives. Commonly, a no policy option would yield neutral impacts or negative as uncontrolled developments could over saturate local services and place too high a demand upon them. As such by incorporating the NPPF sustainable practices and designs will be created whereby developers and TDC work together to create a development thats sustainably meets the needs of the local population whilst also been considered for its socio-economic and environmental implications.

Policy SP02 - Economic Growth

The proposed policy has no significant negative effects and provides a number of opportunities yield of 5,000 jobs. Notwithstanding the above comments, any potential negative significant effects could be mitigated, either by other Local Plan policies and the site allocation assessment process.

Policy SP03 - Land Allocated for Economic Development

Policy SP04 - Manston Business Park

The proposed policy is predicted as having the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects could be attributed to the proposed policy, however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing by potentially allowing a greater area of land for housing and other types of development.

Policy SP05 - Manston Airport

Adoption of the policy would provide sustainable impacts in that it would specifically preserve and protect environmental, cultural and heritage features of the local area through the creation of an Area Action Plan as recommended as part of the mitigation strategy. Noise and air pollution would also be mitigated meaning any future plans would ensure sustainability and viability both socially and environmentally. These impacts are largely reflective of existing legislation that would protect such assets under a no policy scenario but commonly the impacts of no policy option are unknown as future developments cannot be assessed as the plans are not known. Over saturation of facilities and services could occur under no policy option as guidance would not be provided to ensure the new local demands are appropriately met. Policy adoption is largely centred upon ensuring the Airport can be mixed use but also retain the potential to be an operational facility. The Area Action Plan for the airport should provide further mitigation and specific local development plan criteria in order to make sure that the unknown impacts are appropriately mitigated.

Policy SP06 - Thanet's Town centres

The proposed policy will have positive effects as it promotes a proportionate town centre hierarchy that would provide services and facilities for Thanet residents in locations that are accessible. Residential accommodation would be allowed, to a degree, so long as the viability of town centres are not detrimentally affected, which is more likely to be an issue at local town centres where shop frontages are threatened. Not all SA objectives are applicable at this level, though these are assessed further as part of policies SP07 to SP10.

Policy SP07 - Westwood

The proposed policy has potential to have positive and negative effects depending on the location of development and its relationship with the receiving environment. The proposed policy would primarily deliver these benefits at the Town Centres. Where potentially adverse effects have been predicted it is anticipated that they can be mitigated either by ensuring that development management policies are provided that counter or avoid adverse effects and/or by meeting the requirements of the NPPF.

Policy SP08 - Margate

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy suitable development will be encouraged across Margate. Active support and promotion of developments will be seen to promote a contemporary seaside resort to help develop the area into a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity. Transport provisions will increase to ensure the viability of the location and facilities will grow that will be of benefit to both visitors and locals. As such the impacts of policy adoption are widely positive socio-economic factor, with local character and history preserved throughout.

Policy SP09 - Ramsgate

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of the Ramsgate district will occur with the developments taking into consideration the local maritime heritage and ensuring character is preserved in order to create a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity with the creation of retail and tourism facilities. Transport provisions will increase notably by the support of the Ramsgate Maritime Policy which will seek to build upon the conflux of a major seaport, international airport and high speed rail location. As such the impacts of policy adoption are widely positive, with local character and history preserved throughout. However it should be noted that policy adoption may be to the detriment of environmental assets and that housing opportunities are not overly supported within the policy due to the tourist and economic focus.

Policy SP10 - Broadstairs

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of Broadstairs will occur with the developments promoting the creation of employment opportunities by enhancing the existing commercial, retail and tourist infrastructure. This will add future economic resilience to the area by increasing the attraction of investors and visitors. The active support of developments along

promenade and beach front will enhance the tourist economy whilst creating employment opportunities. Similarly by enhancing local character and exiting features a sense of place will be established that is attractive and in keeping with local history. Policy adoption undoubtedly meets the requirements of the SA objectives.

Policy SP11 - Housing Provision

Areas of new build homes have the potential to create areas that may be perceived as being safer. This is often the case when brownfield or previously developed land is developed and brought back into active use. However, this was not factored into the assessment of the scenarios at this stage, given their strategic nature.

The development of new homes will have no direct effect on the provision of public transport links. The increase in new homes will likely increase demand on public transport facilities indirectly by increasing the population of certain areas. The extent of the effect will depend on the provision of public transport facilities and the availability of public transport options for a given area. Gathering data on capacity of existing public transport facilities will be crucial in understanding the effects increased populations will have. Many of the potentially uncertain effects and adverse effects will be mitigated by other criteria and topic specific policies as well as the site assessment criteria used to assess and select site allocations.

Policy SP12 - Strategic Housing Site Allocations.

The potential effects of SP12 are covered in detail as part of SP13, SP14, SP15 and SP16.

Policy SP13 Strategic Housing Sites - Manston Green

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. Due to its location, the proposed policy advocates housing on sites that do not currently connect well with existing urban settlements, though design of the sites can improve urban connectivity. The sites are served by public transport and available capacity on the highway network, which enables good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP14 - Strategic Housing Site at Birchington

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of a new link road to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP15 - Strategic Housing Site at Westgate-on-Sea

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of a new link road to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP16 - Westwood Strategic Housing

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities. There may be a need for a new off-site school, which would benefit from identification and implementation that aligns with a phasing programme for the site. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is largely served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs and Ramsgate.

Policy SP17 - Land fronting Nash and Haine Roads

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new school, medical centre and community assembly facility. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP18 - Type and Size of Dwellings

The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such housing sustainability is appropriately met through the adoption of policy SP18.

Policy SP19 - Affordable Housing

The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such affordable housing provision is appropriately met through the adoption of the proposed policy.

Policy SP20 - Development in the Countryside

The proposed policy is likely to have a beneficial effect on the majority of the SA objectives. Many of the potentially adverse effects associated with no policy option could be mitigated by other policies in the Local Plan, though in isolation are likely to be significantly adverse.

Policy SP21 - Safeguarding the Identity of Thanet's Settlements

The proposed policy is likely to have a beneficial effect on the majority of the SA objectives. Many of the potentially adverse effects associated with the no policy option would be mitigated by other policies in the Local Plan.

Policy SP22 - Protection and Enhancement of Thanet's Historic Landscapes

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas.

Policy SP23 - Green Infrastructure

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy SP24 - Biodiversity Enhancements

The proposed policy seeks to preserve an environmental aspect and as such commonly yield positivity on similar objectives. The no policy option largely yields negative impacts as by removing protection or having no support there is the potential for unrestricted development action which could be to the detriment of environmentally sensitive parameters. Biodiversity enhancements are clearly supportive of all of the SA objectives they relate to. Whilst focusing on species and habitats, the effects of the proposed policy are more wide reaching and affect many other aspects of the natural environment.

Policy SP25 - Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserve

The proposed policy is largely a reflection of existing legislation and will yield the most substantial environmental protection and sustainability. The protection of open spaces would yield environmental benefits. The proposed policy will be restrictive to infrastructure and housing as protecting environmental assets will mean developments upon such lands will most likely be prohibited and thus restricted to other areas of Thanet.

Policy SP26 - Protection of Open Space

The protection of open spaces would yield environmental benefits. However without mitigation and the implementation of other policies within the Local Plan, the proposed policy may be restrictive to infrastructure and housing.

Policy SP27 - Provision of Accessible Natural and Semi Natural Green Space, Parks, Gardens and Recreation Grounds

The proposed policy seeks to preserve an environmental aspect and as such commonly yield positivity on a number of the sustainability objectives.

Policy SP28 - Quality Development

The proposed policy specifies that all developments must be high quality and inclusive in design thus reduce a prominent impact of the local visual display and in fact enhance its appearance. Similarly the policy stipulates that any large developments or ones of national significance have to undergo a design review to ensure development quality does not impede the local area.

Policy SP29 - Conservation and Enhancement of Thanet's Historic Environment

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas. There is also the added ability of the proposed policy to encourage the reuse of listed buildings to aid urban renaissance and also to enhance the protection of the historical and archaeologically important sites across Thanet.

Policy SP30 - Climate Change

Generally, the proposed policy seeks to protect assets through ensuring climate change resilience for new development. The proposed policy also ensures that the design of new development should consider the effects it can have on climate change issues by helping to reduce emissions.

Policy SP31 - Healthy and Inclusive Communities

Adoption of the proposed policy would yield significant positive effects upon a variety of objectives, with regards to the improvements in available health care for the community. Whilst A no policy option is not likely to cause significant negatives the added policy and effort to enhance services would create a more robust sustainability approach. Social benefits could be seen through increased recreational provisions in an environmental conscientious manner. Through creating a healthier lifestyle approach within designs and facilities the region would significantly benefit in comparison to if A no policy option was pursued. The proposed policy also encourages environmentally sustainable mixed use areas of character and charm, alongside appropriate building practices and as such a multifaceted approach to creating an appropriate healthy and inclusive community can be achieved.

Policy SP32 - Community Infrastructure

The effects of the proposed policy are considered positive as the policy contributes towards supporting existing facilities and promoting the development of new facilities to address current and future shortages. The effects of the no policy option are adverse because over the long term would not allow the capacity of facilities to be increased. All of the other remaining uncertain effects associated with the proposed policy can potentially be mitigated by development management policies.

Policy SP33 - Expansion of Primary and Secondary Schools

The proposed policy would attribute significant success with regards to the education SA objectives. It is also likely that the proposed policy will be required over the life of the plan if there is to be sufficient school place provision to meet the anticipated growth in the residential population. The potential improvement within the community could be significant due to the utilisation of existing infrastructure at the schools. Whilst expansions can accommodate new pupils, a new purpose built facility can be tailored to the needs of the local area. There are potential society benefits under the options such as increased employment form both options alongside the opportunity to potentially offer night school as a side product of expanded facilities for the wider community. A no policy option could be generationally inhibiting as a lack of investment into the education system could cause stagnation and overcrowding of resources.

Policy SP34 - Safe and Sustainable Travel

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Policy support for the growth of sustainable transport would robustly meet the demands of the public and the SA objectives.

Policy SP35 - Accessible location

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Additional benefits of the proposed policy are likely to stem from promoting the need for developments to be located in accessible locations. This in turn could promote public transport use and reduce the need for private vehicles whilst also ensuring that developments are appropriately situated in relation to facilities and services.

Policy SP36 - Transport Infrastructure

The proposed policy is likely to have a positive effect against a number of sustainability objectives. Furthermore, the proposed policy is likely to have significant beneficial cumulative effects when considered with policies relating to greenhouse gas emissions and efficient use of resources.

Policy SP37 - Connectivity

No SA required as policy relates to statement of intent to lobby for investment

Policy SP38 - Strategic Road Network

No SA required as policy relates to statement of intent to undertake modelling of impact on strategic road network outside the district

Policy SP39 - New Rail Station

The proposed policy is likely to result in significant beneficial effects, particularly in terms of contributing towards employment, economic growth (particularly the visitor economy) and providing infrastructure to support modal shift. However, without further details of the proposed policy it is not possible to assess whether it is likely to result in significantly greater benefits than the other. Where potentially adverse or uncertain effects have been predicted mitigation measures can be used to ameliorate the effects.

Policy E01 - Retention of existing employment sites

The proposed policy is predicted to have the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects were predicted for both options, however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing, by potentially allowing a greater area of land for housing and other types of development.

Policy E02 - Home Working

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working) and by indirectly helping to make residential areas and local centres more vibrant by increasing day time weekday activity. It should however be noted that the potential sustainability benefits of this option are only likely to be realised as part of wider sustainability interventions. Any potentially uncertain and/or adverse effects can be mitigated by the requirements of the NPPF and at the local level through development management policies.

Policy E03 - Digital Infrastructure

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy E04 - Primary and Secondary Frontages

Policy adoption has the potential to have a significant sustainability effect on towns. Whilst it restricts the housing market by only allowing residential properties upon non ground floors in the primary frontage, economic functioning will enhance. Through safeguarding primary and secondary frontages into set business activities whether tourism, retail or business the frontages will not undermine one another through a conflict of use and subsequently create areas that do not undermine one another. Indirectly by adopting the policy and creating centralised hubs of activity business opportunities could potentially grow and increase employment opportunities. As a no policy option would not alter the status quo of the local economy, policy adoption undoubtedly meets the requirements of the SA objectives.

Policy E05 - Sequential and Impact Test

The proposed policy has both positive and negative effects against the sustainability objectives. The proposed policy is likely to only support out of town centre development that contributes to sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development

management type policies, the implementation of the NPPF and compliance with environmental legislation.

Policy E06 - District and Local Centres

Both the proposed policy and no policy option have positive and negative effects. However, the effects of the proposed policy are generally more certain and likely to result in a beneficial effect than those associated with the no policy option. This is because the assessment deemed that the proposed policy was more likely to support out of town centre development that contributes sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development management type policies, the implementation of the NPPF and compliance with environmental legislation.

Policy E07 - Serviced Tourist Accommodation

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. Both the proposed policy and the no policy option are likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E08 - Self Catering Tourist Accommodation

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. The protection of tourist accommodation could detract from the community sense of place due to the presence of accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However providing tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy is likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E09 - Protection of Existing Tourist Accommodation

The proposed policy would ensure a fair assessment of economic viability across a minimum of a calendar year. This would safeguard jobs for a period of time alongside ensuring tourist accommodation is present for at least one more low/high season cycle to assess if the tourist trade will re-establish itself and be increasingly profitable. The policy would also ensure knee jerk decisions are not made by landowners to redevelop their assets. Protection of tourist accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However safeguarding tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy likely to have a number of uncertain effects. This is particularly because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E10 - Major Holiday Beaches Policy E11 - Intermediate Beaches

Policy E12 - Undeveloped Beaches

The proposed policy is likely to have a positive effect, on job creation, economic growth and potentially the use of previously developed land. However, without this policy there would be a greater degree of uncertainty as to whether or not these effects would be realized, and would be positive or negative. The proposed policy is likely to have uncertain effects, because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E13 - Language Schools

The proposed policy is likely to result in positive effects, particularly in terms of job creation and supporting economic growth associated with language schools. The potentially negative or uncertain effects associated with the proposed policy can be mitigated by development management policies. The no policy option would avoid a lot of the potentially adverse effects associated with the proposed policy. However, over the long term in particular it could have a negative effect on the economy, if opportunities to increase the provision in this sector are lost.

Policy E14 - Quex Park

The proposed policy and no policy option commonly reflected one another in that the impacts were the same either as the future development specifics were unknown or that national legislation that already exists ensured that the objective would be met under either option. However under policy adoption it would be ensured that a local heritage and cultural asset would be preserved with the opportunity to increase local employment and helping develop a tourist industry within Thanet. The safeguarding of Quex Park in such a way would yield significant economic benefits which may not be attained under a no policy option as it would not be known if the facility would be retained and developed or not; under this option.

Policy E15 - New build development for economic development purposes in the rural area

Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from rural economic development, whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.

Policy E16 - Conversion of rural buildings for economic development purposes

The proposed policy has many positive effects and under the utilisation of existing structures in rural environments it will ensure local economy, the sense of place, sustainable transport all benefit. However the policy is limited by the locations of existing structures which may not be appropriately placed for economic development if too isolated. However utilization of existing structures would have significant environmental benefits by minimising the need for construction.

Policy E17 - Farm Diversification

Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from agricultural diversification whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.

Policy E18 - Best and Most Versatile Agricultural Land

The proposed policy has the potential to contribute towards the economy, avoiding increases in flood risk and significant benefits for the protection of greenfield land from development. All of the negative and uncertain effects associated with both the proposed option and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the volume of 'uncertain' effects.

Policy E19 - Agricultural Related Development

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option is specific about where development would occur uncertain effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy and resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the 'uncertain' effects.

Policy H01- Housing Development

Policy H02A - Land on west side of Old Haine Road, Ramsgate

Policy H02B - Land fronting Nash Road and Manston Road

Policy H02C - Land fronting Park Lane, Birchington.

Policy H02D - Land south of Brooke Avenue Garlinge

Policy H02E - land at Haine Road and Spratling Street, Ramsgate

Policy H02F - Land south of Canterbury Road East, Ramsgate

Policy H02G - Land at Melbourne Avenue, Ramsgate

Under policy adoption there are specific requirements that developments must undertake in order to be granted permission. One concerns the management of natural conservation sites and infrastructure provisions. The policy states that developments must not conflict with another policy, resultantly all SA objectives are positively met as alternative polices all provide positive impacts to the objectives. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H03 - Cliftonville West and Margate central

Under the proposed policy, housing in Cliftonville West and Margate central would have specific guidance to ensure a positive sustainability outcome was achieved and that updated or new residential accommodation actively contributed to the establishment of vibrant local communities. Policy adoption would ensure historic character and scale was preserved. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H04 - Housing at Rural Settlements

Policy H04A - Land at Tothill Street, Minster

Policy H04B - Land at Manor Road, St Nicholas at Wade

Policy H04C - Land at 71-75 Monkton Street, Monkton

Policy H04D - Land at Walter's Hall Farm, Monkton

Policy H04E - Land south side of A253, Cliffsend

Policy H04F - Land north of Cottington Rd, Cliffsend

Policy H04G - Land south side of Cottington Rd, Cliffsend

Under the proposed policy, housing in rural settlements would have specific guidance to ensure a positive sustainability outcome was achieved. The developments must also comply with guidance of Policy H01 which provides positivity to all SA objectives and as such the effects would also be felt under adoption of the proposed policy. Additionally policy adoption would ensure historic character and scale was preserved; the requirement of bird surveys also shows environmental conscientiousness. Combining the requirements of the proposed policy with positive sustainability practices in relation to rural housing will occur. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H05 - Rural Housing Need

The proposed policy would release land for appropriate residential development, yet it could be to the detriment of environmental sustainability. In addition rural locations may be isolated from provisions and facilities, which may be detrimental for certain groups of first time buyers, particularly those with young families.

Policy H06 - New agricultural dwellings

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option are specific about where development would occur, effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy an resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is predicted to have both positive and negative effects, but the balance of this is unknown at this stage, as illustrated by the 'uncertain' effects.

Policy H07 - Care and Supported Housing

The proposed policy would undoubtedly increase the provisions and facilities available across Thanet. As such levels of deprivation and access to healthcare will enhance whilst it also indirectly provides the opportunity for employment. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. This could lead to the decline in the quality of life and increase deprivation across the area.

Policy H08 - Accessible Homes

By adopting the proposed policy, deprivation has the potential to be indirectly reduced by providing access to new development homes for wheelchair users whilst the developments would also have at least 20% built to lifetime standards meaning sustainability and the quality of housing would meet the demands of the local market. Subsequently the potential for positive impacts upon the objectives is largest through policy adoption to improve accessible homes. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. Similarly A no policy option may or may not meet future housing demands as plans are not known. As such sustainability would be negligible in comparison to policy adoption.

Policy H09 - Non self-contained residential accommodation

The proposed policy would induce sustainability across Thanet and is likely to yield a controlled impact across the region without fully restricting HMO locations. The uses of

HMO's would not be fully restricted through the policy option, which would be a positive impact given that HMO's often provide student accommodation and low cost housing, thus a key demographic in Thanet would be accounted for and have suitable housing provisions without being to the detriment of the local area (e.g. in Broadstairs given its proximity to East Kent College and University Campus). It would take into account the specific local housing make up to ensure there is not an over saturation of such houses in one region and thus allow their spread across Thanet. It is specific in detail and guidance as it allows a controlled utilisation of the whole Thanet area as opposed to specific locations.

Policy H10 - Accommodation for Gypsy and Travelling Communities

Adoption of the proposed policy will ensure any new gypsy and traveller communities are appropriately placed to have access to existing services and facilities without placing undue stresses upon them. However support for creating appropriate sites may be to the detriment of environmental assets yet this is questionable due to existing legislation protecting such assets. The no policy option could allow unrestricted developments that may be to the detriment of local services and facilities.

Policy H11 - Residential use of empty property

The proposed policy states that developments must be compatible with nearby uses, which in turn could act as a catalyst for the improvement of local infrastructure and services. Policy adoption implements an all-encompassing policy that will be specific to housing but will also incorporate other policy benefits for the wider promotion of sustainability. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H12 - Retention of existing housing stock

Through the proposed policy, there would be the safeguarding of existing housing stocks. This would mean that a variety of housing types would be available to the market whilst also preserving other land that has not been identified for residential purposes by ensuring utilisation of existing assets. Similarly the social benefits would be the prevention of social upheaval of residents in favour of developments whist also retaining existing services and infrastructure that will most likely currently service the area to an appropriate level without causing disruption. However the policy would not actively grow employment and economic upturn yet the clauses provide the flexibility to allow tourist developments and community facilities to grow, which indirectly would create employment. A no policy option commonly would not alter the status quo and in some cases would allow unrestricted developments which could be to the detriment of several objectives. As such adoption of the policy protects existing housing which has significant social implications whilst providing flexibility for economic growth in an appropriate sustainable manner.

Policy GI01 - Locally Designated Wildlife Sites

Adoption of the proposed policy would undoubtedly enhance the protection of wildlife sites. With that said A no policy option would not damage such assets due to existing legislation. However by adding local specificity and control through the proposed policy, adoption would ensure sustainability practices are upheld by new developments with the desire to enhance and connect designated wildlife sites.

Policy GI02 - Regionally Important Geological Sites (RIGS)

Comparably both options would offer protection to RIGS given that existing legislation is in place to protect such features. However the adoption of the proposed policy would be pertinent in order to meet specific environmentally related SA objectives. Yet if nothing is done it is unlikely severe adverse effects would occur given the existing legislation around geological areas of significance.

Policy GI03 – Protected Species and other significant species

Adoption of the proposed policy would undoubtedly enhance the protection of both wildlife and protected species. Many objectives regarding the protection of biodiversity and wildlife are met. With that said A no policy option would not damage such objectives due to existing legislation.

Policy GI04 - Amenity Green Space and Equipped Play Areas

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy GI05 - Protection of Playing Fields and Outdoor Sports Facilities

Adoption of the proposed policy would be beneficial as it could help provide social benefits through preserving recreational facilities. Similarly the policy could preserve the associated health benefits of active recreation on the protected areas by encouraging and preserving exercise spaces. A no policy option would not actively support the aims of several objectives regularly yielding neutral impacts in comparison to the significant social benefits of the proposed policy.

Policy GI06 - Landscaping and Green Infrastructure

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy GI07 - Jackey Bakers

Adoption of the proposed policy could help provide social benefits through an additional facility to utilise. Subsequent health and social benefits from exercise would also follow. The potential for expansions and increased footfall at the site could create more employment/business opportunities within the immediate vicinity. This could be through direct employment at the site or even through local business needing extra staff. A no policy option would not actively support the aims of several objectives. The overall benefits of the policy potentially outweighs the negatives as the site is not a new build and the environmental effects should not be on a large scale.

Policy QD01 - General design principles

The proposed policy will contribute towards a number of SA objectives, most notably where there is a likely improvement in the quality of housing stock. Additionally there is also the potential for increasing resilience to climate change and reducing the effect on climate change, through implementing robust design standards and reducing energy efficiency respectively. The no policy option is unlikely to impact on the SAS objectives as it will not alter the status quo

Policy QD02 - Living Conditions

The proposed policy has the potential to positive impact on the objectives by encouraging the natural drying of clothes and providing adequate space for refuse disposal. The proposed policy has the potential to have a number of positive effects, including indirect effects on a sense of place and the desire people have to live at certain location or in a given settlement, supporting the visitor economy by working with and enhancing the built environment and by requiring development to take into account and work with their setting including heritage areas and features. However the most significant effect of the proposed policy is the requirement for developments to take into account their surroundings, residential amenities and neighbouring buildings in order to have a on the landscape and townscape.

Policy QD03 - Advertisements

The proposed policy has an inherently positive effect on the creation of vibrant communities as there is a clear emphasis within the proposed policy text for the effects on amenity and public safety to be considered as part of any application for advertisements and the safeguarding of townscape character, through the consideration of specific aspects, such as the appearance and the illumination of advertising.

Policy QD04 – Telecommunications

The proposed policy has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy HE01 - Archaeology

The proposed policy has direct and indirect effects on the character and sense of place of settlements, helping to support the economy and visitor economy in particularly as visitor

attractions in their own right and contribute to character of townscape. One major significant effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE02 - Development in Conservation Areas

The proposed policy has direct and indirect effects on the character and sense of place of settlements; helping to support the economy and visitor economy in particularly as visitor attractions in their own right; and contribute to the character of townscapes. Two significant beneficial effects were predicted on SA objectives 12 and 13 (to conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas; and to preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings).

Policy HE03 - Local Heritage Assets

The proposed policy will have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adoption of the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE04 - Historic Parks and Gardens

The proposed policy will have direct and indirect effects on the character and sense of place of settlements, will help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant effect was predicted on SA objective 13 (To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings). The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE05 - Works to a heritage asset to address climate change

The proposed policy is likely to have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain, because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy CC01 - Fluvial and Tidal Flooding

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from flooding.

Policy CC02 - Surface Water Management

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk through the implementation of sustainable drainage systems, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development.

Policy CC03 - Coastal Development

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change, flood risk and coastal erosion through the implementation of restrictive criteria for new developments. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development within coastal areas, particularly within 40m of the coastline or cliff top.

Policy CC04 - Sustainable Design

The proposed policy contains explicit design criteria that are likely to have significant beneficial effects on a range of sustainability objectives relating to transport, greenhouse gas emissions, waste minimisation, efficient use of resources and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant adverse effects on housing quality, which is likely to be the most prevalent form of development within the District.

Policy CC05 - Renewable energy installations

The proposed policy explicitly states a presumption in favour of renewable technologies within developments, assuming that there are no detrimental impacts, particularly visual effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.

Policy CC06 - District Heating

The proposed policy is unlikely to have an adverse sustainability effect. It is likely to have significant beneficial effects on transport, greenhouse gas emissions, waste minimisation, and efficient use of resources, and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels as part of individual heating installations.

Policy CC07 - Solar Parks

The proposed policy will contribute towards the promotion of low carbon and renewable energy with associated benefits for environmental objectives relating to air quality, biodiversity etc. The no policy option results in neutral effects.

Policy CC08 - Richborough

The proposed policy explicitly states a presumption in favour of renewable technologies within developments at Richborough, assuming that there are no detrimental impacts, particularly biodiversity effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.

Policy SE01 - Potentially Polluting Development

The proposed policy result in beneficial effects because it would allow the District to control polluting development through the planning system. The policy will be beneficial in terms of improving air quality and the quality of water resources, as well as benefits for biodiversity. The no policy option performs negatively against the objectives as it provides no such control.

Policy SE02 - Landfill Sites and Unstable Land

The proposed policy is likely to affect the use / development of previously developed land. A beneficial effect is predicted because the proposed policy will ensure that developers have better understanding of the potential structural and design issues they will have to address

during construction. As a result this could help to make development of PDL more viable and less risky for developers and give others the confidence that potential instability issues have been considered. This particularly important in areas with a dynamic coastline. The no policy option would not affect the status quo.

Policy SE03 - Contaminated Land

The proposed policy will have beneficial effect on land use by helping to provide a framework that would allow potentially contaminated previously developed land to be used for development. A no policy option is likely to have a neutral effect as other legislation would require developers to remediate their sites.

Policy SE04 - Groundwater Protection

The proposed policy would benefit objectives related to sustainable development, biodiversity and the protection of water quality. However groundwater is protected by other legislation so it is uncertain whether the no policy option would actually result in detrimental effects.

Policy SE05 - Air Quality

The proposed policy is more likely to result in beneficial effects than the no policy option because, by the use of criteria, it would allow the District to control polluting development through the planning system. The proposed policy would contribute towards promoting more sustainable, low emission forms of transport as well as providing beneficial effects in relation to both air quality and biodiversity.

Policy SE06 - Noise Pollution

The proposed policy would ensure that residents and other sensitive receptors are protected from unacceptable noise at both existing and future development locations.

Policy SE07 - Noise Action Plan Important Areas

The proposed policy would ensure that noise pollution is managed in line with the Environmental Noise Directive and ensure that that communities and residential amenity is protected from unacceptable noise.

Policy SE08 - Aircraft Noise

The proposed policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise pollution within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy SE09 - Aircraft Noise and Residential Development

The policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise nuisance within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy SE10 - Light Pollution

The policy supports objectives to conserve the character of the areas townscape and landscape as well as biodiversity by minimising the potential impacts of light spillage and pollution. A no policy option could lead to negative effects with respect to townscape and biodiversity.

Policy CM01 - Provision of New Community Facilities

The proposed policy supports objectives to maintain and enhance existing key facilities and services, especially local services such as those in rural areas. By protecting, and allowing for enhancement of such facilities it ensures that they are still available for the most vulnerable members of society. It also promotes more sustainable modes of travel by ensuring services are available at local level and can be accessed by cycling and walking, rather than reliance on

private motor vehicles. Conversely, the no policy option is likely to perform adversely against these aspects.

Policy CM02 - Protection of Existing Community Facilities

The proposed policy supports objectives to provide and maintain appropriate access to key facilities and services, including healthcare and education. By protecting such facilities it ensures that they are still available for the most vulnerable members of society. Conversely, the no policy option would perform adversely against these objectives.

Policy CM03 - Expansion of Margate Cemetery

The policy indirectly enhance natural biodiversity by providing an increased land area that would be largely undisturbed. The no policy option would be neutral in terms of the SA objectives.

Policy CM04 - Expansion of Minster Cemetery

The policy indirectly enhance natural biodiversity by providing an increased land area that would be largely undisturbed. The no policy option would be neutral in terms of the SA objectives.

Policy TP01 - Transport assessments and Travel Plans

The proposed policy has the opportunity to promote more sustainable, low carbon modes of travel. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Policy TP02 - Walking

The policy has the potential to have a positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Policy TP03 - Cycling

The proposed policy has the potential to positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access.

Policy adoption would actively seek to increase safe and appropriate cycling provisions at the earliest opportunity within new developments and grow the cycling network across the District. There are numerous sustainability benefits for doing so, particularly regarding improved travel options, improved air quality and enhanced health all indirectly via the potential to reduce road traffic and vehicle use. Under a no policy option the status quo would ensure the effects would largely be neutral.

Policy TP04 - Public Transport

Adoption of the proposed policy to support the growth and active investment into public transport provisions has the potential to yield significant positive effects. The proposed policy would increase travel opportunities and reduce the number of vehicles upon roads which would have environmental and health benefits. Additionally it would increase the connectivity across the district and ensure all members of society have access to facilities, services and employment. A no policy option would not alter the status quo and as such would not actively seek to improve the public transport network.

Policy TP05 - Coach Parking

The proposed policy seeks to maintain and potentially enhance coach parking, which will have beneficial effects to the local tourist industry and for the local road network. Any development pressures applied to these sites, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP06 - Car Parking

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP07 - Town Centre Public Car Parks

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP08 - Freight and service delivery

The proposed policy seeks to implement appropriate standards for the servicing of businesses. This would reduce on street deliveries, which would have beneficial effects relating to local air quality and traffic congestion. The no policy option would potentially lead to a comparative lack of service bays if developers are not duty bound to provide appropriate provision within developments.

Policy TP09 - Car parking provision at Westwood

The proposed policy seeks to maintain parking provision at Westwood, whilst limiting the potential for increased parking provision associated with new commercial development. This would have beneficial effects on local air quality and the local transport network, as pollution and congestion associated with private car use is limited. The no policy option would retain dependency on use of private cars, which may result an ongoing increase in pollution and congestion on the roads surrounding Westwood.

Policy TP10 - Traffic Management

There is minimal difference between the proposed policy and no policy option. Both options seek to enhance sustainability within Thanet and do so in similar ways given that the local policy regularly reflects the Traffic Management Act 2004. As such adoption of the proposed policy or the no policy option would be beneficial. Incorporating specific policy regarding traffic management would add an additional layer of protection to the District and ensure traffic management measures are implemented with the best interests of the local community at the core.

Sustainability of Thanet's Housing Allocation

The selection of housing allocation sites followed an allocation strategy; TDC screened sites for those that could be accepted or rejected after being appraised for their availability, suitability for development and the achievability of development. As a result of the SA process a number of the sites selected for allocation were identified as being likely to result in significant adverse effects or were not suitable in capacity and thus were rejected or mitigation was proposed.

Any sites that were 'call for site' locations (i.e. sites which are privately owned and have been proposed as potential redevelopment sites by local land owners) underwent a further appraisal to add depth to the housing land allocation process. This was to create a broad overview for potential sites which were generally larger proposals outside either the existing planning system or outside the districts urban confines. Upon completion of the process appropriate housing developments sites have been identified and proposed as suitable for the Thanet district. To address these potential significant effects policies have been included in the draft Local Plan to ensure that if these sites are developed the relevant mitigation measures are put in place.

Sustainability Appraisal of the Employment Land Allocation

The selection of sites for employment land was subject to a single assessment stage. As a result of the assessment process a number of the sites selected for allocation were identified as being likely to result in significant adverse effects. Such sites were discounted and a final four suitable employment land allocation sites were noted and are subsequently detailed within Policy SP03 of the Local Plan. The sites considered suitable for employment land development in accordance to the assessment were:

- Manston Park;
- Eurokent Business Park;
- Thanet Reach Business Park; and
- Hedgend Industrial Estate.

To address any potential significant effects policies have been included in the draft Local Plan to ensure that if these sites are developed the relevant mitigation measures are put in place, as detailed within the Policy SP03 and other relevant policies.

Next Steps

Following consultation it may be necessary to revise or update the SA report in response to specific comments on the SA process or its findings. The SA will also require updating if, as a result of consultation, the policies and allocations in the draft Local Plan are revised. With each revision any new or amended policies or allocations will be subject to SA and compared to the options or sites that were rejected earlier on in the plan preparation process. The SA may also require updating if the Planning Inspector makes changes to the draft Local Plan.

Once the Local Plan is adopted a Sustainability Statement will be produced. This will set out the indicators that will be used to monitor any of the significant effects identified in the SA. It will also summarise how:

- Sustainability considerations have been taken into account by the Local Plan;
- Comments on the Local Plan and SA Reports have been taken into account;
- The reasons for the choice of the preferred policies and allocations in light of the alternatives; and
- The indicators and approach to be adopted to monitor significant effects.

Draft Sustainability Appraisal monitoring framework

It is anticipated that the monitoring of the SA will take place annually alongside the monitoring of the Local Plan up to 2031 in the Annual Monitoring Report. The SA monitoring framework indicates that there is a strong overlap between the two processes.

Such monitoring will enable any unforeseen adverse effects to be identified at an early stage and necessary remedial action to be undertaken.

Contextual indicators describe the wider economic, social and environmental background in which the plan operates, such as life expectancy, unemployment rates and GCSE results. In addition some of the indicators (e.g. affordable housing completions and open space standards) have been taken directly from the Local Plan monitoring framework. The indicators will be revised following the assessment of the draft Local Plan policies and allocations in light of any specific effects that are identified during the assessment process.

Sustainability Appraisal Conclusion

The Local Plan will ensure new developments across the Thanet District are designed in an appropriate manner to ensure sustainability in accordance to the Strategic Priorities of Thanet District Council. Several broad overarching policies are specifically contextualised where necessary by others to add a unified purpose across all policies and strive towards sustainable development. Mitigation processes have been proposed throughout the SA process where relevant in order to deliver a positive impact for every policy.

The land allocations for housing and employment allocations have undergone a robust appraisal to ensure only suitable sites are selected that are appropriate for their intended function.

Upon completion of the report it can be found with confidence that the draft plan is unlikely to result in significant adverse effects. The plan will promote social, environmental and economic sustainability for the Thanet district due to the cohesive but varied nature of the policies in place in order to attain the desired outcomes for new developments across the life of the plan until 2031.

1 Introduction

1.1 General Introduction and Background

The District of Thanet is located on the east coast of England, on the north eastern tip of Kent. Bounded by the English Channel to the north, east and south, the District is predominantly coastal. The District is bordered by the City of Canterbury District to the west, and the Dover District to the south. The district has an area of 103 square kilometres and a resident population of 134,400. There are 32 kilometres of coastline with attractive chalk cliffs and beautiful sandy beaches and bays making the area a vibrant coastal resort.

Thanet comprises of three main urban areas: Margate, Broadstairs and Ramsgate, which are all located on the coast. Interspersed between these are a number of villages and hamlets. As a consequence of the position of the three towns, almost the entire coastal area accommodates substantial built development. From Birchington-on-sea, via Westgate-on-Sea, Margate, Cliftonville, Kingsgate to Ramsgate there is limited undeveloped seafront.

The key transport networks into the area include the duelled A299 Thanet Way, which connects to the M2, the A28 Canterbury Road which links with the city of Canterbury and the A256 which serves as the link to District of Dover. Kent's international airport, formerly RAF Manston, is a hub for international travel. Ferry services (freight) are operated from Port Ramsgate¹, with the potential for passenger services in the future.

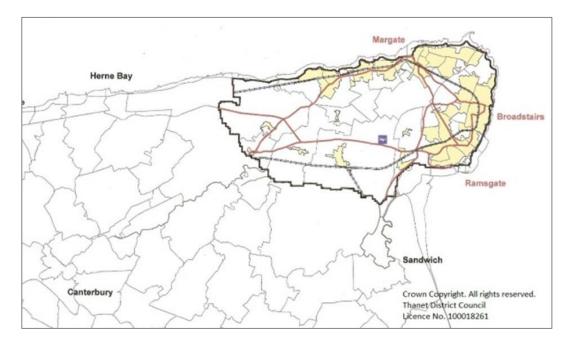

Figure 1: Location Map of Thanet District Council.

1.2 Local Development Framework Background

Following the introduction of the NPPF and the Localism Act (2011) significant changes have been made to the scoping report document to reflect the evolution of the planning policy framework for Thanet; from an LDF comprising a Core Strategy and Site Allocations to a single Local Plan.

The new Local Plan will set out the planning policy for Thanet. It will include the 'Strategy' for spatial development of Thanet up to 2031, TDC's polices for managing development in the District, and sites for achieving development requirements, including other land use designations. The purpose of the Local Plan is to provide a spatial strategy for development in Thanet and to provide a responsive and flexible supply of land for housing, employment and other uses, the future of town centres and other issues such as the role of Kent International Airport. This SA has assessed the policies to ensure that they are both strategic and site specific. This conforms to national planning policy and acts as a basis for local people to build upon with Neighbourhood Plans should they wish to do so.

While such matters have been subject to previous consultation, they have been reconsidered and re-consulted in light of differing circumstances, such as the new planning policy guidance issued by Government.

As well as providing a strategic vision to guide development in Thanet, the Local Plan will provide a comprehensive set of generic development management quality development policies to replace those currently saved from the Thanet District Local Plan, which will act as the basis for determining planning applications.

Consultation on the issues and options for future growth took place in June 2013. After this, in January 2015, TDC undertook a further round of consultation on the preferred options Draft Local Plan - this included detail on policies and allocations.

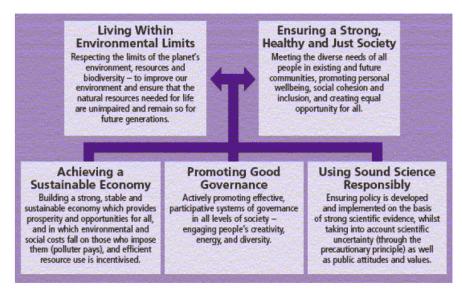

The Scoping Report was updated after a version published in 2009 underwent review. The new version was an opportunity to present a review of sustainability issues in relation to the emerging Local Plan and identify those that should be a particular focus for this SA. It was advised to update the baseline information, trends and issues for the District to enhance the sustainability appraisal of TDCs Local Plans. Baseline information was identified across a wide range of topics, help bring together key issues from an evidence based approach, with key trends and objectives for Thanet identified. A key output of the Scoping Report was the sustainability framework which was used to appraise plans and proposals.

1.3 Sustainable Development and the LDF

Under the *Planning and Compulsory Purchase Act 2004* (the Act), Sustainability Appraisal (SA) is mandatory for Local Development Documents as part of the plan making process. The process of undertaking SA assists planning authorities to fulfil the objective of integrating sustainable development principles into the plan making process and should not be seen as a separate activity.

There are a number of different definitions of sustainable development. The National Planning Policy Framework (NPPF) refers to the UK Sustainable Development Strategy *Securing the Future* in relation to its five 'guiding principles' of sustainable development: living within the planet's environmental limits; ensuring a strong, healthy and just society; achieving a sustainable economy; promoting good governance; and using sound science responsibly.

Figure 2: Guiding Principles in the UK Sustainability Strategy - Securing the Future.

Source: Securing the Future, HMG 2005

Sustainable development in England will be achieved partly through the planning system and by the policies within the NPPF assisting in fulfilling a number of roles under three dimensions:

- "an economic role contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure;
- a social role supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well-being; and
- an environmental role contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy."²

Spatial plans such as Thanet District Council's Local Plan encompassing Core Strategy and Site Allocations can have a significant role in achieving the objectives of sustainable development. The 2004 Planning and Compulsory

REP/228764/002 | Final | February 2015

² National Planning Policy Framework, Department for Communities and Local Government, March 2012

Purchase Act³ requires planning bodies, in preparing plans, to contribute to the achievement of sustainable development.

1.4 SA and SEA and Requirements for the Local Plan

1.4.1 Sustainability Appraisal

The SA is in accordance with the requirements of the European Strategic Environmental Assessment (SEA) Directive (2001/42/EC) and Statutory Instrument 1633 'The Environmental Assessment of Plans and Programmes' Regulations (2004), the National Plan Policy Framework (NPPF) 2012 and Planning Practice Guidance (updated 2014).

Sustainability Appraisal is an iterative process that identifies and reports on the likely significant effects of a plan. It is a systematic and transparent process for informing decision making. It achieves this by testing the performance of the plan against a series of environmental, social and economic objectives which define sustainable development. The process identifies the adverse sustainability issues that need to be mitigated; alongside the opportunities for such enhancement. The SA subsequently provides the basis for improving the performance of plans.

In the context of the Local Plan:

'the purpose of SA to promote sustainable development through the better integration of sustainability considerations into the preparation and adoption of plans. It should be viewed as an integral part of good plan-making and should not be seen as a separate activity'.⁴

Sustainability Appraisals help planning authorities to fulfil the objective and to promote sustainable development in the preparation of plans. The 2004 Act makes SA mandatory for all DPDs (including Local Plans) and SPDs. In addition, SA helps planning authorities to deliver more effective DPDs and SPDs that can address the significant issues facing them.

1.4.2 Strategic Environmental Assessment (SEA)

The European Directive 2001/42/EC (SEA Directive) came into effect in the UK on the 21st July 2004 in the form of '*The Environmental Assessment of Plans and Programmes Regulations 2004 (SI2004/1633)*'. These regulations require that a Strategic Environmental Assessment (SEA) is undertaken on a range of plans and programmes, including certain planning documents. The objective of the SEA Directive is:

'to provide for a high level of protection of the environment and to contribute to the integration of environmental considerations into the preparation and

³ The Planning and Compulsory Purchase Act: 2004

⁴ Sustainability Appraisal of Regional Spatial Strategies and Local Development Documents: ODPM, November 2005

adoption of plans ... with a view to promoting sustainable development' (Article 1, SEA Directive).

The SEA Directive, Annex II suggests the significance of effects of a plan relates to the characteristics of the plan as well as its implications. Annex II defines the criteria for determining the likely significance of a plan in regard to the following characteristics:

- The degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources;
- The degree to which the plan or programme influences other plans and programmes including those in a hierarchy;
- The relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development;
- Environmental problems relevant to the plan or programme; and,
- The relevance of the plan or programme for the implementation of Community legislation on the environment (e.g. plans and programmes linked to waste-management or water protection).

In relation to these characteristics it is clear the Local Plan can have a significant impact and influence when considered in the context of the SEA Directive. Therefore, when preparing DPDs and SPDs planning authorities must conduct an assessment in accordance with the SEA Directive.

1.4.3 Combined Sustainability Appraisal and SEA Process

Although the requirements to carry out SA and SEA are distinct, the Department for Communities and Local Government (DCLG, formerly ODPM) Plan Making Manual 2, the DCLG SEA Practical Guide (2005) and the Sustainability Appraisal Guidance (2005) propose that both can be satisfied through a single appraisal process⁵. They have produced guidance to ensure SAs meet the requirements of the SEA Directive whilst widening the Directive's approach to include economic and social issues as well as environmental. The DCLG are currently reviewing all their planning guidance including their Plan Making Manual, however in the meantime it remains valid. The guidance proposes that where reference is made to SA (in the application to LDFs) it should be taken to include the requirements of the SEA Directive. It should be noted that herein where reference is made to SA it should be taken to include the requirements of the SEA Directive. In practice these two processes are generally combined, provided that the matters relating to the Environment Report required by the SEA are clearly defined. The link between this combined process and its application to DPDs is illustrated in Figure 3.

⁵ http://www.pas.gov.uk/pas/core/page.do?pageId=152450

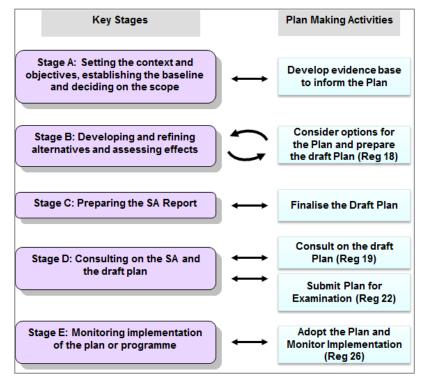

Figure 3: The SA and Plan development process.

Source: Planning Advisory Service.

Sustainability Appraisal differs from SEA in that it expands the focus of the assessment to include social and economic considerations. Therefore, the Local Plan has been subject to both assessment processes. However to avoid unnecessary repetition the results from the two processes have been documented within one report (this Sustainability Appraisal Report). The table below sets out the SEA requirements and where relevant information can be found within this report. For the avoidance of doubt the information in this SA Report meets all of the requirements.

Table 3: Signposting where the requirements of the SEA have been met

Required stages from the SEA Directive	Relevant section of this SA Report
(a) An outline of the contents, main objectives of the plan or programme and relationship with other relevant plans and programmes (article 5)	Section 6
(b) The relevant aspects of the current state of the environment and the likely evolution thereof without the implementation of the plan or programmes;	Section 7
(c) The environmental characteristics of areas likely to be significantly affected	Section 7
(d) Existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance such as areas designated pursuant to Directives 79/409/EEC and 92/43/EEC	Section 7

Required stages from the SEA Directive	Relevant section of this SA Report
(e)The environmental protection objectives, established at international, community or member state level, which are relevant to the plan or programme and the way those objectives and any environmental considerations have been taken into account during its preparation	Section 7
(f)The likely significant effects on the environment including on issues such as biodiversity, population, human health, fauna, flora, soil, water, air, climatic factors, material assets, cultural heritage including architectural and archaeological heritage, landscape and the interrelationship between the above factors.	Section 9
(g) The measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme	Section 9 (where appropriate)
(h) An outline of the reasons for selecting alternatives dealt with and a description of how the assessment was undertaken including any difficulties encountered in compiling the required information	Sections 2, 8 and 9
(i) A description of the measures envisaged concerning monitoring	Section 10
(j) A non-technical summary of the information provided under the above headings	Non-Technical Summary
Consultation Authorities with environmental responsibility, when deciding on the scope and level of detail of the information which must be included in the environmental report (Art. 5.4)	Scoping report consultation occurred in the Summer of 2014

The Guidance emphasises the importance of the following areas in conducting appraisals:

- Collecting and presenting baseline information;
- Predicting the significant effects of the plan and addressing them during its preparation;
- Identifying reasonable plan options and their effects;
- Involving the public and authorities with social, environmental and economic responsibilities as part of the assessment process; and,
- Monitoring the actual effects of the plan during its implementation.

1.5 The Local Plan Process

Thanet District Council is currently preparing a new Local Plan for the District the Thanet Local Plan to 2031, which when finalised, will form the statutory planning framework for determining planning applications and will replace the 'saved' policies from the Thanet Local Plan 2006.

The Thanet Local Plan will set out the policies and proposals for the development and use of land within the District and help guide regeneration over the period to 2031. They are subject to independent examination and consultation and must be deliverable, viable and realistic.

Under the Planning and Compulsory Purchase Act 2004, Thanet District Council was required to carry out a SA of its Local Plan. The SA was used to inform each subsequent stage of plan production.

Paragraph 165 of the National Planning Policy Framework states that 'a sustainability appraisal which meets the requirements of the European Directive on strategic environmental assessment should be an integral part of the plan preparation process, and should consider all the likely significant effects on the economic, social and environmental factors'. Table 3 demonstrates how this SA Report achieves these requirements.

Each stage of the SA followed approximately the same format as detailed in the following section. The detailed structure of each report was subject to review due to the iterative nature of the process.

2 Appraisal Methodology

2.1 Key Stages of the SA Process

The SA process, as defined in the DCLG SA and SEA Guidance 2005, must be applied to all DPDs and SPDs. This process that was undertaken is outlined below.

Table 4: Stages and tasks in the SA process

STAGE 1 PRE-PRODUCTION
Stage A: Setting the context and objectives, establishing the baseline and deciding on the scope
Task A1: Identifying other relevant plans, programmes and sustainability objectives
Task A2: Collecting baseline information
Task A3: Identifying key sustainability issues and problems
Task A4: Developing the SA framework
Task A5: Consulting on the scope of the SA
STAGE 2 PRODUCTION
Stage B: Developing and refining options and assessing effects
Task B1: Testing the Local Plan objectives against the framework
Task B2: Developing the Local Plan options
Task B3: Predicting the effects of the Local Plan
Task B4: Evaluating the effects of the Local Plan
Task B5: Considering ways of mitigating adverse effects and maximising beneficial effects
Task B6: Proposing measures to monitor significant effects of implementing the Local Plan
Stage C: Appraising the effects of the Local Plan
Task C1: Preparing SA report
Stage D: Consulting on the SA and Local Plan
Task D1: Public participating on the SA report and Local Plan
Task D2: Assessing significant changes
STAGE 3 ADOPTION
Task D3: Making decisions and providing information
Stage E: Monitor implementation of Local Plan
Task E1: Finalising aims and methods for monitoring
Task E2: Responding to adverse effects

The SA identified and assessed the likely significant effects of the policies and site allocations of the Local Plan against economic, social and environmental objectives. This included appraisals of the options developed through the plan preparation process and policies and proposals contained within the Local Plan.

2.2 Adding value: influencing the content of the plan

The SA process adds value and transparency to the preparation of the Local Plan and the decision making process. This has occurred through the consideration of economic, social and environmental effects of the plan (including the no policy option) using a robust framework which is specifically designed to address the issues and problems of TDC. The framework is described in Section 8 of this report.

Sustainability Appraisal as a tool, helps to ensure that the Local Plan meets the requirements of sustainable development as well as to ensure consistency and rigor in the plan process. The Government's SA guidance states that '*integration of SA into DPD preparation is fundamental to sound plan making*' (paragraph 3.19).

The SA reports provide a detailed commentary of how the SA has informed and influenced the preparation of the Local Plan and highlights the difference it has made.

2.3 Policy Context

This SA Report and the development of the Thanet Local Plan have taken into account the recent changes to the Planning System, including:

- The Localism Act 2011 which provides for the introduction of Neighbourhood Plans and the 'revocation' (abolition) of Regional Spatial Strategies (in the case of Thanet the South East Plan)
- The National Planning Policy Framework (March 2012) which simplifies national planning guidance, reemphasises the role of planning in supporting economic development, and requires each Local Planning Authority to produce a single Local Plan, with additional and supplementary planning documents only used when necessary.

3 Stages of the SA Process

This SA Report describes the results from the SA of the Local Plan Preferred Options and also fulfils the requirements of Stages B and C of the SA process as defined in the SA guidance note and illustrated in Table 4.

3.1 Scoping stage

The scoping stage (Stage A) involved collating information on the economic, social and environmental aspects of the district, identifying the main sustainability issues and developing sustainability objectives to allow the likely significant effects of the Local Plan to be assessed. The process is cyclic and has been carried out systematically from task A1 to A4 (see Table 4).

Scoping is a requirement of the SEA Directive and has been incorporated into a single document to inform the appraisal process. It has resulted in the development of an objective-led framework to overcome the issues identified in the baseline and policy review. This framework was used as a basis for assessing the economic, social and environmental effects of the plan.

3.2 Assessment stage

The assessment stage (stage B in Table 4) involved examining the likely significant effects of the Local Plan policies and site specific land use allocations, and the SA Objectives and assessment criteria (Table 1) were used as the criteria to assess effects.

The potential effects of the Local Plan, acting as a comprehensive planning document on its own, has also been accounted for. The impacts and combination between the plan and others such as the Local Transport Plan and the National Planning Policy Framework (NPPF) have also been accounted for.

Where potentially significant adverse effects have been predicted an accompanying mitigation strategy has been supplied. This will illustrate how to reduce the impact to a level where it is no longer likely to have significant effect.

3.3 Structure of the SA Report

In summary, the format of this SA report is as follows:

- Introduce the SA process and provide background/ context into preparation of the Local Plan (Section 1);
- Describe the method and purposes of the assessment, including the testing of the issues and options (Section 2);
- Describe the consultation that has been undertaken so far during the SA process (Section 4);
- Describe the appraisal of the Issues and Options (Section 5)
- Provide a review of relevant international, national, regional and local plans, policies and strategies describing the policy context and sustainability objectives relevant to Thanet(Section 6);

- Define the characteristics of the district (the baseline) and identify the key problems and sustainability issues (Section 7);
- Set out the framework for assessing the likely significant sustainability effects of the plan (Section 8);
- Assess the effects of the proposed Local Plan policies (Section 9);
- Outline the potential monitoring arrangements and indicators that could be used to monitor the likely significant effects predicted by the SA; and a description of the next steps that will be undertaken during SA process (Section 12).

4 **Consultation Process**

The SA process has included the following consultation stages (please note that stages described in brackets refer to those set out in Table 4):

4.1 Scoping (SA Stage A)

The Scoping Report was sent to the three statutory consultation bodies⁶ (Environment Agency, Natural England and English Heritage), for a consultation period between March and April 2013. The Scoping Report was also logged on the Local Plan consultation area of TDC's website and offices to allow others the opportunity to comment on the scope of the SA.

4.2 Development of the Draft Local Plan (SA Stage B)

The development of the draft Local Plan has considered a number of development options and these have been assessed by the SA. The assessment has been informed by dialogue and consultation with statutory consultation bodies and local stakeholders, including council members and officers from key council departments and local area forums that has occurred as part of the Local Plan development process.

4.3 Further stages

The SA will be subject to consultation as part of the Local Plan publication document consultation (i.e. Stages and D).

If, following consultation on the publication version of the Local Plan, changes are required that have not been subject to SA, then further SA work will be carried out. If this is necessary then this SA Report will be updated and consulted on at the same time as the updated Local Plan. We will produce a final SA environmental report for the Local Plan at publication stage. This will set out how the SA has influenced the Local Plan process from issues and options through to submission outlining any changes in the light of previous consultation work.

⁶ English Nature, the Countryside Agency and the environmental activities of Rural Development Service have been brought together to form Natural England (October 2006) - the new integrated government agency for the natural environment. Natural England acts as a statutory consultee on the SA along with the Environmental Agency and English Heritage.

5 Appraisal of Issues and Options

5.1 **Options Appraisal**

A fundamental part of the plan preparation process was the identification and assessment of options. A SA of the Local Plan options was required in order to arrive at the preferred options, and to comply with the requirements of the European SEA Directive. An appraisal of the issues and options associated with the policy themes was undertaken in May 2013.

The SA assessed, in broad terms, the likely significant effects of the plan options against the objectives of the framework, as set out in Table 1 of this report. It fulfilled the requirements of stage B (Table 4) of the SA process. The findings of the appraisal were reported in the Summary Interim SA⁷. It has also set out the options and outlined the reasons for selecting or eliminating them. This was performed in order to establish a relevant option that would promote sustainability across the district by meeting the demands of the objectives.

The Summary Interim SA appraised the strategic options proposed for plan components, such as whether housing should be located on the urban edge of existing settlements or whether there should be new settlements. These broad assessments influenced key TDC documents, including the Strategy for the Planned Location of Housing⁸ that was used to help identify potential housing sites within Thanet.

5.2 Housing and Employment Land Allocation

A comparative SA process was utilised for the assessment of housing land and employment land allocations across the District. At the issues and options stage of the SA process, broad options were tested such as the amounts and location of housing and employment land. Following this, housing sites submitted under the SHLAA process and current employment allocations and sites were assessed according to their suitability, availability, and achievability. Employment sites were assessed to determine which sites should be retained and which could be released for alternative development. This assessment is reported in Appendix A and has in turn helped the appraisal of housing and economic sites against the SA framework, as reported in Appendix E.

The process was utilised to assess all potential development sites, including those that are outside the existing planning policy framework or Thanet's urban confines. Upon completion of the comparative assessment, appropriate sites for housing and employment land, have been proposed across Thanet. This process is considered compliant and robust in assessing alternatives as required by the Environmental Assessment of Plans and Programmes Regulations 2004.

⁷ Arup (May 2013) Summary Interim Sustainability Appraisal

⁸ https://www.thanet.gov.uk/publications/planning-policy/strategy-for-the-planned-location-of-housing/

5.3 Developing the Options

The process of developing options involved extensive consultation with members of the public, local stakeholders and statutory consultees. These options ranged from broad strategic and spatial options (i.e. showing different levels of growth) through to detailed policy options.

TDC carried out a consultation on Issues and Options for the new local plan from 3rd June - 14 August 2013. Comments were invited on various options that could form new planning policies. TDC then considered the responses to that consultation, and comments made in the Summary Interim SA regarding the performance of the options against the sustainability framework.

In preparation for voluntary consultation on the preferred options in January 2015, TDC provided a suite of documents to aid the consultation process, one of which was the Justification for Preferred Options⁹. This document provided the rationale behind the decision making employed for selecting preferred options and the reasons why other options were rejected. Full details of this process and the justification for preferred options is presented in Appendix G.

6 Review of Relevant Plans, Programmes, Strategies and Objectives

6.1 Introduction

The Local Plan and the SA were influenced by many different plans and programmes. This is recognised by the SEA Directive which requires a review of relevant plans and programmes to be completed in the preparation of the SA document.

'the plan's relationship with other relevant plans and programmes' and 'the environmental protection objectives, established at international, (European) Community or national level, which are relevant to the plan...and the way those objectives and any environmental considerations have been taken into account during its preparation'.

Directive 2001/42/EC - SEA Annex 1 (a), (e)

Therefore, the first stage of completing the SA was to review relevant international, national, regional and local, policy guidance, plans and strategies. This ensures:

- the Local Plan and the SA framework are in line with the requirements of other relevant plans and policies;
- that inconsistencies or constraints are suitably dealt with;
- sustainability objectives, key targets and indicators are reflected in the SA; and,
- relevant baseline data is accounted for.

6.2 **Document Review for Thanet**

The 2009 Core Strategy Scoping Report identified a substantial list of PPPs (Policies, Plans and Programmes) relevant for the Thanet district. This list has been comprehensively reviewed, updated and rationalised by removing redundant or irrelevant policies, plans and programmes, so as to focus on those that are key and most recent and relevant.

The relevant PPPs are summarised in Table 5 below. The identification of relevant PPPs is an on-going process and the list will be updated once new PPPs become available and will be included in any subsequent SA Reports.

The review process provided a valuable source of information and a framework for developing different components of the SA, specifically:

- Key national policies (including the National Planning Policy Framework) and sub-regional (county) plans, provided the planning context for Thanet;
- Local documents provided a valuable source of baseline information, and identified local priorities and objectives as well as conditions that the Local Plan and SA should adhere to; and,
- Several documents including existing appraisals provided sustainability objectives and indicators and guided the development of the SA Framework.

6.3 NPPF Review: Local Plan and Development Context

The Local Plan must be in conformity with the National Planning Policy Framework (NPPF). The NPPF came into force on 27th March 2012 and emphasises the importance of the planning system to contribute to the achievement of sustainable development. It sets out how planning process can accomplish this by meeting a number of requirements that are listed below:

- 1. Building a strong, competitive economy;
- 2. Ensuring the vitality of town centres;
- 3. Supporting a prosperous rural economy;
- 4. Promoting sustainable transport;
- 5. Supporting high quality communications infrastructure;
- 6. Delivering a wide choice of high quality homes;
- 7. Requiring good design;
- 8. Promoting healthy communities;

- 9. Protecting Green Belt land;
- 10. Meeting the challenge of climate change, flooding and coastal change;
- 11. Conserving and enhancing the natural environment;
- 12. Conserving and enhancing the historic environment; and
- 13. Facilitating the sustainable use of minerals.

Many of these policy areas overlap with the SA objectives that have been developed for this SA. As a result the SA process can help to inform the development of the Local Plan and potentially identify areas where the Local Plan might not comply with the NPPF.

7 Baseline and Key Sustainability Issues

7.1 Scope and Purpose of the Baseline and Key Issues

The Environmental Assessment of Plans and Programmes Regulations 2004 require a discussion of the 'relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan or programme' (Annex 1 (b)). In the case of SA the baseline and identification of key issues must also consider social and economic aspects in addition to the environmental issues specified in the SEA Directive.

The baseline review provides the basis for predicting and monitoring the effects of the LDDs. The sustainability issues identify positive or negative issues for Thanet relevant to the Local Plan that has the capacity to influence, optimising enhancement opportunities and minimising detrimental impacts associated with the plan.

The collation of baseline data and identification of sustainability issues has been completed for Thanet as a whole, and is therefore relevant to all documents in the Local Development Scheme. The baseline situation and key issues for Thanet will inevitably change over time, as such it is important that it is monitored and regularly revised.

7.2 Collating Baseline Information and Identifying Sustainability Issues for Thanet

7.2.1 Approach and Format

The baseline for Thanet was collated in a number of iterative stages. Firstly the review of plans and policies listed in Appendix B provided an initial understanding of the current situation in Thanet in terms of environmental, social and economic performance and enabled key sustainability issues for Thanet to be identified. This subsequently assisted in the development of the SA Framework.

Indicators were developed for each of the SA Objectives in the framework. Both qualitative and readily available quantitative information was collected for each of the SA Objectives.

It should be recognised that due to the interrelationships between the SA Objectives, the baseline data is often relevant to more than one objective. The data collection focused on identifying:

- The current situation in Thanet;
- The trend for Thanet; and
- Regional and national comparisons.

7.2.2 **Problems and Constraints**

Every effort has been made to provide an accurate baseline review. Production of the baseline has been effective at providing an understanding of current issues, and there is generally enough information available to enable an informed and detailed appraisal. However, during the collection of baseline data some problems were encountered placing limitations on data. This included:

- as the scope of the information required is wide, data has not been available for a number of indicators;
- the consistency between data sources;
- the availability of historic data; and
- the availability of up to date information.

As a result of the scale of data it has not always been possible to divide information up in a way which optimises its value e.g. by geographic area or by different communities or groups. For example, environmental data is often collected at a high level and it has not always been possible to collate at a more localised level.

Thanet is interlinked socially, economically and physically to adjacent areas and while trans boundary issues are important and need to be considered in the appraisal process, it was not possible to represent such complex issues in the baseline data collation; and,

It is acknowledged that the baseline situation in Thanet is ever changing, thus baseline data can quickly go out of date, including the information within this SA Report. Every effort has been made to ensure the report contains up to date environmental data.

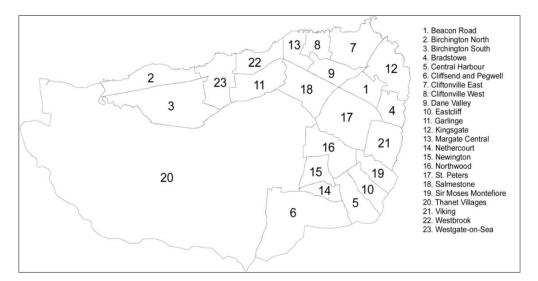

7.2.3 Future Baseline

Further consideration should be given to how data could be made available for the on-going data collection required during the implementation and monitoring of the Local Plan. This could include expanding the data managed through the central computerised resource for Thanet linked to Geographical information Systems (GIS), consistency of data type, aligning indicators across Thanet and where possible in the wider district and other areas, and the collation of new or evolving indicators.

7.3 Baseline

A review of the Thanet baseline conditions is given below, making comparisons on topics such as housing, employment, education and cultural heritage between Thanet, Kent, the South East and England. In order to make comparisons between the different areas within Thanet, Wards, which are electoral districts that form part of the UK administrative hierarchy, have been utilised. The different Wards of Thanet are shown in Figure 4.

Figure 4: Thanet District Electoral Wards⁴.

7.3.1 Geography and Situation

The District of Thanet is located on the east coast of England and on the north eastern tip of Kent. Bounded by the English Channel to the north, east and south, the District is predominantly coastal. The District is bordered by the City of Canterbury District to the west, and the Dover District to the south.

Thanet comprises three main urban areas: Margate, Broadstairs and Ramsgate, all located on the coast. Interspersed between these are a number of villages and hamlets. As a consequence of the position of the three towns, almost the entire coastal area accommodates substantial built development. From Birchington, via Westgate-on-Sea, Margate, Cliftonville, Kingsgate to Ramsgate there is limited unused seafront.

The key transport networks into the area include the duelled A299 Thanet Way, which connects to the M2, the A28 Canterbury Road which links with the city of Canterbury and the A256 which serves as the link to District of Dover. Kent's international airport, formerly RAF Manston, is a hub for international travel. Ferry services (predominantly freight) are operated by Transeuropa ferries to the Continent from Port Ramsgate¹⁰.

7.3.2 Demographics

Thanet's population has gradually increased in recent years with a net inmigration offsetting a negative natural change (births to deaths). In 2011, the population was estimated at 134,186 with 64,555 males and 69,631 females¹¹. Of these, around 79,000 are aged 16-64 (the approximate working age of the population).

The population of children and young people is similar to the England average for boys and lower for girls aged below 10, but has a higher than average for both

⁴ http://www.kent.gov.uk/NR/rdonlyres/91197ED9-F552-4D4D-9206

¹⁰ http://en.wikipedia.org/wiki/Thanet

¹¹ http://www.neighbourhood.statistics.gov.uk

boys and girls for 10 to 19 year olds. Thanet's population exhibits a considerable smaller proportion of under 50s compared to the England profile. As a popular coastal location, Thanet attracts people of retirement age with the largest section of the local population are the over 64's accounting for 40% of residents¹². The related effect of high numbers of elderly residents is a low, and decreasing, proportion of people of working age, between 16 and 64, and a lower than average percentage of residents aged between 0 and 15¹³. This demographic skew towards an older population has been a characteristic of the area since at least the 1991 census.

7.3.3 **Population projection**

Population projections from the Office for National Statistics (ONS) show a rise in all age groups over the next five years (except the 5 to 19 range) with the largest percentage rise occurring in the 65+ age group. This is predicted to increase by 12% in 2015. The overall population projected increase for Thanet for 2015 is 3.3% and would result in the size of population just under 136,000. This will have an impact on health services because people over 60 will generally have greater health needs and service usage.

In the coming years the population over 65 and 85 is expected to grow significantly placing increased demand on local health services. Thanet's seaside location and relatively low property prices attract high numbers of unemployed and asylum seekers to the District. These dependent and vulnerable groups have led to, especially in the more deprived areas, a highly transient population abundant with people with support needs.

Figures from the Office of National Statistics show that the population of Thanet is predominantly white, although there are increasing concentrations of people from different Black and Minority BME backgrounds.

			England		
			Number	%	
All people	134,186	100%	53,012,456	100%

Table 6: Population by ethnicity for Thanet in 2011.

Source: 2011 Census Table KS201EW

Thanet has a number of ethnic minority populations. National census data from 2011 shows the largest of which 'White other' makes up 4.2%. 14More detailed figures of ethnicity breakdown showing 'white: other Eastern European' to be the largest ethnic minority with 0.85% of the total population. Thanet's ethnic minorities are not evenly distributed across the District, but rather concentrated in the wards that are the most socially and economically deprived. One such group

REP/228764/002 | Final | February 2015

¹³ Thanet Local Plan Background Paper: Housing.

¹⁴ http://www.kent.gov.uk/your_council/kent_facts_and_figures/equalities_and_diversity/ethnic_profile.aspx

categorised as 'white: other white' have high representations in Cliftonville West (18.2%) and Margate Central (8%) and. This clustering of ethnic minority populations is likely to be a result of net in-migration from EU countries into the more socially and economically deprived areas of Thanet.

7.3.4 Economic Trends and Performance

In a study of resilience to economic downturns Thanet was poorly rated at 295th out of 324 districts¹⁵. From 2002 to 2007 Kent saw an increase of 11.9% in VAT registered companies compared to an increase of just 1.7% in Thanet during the same period.

In 2011 3,875 VAT companies were registered in Thanet across a number of industries including Wholesale and Retail (730 companies), Construction (510 companies), Hotels and Restaurants (390 companies) and Manufacturing (220 companies). Overall for Thanet the number of business 'births' have increased 3.9% from 2010-2011, although the percentage growth is considerably less than on average across Kent, (15.1%), and in Great Britain as a whole $(11.7\%)^{16}$. Also, business closures are down compared to last year, and the decline in Thanet 10.9% was higher than the decline in Kent (-4.5%) was lower than nationally (-8.0%)¹².

According to 2011 Business Register and Employment Survey (BRES) data Thanet's employment growth in 2011 was -2.36%. The South East figure was -1.06% and England's figure was -0.25%. The recession has contributed to this as the whole country has seen negative growth in the national economy for a number of years. Table 7 shows a decrease in business survival rates between 2012 and 2011.

Thanet Economic Indicators.	2009	2010	2011	2012
% 16-64 claiming out of work benefits	14.9	17.2	17.6	17.3
Unemployment rate (%)	3.2	5.1	5.2	5.6

Table 7: Thanet Key Economic Indicators

Source: Kent Economic Indicators 2012

¹⁵ "Thanet least resilient to economic woe, research finds". BBC News. 9 September 2010

¹⁶ https://shareweb.kent.gov.uk/Documents/facts-and-figures/Economy/Business-Demography-2011.pdf

Since 2001 Thanet's GVA (Gross Value Added) increased from £9,405 per capita to £13,239 (38.5% increases). However, the Thanet figures are still significantly lower than the Kent average¹⁷.

Tourism is an important sector in Thanet's economic performance supporting 10% of the workforce and worth 2.5 million. ¹⁸ Tourism and the green sector (e.g. renewable energy) are growing and comprise a larger proportion of total businesses in comparison to the South East region and England.

Public Services, including education and health are the largest employer in the district, accounting for 35.3% of the workforce¹¹. The proportion of people that are home working is relatively high in the District. Skilled trades and caring, leisure and other service occupations are dominant, and Thanet has fewer professional and managerial occupations than the South East and also England although the number of people employed in these occupations has been rising for the last few years.

7.3.5 Employment

Thanet's history of economic problems is reflected in a persistently high unemployment rate, which has consistently been above regional and national averages. During the growth period between 1995 and 2007 the unemployment numbers decreased, and at a slightly faster rate than national rates and by 2007 the gap between the unemployment rate in Thanet and that in Kent (and England) was the smallest it had been for a decade. However following the 'credit crunch' in 2007 and the subsequent economic recession that has struck the national economy in late 2008 the progress made in closing the gap with national economic performance achieved over the previous decade has been reversed. Thanet has been hit particularly hard with unemployment increasing faster than regional and national rates. With unemployment levels at almost three times that of the south east and twice the national average a significant and increasing gap between the rates of unemployment in Thanet, peaking in February 2012 at 6.1% compared to Kent 3.2% the South East (2.4%) and National $(3.7\%)^{19}$ averages remains. Thanet also has the highest youth unemployment rate in the Kent County Council area at 13.4% of 18 - 24 year olds.

A clear disparity in the employment rates and types can be seen between the different Thanet Wards, and is shown in Figure 5. Comparing the deprived area of Cliftonville West against the relatively affluent Thanet Villages, for example, shows that Thanet Villages have a substantially higher economically active population (76.8%) compared to Cliftonville West (64.7%). This social gap is highlighted further when comparing employment by occupation that shows the Thanet Villages having 16.9% working as mangers and senior officials, and 11% working as professionals compared to 12.2% and 6.9% respectively for Cliftonville West¹². The differences in employment trends are not restricted to comparisons between rural and urban wards. Comparing Cliftonville West against

¹⁷ http://thanet.gov.uk/publications/planning-policy/thanet-local-plan-monitoring-report-april-2011-to-march-2012/economic-development-and-regeneration/

¹⁸ www.Thisiskent.co.uk

¹⁹ www.kent.gov.uk : Business Intelligence Statistical Bulletin – January 2013

Eastcliff, another predominantly urban ward close to Ramsgate, shows that Cliftonville West has 5.2% less economically active people than Eastcliff¹².

Around a quarter of all enterprises in the area have turnover below the VAT threshold – this includes a significant number of self-employed people. Nationally over 30% of employees work for a business that employs 200 or more workers. In the Thanet area it is less than 20%. By contrast, over a quarter of people work in a firm employing fewer than 10 people, nationally it is one fifth.

The differences in employment trends are not restricted to comparisons between rural and urban wards. Comparing Cliftonville West against Eastcliff, another predominantly urban ward close to Ramsgate, shows that Cliftonville West has 7.8% less economically active people than Eastcliff¹².

Note: Official figures such as the official labour market statistics (Nomis) are based on the idea of a 'working age'. For most figures the age bracket 16-64 has been used to measure this, but changes to retirement age make this an estimate rather than exact number for 'working-age'.

The following chart shows Job Seeker Allowance (JSA) claimant rates since November 2007. The rates for the two wards have not reduced in line with the district and national rates.

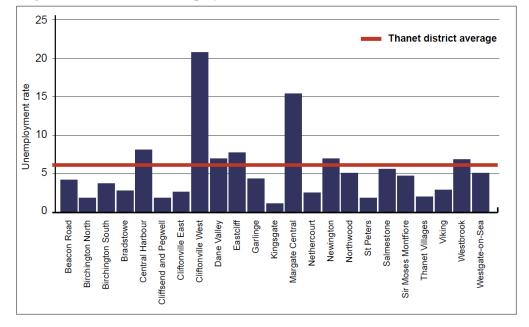

Figure 5: Thanet Ward Unemployment Rates.

Source: nomisweb.co.uk

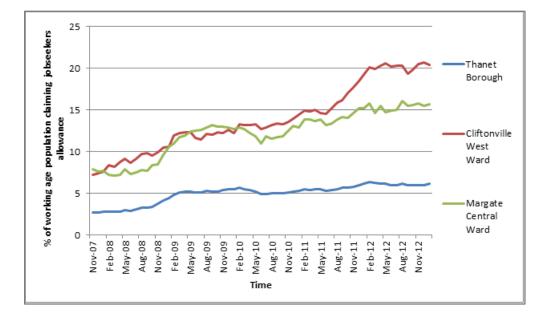

Figure 6: Percentage of Working Age Residents claiming job seekers allowance from 2007 to 2013.

Source: nomisweb.co.uk

Since 2007 the percentage of the working age population claiming Jobseeker's Allowance has increased from 2.7% in November 2007 to 6.1% in January 2013. At a ward level this trend is also evident. However in the last 18 months Cliftonville West Ward has experienced even greater increases than the District as whole or other similar wards such as Margate Central with approximately 1 in 5 people of working age claiming the Jobseeker's Allowance.

7.3.5.1 Employment Space and Land Provision

The estimated stock of employment premises shows that the number of premises in Thanet is spread evenly across the three main employment uses, namely offices, factories and warehouses, at approximately 500 premises each. These amounts compare reasonably well with the rest of the districts in the East Kent Area, being greater than the amounts in Dover and Shepway, and not significantly less than that of Canterbury and Ashford. However, in terms of the number of office premises, the majority of other districts in Kent have a greater number of offices than the other employment generating uses, with only Gravesham having a lower stock of office premises, in Kent, than Thanet.

Thanet contributes much more significantly with industrial stock than office stock, in terms of overall floorspace, being close to the median of all south east districts. Other than new retail developments which have taken place across East Kent, there has been little new commercial development, when compared to the rest of the south-east. In terms of the amount of floorspace available in the district, in April 2008 there was approximately:

- 100,000 m2 office floorspace,
- 335,000 m2 of factories and

• 155,000 m2 warehousing space.

The total amount of employment floorspace is the second lowest out of the East-Kent Districts, with only Shepway having less. Like the overall stock, the amount of Office floorspace in Thanet is lower than the other districts, with office accounting for only 17% of the stock in the district. Factories account for 56% of the stock, whilst warehouses account for 26% of the stock²⁰.

In terms of changes to stock of employment premises figures taken from the Thanet Employment Land Review 2010 suggest there was an increase of 17,000m² between 2005 and 2008, which is equivalent to 3% of the stock. This is the highest overall increase compared to other districts in East Kent. The largest gain in Thanet was in Office space adding 15,000 m² to its stock, a similar amount to Ashford. A decrease was seen in the amount of factory floorspace across all Districts with the exception of Dover. Thanet saw a loss of 5,000 m², less than Ashford and Canterbury, but more than Shepway.

Due to the lack of new development, supply tends to be dominated by poorer, second hand buildings, rather than new or refurbished accommodation. Land values remain depressed in East Kent peripheral locations, whilst values in more active commercial locations have improved. The depressed values are primarily a result of an over-supply of land, and poor infrastructure. The average value for industrial land in 2006, in Dover was £180,000 and Thanet £150,000 per acre.

Vacancy levels provide an indication of the balance between supply and demand for employment premises. Consultation with TDC has revealed that vacancies are limited, particularly since the demolition of Grupo Antolin.

Employment land allocations established over previous Local Plan periods have remained vacant, and there is strong competition from elsewhere in Kent Thanet has a significant amount of land available in public ownership that is serviced and available for development. Thanet District Council is currently reviewing its strategic site allocations within the Employment Land Review which is being carried out as part of the Local Plan process.

7.3.6 Education and Skills

In 2011 8% of people in Thanet aged 16-64 had no qualifications compared to a regional average of 7.9 and national average of 10.6% and whilst 29% of residents have a qualification at NVQ4 or higher this is still significantly lower than the regional 36.9% and the national average of 32.9 $\%^{12}$.

GCSE results for 2011 show 69.1% of pupils obtained 5+GCSEs at Grade A-C, which compared poorly in relation to other Kent districts including Dover 74.2% and Canterbury 77.1%

The distribution of residents in possession of qualifications is uneven across the District. Within the Ward of Newington, 53.5 % of people are without a qualification or level of qualification is not known. This is the worst in Thanet, 17.7% worse than the national average and 17.4% worse than the nearby

²⁰ Thanet Employment Land Review 2010

Bradstowe Ward. Margate Central and Sir Moses Montefiore also have far fewer residents with higher qualifications, 9.0% and 9.5% respectively, than both the National average (20.4%) and that of Bradstowe (20.5%).

7.3.7 Transport

7.3.7.1 Existing Transport Network

Thanet has long been perceived as isolated from London, the M25 and access to other parts of the country. The District and County Councils, Government and European agencies have realised that considerable investment would be needed to overcome this perception. In recent years a number of transport connections have improved significantly. Thanet is connected to the UK motorway network via the A299 Thanet Way (a dual carriageway), which links the District to the M2. The A254 (Ramsgate Road) and A255 (St Peters Road) connect Margate to Ramsgate and Broadstairs. The recently completed East Kent Access Road (A256) provides a fast connection to the A20/M20 at Dover and to the Port of Dover and Channel Tunnel. The Access Road also links Thanet with other major economic assets such as Manston, Kent's International Airport (6 miles from Margate), the Port of Ramsgate and Discovery Park to the UK's main arterial road network in less than 60 minutes. Additionally, the introduction of High Speed 1 rail services in 2009 has reduced commuting from central London to Ramsgate to 76 minutes and Margate to 88 minutes.

Whilst the district does have a number of good transport links it is still on the periphery of Kent and the South-East, and in particular its proximity to London is poor compared to the rest of the south-east.

7.3.7.2 By Air

Thanet's Manston Airport is currently closed after passenger and freight operations ceased in May 2014. Previously, Manston Airport predominantly handled freight, catering for around 32,000 tonnes a year, and which was forecast to grow to 400,000 tonnes by 2033²¹.

In addition to freight cargo the airport operated a number of chartered passenger services to selected destinations. It has a runway capable of handling fully laden Boeing 747s. In 2011 figures indicate that it handled 37,000 passengers and 27,000 tonnes of freight per annum. Dutch airline KLM operated a shuttle service to Schipol Airport in Amsterdam where a significant number of onward connections can be accessed by UK customers. A Masterplan for the Airport produced in 2009 estimated a significant increase in passenger and freight numbers for the airport to 2033 along with details of future airport expansion such as a new terminal building. Manston airport has currently been purchased for redevelopment, though studies assessing the viability for continued airport use are ongoing.

²¹ Freight action plan

Lydd Airport near Ashford is easily accessed from Thanet. The Airport is currently awaiting the Public Inquiry decision on its application to extend its runway as well as a new terminal building capable of processing 50,000 passengers per year. The proposed developments may have knock on effects and implications for the Thanet district in terms of economic regeneration, infrastructure improvements and traffic.

7.3.7.3 **Private Transport**

Although there is some peak hour congestion, Thanet generally enjoys comparatively free-flowing traffic conditions despite over half (55.8%) of work journeys being made by car. Access to private transport is an indicator of the social disparity within Thanet, and within some of its Wards, such as Margate Central, the proportion of households without a car or van are significantly higher (52. 94%) than both the national and Thanet averages at 25.8% and 29.8%¹¹ respectively. It is expected that the extensive network of bus services in the area is a result of the low car ownership rather than a positive encouraging factor to low private car ownership.

7.3.7.4 Public Transport

Thanet's bus service provider is Stagecoach. Bus usage nationally, which was declining, has now started to grow. Closer examination reveals that growth in London and the other metropolitan areas disguises a drop elsewhere. Bus use in Thanet, however, remains relatively high (10% of trips in 1998) with an annual growth of around 2% year on year²².

7.3.7.5 Community Transport

Thanet Community Transport Association provides accessible minibuses for residents who are unable to use other public transport. This is a door-to-door diala-ride service timetabled to operate to/from selected destinations each day.

7.3.7.6 By Rail

Within Thanet District, the rail network connects the main centres of population via seven stations. These provide links within Thanet, to other major centres in East Kent as well as to London and beyond. The principal stations are Ramsgate, Broadstairs and Margate, with routes in three directions:

- London via Faversham and Chatham;
- London via Canterbury and Ashford;
- Dover and Folkestone via Sandwich.

In addition the Introduction of the High Speed Domestic Rail Service at the end of 2009 has reduced the travel time to London St Pancras from Ramsgate via Ashford to 76 minutes. For purposes of comparison, the mainline journey time to

REP/228764/002 | Final | February 2015 C:USERSISTEVEN.HARDINGIDESKTOP'3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

²² Thanet District Transport Plan 2005-2011, Thanet District Council

London Victoria is around 2 hours and to London Charing Cross up to 2 hours and 30 minutes.

Limited facilities currently exist for the carriage of cycles, although the recently introduced Class 375 units do have wheelchair spaces, which can be used for cycles. The Channel Tunnel Rail Link has benefited the UK as a whole but has led to substantial job losses in the in the cross channel ferry industry.

7.3.7.7 By Sea

Ramsgate Port handles freight traffic and has passenger ferry capacity. The Port is operated by Thanet District Council. Ramsgate Marina also enables private vessels to be moored.

7.3.7.8 Pedestrians

Thanet has a road network which mostly accommodates footways on both sides, not only in the main towns and seaside villages but also along the distributor routes connecting them. Public Rights of Way network offers walkers (and sometimes horse riders and cyclists) a good connection across open countryside to the coast, rural settlements and end destinations, with some circular walks offering superb views of both coast and countryside combined. The Thanet Coastal Path follows the longest stretch of chalk coastline in the country, the route having been set up in the 1990s.

In March, 2004 Thanet District Council published its Walking Strategy 'Feet First'. This is intended to compliment Kent County Council's 'Walking Strategy for Kent' published in 2001. It includes an agreed network of multi-purpose walking routes to be developed and on which work has now commenced.

7.3.7.9 Commuting

With regards to people commuting into the district to work, this is the lowest in Kent, with 87% of people working in the District also living there. This indicates that Thanet has a small employment catchment and cannot attract a large number of people from outside the district to work there, demonstrating the relative lack of employment opportunities. In contrast only 38% of people who work in Dartford also live there. More people therefore travel out of the district to work, than those that travel to work in Thanet. The total number of people working in Thanet District is 40,694 (2001). This net out-commuting suggests that there are insufficient jobs to meet the needs of the local population, let alone attract employees from outside of the District. Table 8 summarises the amount of commuting out of the district.

Destination	Number	Percentage
Within Thanet	36,812	74%
Dover	4218	9%
Canterbury	3673	7.4%

Table 8: Commuters C	Out of Thanet
----------------------	---------------

Destination	Number	Percentage
Greater London	1293	2.4%
Inner London	847	1.6%
Shepway	435	0.9%
Swale	449	0.9%
Ashford	403	0.9%
Maidstone	379	0.8%
Other in Kent	334	0.6%
Outer London	331	0.6%
Medway	272	0.5%
Other outside Kent	189	0.4%

(Source: TDC Employment Land Review May 2010)

Approximately 30% of people living in the District commute out of Thanet to work. Out-commuting levels are the greatest to Dover and Canterbury, with a significant number also commuting to London.

Thanet District Council are currently preparing their transport strategy and associated transport plans with a horizon period up to 2031, and is consistent with the emerging Local Plan, hence the previous Transport Plan 2005-2011 represents most recent data in most cases.

7.3.8 Deprivation

The area of the Coastal South East is identified as having economic underperformance as a result of its relative remoteness, isolation, deprivation, ageing population, transient population, poor quality housing and limited agglomeration advantages resulting from a restricted (180°) hinterland.

Thanet's long-term economic and social problems have resulted in high levels of deprivation shown in high unemployment and low levels of education. The 2010 Indices of Multiple Deprivation consist of seven domains of relative deprivation and are constructed using 36 variables. These domains are:

- Income
- Barriers to housing
- Health and disability
- Crime
- Education
- Living environment
- Employment

These indices show that compared to other English districts Thanet had become relatively more disadvantaged since the 2007 data release and remained in England's 20% most deprived districts. Thanet is the 65th most deprived local

authority district in England (out of 354), moving it within England's top 20% deprived. It is the 2nd most deprived local authority district in the South East Region (out of 67) and is the most deprived district in Kent. Thirteen of Thanet's wards (57%) rank within the 20% most deprived in Kent and includes the most disadvantaged Lower Super Output Area (LSOA) in Kent, Margate Central ward, closely followed by Cliftonville West and then Newington ²³.

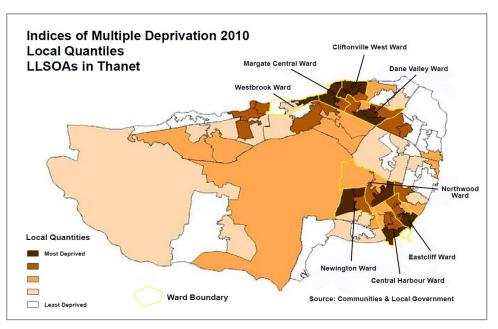

Figure 7: Indices of Multiple Deprivation for Thanet.

Source: Thanet Commissioning Plan 2012-2014: (taken from Kent public health observatory website).

Levels of car/van ownership are a key indicator of deprivation. Approximately 30% of the district's population live in households with no cars/vans compared to just 20% for the whole KCC area. However, the percentage of households with access to one car/van is similar to the average for the KCC area showing that few households have second and third cars. This has implications for accessibility for particular groups as when the car is being used (for example during the working day) other household members (often women and children) do not have access to the car and must rely on public transport. Likewise, where households have no car/van reliance on other forms of transport is high.

Thanet's coastal towns have also been subjected to a wider trend of declining seaside resorts. The 2008 report "England's seaside towns – a benchmarking study" Thanet was reported as amongst the weakest economies of 37 seaside towns and as the most disadvantaged of those with populations over 100,000 people. Consequently wages in the district are lower than the rest of Kent with a median weekly full time wage being £412.50 in 2011 compared to £546.20 in Kent and £554.40 for the South East region. However a number of regeneration strategies and policies are in place to reverse this decline, including the draft Economic Strategy.

REP/228764/002 | Final | February 2015 C:USERSISTEVEN.HARDING/DESKTOP/3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

²³ https://shareweb.kent.gov.uk/Documents/facts-and-figures/Deprivation/id2010-kent-ward-level.pdf

7.3.9 Housing

Approximately 5% of Thanet's population live in the District's rural settlements. The remaining 95% reside in the coastal urban belt including the towns of Margate, Broadstairs and Ramsgate. Forecast demand for housing from 2011 to 2031is 3,714 (zero net migration) and 11,648 (short term migration)²⁴.

7.3.9.1 House Tenure and Type

Based on Office of National Statistics data (2011 Census) of the 59,513 households in Thanet District 62% are owned. Of the remaining 12.6% of the households are socially rented and 25.4% are privately rented or rent free households. When this is compared to the 2001 Census data it is apparent that there has been a noticeable change in the type of tenure. For example in 2001 70% of households were in private ownership therefore there is a current trend of people moving away from private ownership and/or delaying moving on to the housing ladder. The percentage mix of dwellings in Thanet District is set out below based on data form the 2011 census:

- Detached homes (19.6%)
- Semi-detached homes (28.1%)
- Terraced homes (22.7%)
- Purpose built flats (17.5%)
- Flats in converted buildings (9%)
- Flats in commercial buildings (1.6%)
- Caravans and other mobile temporary structures (1.4%)

(Note: due to rounding the % values do not equal 100%).

Again, there has been a noticeable shift in the mix of housing since the previous with a greater proportion of the housing mix being flats rather than houses and bungalows. This is partially a factor of the housing market which has seen investors looking towards flats and apartments as preferred investments during the last decade.

7.3.9.2 Household size

Data collated by the Office of National Statistics illustrates numbers of people living in households in Thanet District and these are illustrated in Table 9. Of the households in the District 70% are one or two person households.

Household Size	Thanet	South East	England
All Household Spaces With At Least One Usual Resident	59513	3555463	22063368
1 Person in Household	20646	1023154	6666493

Table 9: Comparison of Household size.

REP/228764/002 | Final | February 2015 C:USERSISTEVEN.HARDINGIDESKTOP'3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

²⁴ Thanet District Council – Housing Topic Paper 2013 (Local Plan evidence base).

Household Size	Thanet	South East	England
2 People in Household	20566	1247950	7544404
3 People in Household	8516	551773	3437917
4 People in Household	6281	492843	2866800
5 People in Household	2312	167581	1028477
6 People in Household	861	53824	369186
7 People in Household	204	11742	88823
8 or More People in Household	127	6596	61268

7.3.9.3 Housing Market

The housing market has undergone a number of changes over the last decade and beyond. This is clearly illustrated by Figure 8 below which shows a general trend of increasing numbers of sales which peaked in 2007 and then slumped significantly to below the 1996 level where it has remained.

7.3.9.4 Housing Condition

The percentage of local authority dwellings that fall below the 'Decent Homes' standard has been falling over the last decade. Since 2010 none of TDC's dwellings are below this standard. There is no data on private dwellings to compare. However, there is evidence that the energy efficiency of private sector housing is increasing (from an averages score of 40 in 2001 to 55 in April 2011 Source CLG 2013).

The Private Sector Housing Strategy refers to a housing condition survey from 2002. It showed:

- 16.2% are privately rented in Thanet. This is a very high percentage compared to 8% in the South East and 8.9% in England as a whole;
- 70.7% are owner occupied which quite closely mirrors the situation in England but is slightly less than the South East at 77%;
- 7.3% are owned by Housing Associations, which is higher than England at 4.6% and the South East at 6%; and
- 935 properties are long term empty. There are approximately 2489 vacant dwellings altogether. (HIP return as at 31st March 2007.

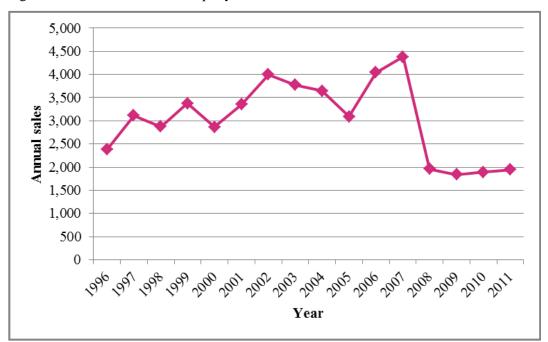

Figure 8: Number of house sales per year within Thanet District.

Source: CLG Statistics 2013

7.3.9.5 Affordability

The number of new affordable homes provides each year in the District are illustrated in Figure 9 below. The trend has varied significantly since 1991and is driven by factors such as the availability of residential developments to provide affordable homes.

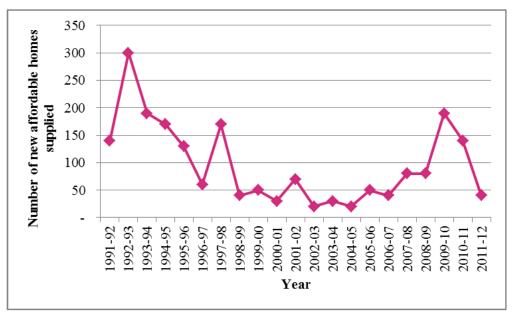

Figure 9: Additional affordable homes provided in Thanet each year.

Source: CLG Housing Statistics 2013.

7.3.9.6 Existing Need

As part of the evidence base for the Local Plan TDC has commissioned forecasts of the possible future demand for housing based on population and economic changes over the life of the plan. As part of this forecast a number of scenarios have been developed based on growth from Thanet's 2011 housing stock. Scenarios have been developed to reflect the degree of uncertainty regarding the existing and future needs because these, to a certain extent, are beyond the control of the Local Plan. However it is able to influence and support growth hence why this data is included in this SA Report.

Scenario	Implied net dwellings 2011-2031 (and implied annual average)	
1 Economic Baseline	9,639	(482)
2 Economic Risk-Based	7,600	(380)
3 Economic Policy-On	11,791	(590)
4 Zero Net Migration	3,714	(186)
5 Short term Migration	11,648	(582)

Table 10: Indicative forecast for net new dwellings over the life of the Plan.

Source: Thanet District Council, 2013

7.3.9.7 Homelessness

Of the 59,513 households in Thanet, 0.002% are classified as homeless and there is a general trend of homelessness declining since 2007 when the current statistical data was collected.

7.3.10 Health

In general the health of people living in Thanet is worse than the average for England. The comparatively poor health of people within Thanet cannot just be attributed to the number of older residents with 23.36% of people suffering an illness that limits their day-today activities²⁵. This is higher than the average for the South East region at 15.71% and 17.64% in England and Wales.

Life expectancy for both men and women is lower than the average for England. The life expectancy for males is 76.4 compared to the southeast average of 79.7 and the national average of 78.2 and the life expectancy for women is 81.8 compared to a regional average of 83.5 and a national average of 82.2^{26} Those people considered to be in very good health in Thanet is 40.7% compared to national average of $47.2\%^{17}$.

REP/228764/002 | Final | February 2015

C:\USERS\STEVEN.HARDING\DESKTOP\3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

²⁵ Office of National Statistics, Long-term health problem or disability 2011.

²⁶ http://www.kent.gov.uk/your_council/kent_facts_and_figures/area_profiles.aspx

There are inequalities in health within Thanet. Life expectancy is 12.3 years lower for men and 7.2 years lower for women in the most deprived areas of Thanet than in the least deprived areas²⁷.

The health of Thanet's residents shows geographical trends with 2% of people in Cliftonville West being defined as having 'Very bad health' compared to just 1.7% of those in Thanet, 1.0% in the South East and 1.2% National averages. Those people with a limiting long-term illness are highest in Westgate-on-Sea with more than 1 in 4 people suffering (27.89%) compared to Thanet Villages which at 19.01% is the lowest in the district but still higher than the Kent and Medway Health Authority (17.01%), South East (15.47%) and National (17.93%) averages.

Although the early death rate from cancer has improved over the last ten years, it has remained higher than the England average. Smoking kills over 300 people per year in Thanet and the rate of hospital admissions for alcohol-related harm is worse than the England average (over 2,800 hospital stays per year)²⁸.

7.3.11 Community Involvement and Cohesion

Turnout in the Thanet District Council Election in 20011 was 42%, a 7% improvement on the 2007 election when the turnout was 35%¹⁷.

The components of population change based on the 2011 census estimate a net migration for Thanet of 270 which represents a population increase of 0.2% similar to the increase for Kent¹¹. Thanet has high number of migrants, asylum seekers and unemployed. These groups could be seen as a highly transient population which could potentially impede upon social cohesion and the sense of community.

As part of Thanet District Council's attempts to improve community involvement and cohesion, and as part of the requirements set by Central Government, Thanet has a Statement of Community Involvement which describes and sets out actions to improve Thanet's sense of community with strong emphasis on consultation and public involvement.

7.3.12 Crime and Safety

Thanet has much higher overall levels of crime compared to the Kent Average with the highest recorded crimes in 2010/2011 being violence against person offences, followed by criminal damage offences.¹¹ However crime has reduced within the district by 22% since 2006, resulting in nearly 3,000 less crimes being committed anti-social behaviour continues to be a big issue for residents with more than 8,000 incidents reported to both the police and TDC every year²⁹.

For the 12 month period ending September 2012 Thanet had marginally above the national highest rates of crime in Kent, peaking between July and September at 76.1 per 1000 residents compared to an average of 57.7 per 1,000 for the Kent

²⁷ Thanet Clinical commissioning group 2012-2014

²⁸ Thanet Health profile 2009

²⁹ Thanet District Council Corporate Plan 2012-2016

force and an average for England and Wales of 66.86. From September 2009 to September 2012 the quarterly reported crime rate in Thanet fell only marginally from 20.74 to 20.35 per 1000 residents³⁰.

The most recent available data concerning Fire and Rescue Services is for 2006 and indicates the Kent Fire service responded to 1,641 incidents including 267 primary fires (i.e. dwelling, non-derelict buildings, road vehicles and other outdoor buildings). This constitutes a reduction from the previous year²⁸.

7.3.13 Biodiversity and Green Spaces

Thanet has number of local, national and international protected areas for conservation and habitat protection (listed in Appendix C). These environmentally designated areas are concentrated along the 32km of attractive chalk cliff and sandy beach coastline and include internationally important feedings grounds for birds and rare chalk reef and cave habitats. Details of the designations are given below.

7.3.13.1 Thanet Coast and Sandwich Bay Ramsar Site

This is a coastal site, consisting of a long rocky shore, adjoining estuary, dune, maritime grassland, saltmarsh, and grazing marsh. The site supports internationally important numbers of wintering turnstone *Arenaria interpres*, nationally important numbers of a breeding seabird, and four waders: ringed plover, golden plover, gray plover, and sanderling. Large numbers of migratory birds use the site for staging. Large numbers of nationally scarce invertebrate species occur at the site. Human activities include recreation, bait collection, agriculture, livestock grazing, fishing, and hunting³¹.

7.3.13.2 Sandwich Bay Special Area of Conservation (SAC)

The site is designated primarily for its sand dune habitats (~35% of total area) the area also includes improved grassland (10%) and salt marshes (15%). The habitats that are the primary reason for the sites designation are; Embryonic Shifting dunes where the dominate species is *Elytrigia juncea*; Shifting dunes along the shoreline with *Ammorphila arenria*; and, fixed dunes with herbaceous vegetation³².

7.3.13.3 Thanet Coast SAC

The site is designated primarily for the reef habitats that support unusual communities. The longest stretch of coastal chalk in the UK the site represents 20% of the UK resource of this type and 12% of the EU resource. This site contains an example of reefs on soft chalk along the shore. Thanet has sublittoral chalk platforms that extend into the littoral and form chalk cliffs. The sublittoral chalk reefs within the site are comparatively impoverished, owing to the harsh

REP/228764/002 | Final | February 2015 C:USERSISTEVEN.HARDING/DESKTOPI3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

³⁰ www.police.co.uk

³¹ http:///www.ramsar.org/profile/profiles_uk.htm

³² Joint Nature Conservation Committee, http://www.jncc.gov.uk

environmental conditions in the extreme southern area of the North Sea, but they are an unusual feature because of the scarcity of hard substrates in the area.

Species present include an unusually rich littoral algal flora, essentially of chalkboring algae, which may extend above high water mark into the splash zone in wave-exposed areas. Thanet remains the sole known location for some algal species³².

7.3.13.4 Thanet Coast and Sandwich Bay Special Protection Area (SPA)

Approximately 83% of the area is classed in terms of habitat as tidal rivers, estuaries and mud flats however also has an area of improved grassland (10%). The area also consists of tunnels, caves, intertidal rock, and open coastline including bays, pools and rocky reefs. The SPA designation is supported by a number of breeding bird populations included *Sterna abifrons* (0.3% of the GB breeding population), *Pluvialis apricaria* (0.2% of the GB population) and *Arenaria interpres* (1.4% of the GB population)³².

7.3.13.5 Sandwich and Pegwell Bay National Nature Reserve (NNR)

One of only 88 national nature reserves not managed by Natural England, the Sandwich and Pegwell Bay NNR is maintained by Kent Wildlife Trust. The reserve is a mixture of natural, semi-natural and artificial habitats. Natural habitats include; eroding chalk cliffs and wave cut platforms to the north of Pegwell Bay, inter tidal mudflats, developing beaches, sand dunes and salt marsh. Semi-natural habitats include ancient dune pasture and coastal scrubland while the re-created grassland of the Pegwell Bay Country Park, along with ponds, dykes and ditches are artificial habitats. The intertidal mudflats support nationally and internationally important numbers of waders and wildfowl³³.

7.3.13.6 Thanet Coast SSSI

This site, extending almost uninterrupted from Swalecliffe to Ramsgate comprises mainly of unstable cliff and foreshore, with smaller areas of salt marsh, coastal lagoons, coastal gill woodland and cliff-top grasslands. Noted for its bird populations, the area supports internationally and nationally important numbers of wintering birds. Sanderlings *Calidris alba* and ringed plovers *Charadrius hiaticula* and grey plovers *Pluvialis squatarola* are present in national important numbers.

Associated with various constituent habitats of the site are outstanding assemblages of both terrestrial and marine plant species, including communities of marine algae that are of limited occurrence elsewhere in the British Isles. Invertebrates are also of interest and there are recent records of 3 nationally rare and nationally scare species³³.

³³ http://www.english-nature.org.uk

Approximately 92.63% of the SSSI area has been classified as 'unfavourable recovering' in a recent assessment.

7.3.13.7 Sandwich Bay to Hacklinge Marshes SSSI

This site contains the most important sand dune system and sandy coastal grassland in South East England and also includes a wide range of other habitats such as mudflats, saltmarsh, chalk cliffs, freshwater grazing marsh, scrub and woodland. Associated with the various constituent habitats of the site are outstanding assemblages of both terrestrial and marine plants with over 30 nationally rare and nationally scarce species, having been recorded. Invertebrates are also of interest with recent records including 19 nationally rare and 149 nationally scarce species. These areas provide an important landfall for migrating birds and also support large wintering populations of waders, some of which regularly reach levels of national importance. The cliffs at Pegwell Bay are also of geological interest³³.

62.28% of the SSSI area has been classified as 'favourable' in a recent assessment.

7.3.14 Local Wildlife Sites

As well as the statutorily designated sites Thanet also has nine Local Wildlife Sites (LWS) that are designated and maintained by the Kent Wildlife Trust. A description of each is given below:

7.3.14.1 Monkton Chalk Pit

Large, deep chalk pit, disused for many years, now managed as a nature reserve by the Thanet Countryside Trust and very important in terms of wildlife in the Thanet area¹⁹.

7.3.14.2 St Peter's Churchyard, Broadstairs

A large churchyard lined with mature sycamore, beech, ash and line trees. Most of the area is generally unmanaged and has developed into a wilderness of secondary woodland with patches of open, rank grassland and scrub.

7.3.14.3 Golf Course Roughs, Kingsgate

The roughs of North Foreland Golf Course comprise an area of considerable interest. They include unimproved and semi-improved chalk grassland, and the importance of the site is enhanced by its proximity to the coastal areas at North Foreland and Foreness, which form part of the Thanet Coast SSSI¹⁹.

7.3.14.4 Woods and Grassland, Minster Marshes

A small mosaic of habitats close to Minster railway station included:

- areas of rough grassland with ant hills and a wide range of common herbs and grasses;
- scrubby areas close to the railway line with heavily silted ponds;
- a small copse with mixed broadleaved trees comprising ash, alder, hawthorn and willow; and,
- a large, heavily silted pond occurs on the western margin of the copse, with large alder coppice stools and much sallow¹⁹.

7.3.14.5 Ash Level and Richborough Pasture

An extensive area of low lying agricultural land with interconnecting dyke systems, mostly situated to the south e of the River Stour. The area is crossed by the old drove roads edged with well-established hedgerows of hawthorn and blackthorn and containing the occasional oak. Old counter walls with their unimproved grassland also form an important feature. Many of the fields have been drained or converted to arable or improved pasture in recent years, but some semi-improved or rough pasture remains, particularly in the area south of Richborough Farm and that south of Richborough Power Sation¹⁹.

7.3.14.6 St Nicholas Wade Churchyard

Chest tombs and headstones within the churchyard are set amid grassland. The grassland is generally well managed but herb-rich, with an area of ranker grassland containing nettle (*Urtica dioica*) and elder scrub present in the southern corner.

7.3.14.7 St Mary Magdalene Churchyard

This churchyard contains semi-improved grassland which is managed in the main area in front of the church entrance but is rank and unmanaged in the rest of the yard. Where the grassland is managed it supports a number of common meadow plants such as hardhead (Centaurea nigraI), and oxeye daisy (Leucanthemum vulgare).

7.3.14.8 Ramsgate Cemetery

A very large cemetery, together with its equally large adjacent extension, contains a large expanse of well-managed short grassland which varies from being calcareous at the southern end to neutral towards the north. It probably represents on the largest areas of semi-improved grassland outside SSSIs in the Thanet District.

In addition to the designated areas a Biodiversity Action Plan (BAP) exists for the Kent Area. BAPs were created as the UK Government's response to the Convention on Biological Diversity signed in 1992. The documents describe the UK's biological resources and commit to detailed plans for the protection of these resources. These plans have been separated in to Habitat Action Plans (HAPs) and Species Action Plans (SAPs). Details of the HAPs and SAPs are included in Appendix C. Under the Habitats Directive (92/43/EEC) Article 6 any plan or project likely to have a significant effect on an area of conservation, especially where that area is of international importance, shall be subject to an assessment of any likely adverse effect in view of the site's conservation objectives. In the instance of the Local Plan, due to the number of internationally designated sites and the District wide scope, an assessment under the Habitats Directive may be required

AMR data for 2010-2011 shows there has been no change in areas designated for their intrinsic environmental value including sites of international, national, regional, and sub-regional significance. Maintenance continues at the new site of local significance that was designated during the last reporting year namely, Cliftonville Grassland, Foreness Point.

As a result of staff cuts the biological monitoring programme at The Sandwich and Pegwell Bay National Nature Reserve has been greatly curtailed. It is anticipated that butterfly transect data will be available for inclusion in next year's AMR.

7.3.14.9 Cliftonville Grasslands

This is an area of chalk grassland, with a high amenity value, adjacent to the cliffs of Botany Bay in Margate. The area is split by a hard surfaced path, which separates the main area and a narrower cliff-top section. There is a waste water treatment works located near to the site, though this is not included within the designation.

The cliff edge section of the site is one of low maintenance that has developed a very vigorous and course community of plants, which whilst not specifically of interest, provide suitable habitat for butterflies, hoverflies and bees. The nationally scarce solitary bee (Nomada fucata) has been recorded on site.

The inner section of the site, to the south of the hard path, retains a plant community much like the cliff edge section, but the majority of the area is managed by hay cut and clear each autumn. This has resulted in a fine grass sward with a good variety of plant species.

Bird activity recorded at the site includes house sparrow, meadow pipit, skylark, linnet, goldfinch and turnstones.

7.3.15 Green Spaces and Corridors

With the exception of inter-tidal habitats, only some 4% of the Districts land area is comprised of semi-natural habitats. This does not compare well with other districts in Kent. This is due to the very high quality of agricultural land in the area which has meant that historically the island has been very intensively farmed leading to the low level of natural habitats. An Open Space Audit undertaken in 2005 describes the quantity, quality and access to natural and semi natural space provision in the area.

There is an existing level of provision of 0.95 ha per 1,000 population. Comparison with English Nature Standards shows this equates to 1.05ha below the recommended provision. The recommended minimum standard of future provision for Natural/Semi-Natural Greenspace is 2ha per 1000 population. This could potentially be achieved with the provision of new community woodlands and by transferring other space within parks and Informal Recreation areas to natural and semi natural Greenspace.

Quality of provision was rated as 'good' by local residents (26.67%). According to the survey that the majority of Thanet residents walk to natural Greenspace facilities, with an average distance travelled to access natural green space of 2.25 kilometres. This meets recommended provision for access applied by Natural England.

The Green Corridors provide opportunities in Thanet to link both rural and urban communities together. Linear green space in Thanet plays an important role as wildlife corridors in addition to their wider amenity green space role and natural and semi natural open space.

The audit undertaken has revealed that there are two Green Corridors within Thanet, although these have not been formally designated.

Development and enhancement of Green Corridors will not only benefit biodiversity, but can also contribute to improving the health of Thanet's community and workforce. This could occur through the indirect promotion of cycling and walking due to an increased aesthetic value, within the District.

7.3.15.1 Climatic Factors

The East of England typically experiences 'long summers, mild winters and a long growing season. Rainfall tends to be linked to topography (with areas at higher elevation experiencing more rainfall) and droughts can be common in low lying areas of the region. Thanet being in the South East of England Region, experiences a similar climate although is likely to also experience some variation in short term weather pattern.

7.3.15.2 Climate Change

Rising to the challenge: the impacts of climate change in the South East: Technical Report ^{'34} produced for the UK Climate Impacts Programme (UKCIP) identifies the changes in climate that will be evident in the South East by the 2080's. These include;

- it will be warmer all year round, with most of the warming in summer and autumn;
- winters will be wetter, and summers will be drier;
- it will be sunnier in the summer, and this, with the higher temperatures, will mean a large increase in summer evaporation;
- it will be windier, with an increased risk of severe storms;
- the sea level in the English Channel will be 54 centimetres above its present level.

REP/228764/002 | Final | February 2015

C:\USERS\STEVEN.HARDING\DESKTOP\3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

³⁴ Rising to the challenge: The impact of climate change in the South East: Technical Report, UNCIP, 1999

The impact of this change in climate will be water shortages during periods of high demand that will threaten and dry out wetland habitats and lead to increased pollution as river flows diminish. There is also likely to be more damage from flooding and floodplains may become more dangerous places to live, and coasts and lower river reaches are expected to face a higher frequency of storm surge tides. Erosion is set to increase which in Thanet may have serious impacts on the Cliff features that hold environmental designations.

The report does however highlight potential advantages for the region with the changing climate with opportunities for farmers, for example, to grow navy beans, soya and sunflowers in many places. The tourism and recreation industries to could benefit considerably from warmer conditions with increasing visitor numbers as traditional European destinations become too hot.

The key cause of anthropogenic climate change is widely acknowledged to be the release of greenhouse gases into the atmosphere from the combustion of fossil fuels. In order to be able to evidence progress being made on climate change and other environmental improvements, the Government has set a number of National Indicators which have been adopted by TDC and, in a number of cases, by The Public Services Board (or Kent Partnership), featuring as part of the suite of 35 KA2 indicators. As they are new, there is currently no baseline data available for most/all of these³⁶

The UK Government has set a framework for CO_2 reduction up to 2050 through The Climate Change Act 2008. This legislation sets targets for greenhouse gas emission reductions through action in the UK and abroad of at least 80% by 2050, and reductions in CO_2 emissions of at least 34% by 2020, 50% by 2023, 60% by 2030 and 80% by 2050 against a 1990 baseline.

TDC began monitoring district GHG emissions from 2008-2009, which acts as baseline for subsequent GHG reporting. For 2011-2012 Thanet's total net emissions were calculated to 3790 (tonnes of CO₂e), a showing 12.9% net decrease compared baseline figures.³⁵

TDC is beginning to look into climate change adaptation and mitigation opportunities for Thanet. The District Council has developed a Climate Change Strategy and Action Plan for Thanet for 2009-2011. To drive forward its commitments to meeting targets and delivering actions outlined in this plan, TDC has developed a 'Going Green Group'. Thanet is seeking to develop a new Climate Change Strategy as part of the new Local Plan and associated development and planning policies to ensure development can contribute to reducing GHG emissions in line with government targets and minimising vulnerability and providing resilience to the impacts of climate change.

7.3.16 Energy and Renewable Sources

The development of low carbon and renewable energy sources is a crucial part of the UK's strategy to minimise the future consequences of climate change. A

³⁵ thanet.gov.uk

review of Renewable Energy provision and opportunities across the region was undertaken by Kent County Council in 2011. As a result AECOM were commissioned to assess availability of renewable resources in the county and wider associated social and economic benefits.

In addition plans are in place to redevelop a derelict brownfield power station site at Richborough, as a new hub for green energy production for Kent. This will provide a significant opportunity for Thanet to meet its climate change and greenhouse gas emissions targets. Thanet District Council has developed an indicator as part of its AMR to monitor planning applications specifically for renewable energy by installed capacity and type. The latest available AMR for 2010-2011 states that during the current reporting year, one solar park involving photovoltaic of 4-5 Megawatts was granted planning permission. Targets for Renewable Energy provision are not as yet established.

7.3.17 Air Quality

Thanet generally has very good air quality. However, there are two busy junctions which show levels of nitrogen dioxide above the recommended health objective. In both cases the main source of pollution is from road transport. To help tackle the problem TDC decided to declare an urban wide Air Quality Management Area (AQMA) on 17th November 2011 which encompasses the two exceedence areas at The Square, Birchington-on-sea and High Street St Lawrence, Ramsgate. The decision to replace the existing AQMAs with one wider urban AQMA was taken to enable a more strategic approach to action planning and effective management and integration of air quality considerations into transport planning and development control.

Thanet District Council operates four automatic monitoring stations situated at two roadside sites, one urban background site and one suburban background location. The stations at Boundary Road, Ramsgate, and The Square, Birchington-on-sea, measure nitrogen dioxide and PM10 and are next to main roads. The other two sites (College Road, Margate and Marston Airport, Ramsgate) measure nitrogen dioxide only. All four sites are within the new Thanet Urban AQMA boundary. Since the previous fourth round Updating and Screening Assessment in 2009 an additional, temporary automatic monitoring station was set up in St Lawrence which was operational for six months from September 2010 to March 2011. All four sites measured concentrations below the objective in all years³⁶.

7.3.18 Flood Risk

Thanet's Strategic Flood Risk Assessment (SRFA 2009) details flood risk information across the district and particularly the extensive coastline, as well as site-specific levels to inform the Sequential Test and the site allocation process. Key information from this report is summarised as follows:

- Tidal flooding poses the greatest risk to the Thanet.
- River Stour within the Stour valley, the tidal extent of the river provides a greater risk than a fluvial flood event the combined fluvial and tidal flood zone should be used to determine greatest level of risk
- Wantsum Channel is at risk from fluvial and tidal flooding
- Groundwater flooding is not considered to be an issue of strategic concern.
- Areas of residual flood risk have been identified as Margate Old Town, Dreamland, Birchington (Minnis Bay)
- Groundwater flood risk is not a significant problem although the district predominately overlies a chalk aquifer, ground elevations are generally high so water table is at significant depths from the surface.

Surface water flooding is localised and site specific so not assessed at a strategic level (but is detailed in the forthcoming Surface Water Management Plan).

7.3.18.1 Fluvial Flooding

The River Great Stour's floodplain forms the western boundary of the district western. This floodplain occupies the Wantsum Channel, which is a broad low lying feature which separates the Isle of Thanet from the rest of Kent. Historically this was a tidal channel that totally separated Thanet from mainland Kent. However, it is no longer flooded as part of daily tidal cycles due to the protection of sea defences along its boundaries. Despite this there remains a tidal flood risk and modelling which has led the Environment Agency to define the Wantsum Channel as being of Fluvial/ Tidal flood Zone 3. Figure 10 shows the flood risk to Thanet. It can be seen that the original channel creating the Isle of Thanet is a significant flood risk as well as the coastal stretches³⁷.

Figure 10: Risk from river and sea flooding assuming no defences (blue indicates flooding and turquoise the extent of extreme flooding).

Source: Environment Agency

³⁷http://maps.environmentagency.gov.uk/wiyby/wiybyController?x=531500.0&y=181500.0&topic=floodmap&ep=map&sc ale=3&location=London,%20City%20of%20London&lang=_e&layerGroups=default&textonly=off

The SFRA also provides the results of modelling of sensitivity to climate change in the costal domain and as well as the predicted impacts to flood zones 2 and 3 for the year 2026, 2080 and 2115 for each of the key urban areas (KUAs). The SFRA addresses Flood Risk for PAS (Protected Areas of Search) as well as as 'Potential Development Sites' which were identified in the R25 Land Survey and H1 Site Survey, undertaken by Entec in 2008. There is no available data to indicate the number of dwellings that are at risk of flooding and no data available to show how many new developments incorporate Sustainable Drainage Systems.

7.3.19 Water Quality and Water Resources

Southern Water supplies water and wastewater services to Thanet. When planning new development and growth it is important to consider both local and strategic wastewater infrastructure. Local infrastructure generally comprises local sewers which are funded by the development whereas strategic infrastructure encompasses trunk sewers, pumping stations and wastewater treatment works and is normally funded by the water company. Capacity in the sewerage system is finite and the spare capacity available (headroom) varies from location to location.

Nearly 70% of Thanet's water is taken from underground aquifers, 23% from rivers and 7% from storage reservoirs³⁸. The Stour Catchment Abstraction Management Strategy (2003) assesses the water availability for each river stretch and groundwater aquifer. Thanet's main water resource is abstraction from the chalk aquifer. The Stour CAMS identifies Thanet's water availability status as over-abstracted. However, the update of October 2006 states that the current abstractions should not have a detrimental impact on the nearby European Marine Sites.

A River Basin Management Plan for the South East River Basin District (2009) has produced under the Water Framework Directive. It identifies the pressures facing the water environment, which prevent a 'good' status being achieved. These issues include:

- Point source pollution from sewage treatment works;
- The physical modification of water bodies;
- Diffuse pollution from agricultural activities;
- Diffuse pollution from urban sources;
- Water abstraction;
- Flood protection/coastal erosion;
- Physical modification urbanisation;
- Physical modification wider environment; and
- Physical modification land drainage.

The Water Framework Directive requires special protection for areas identified under other EU Directive and waters used for the abstraction of drinking water. The River Basin Management Plan describes the objectives for each protected

REP/228764/002 | Final | February 2015 C:USERSISTEVEN.HARDINGIDESKTOP3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

³⁸ Thanet District Council: (Draft) Water Cycle Report - January 2013

area and assesses compliance with them. It also describes the actions needed to achieve and maintain compliance. Thanet has a number of protected areas as listed in Figure 11.

A consultation on updates to River Basin Management Plans was held between 10 October 2014 and 10 April 2015. All updated River Basin Management Plans will updated and published in December 2015.

7.3.20 Coastal Waters

Thanet has 13 beaches which have been designated as 'Bathing Waters' and are independently tested weekly from May to September by the Environment Agency. Sea Waters are tested for bacteria, and beaches are assessed for cleanliness, dog control, wheel chair access, provision of facilities and provision of life saving equipment to meet EC bathing water standards. A Blue Flag award is given to areas that meet those standards. Water quality has overall improved since 1993, however in 2010 fewer coastal waters were recorded as being excellent than in previous year.

³⁹ From 2015 there are new, tighter standards. A classification tagged with this symbol indicates the class that the bathing water would have achieved if the new bathing water quality standards had been in force. The first official classification under these new standards will be published towards the end of 2015, when there is a full four-year dataset.

7.3.21 Cultural Heritage and Material Assets

There is an extensive and rich variety of building forms, character and heritage within the built-up area of Thanet. The urban areas range from the 'urban village', such as Pegwell and St Peter's, to the modern shopping centre and bright lights of Margate, the wooded areas and special atmosphere of Broadstairs to the historic harbour, lively marina and cross-Channel port of Ramsgate. There is also a diversity of heritage throughout Thanet's villages¹⁹.

Thanet has 22 conservation areas, 14 scheduled monuments and one registered park and garden (listed in Appendix C) as well as around 2,000 Listed Buildings and a number of archaeological sites dating back to pre-historic times. The District also has associations with important historical figures including JMW Turner, AW Pugin, Sir Moses Montefiore, Charles Dickens, Karl Marx and Vincent Van Gogh.

TDC has adopted a Statement of Community Involvement, which sets out TDC's commitment to community involvement in all aspects of town planning, including matters pertaining to Thanet Conservation Areas.

7.3.22 Landscape and Townscape

A Landscape Assessment Survey undertaken by the District Council in 1991 described a gently undulating landscape with few dominant natural features, shaped largely by arable farming, combined with a historical lack of tree cover. However areas of high landscape value do exist such as the Pegwell Bay and Former Wantsum Channel where uninterrupted long views of the sea and marshes along the undeveloped coastline exist¹⁹.

As part of the last Local Plan (2006) detailing conservation of the Townscape and Landscape character of Thanet, TDC has identified six landscape character areas;

- Pegwell Bay;
- The Former Wantsum Channel;
- The Former Wantsum North Shore;
- The Central Chalk Plateau;
- Quex Park; and
- The Urban Coast.

Thanet district also includes three Regionally Important Geological Sites.

In previous Local Plans, TDC has sought to protect these important landscapes. The protection of Thanet's important landscapes is to be continued in the emerging Local Plan. To gain a more up to date picture of Thanet's Landscape Character Areas, site surveys were carried out in 2012⁴⁰ and compared with the 1993 study to identify any views that may have changed. Of the 22 views surveyed 14 were considered not to have changed since the 1993 survey.

 $^{^{\}rm 40}$ Landscape Character Area Topic Paper $\,$ - August 2012 $\,$

In summary:

- Two views were considered to have improved as the cooling towers at Richborough district Power Station have been demolished so no longer form part of the landscape.
- One view was considered to be more built up as Thanet Earth is now visible.
- The 2006 Thanet Local Plan allocated a site for residential development of 100 new dwellings in Minster within the Wantsum Channel North Shore landscape character area. The development has been completed and is visible from one view visited in the 2012 survey; however it is well screened and has not made a significant visual impact.
- In recent years, the Kentish Flats and Thanet offshore wind farms have been constructed, providing a new feature to the landscape.

7.3.23 Waste

Almost 4 million m³ of solid waste is disposed of in Kent every year (equivalent to 300,000 lorry loads) and this goes mainly to landfill⁴¹. As a result of economic development and rising standards of living, the volume of waste produced could be expected to increase. However, the recent trend for Kent as a whole has seen a reduction in the collected volume of municipal waste and in the amount of waste generated per household, although there is some volatility at district level. The volume of MSW in Kent peaked in 2004 and has declined each year subsequently, giving a reduction of 10.9% 2004 to 2009. The reduction in MSW produced per household has been greater (-12%), and the volume of MSW arising has therefore declined despite continued growth in the number of Kent households.

Thanet's total waste decreased between 2008/09 and 2009/10 from 45,348 (tonnes) to 43,872, despite an increase in dwelling stock. The MSW per dwelling for Thanet in 2009/2010 was 0.68 (tonnes), the lowest amount of waste per dwelling across the Kent districts. The reason for this and variations across the district is unclear, but may in part be attributed to local collection method and also to local differences in the mix of household types.

The environmental issues raised by the treatment and disposal of waste are matters of great public concern and waste management can have various unsustainable impacts (e.g. aquifer damage, atmospheric emissions and energy use).

The Annual Monitoring Report for South East England 2008-09 compares the percentage of MSW sent for reuse, recycling or composting from all local authorities in the region. The average for Kent is slightly above the regional average, but there are marked variations between district councils. However this report describes Thanet as being one of the lower performing authorities in terms of recycling/ composting.

⁴¹ Kent Waste Local Plan (Saved Policies)

7.4 Key Sustainability Issues for Thanet

The SEA Directive confirms that the Environmental Report should include the following information:

'any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of particular environmental importance, such as areas designated pursuant to Directives 79/409/EEC and 92/43/EEC'⁴².

The examination of policy and baseline characteristics, has allowed sustainability issues to be identified which may influence the emerging Local Plan.

Presented in Table 11 are the Key Sustainability Issues for Thanet. It should be noted that to assist in transparency, sub issues have been included for each of the key issues. These provide an indicator of the particular facet of economic, environmental and societal (the three core elements of sustainability) that the issue is most relevant to. The table proved useful in developing relevant objectives and indicators during SA Stage A4.

REP/228764/002 | Final | February 2015 C:USERSISTEVEN HARDING/DESKTOP/3.06 FEBRUARY 2015 THANET LOCAL PLAN SA - PREFERRED OPTIONS.DOCX

⁴² Annex I (c)

Key Sustainability Issue	Sub Issue	Description	Validation	Source
ECONOMY	Economic Development	Support for industrial and employment development at key sites within the District.	Existing evidence suggests that Thanet is a net exporter of labour with a workplace ratio of 1.19. Bearing in mind the limitations of the data, further analysis suggests that the workplace ratio could be closer to 1.10. Currently Thanet has significant out migration of the 16-39 age groups. Our forecasts promisingly suggest that more roles are likely to be created which align with the occupation profile of this younger age group which help to reduce the level of out-migration. Economic development at business Parks such as Manston Park, Eurokent and Thanet Reach along with economic development at employment sites adjacent to the Sandwich corridor expected to be available as services employment land within the Local Plan. The main demand and growth is coming out of the local market, and therefore should be supported. There is insufficient supply of property to meet this demand. Relatively little interest from companies wishing to relocate to Thanet, or large inward investors. Priority should be given to allocating land for delivering economic development, protecting sites for industrial and commercial uses where there is a good prospect of employment use, consider upgrading or improving existing sites and working to overcome barriers to delivering sites, including identifying infrastructure planned and necessary to support economic growth. In particular relation to employment land provision, sufficient employment land must be provided through the redevelopment of brownfield land and refurbishment of existing stock, to provide new and flexible employment space.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan Employment Land Review Experian Economic and Employment Assessment – Thanet District Council, 2012
		Create and maintain local employment opportunities centred on fairly paid jobs.	Thanet has relatively high levels of unemployment, and social and economic deprivation. Thanet's history of economic problems is reflected in a persistently high unemployment rate. Total, unemployment rates increased since 2009, and peaked at 6.4% in February 2012. Figures for 2012 show unemployment to have slightly decreased to 5.6%. There is a significant and increasing gap between the rates of unemployment in Thanet compared to Kent (3.2%), the South East (2.4%) and National (3.75%) ⁴³ averages remains. There are fewer people with professional jobs in Thanet than in Kent and England. Skilled trades, caring, leisure and customer service, and other service occupations are more dominant in Thanet than in Kent and South east. Table 11: Key Sustainability Issues for Thanet.

⁴³ Thanet District Council Local Plan 2006

Key Sustainability Issue	Sub Issue	Description	Validation	Source
		Development of grant funding packages for firms investing in Thanet.	Thanet is part of the Grow East Kent initiative which includes funding for existing and new start businesses as well as businesses looking to move to area. Thanet is also part of the East Kent Priority Area for Regeneration	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
		Ensuring that the strategic future of retail centres supports commercial diversification and capital investment as well as providing a strong revenue stream for Thanet District Council.	Thanet retail centres are considered unattractive investment areas for major retailers due to relative isolation, limited catchment and the current high dependence ion larger retail centres outside the Thanet region. However major changes have occurred since 2000 to the provision of retail floor space in Kent and this has had an impact on expenditure spent outside the Thanet region.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
		Supporting regeneration of key areas within the District.	South East Local Economic Partnership (SE LEP) implemented in April 2011 to promote strategic economic priorities and make investments activities to drive growth and local jobs. Investment from the Governments Growing Places Fund includes first round projects across Kent and in Thanet such as 'Live Margate, Kent	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
	Economic Structure	Ensuring that improving economic prosperity provides benefits to the whole of Thanet focussing regeneration on key wards.	Kent County Council's 'Grow for it East Kent' scheme which is aiming to attract new businesses to locate within the sub-region as well as supporting the start up and growth of indigenous and pre-existing businesses. It is doing this by promoting the area to businesses and also providing support to new businesses and funding to support businesses looking to locate in East kent. The Thanet Local Plan identifies four key areas in need of special attention: Margate Old Town Area, King Street in Ramsgate, Upper High Street in Ramsgate and Cliftonville West. Thanet has poor housing stock with a high proportion of semi-derelict, vacant or homes in a state of poor repair. In addition there are a high proportion of multiple occupation premises which leads to pressure on parking, nuisance, noise and visual deterioration of houses and gardens.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan Experian Economic and Employment Assessment – Thanet District Council, 2012

Key Sustainability Issue	Sub Issue	Description	Validation	Source
		Ensuring that existing building stock (particularly redundant buildings) is brought into use for employment where appropriate.	Create and maintain local employment opportunities centred on fairly paid jobs. There is also a dominance of employment in the public sector and whilst this has an important role to play in any economy, it is not a strong driver of growth and wealth creation. With over a third of employees working in the public sector there is a need to balance this to ensure that there is scope for the economy to grow At 1st April 2011 there were 3,456 empty homes in Thanet. (Source Research & Evaluation Statistical Bulletin "Vacant and empty dwellings - Annual 2010/11" Kent County Council)	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
		The protection and enhancement of natural assets including Blue Flag status of beaches in support of tourist economy.	Tourism provides a significant contribution to the Thanet local economy and so efforts to maintain natural assets and improve its desirability as a coastal destination are required to strengthen and support future economic growth. Visit Kent data for 2009 indicates that there were 57 million visitors to Kent, with an economic impact of £3.2 billion as well as supporting an estimated 63,000 jobs.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan Town Centre Retail, Leisure, Tourism and Culture Assessment, 2012
		The protection and enhancement of historic assets.	Scheduled monuments in Thanet include Anglo Saxon Cemeteries and remains at Monkton and Dane Valley, Salinestone Grange, Quex Park Settlements, and various ring ditches and enclosures. There are also significant amounts of listed buildings and conservation areas throughout the district.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan

Key Sustainability Issue	Sub Issue	Description	Validation	Source
	Economic Connectivity	The development of key transport gateways to the region including the development of Kent International Airport.	Thanet has often been perceived to be peripheral although in reality transport infrastructure is extremely good with excellent road access to the M2 and M25 along with the new East Kent Access links to the south. The port and airport are important links to the continent and beyond and the High Speed rail link has greatly decreased commuting times to London. Whilst the district does have a number of good transport links it is still on the periphery of Kent and the South-East, and in particular its proximity to London is poor compared to the rest of the south-east. Kent International airport has a potential capacity of 1,000 million passengers per annum with 250,000 tonnes freight per annum. The Airport Masterplan developed in 2009 which estimated a significant increase in passenger (4.7 million passengers per annum) and freight (400,000 tonnes of freight) numbers for the airport to 2033 along with details of future airport expansion such as a new terminal building. To date The airport is currently up for sale and the estimates for growth proposed in the Masterplan have not been achieved. In addition, given the uncertainty regarding the government's position on aviation within the South East, the future of the airport is uncertain. However, it remains an important economic asset and opportunity to encourage growth in Thanet. Facilitating further growth at the Airport and Ramsgate Port could unlock further opportunities. Current export levels from Thanet are low and therefore there could be growth potential in this area given the close proximity of Thanet to Europe coupled with transport links. There is also the potential for growth given knock on effects from the airport in terms of the supply chain.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan Employment Land Review
		Mobility and access to employment opportunities through provision of sustainable public modes of transport.	Compared to a national average of 25.8% the proportion of Thanet households not in possession of a car or van is 29.8%, the 5th highest in the region. In some of the more deprived wards this is almost double this such as Margate Central (52.4%). Of the working age population 40% travel by private, car, van or motorbike to work. 6% travel by public transport, 9% walk or cycle and 3% work from home. These percentages are all lower than the regional and national (England) averages.	Census 2011.

Key Sustainability Issue	Sub Issue	Description	Validation	Source
		Links to opportunities associated with sub-regional growth and development including major economic opportunities.	Thanet has an Airport of regional significance at Manston with a potential capacity of one million passengers per annum with 250,000 tonnes freight per annum. The 2009 Masterplan which estimated a significant increase in passenger and freight numbers for the airport to 2033 along with details of future airport expansion such as a new terminal building. The airport is currently up for sale and the estimates for growth proposed in the Masterplan have not been achieved. In addition, given the uncertainty regarding the government's position on aviation within the South East, the future of the airport is uncertain. However, it remains an important economic asset and opportunity to encourage growth in Thanet.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
	Safety	Initiatives leading to greater public safety including appropriate strategies for intervention (Community Wardens, Police Community Support and Secured by Design).	Approximately 91% of the Thanet population feel safe in their homes – the main focus of interest is in Margate Central Ward and Cliftonville West Ward. Local analysis has shown that the streets of Thanet are extremely safe – large areas of Thanet have had no reported crime in two years with only nine of 446 output areas reporting one crime per month. All three town centres are awarded the National 'Safer Shopping Award' with shoplifting and commercial burglary falling year on year.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan Thanet Crime and Disorder Police Audit 2005-2008
SOCIAL	Housing	Responding the needs and requirements of the current and future housing market. Support the viability of existing residential developments now and in the future.	Over the last decade the housing market and mix of tenure has changed due to the recession and the impacts this has had on house prices. The proportion of households that are rented instead of owned or mortgaged has increased. Likewise, the annual number of housing sales has fallen to a level lower than 1996. This means that because there is currently less demand for housing the potential future requirements may be less than previously anticipated. However, given the long timeframe over which the Local Plan will operate (to 2031) it is quite likely that the housing market will have changed again. Therefore the Local Plan needs to consider how it can allow flexibility to address potential changes in the future and this flexibility is something that the SA will also consider during the assessment of options and alternatives. The Thanet Private Sector Housing Strategy indicates that the standard of the existing stock is an issue, with the private rented sector being poor in some areas, particularly in Cliftonville.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan Urban Housing Capacity Study (Kent District council) 2002 Local Housing Needs Study Strategic Housing Land Availability Assessment Strategic Housing Market Assessment

Key Sustainability Issue	Sub Issue	Description	Validation	Source
	Mobility	Access to key services and employment opportunities through public transport provision.	The Channel Tunnel Rail Link has benefited the UK as a whole but has led to substantial job losses in the in the cross channel ferry industry. Transport links in Thanet have been historically poor however in recent years a number of transport connections have improved significantly. The recently completed East Kent Access Road (A256) provides a fast connection to the A20/M20 at Dover and to the Port of Dover and Channel Tunnel. The Access Road also links Thanet with other major economic assets such as Manston, Kent's International Airport, the Port of Ramsgate and Discovery Park to the UK's main arterial road network in less than 60 minutes. Additionally, the introduction of High Speed 1 rail services in 2009 has reduced commuting from central London to Ramsgate to 76 minutes and Margate to 88 minutes. The local population is well served with public transport connections. Access throughout the district is possible via the Thanet Loop bus service. This covers Margate - Broadstairs - Ramsgate – Margate i.e. all towns/centres of commercial activity	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
	Deprivation	Levels of economic disparity within the region and need to maximise opportunities for all sectors of society. Access to employment opportunities identified as an issue in limiting the realisation of Thanet's potential.	The 2010 Office of National Statistics Indices of Deprivation indicates that Thanet is ranked the most deprived District in Kent and 65 th in England (out of 354), moving it within England's top 20% deprived Districts in England in all 6 deprivation categories (employment, health deprivation, disability, educational skills and training, housing, geographical access to services and income). Per ward Margate is ranked the most deprived Ward Thanet is within the top 20% most deprived areas of Kent. 15.2% of the District's population are separated or divorced in comparison to the England and Wales average being 11.7% - this is the highest rate in Kent.	Thanet DC Corporate Themes, Plans, Policies and Programmes Thanet Local Plan
	Health	Maintenance of high levels of healthcare provision including dependent sectors of the community. Population demand on healthcare and support services (PCT initiatives).	The poor health of Thanet cannot just be attributed to the number of older residents of people suffering a limiting long term illness. This ranks highest in the region (of 67) and is 37 th of the 376 Districts in England and Wales.	Census 2011.

Key Sustainability Issue	Sub Issue	Description	Validation	Source
	Education and Skills	Access to skills development for all sectors of society. Particular demand associated with transient and dependent sectors of society.	39% of East Kent's children's homes providing care for socially excluded children are located in Thanet. A large proportion of children remain in the area through to adulthood compounding a dependency culture. Within Thanet 15.9% of 16-60 year olds have low or very low literacy (15% nationally) and 35.1% have low or very low numeracy (33% nationally) It is well evidenced that the district has a number of skills gaps. Thanet's qualification profile is skewed towards NVQ1, 2 and 3, with all three above the county, region and UK. Promisingly it has proportionally fewer individuals with no qualifications (8.6%) this is compared to Kent at 11.4 per cent and the UK as a whole 12.2 per cent. However in terms of NVQ level 4, which is equivalent to degree level qualification, the district has proportionally far fewer residents that hold this qualification than the county, region and UK. In the South East over a third (39.7 per cent) are NVQ level 4 or above compared to 31.4 per cent in Thanet.	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement Experian Economic and Employment Assessment – Thanet District Council, 2012
MENT	Perceptions and Image	Need to maintain the appearance, vitality and safety of the street scene within Thanet particularly associated with town centres and coastal areas.	With their competing catchment areas Thanet's towns have struggled to retain a vital commercial core and have lost many visitor attractions resulting in the stock of guest house and hotels being reduced and converted to private residential multiple user accommodation. However, this is starting to change particulalrly within Old Town in Margate and Marina in Ramsgate, but in some areas of public realm the main high streets are of a poor standard.	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement NLP Report
ENVIRONMENT	Biodiversity	Protection of designated sites including; SSSIs, SPA and Ramsar site.	The Thanet coast is protected by a number of international and national conservation and biodiversity designations. These include Special Protected Areas, a Ramsar Site and Sites of Special Scientific Interest. A full list of designations made on biodiversity grounds are given in Appendix C. Threats to rare species of birds and the Chalk Reefs are a particular concern.	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement, Kent Biodiversity Action Plan.

Key Sustainability Issue	Sub Issue	Description	Validation	Source	
	Development Pressure	Threat to areas of high wildlife, conservation and biodiversity importance from economic and social development	Development within the Thanet District presents areas of conservation and wildlife importance at threat. This is particularly evident in areas of 'coastal squeeze' where space for development is at a premium. Also the need for open space for recreational needs places additional pressures on designated areas. The impact of changes to air quality resulting from this development should also be considered. Where possible opportunities to link and extend wildlife habitats to reduce the impact of inappropriate development should be supported. In doing so it is important to make provisions for general green space and green infrastructure in association with development needs	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement, Kent Biodiversity Action Plan.	
	Coastal Management	The coastal areas of Thanet have a high conservation and landscape value and should be afforded appropriate protection.	The chalk reefs in themselves justify the need to afford significant management in the protection of the coastal area. In particular threats include; increasing pressure on coastal resources from recreational use, the potential impact of coastal flood defence construction, the impact of coastal erosion, impact from urbanisation and the threat to species of regional, national and international importance, such as the turnstone. Groundwater Source Protection Zones exist across the district.	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement, Kent Biodiversity Action Plan.	
	Water Quality	Risk to water quality	The whole of the Thanet area is classified as a Nitrate Vulnerable Zone. Furthermore nutrient runoffs may impact on inter tidal chalk reefs.	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement, Kent Biodiversity Action Plan. Environment Agency mapping	

Key Sustainability Issue	Sub Issue	Description	Validation	Source
	Climate Change and Flood Risk	Nation need to consider impacts associated with climate change and particular imperative within coastal locale. Risk of flooding must be considered in Local Plan development.	Thanet has a key advantage as flood risk does not pose a constraint to identifying sufficient housing site, commercial or industrial site opportunities.	Thanet DC Corporate Themes, Plans, Policies and Programmes review and baseline, South East Regional Integrated Regional Framework, Thanet Statement of Community Involvement, Kent Biodiversity Action Plan, Environment Agency

8 Thanet Local Plan Sustainability Framework

8.1 Sustainable development

A key objective of the SEA Directive is to integrate the principles of sustainable development into the plan making process. The combined SA and SEA process does this by integrating economic, social and environmental considerations into the decision making process along with other evidence.

In order to understand this, it is necessary to define 'sustainable development' in the context of spatial planning. There are numerous definitions describing the concept of sustainable development. The most commonly cited definition of sustainable development is: 'Development which meets the needs of the present without compromising the ability of future generations to meet their own needs' (Bruntland Commission, 1987)

8.2 Objectives and Decision Making Criteria (DMC)

8.2.1 Development

There were a number of key starting points for developing SA Objectives and DMC. These are outlined below:

8.2.1.1 Sustainability Objectives SEA Requirements

It is essential that the SA Framework includes the topics required by the SEA Directive. These are:

'the likely significant effects on the environment including on issues such as biodiversity, population, human health, fauna, flora, soil, water, air, climatic factors, material assets, cultural heritage including architectural and archaeological heritage, landscape and the interrelationship between the above factors.' EU Directive 2001/42/EC (Annex 1)

8.2.1.2 UK Sustainable Development Objectives

The UK Government recognises five objectives for Sustainable Development as part of its Sustainable Development Strategy 'Securing the Future' (2005). Furthermore the NPPF sets out overarching principles and guidance by which the planning system can contribute to sustainability and prescribes a 'presumption in favour of sustainable development' The SA Framework should support and incorporate these objectives and principles

8.2.1.3 Established Objectives and Locally Relevant Issues and Parameters

The 2009 SA Scoping Report included an exercise to identify the key themes referred to within the Community Strategy and compare these against the proposed SA Objectives. In addition to the Community Strategy, the key objectives of the Integrated Regional Framework (IRF) for South East England and objectives of the Regional Spatial Strategy (RSS) were also identified and compared against the proposed SA Objectives.

Since 2009 changes to the planning system and introduction of the NPPF and Localism Act 2011 has led revocation and redundancy of the RSS and IRF. To mirror this change, SA framework objectives developed in 2009 have been reviewed and comparison made with NPPF principles to ensure alignment. This is summarised in Table 12.

8.2.2 **Proposed SA Objectives and DMC**

The SA Objectives are listed in Table 12. The full SA objectives, indicators and supporting DMC and indicators are given in Appendix D. Following on from the assessment of issues and options, it was suggested that SA objectives 5 and 16 should be amalgamated in to one objective as they both covered the same topic sustainable public transport. As a result, objective 5 was removed, thus reducing the total number of SA objectives to 23.

The SA objectives have been grouped against the themes of economy, social and environment, to tie in with SA policy. Each objective has been numbered to assist with cross referencing. The derived objectives are set out below in the following sections.

8.2.3 Social

- 1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand and need;
- 2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society;
- 3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment;
- 4. To increase public safety and reduce crime and fear of crime;
- 5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards;
- 6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.

8.2.4 Economic

- 7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment;
- 8. To ensure the sustainable development of the proposed economic growth and encourage industrial and employment development at key sites within the District to support priority regeneration areas;
- 9. To protect and enhance the areas natural, semi-natural environments and street scene to support the tourist economy and quality of life;
- 10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance;
- 11. To ensure that a sustainable pattern of development is pursued.

8.2.5 Environmental

- 12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.
- 13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings;
- 14. To improve air quality in areas where air quality (pollutant) levels exceed national standards;
- 15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles;
- 16. To develop key sustainable transport links between Thanet and the wider Kent district and beyond, including road, rail and air;
- 17. To reduce waste generation and disposal and achieve the sustainable management of waste;
- 18. To ensure development within the District responds to the challenges associated with climate change;
- 19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with development management policies and NPPF;
- 20. To conserve and enhance biodiversity;
- 21. To protect and improve the quality of fluvial and coastal water resources, including European designated sites;
- 22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products;
- 23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.

While it is acknowledged that some objectives could fit in a number of themes, it is not considered to be a barrier to the effective delivery of the appraisal process due to the following:

- The impact on each of the SA Objectives is assessed individually, and the appraisal also considers the impact on all the SA Objectives as a whole rather than by theme; and
- It must be recognised that the themes and SA Objectives are inextricably interlinked, contributing and impacting on each other.

It was important to consider the links between the SA Objectives when completing the appraisal. The links between the SA Objectives and other plan objectives are included in Table 12.

Table 12: SA Objectives Cross Reference	ced Against NPPF Objectives.
---	------------------------------

Objective Number / Thanet District SA Objective	NPPF Objectives
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	<i>NPPF – Headline principle</i> Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities.
	NPPF - Delivering a wide choice of high quality homes
	To deliver a wide choice of high quality homes, widen opportunities for home ownership and create sustainable, inclusive and mixed communities, local planning authorities should:
	• Plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community (such as, but not limited to, families with children, older people, people
	with disabilities, service families and people wishing to build their own homes);
	• Identify the size, type, tenure and range of housing that is required in particular locations, reflecting local demand; and
	• Where they have identified that affordable housing is needed, set policies for meeting this need on site, unless off-site provision or a financial contribution of broadly equivalent value can be robustly justified (for example to improve or make more effective use of the existing housing stock) and the agreed approach contributes to the objective of creating mixed and balanced communities. Such policies should be sufficiently flexible to take account of changing market conditions over time.
2. To maintain appropriate	NPPF – Headline principle
healthcare provision and access to healthcare facilities for all sectors of society.	Take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.
3. To provide access to	NPPF – Headline principle
appropriate educational facilities for all sectors of society including focus on	Take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.
training vulnerable and welfare dependant workers	NPPF – Promoting sustainable transport

Objective Number / Thanet District SA Objective	NPPF Objectives
with skills necessary to ensure year round employment.	Planning policies should aim for a balance of land uses within their area so that people can be encouraged to minimise journey lengths for employment, shopping, leisure, education and other activities.
	NPPF – Promoting healthy communities
	The Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Local planning authorities should take a proactive, positive and collaborative approach to meeting this requirement, and to development that will widen choice in education. They should:
	• Give great weight to the need to create, expand or alter schools; and
	• Work with schools promoters to identify and resolve key planning issues before applications are submitted.
4. To increase public safety	NPPF – Requiring good design/Promoting healthy communities
and reduce crime and fear of crime.	Create safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion.
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	<i>NPPF – Headline principle</i> Take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.

Objective Number / Thanet District SA Objective	NPPF Objectives
6. To create a vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued	 NPPF – Headline principle Always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings. NPPF – Headline principle Not simply be about scrutiny, but instead be a creative exercise in finding ways to enhance and improve the places in which people live their lives. (NPPF – Headline principle) Take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	NPPF – Local Plans Local planning authorities should set out the strategic priorities for the area in the Local Plan. This should include strategic policies to deliver: • jobs needed in the area; NPPF – Building a strong, competitive economy In drawing up Local Plans, local planning authorities should: • Set out a clear economic vision and strategy for their area which positively and proactively encourages sustainable economic growth?
8. To ensure the sustainable development of the proposed economic growth and encourage industrial and employment development at key sites within the District to support priority regeneration areas.	NPPF – Headline principle Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities
9. To protect and enhance the areas natural, semi-	NPPF – Headline principle

Objective Number / Thanet District SA Objective	NPPF Objectives
natural and street scene to support the tourist economy.	Conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations.
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	NPPF – Headline principle Encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value.
11. To ensure that a sustainable pattern of development is pursued.	 NPPF – Headline principle Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	NPPF – Headline principle Contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	NPPF – Headline principle Take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it.

Objective Number / Thanet District SA Objective	NPPF Objectives
14. To improve air quality in the District's Air Quality Management Areas.	NPPF – Conserving and enhancing the natural environment
	Planning policies should sustain compliance with and contribute towards EU limit values or national objectives for pollutants, taking into account the presence of Air Quality Management Areas and the cumulative impacts on air quality from individual sites in local areas. Planning decisions should ensure that any new development in Air Quality Management Areas is consistent with the local air quality action plan.
15. To provide a sustainable	NPPF – Headline principle
public transport network that allows access to key facilities, services and	Actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable.
employment opportunities without reliance on private	NPPF – Promoting sustainable transport
vehicles.	Plans should protect and exploit opportunities for the use of sustainable transport modes for the movement of goods or people. Therefore, developments should be located and designed where practical to
16. To develop key	• accommodate the efficient delivery of goods and supplies;
sustainable transport links	• give priority to pedestrian and cycle movements, and have access to high quality public transport facilities;
between Thanet and the wider Kent region and	• create safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians, avoiding street clutter and where appropriate establishing home zones;
beyond, including road, rail and air.	• incorporate facilities for charging plug-in and other ultra-low emission vehicles; and
und un.	• consider the needs of people with disabilities by all modes of transport.
17. To reduce waste	NPPF – Headline principle
generation and disposal and achieve the sustainable management of waste	Support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy).
	NPPF – Facilitating the sustainable use of minerals
	So far as practicable, take account of the contribution that substitute or secondary and recycled materials and minerals waste would make to the supply of materials, before considering extraction of primary materials, whilst aiming to source minerals supplies indigenously.

Objective Number / Thanet District SA Objective	NPPF Objectives
18. To ensure development within the District responds to the challenges associated with climate change.	<i>NPPF – Headline principle</i> Support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	<i>NPPF – Headline principle</i> Support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy).
20. To conserve and enhance biodiversity.	 NPPF – Headline principle Contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework. NPPF – Protecting Green Belt Land Once Green Belts have been defined, local planning authorities should plan positively to enhance the beneficial use of the Green Belt,
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	 such as looking for opportunities to provide access; to provide opportunities for outdoor sport and recreation; to retain and enhance landscapes, visual amenity and biodiversity; or to improve damaged and derelict land. NPPF - Conserving and enhancing the natural environment The planning system should contribute to and enhance the natural and local environment by: Minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Government's commitment to halt the overall decline in biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures; and Preventing both new and existing development from contributing to or being put at unacceptable risk from, or being adversely affected by unacceptable levels of soil, air, water or noise pollution or land instability

Objective Number / Thanet District SA Objective	NPPF Objectives
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	To reduce the global, social and environmental impact of consumption of resources by using sustainability produced and local products (objective 16) (NPPF – Headline principle) Support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy). (NPPF – Facilitating the sustainable use of minerals) So far as practicable, take account of the contribution that substitute or secondary and recycled materials and minerals waste would make to the supply of materials, before considering extraction of primary materials, whilst aiming to source minerals supplies indigenously.
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	 NPPF - Headline principle Support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy). NPPF - Meeting the challenge of climate change, flooding and coastal change To support the move to a low carbon future, local planning authorities should: Plan for new development in locations and ways which reduce greenhouse gas emissions; Actively support energy efficiency improvements to existing buildings; and When setting any local requirement for a building's sustainability, do so in a way consistent with the Government's zero carbon buildings policy and adopt nationally described standards.

8.3 Assessing the Local Plan

The SA Framework outlined above was the criteria used to assess the likely significant effects of the Local Plan options. A description of the potential impacts has been included and the significance of the effect determined, taking into account the magnitude of the impact and the sensitivity of the feature or receptor concerned. Where a significant effect was predicted, measures to mitigate the effects have been identified so that the potentially significant effects can be avoided or the magnitude of the impact reduced, to a level where there would no longer be a significant effect.

In order to correctly code the policy effects, the following table was utilised. The following significance criteria have been developed to assess the effects of the plan options. Significant effects are those as defined in the SEA Directive as illustrated below.

Significance of effect		Description of effect
++	Significant Positive	Likely to benefit a large area of the District and wider area and beyond or a large number of people and receptors. The effects are likely to be direct and permanent and the magnitude will be major
+	Minor Positive	The extent of predicted beneficial effects is likely to be limited to small areas within the District or small groups of people and receptors. The effects can be direct or indirect, temporary or reversible. The magnitude of the predicted effects will be minor.
0	Neutral	Neutral effects are predicted where the option being assessed is unlikely to alter the present or future baseline situation.
-	Minor Negative	Minor negative effects are likely to be limited to small areas within the district, or limited to small groups of people and receptors and or those with low sensitivity to change. The effects can be direct or indirect, temporary or reversible. The importance of the receptor that is effect is likely to be minor as is the magnitude of the predicted effect.
	Significant Negative	Likely to affect the whole, or large areas of Thanet or the wider district area. Also applies to effects on nationally or internationally important assets. The effects are likely to be direct, irreversible and permanent and or those with high sensitivity to change. The magnitude of the predicted effects will also be major.
?	Unknown	This significance criterion is applied to effects where there is insufficient information to make a robust assessment. It is also applied to the assessment of options that can have both positive and negative effects and it is not clear whether the positive or negative effects outweigh each other.
N/A	Not Applicable	This is applied to objectives that are clearly not affected by the option or policy being assessed.

Table 13: Significance Criteria for Policy Option Review.

Where there is an effect could have a positive or negative effect, but the magnitude is uncertain a combination of symbols will be used (e.g. - / ? signifies a potential minor adverse effect with a significant level of uncertainty associated

with the predicted effect). The full results from the assessment can be seen Appendix E.

The Local Plan that is the focus of this SA consists of overarching policies and site specific allocations for housing provision. For the housing and employment land allocations the SA objectives and assessment supporting questions do not independently provide the basis for a robust comparative SA of different sites. For this reason the criteria developed for the assessment and selection of housing sites have been reviewed and compared to the SA objectives, as previously detailed. This review highlighted how the site selection criteria relates to the SA. THis review was then used to help undertake the appraisal of site allocations, using the SA framework. The site selection criteria can be found in Appendices A1 and A2.

Having undertaken the SA of the site allocations preferred site allocations were selected. To address potentially significant adverse effects this process has resulted in the inclusion of additional policies in the draft plan to ensure that these are mitigated (these are covered by polices regarding infrastructure, school, facilities and access to local amenities and services).

The following sections of the SA Report describe the results from this assessment in more detail. However, in some instances the detailed appraisal results have been included as appendices to this document due to their size and the number of policy area/options that have had to be assessed.

Appendix F illustrates where the proposed SA objectives overlap and meet the demands of the Strategic Priorities of Thanet District Council. The information also discloses if the Objective would have a neutral or potentially negative influence upon the Strategic Priorities. The information was constructed in order to ensure that the Policies proposed met the requirements of the priority areas that were initially outlined. It can be seen that at least one objective positively meets the demands of the strategic priorities thus showing that the proposed SA Objectives have applicability for aiding to guide the Districts vision for sustainable development.

9 Sustainability Appraisal of Local Plan Policies

This sections summarises the results from the SA of the Local Plan policies. It describes the options that have been assessed, the reasons for selecting the preferred options and not selecting the alternatives. These are described in the table below. However the complete detailed appraisals can be found in Appendix E.

Table 14: Sustainability Appraisal Findings.

Policy SP01 - National Planning Policy Framework – Presumption in favour of sustainable development

The proposed policy, through support for the promotion of NPPF, would undoubtedly enhance the District due to the positive impacts seen across the majority of the SA objectives. Commonly, a no policy option would yield neutral impacts or negative as uncontrolled developments could over saturate local services and place too high a demand upon them. As such by incorporating the NPPF sustainable practices and designs will be created whereby developers and TDC work together to create a development thats sustainably meets the needs of the local population whilst also been considered for its socio-economic and environmental implications.

Policy SP02 - Economic Growth

The proposed policy has no significant negative effects and provides a number of opportunities yield of 5,000 jobs. Notwithstanding the above comments, any potential negative significant effects could be mitigated, either by other Local Plan policies and the site allocation assessment process.

Policy SP03 - Land Allocated for Economic Development

Policy SP04 - Manston Business Park

The proposed policy is predicted as having the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects could be attributed to the proposed policy, however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing by potentially allowing a greater area of land for housing and other types of development.

Policy SP05 - Manston Airport

Adoption of the policy would provide sustainable impacts in that it would specifically preserve and protect environmental, cultural and heritage features of the local area through the creation of an Area Action Plan as recommended as part of the mitigation strategy. Noise and air pollution would also be mitigated meaning any future plans would ensure sustainability and viability both socially and environmentally. These impacts are largely reflective of existing legislation that would protect such assets under a no policy scenario but commonly the impacts of no policy option are unknown as future developments cannot be assessed as the plans are not known. Over saturation of facilities and services could occur under no policy option as guidance would not be provided to ensure the new local demands are appropriately met. Policy adoption is largely centred upon ensuring the Airport can be mixed use but also retain the potential to be an operational facility. The Area Action Plan for the airport should provide further mitigation and specific local development plan criteria in order to make sure that the unknown impacts are appropriately mitigated.

Policy SP06 - Thanet's Town centres

The proposed policy will have positive effects as it promotes a proportionate town centre hierarchy that would provide services and facilities for Thanet residents in locations that are

accessible. Residential accommodation would be allowed, to a degree, so long as the viability of town centres are not detrimentally affected, which is more likely to be an issue at local town centres where shop frontages are threatened. Not all SA objectives are applicable at this level, though these are assessed further as part of policies SP07 to SP10.

Policy SP07 - Westwood

The proposed policy has potential to have positive and negative effects depending on the location of development and its relationship with the receiving environment. The proposed policy would primarily deliver these benefits at the Town Centres. Where potentially adverse effects have been predicted it is anticipated that they can be mitigated either by ensuring that development management policies are provided that counter or avoid adverse effects and/or by meeting the requirements of the NPPF.

Policy SP08 - Margate

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy suitable development will be encouraged across Margate. Active support and promotion of developments will be seen to promote a contemporary seaside resort to help develop the area into a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity. Transport provisions will increase to ensure the viability of the location and facilities will grow that will be of benefit to both visitors and locals. As such the impacts of policy adoption are widely positive socio-economic factor, with local character and history preserved throughout.

Policy SP09 - Ramsgate

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of the Ramsgate district will occur with the developments taking into consideration the local maritime heritage and ensuring character is preserved in order to create a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity with the creation of retail and tourism facilities. Transport provisions will increase notably by the support of the Ramsgate Maritime Policy which will seek to build upon the conflux of a major seaport, international airport and high speed rail location. As such the impacts of policy adoption are widely positive, with local character and history preserved throughout. However it should be noted that policy adoption may be to the detriment of environmental assets and that housing opportunities are not overly supported within the policy due to the tourist and economic focus.

Policy SP10 - Broadstairs

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of Broadstairs will occur with the developments promoting the creation of employment opportunities by enhancing the existing commercial, retail and tourist infrastructure. This will add future economic resilience to the area by increasing the attraction of investors and visitors. The active support of developments along promenade and beach front will enhance the tourist economy whilst creating employment opportunities. Similarly by enhancing local character and exiting features a sense of place will be established that is attractive and in keeping with local history. Policy adoption undoubtedly meets the requirements of the SA objectives.

Policy SP11 - Housing Provision

Areas of new build homes have the potential to create areas that may be perceived as being safer. This is often the case when brownfield or previously developed land is developed and brought back into active use. However, this was not factored into the assessment of the scenarios at this stage, given their strategic nature.

The development of new homes will have no direct effect on the provision of public transport links. The increase in new homes will likely increase demand on public transport facilities indirectly by increasing the population of certain areas. The extent of the effect will depend on the provision of public transport facilities and the availability of public transport options for a given area. Gathering data on capacity of existing public transport facilities will be crucial in understanding the effects increased populations will have. Many of the potentially uncertain effects and adverse effects will be mitigated by other criteria and topic specific policies as well as the site assessment criteria used to assess and select site allocations.

Policy SP12 - Strategic Housing Site Allocations.

The potential effects of SP12 are covered in detail as part of SP13, SP14, SP15 and SP16.

Policy SP13 Strategic Housing Sites - Manston Green

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. Due to its location, the proposed policy advocates housing on sites that do not currently connect well with existing urban settlements, though design of the sites can improve urban connectivity. The sites are served by public transport and available capacity on the highway network, which enables good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP14 - Strategic Housing Site at Birchington

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of a new link road to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP15 - Strategic Housing Site at Westgate-on-Sea

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new primary school. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of a new link road to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP16 - Westwood Strategic Housing

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities. There may be a need for a new off-site school, which would benefit from identification and implementation that aligns with a phasing programme for the site. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is largely served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs and Ramsgate.

Policy SP17 - Land fronting Nash and Haine Roads

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new school, medical centre and community assembly facility. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs, Ramsgate and Westwood.

Policy SP18 - Type and Size of Dwellings

The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such housing sustainability is appropriately met through the adoption of policy SP18.

Policy SP19 - Affordable Housing

The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such affordable housing provision is appropriately met through the adoption of the proposed policy.

Policy SP20 - Development in the Countryside

The proposed policy is likely to have a beneficial effect on the majority of the SA objectives. Many of the potentially adverse effects associated with no policy option could be mitigated by other policies in the Local Plan, though in isolation are likely to be significantly adverse.

Policy SP21 - Safeguarding the Identity of Thanet's Settlements

The proposed policy is likely to have a beneficial effect on the majority of the SA objectives. Many of the potentially adverse effects associated with the no policy option would be mitigated by other policies in the Local Plan.

Policy SP22 - Protection and Enhancement of Thanet's Historic Landscapes

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas.

Policy SP23 - Green Infrastructure

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy SP24 - Biodiversity Enhancements

The proposed policy seeks to preserve an environmental aspect and as such commonly yield positivity on similar objectives. The no policy option largely yields negative impacts as by removing protection or having no support there is the potential for unrestricted development action which could be to the detriment of environmentally sensitive parameters. Biodiversity enhancements are clearly supportive of all of the SA objectives they relate to. Whilst focusing on species and habitats, the effects of the proposed policy are more wide reaching and affect many other aspects of the natural environment.

Policy SP25 - Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserve

The proposed policy is largely a reflection of existing legislation and will yield the most substantial environmental protection and sustainability. The protection of open spaces would yield environmental benefits. The proposed policy will be restrictive to infrastructure and housing as protecting environmental assets will mean developments upon such lands will most likely be prohibited and thus restricted to other areas of Thanet.

Policy SP26 - Protection of Open Space

The protection of open spaces would yield environmental benefits. However without mitigation and the implementation of other policies within the Local Plan, the proposed policy may be restrictive to infrastructure and housing.

Policy SP27 - Provision of Accessible Natural and Semi Natural Green Space, Parks, Gardens and Recreation Grounds

The proposed policy seeks to preserve an environmental aspect and as such commonly yield positivity on a number of the sustainability objectives.

Policy SP28 - Quality Development

The proposed policy specifies that all developments must be high quality and inclusive in design thus reduce a prominent impact of the local visual display and in fact enhance its appearance. Similarly the policy stipulates that any large developments or ones of national significance have to undergo a design review to ensure development quality does not impede the local area.

Policy SP29 - Conservation and Enhancement of Thanet's Historic Environment

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas. There is also the added ability of the proposed policy to encourage the reuse of listed buildings to aid urban renaissance and also to enhance the protection of the historical and archaeologically important sites across Thanet.

Policy SP30 - Climate Change

Generally, the proposed policy seeks to protect assets through ensuring climate change resilience for new development. The proposed policy also ensures that the design of new development should consider the effects it can have on climate change issues by helping to reduce emissions.

Policy SP31 - Healthy and Inclusive Communities

Adoption of the proposed policy would yield significant positive effects upon a variety of objectives, with regards to the improvements in available health care for the community. Whilst A no policy option is not likely to cause significant negatives the added policy and effort to enhance services would create a more robust sustainability approach. Social benefits could be seen through increased recreational provisions in an environmental conscientious manner. Through creating a healthier lifestyle approach within designs and facilities the region would significantly benefit in comparison to if A no policy option was pursued. The proposed policy also encourages environmentally sustainable mixed use areas of character and charm, alongside appropriate building practices and as such a multifaceted approach to creating an appropriate healthy and inclusive community can be achieved.

Policy SP32 - Community Infrastructure

The effects of the proposed policy are considered positive as the policy contributes towards supporting existing facilities and promoting the development of new facilities to address current and future shortages. The effects of the no policy option are adverse because over the long term would not allow the capacity of facilities to be increased. All of the other remaining uncertain effects associated with the proposed policy can potentially be mitigated by development management policies.

Policy SP33 - Expansion of Primary and Secondary Schools

The proposed policy would attribute significant success with regards to the education SA objectives. It is also likely that the proposed policy will be required over the life of the plan if there is to be sufficient school place provision to meet the anticipated growth in the residential population. The potential improvement within the community could be significant due to the utilisation of existing infrastructure at the schools. Whilst expansions can accommodate new pupils, a new purpose built facility can be tailored to the needs of the local area. There are potential society benefits under the options such as increased employment form both options alongside the opportunity to potentially offer night school as a side product of expanded facilities for the wider community. A no policy option could be generationally inhibiting as a lack of investment into the education system could cause stagnation and overcrowding of resources.

Policy SP34 - Safe and Sustainable Travel

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Policy support for the growth of sustainable transport would robustly meet the demands of the public and the SA objectives.

Policy SP35 - Accessible location

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Additional benefits of the proposed policy are likely to stem from promoting the need for developments to be located in accessible locations. This in turn could promote public transport use and reduce the need for private vehicles whilst also ensuring that developments are appropriately situated in relation to facilities and services.

Policy SP36 - Transport Infrastructure

The proposed policy is likely to have a positive effect against a number of sustainability objectives. Furthermore, the proposed policy is likely to have significant beneficial cumulative effects when considered with policies relating to greenhouse gas emissions and efficient use of resources.

Policy SP37 - Connectivity

No SA required as policy relates to statement of intent to lobby for investment

Policy SP38 - Strategic Road Network

No SA required as policy relates to statement of intent to undertake modelling of impact on strategic road network outside the district

Policy SP39 - New Rail Station

The proposed policy is likely to result in significant beneficial effects, particularly in terms of contributing towards employment, economic growth (particularly the visitor economy) and providing infrastructure to support modal shift. However, without further details of the proposed policy it is not possible to assess whether it is likely to result in significantly greater benefits than the other. Where potentially adverse or uncertain effects have been predicted mitigation measures can be used to ameliorate the effects.

Policy E01 - Retention of existing employment sites

The proposed policy is predicted to have the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects were predicted for both options,

however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing, by potentially allowing a greater area of land for housing and other types of development.

Policy E02 - Home Working

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working) and by indirectly helping to make residential areas and local centres more vibrant by increasing day time weekday activity. It should however be noted that the potential sustainability benefits of this option are only likely to be realised as part of wider sustainability interventions. Any potentially uncertain and/or adverse effects can be mitigated by the requirements of the NPPF and at the local level through development management policies.

Policy E03 - Digital Infrastructure

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy E04 - Primary and Secondary Frontages

Policy adoption has the potential to have a significant sustainability effect on towns. Whilst it restricts the housing market by only allowing residential properties upon non ground floors in the primary frontage, economic functioning will enhance. Through safeguarding primary and secondary frontages into set business activities whether tourism, retail or business the frontages will not undermine one another through a conflict of use and subsequently create areas that do not undermine one another. Indirectly by adopting the policy and creating centralised hubs of activity business opportunities could potentially grow and increase employment opportunities. As a no policy option would not alter the status quo of the local economy, policy adoption undoubtedly meets the requirements of the SA objectives.

Policy E05 - Sequential and Impact Test

The proposed policy has both positive and negative effects against the sustainability objectives. The proposed policy is likely to only support out of town centre development that contributes to sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development management type policies, the implementation of the NPPF and compliance with environmental legislation.

Policy E06 - District and Local Centres

Both the proposed policy and no policy option have positive and negative effects. However, the effects of the proposed policy are generally more certain and likely to result in a beneficial effect than those associated with the no policy option. This is because the assessment deemed that the proposed policy was more likely to support out of town centre development that contributes sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development management type policies, the implementation of the NPPF and compliance with environmental legislation.

Policy E07 - Serviced Tourist Accommodation

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. Both the proposed policy and the no policy option are likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E08 - Self Catering Tourist Accommodation

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. The protection of tourist accommodation could detract from the community sense of place due to the presence of accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However providing tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy is likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E09 - Protection of Existing Tourist Accommodation

The proposed policy would ensure a fair assessment of economic viability across a minimum of a calendar year. This would safeguard jobs for a period of time alongside ensuring tourist accommodation is present for at least one more low/high season cycle to assess if the tourist trade will re-establish itself and be increasingly profitable. The policy would also ensure knee jerk decisions are not made by landowners to redevelop their assets. Protection of tourist accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However safeguarding tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy likely to have a number of uncertain effects. This is particularly because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E10 - Major Holiday Beaches

Policy E11 - Intermediate Beaches

Policy E12 - Undeveloped Beaches

The proposed policy is likely to have a positive effect, on job creation, economic growth and potentially the use of previously developed land. However, without this policy there would be a greater degree of uncertainty as to whether or not these effects would be realized, and would be positive or negative. The proposed policy is likely to have uncertain effects, because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy E13 - Language Schools

The proposed policy is likely to result in positive effects, particularly in terms of job creation and supporting economic growth associated with language schools. The potentially negative or uncertain effects associated with the proposed policy can be mitigated by development management policies. The no policy option would avoid a lot of the potentially adverse effects associated with the proposed policy. However, over the long term in particular it could have a negative effect on the economy, if opportunities to increase the provision in this sector are lost.

Policy E14 - Quex Park

The proposed policy and no policy option commonly reflected one another in that the impacts were the same either as the future development specifics were unknown or that national legislation that already exists ensured that the objective would be met under either option. However under policy adoption it would be ensured that a local heritage and cultural asset would be preserved with the opportunity to increase local employment and helping develop a tourist industry within Thanet. The safeguarding of Quex Park in such a way would yield significant economic benefits which may not be attained under a no policy option as it would not be known if the facility would be retained and developed or not; under this option.

Policy E15 - New build development for economic development purposes in the rural area

Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from rural economic development, whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.

Policy E16 - Conversion of rural buildings for economic development purposes

The proposed policy has many positive effects and under the utilisation of existing structures in rural environments it will ensure local economy, the sense of place, sustainable transport all benefit. However the policy is limited by the locations of existing structures which may not be appropriately placed for economic development if too isolated. However utilization of existing structures would have significant environmental benefits by minimising the need for construction.

Policy E17 - Farm Diversification

Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from agricultural diversification whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.

Policy E18 - Best and Most Versatile Agricultural Land

The proposed policy has the potential to contribute towards the economy, avoiding increases in flood risk and significant benefits for the protection of greenfield land from development. All of the negative and uncertain effects associated with both the proposed option and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the volume of 'uncertain' effects.

Policy E19 - Agricultural Related Development

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option is specific about where development would occur uncertain effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy and resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the 'uncertain' effects.

Policy H01- Housing Development

Policy H02A - Land on west side of Old Haine Road, Ramsgate

Policy H02B - Land fronting Nash Road and Manston Road

Policy H02C - Land fronting Park Lane, Birchington.

Policy H02D - Land south of Brooke Avenue Garlinge

Policy H02E - land at Haine Road and Spratling Street, Ramsgate

Policy H02F - Land south of Canterbury Road East, Ramsgate

Policy H02G - Land at Melbourne Avenue, Ramsgate

Under policy adoption there are specific requirements that developments must undertake in order to be granted permission. One concerns the management of natural conservation sites and infrastructure provisions. The policy states that developments must not conflict with another policy, resultantly all SA objectives are positively met as alternative polices all provide positive impacts to the objectives. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H03 - Cliftonville West and Margate central

Under the proposed policy, housing in Cliftonville West and Margate central would have specific guidance to ensure a positive sustainability outcome was achieved and that updated or new residential accommodation actively contributed to the establishment of vibrant local communities. Policy adoption would ensure historic character and scale was preserved. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H04 - Housing at Rural Settlements

Policy H04A - Land at Tothill Street, Minster

Policy H04B - Land at Manor Road, St Nicholas at Wade

Policy H04C - Land at 71-75 Monkton Street, Monkton

Policy H04D - Land at Walter's Hall Farm, Monkton

Policy H04E - Land south side of A253, Cliffsend

Policy H04F - Land north of Cottington Rd, Cliffsend

Policy H04G - Land south side of Cottington Rd, Cliffsend

Under the proposed policy, housing in rural settlements would have specific guidance to ensure a positive sustainability outcome was achieved. The developments must also comply with guidance of Policy H01 which provides positivity to all SA objectives and as such the effects would also be felt under adoption of the proposed policy. Additionally policy adoption would ensure historic character and scale was preserved; the requirement of bird surveys also shows environmental conscientiousness. Combining the requirements of the proposed policy with positive sustainability practices in relation to rural housing will occur. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H05 - Rural Housing Need

The proposed policy would release land for appropriate residential development, yet it could be to the detriment of environmental sustainability. In addition rural locations may be isolated from provisions and facilities, which may be detrimental for certain groups of first time buyers, particularly those with young families.

Policy H06 - New agricultural dwellings

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option are specific about where development would occur, effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy an resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is predicted to have both

positive and negative effects, but the balance of this is unknown at this stage, as illustrated by the 'uncertain' effects.

Policy H07 - Care and Supported Housing

The proposed policy would undoubtedly increase the provisions and facilities available across Thanet. As such levels of deprivation and access to healthcare will enhance whilst it also indirectly provides the opportunity for employment. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. This could lead to the decline in the quality of life and increase deprivation across the area.

Policy H08 - Accessible Homes

By adopting the proposed policy, deprivation has the potential to be indirectly reduced by providing access to new development homes for wheelchair users whilst the developments would also have at least 20% built to lifetime standards meaning sustainability and the quality of housing would meet the demands of the local market. Subsequently the potential for positive impacts upon the objectives is largest through policy adoption to improve accessible homes. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. Similarly A no policy option may or may not meet future housing demands as plans are not known. As such sustainability would be negligible in comparison to policy adoption.

Policy H09 - Non self-contained residential accommodation

The proposed policy would induce sustainability across Thanet and is likely to yield a controlled impact across the region without fully restricting HMO locations. The uses of HMO's would not be fully restricted through the policy option, which would be a positive impact given that HMO's often provide student accommodation and low cost housing, thus a key demographic in Thanet would be accounted for and have suitable housing provisions without being to the detriment of the local area (e.g. in Broadstairs given its proximity to East Kent College and University Campus). It would take into account the specific local housing make up to ensure there is not an over saturation of such houses in one region and thus allow their spread across Thanet. It is specific in detail and guidance as it allows a controlled utilisation of the whole Thanet area as opposed to specific locations.

Policy H10 - Accommodation for Gypsy and Travelling Communities

Adoption of the proposed policy will ensure any new gypsy and traveller communities are appropriately placed to have access to existing services and facilities without placing undue stresses upon them. However support for creating appropriate sites may be to the detriment of environmental assets yet this is questionable due to existing legislation protecting such assets. The no policy option could allow unrestricted developments that may be to the detriment of local services and facilities.

Policy H11 - Residential use of empty property

The proposed policy states that developments must be compatible with nearby uses, which in turn could act as a catalyst for the improvement of local infrastructure and services. Policy adoption implements an all-encompassing policy that will be specific to housing but will also incorporate other policy benefits for the wider promotion of sustainability. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy H12 - Retention of existing housing stock

Through the proposed policy, there would be the safeguarding of existing housing stocks. This would mean that a variety of housing types would be available to the market whilst also preserving other land that has not been identified for residential purposes by ensuring utilisation of existing assets. Similarly the social benefits would be the prevention of social upheaval of residents in favour of developments whist also retaining existing services and infrastructure that will most likely currently service the area to an appropriate level without causing disruption. However the policy would not actively grow employment and economic upturn yet the clauses provide the flexibility to allow tourist developments and community facilities to grow, which indirectly would create employment. A no policy option commonly would not alter the status quo and in some cases would allow unrestricted developments which could be to the detriment

of several objectives. As such adoption of the policy protects existing housing which has significant social implications whilst providing flexibility for economic growth in an appropriate sustainable manner.

Policy GI01 - Locally Designated Wildlife Sites

Adoption of the proposed policy would undoubtedly enhance the protection of wildlife sites. With that said A no policy option would not damage such assets due to existing legislation. However by adding local specificity and control through the proposed policy, adoption would ensure sustainability practices are upheld by new developments with the desire to enhance and connect designated wildlife sites.

Policy GI02 - Regionally Important Geological Sites (RIGS)

Comparably both options would offer protection to RIGS given that existing legislation is in place to protect such features. However the adoption of the proposed policy would be pertinent in order to meet specific environmentally related SA objectives. Yet if nothing is done it is unlikely severe adverse effects would occur given the existing legislation around geological areas of significance.

Policy GI03 – Protected Species and other significant species

Adoption of the proposed policy would undoubtedly enhance the protection of both wildlife and protected species. Many objectives regarding the protection of biodiversity and wildlife are met. With that said A no policy option would not damage such objectives due to existing legislation.

Policy GI04 - Amenity Green Space and Equipped Play Areas

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy GI05 - Protection of Playing Fields and Outdoor Sports Facilities

Adoption of the proposed policy would be beneficial as it could help provide social benefits through preserving recreational facilities. Similarly the policy could preserve the associated health benefits of active recreation on the protected areas by encouraging and preserving exercise spaces. A no policy option would not actively support the aims of several objectives regularly yielding neutral impacts in comparison to the significant social benefits of the proposed policy.

Policy GI06 - Landscaping and Green Infrastructure

The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.

Policy GI07 - Jackey Bakers

Adoption of the proposed policy could help provide social benefits through an additional facility to utilise. Subsequent health and social benefits from exercise would also follow. The potential for expansions and increased footfall at the site could create more

employment/business opportunities within the immediate vicinity. This could be through direct employment at the site or even through local business needing extra staff. A no policy option would not actively support the aims of several objectives. The overall benefits of the policy potentially outweighs the negatives as the site is not a new build and the environmental effects should not be on a large scale.

Policy QD01 - General design principles

The proposed policy will contribute towards a number of SA objectives, most notably where there is a likely improvement in the quality of housing stock. Additionally there is also the potential for increasing resilience to climate change and reducing the effect on climate change, through implementing robust design standards and reducing energy efficiency respectively. The no policy option is unlikely to impact on the SAS objectives as it will not alter the status quo

Policy QD02 - Living Conditions

The proposed policy has the potential to positive impact on the objectives by encouraging the natural drying of clothes and providing adequate space for refuse disposal. The proposed policy has the potential to have a number of positive effects, including indirect effects on a sense of place and the desire people have to live at certain location or in a given settlement, supporting

the visitor economy by working with and enhancing the built environment and by requiring development to take into account and work with their setting including heritage areas and features. However the most significant effect of the proposed policy is the requirement for developments to take into account their surroundings, residential amenities and neighbouring buildings in order to have a on the landscape and townscape.

Policy QD03 - Advertisements

The proposed policy has an inherently positive effect on the creation of vibrant communities as there is a clear emphasis within the proposed policy text for the effects on amenity and public safety to be considered as part of any application for advertisements and the safeguarding of townscape character, through the consideration of specific aspects, such as the appearance and the illumination of advertising.

Policy QD04 – Telecommunications

The proposed policy has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy HE01 - Archaeology

The proposed policy has direct and indirect effects on the character and sense of place of settlements, helping to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. One major significant effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE02 - Development in Conservation Areas

The proposed policy has direct and indirect effects on the character and sense of place of settlements; helping to support the economy and visitor economy in particularly as visitor attractions in their own right; and contribute to the character of townscapes. Two significant beneficial effects were predicted on SA objectives 12 and 13 (to conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas; and to preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings).

Policy HE03 - Local Heritage Assets

The proposed policy will have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adoption of the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE04 - Historic Parks and Gardens

The proposed policy will have direct and indirect effects on the character and sense of place of settlements, will help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant effect was predicted on SA objective 13 (To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings). The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments

are not yet known which could be either positive or negative in relation to many of the objectives.

Policy HE05 - Works to a heritage asset to address climate change

The proposed policy is likely to have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain, because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy CC01 - Fluvial and Tidal Flooding

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from flooding.

Policy CC02 - Surface Water Management

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk through the implementation of sustainable drainage systems, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development.

Policy CC03 - Coastal Development

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change, flood risk and coastal erosion through the implementation of restrictive criteria for new developments. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development within coastal areas, particularly within 40m of the coastline or cliff top.

Policy CC04 - Sustainable Design

The proposed policy contains explicit design criteria that are likely to have significant beneficial effects on a range of sustainability objectives relating to transport, greenhouse gas emissions, waste minimisation, efficient use of resources and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant adverse effects on housing quality, which is likely to be the most prevalent form of development within the District.

Policy CC05 - Renewable energy installations

The proposed policy explicitly states a presumption in favour of renewable technologies within developments, assuming that there are no detrimental impacts, particularly visual effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.

Policy CC06 - District Heating

The proposed policy is unlikely to have an adverse sustainability effect. It is likely to have significant beneficial effects on transport, greenhouse gas emissions, waste minimisation, and efficient use of resources, and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant

adverse effects associated with the continued use of fossil fuels as part of individual heating installations.

Policy CC07 - Solar Parks

The proposed policy will contribute towards the promotion of low carbon and renewable energy with associated benefits for environmental objectives relating to air quality, biodiversity etc. The no policy option results in neutral effects.

Policy CC08 - Richborough

The proposed policy explicitly states a presumption in favour of renewable technologies within developments at Richborough, assuming that there are no detrimental impacts, particularly biodiversity effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.

Policy SE01 - Potentially Polluting Development

The proposed policy result in beneficial effects because it would allow the District to control polluting development through the planning system. The policy will be beneficial in terms of improving air quality and the quality of water resources, as well as benefits for biodiversity. The no policy option performs negatively against the objectives as it provides no such control.

Policy SE02 - Landfill Sites and Unstable Land

The proposed policy is likely to affect the use / development of previously developed land. A beneficial effect is predicted because the proposed policy will ensure that developers have better understanding of the potential structural and design issues they will have to address during construction. As a result this could help to make development of PDL more viable and less risky for developers and give others the confidence that potential instability issues have been considered. This particularly important in areas with a dynamic coastline. The no policy option would not affect the status quo.

Policy SE03 - Contaminated Land

The proposed policy will have beneficial effect on land use by helping to provide a framework that would allow potentially contaminated previously developed land to be used for development. A no policy option is likely to have a neutral effect as other legislation would require developers to remediate their sites.

Policy SE04 - Groundwater Protection

The proposed policy would benefit objectives related to sustainable development, biodiversity and the protection of water quality. However groundwater is protected by other legislation so it is uncertain whether the no policy option would actually result in detrimental effects.

Policy SE05 - Air Quality

The proposed policy is more likely to result in beneficial effects than the no policy option because, by the use of criteria, it would allow the District to control polluting development through the planning system. The proposed policy would contribute towards promoting more sustainable, low emission forms of transport as well as providing beneficial effects in relation to both air quality and biodiversity.

Policy SE06 - Noise Pollution

The proposed policy would ensure that residents and other sensitive receptors are protected from unacceptable noise at both existing and future development locations.

Policy SE07 - Noise Action Plan Important Areas

The proposed policy would ensure that noise pollution is managed in line with the Environmental Noise Directive and ensure that that communities and residential amenity is protected from unacceptable noise.

Policy SE08 - Aircraft Noise

The proposed policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise pollution within potentially nearby developments. The knock on effects of this would be a happier residential population which

could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy SE09 - Aircraft Noise and Residential Development

The policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise nuisance within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy SE10 - Light Pollution

The policy supports objectives to conserve the character of the areas townscape and landscape as well as biodiversity by minimising the potential impacts of light spillage and pollution. A no policy option could lead to negative effects with respect to townscape and biodiversity.

Policy CM01 - Provision of New Community Facilities

The proposed policy supports objectives to maintain and enhance existing key facilities and services, especially local services such as those in rural areas. By protecting, and allowing for enhancement of such facilities it ensures that they are still available for the most vulnerable members of society. It also promotes more sustainable modes of travel by ensuring services are available at local level and can be accessed by cycling and walking, rather than reliance on private motor vehicles. Conversely, the no policy option is likely to perform adversely against these aspects.

Policy CM02 - Protection of Existing Community Facilities

The proposed policy supports objectives to provide and maintain appropriate access to key facilities and services, including healthcare and education. By protecting such facilities it ensures that they are still available for the most vulnerable members of society. Conversely, the no policy option would perform adversely against these objectives.

Policy CM03 - Expansion of Margate Cemetery

The policy indirectly enhance natural biodiversity by providing an increased land area that would be largely undisturbed. The no policy option would be neutral in terms of the SA objectives.

Policy CM04 - Expansion of Minster Cemetery

The policy indirectly enhance natural biodiversity by providing an increased land area that would be largely undisturbed. The no policy option would be neutral in terms of the SA objectives.

Policy TP01 - Transport assessments and Travel Plans

The proposed policy has the opportunity to promote more sustainable, low carbon modes of travel. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Policy TP02 - Walking

The policy has the potential to have a positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Policy TP03 - Cycling

The proposed policy has the potential to positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access.

Policy adoption would actively seek to increase safe and appropriate cycling provisions at the earliest opportunity within new developments and grow the cycling network across the District. There are numerous sustainability benefits for doing so, particularly regarding improved travel options, improved air quality and enhanced health all indirectly via the potential to reduce road traffic and vehicle use. Under a no policy option the status quo would ensure the effects would largely be neutral.

Policy TP04 - Public Transport

Adoption of the proposed policy to support the growth and active investment into public transport provisions has the potential to yield significant positive effects. The proposed policy would increase travel opportunities and reduce the number of vehicles upon roads which would have environmental and health benefits. Additionally it would increase the connectivity across the district and ensure all members of society have access to facilities, services and employment. A no policy option would not alter the status quo and as such would not actively seek to improve the public transport network.

Policy TP05 - Coach Parking

The proposed policy seeks to maintain and potentially enhance coach parking, which will have beneficial effects to the local tourist industry and for the local road network. Any development pressures applied to these sites, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP06 - Car Parking

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP07 - Town Centre Public Car Parks

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy TP08 - Freight and service delivery

The proposed policy seeks to implement appropriate standards for the servicing of businesses. This would reduce on street deliveries, which would have beneficial effects relating to local air quality and traffic congestion. The no policy option would potentially lead to a comparative lack of service bays if developers are not duty bound to provide appropriate provision within developments.

Policy TP09 - Car parking provision at Westwood

The proposed policy seeks to maintain parking provision at Westwood, whilst limiting the potential for increased parking provision associated with new commercial development. This would have beneficial effects on local air quality and the local transport network, as pollution and congestion associated with private car use is limited. The no policy option would retain dependency on use of private cars, which may result an ongoing increase in pollution and congestion on the roads surrounding Westwood.

Policy TP10 - Traffic Management

There is minimal difference between the proposed policy and no policy option. Both options seek to enhance sustainability within Thanet and do so in similar ways given that the local policy regularly reflects the Traffic Management Act 2004. As such adoption of the proposed

policy or the no policy option would be beneficial. Incorporating specific policy regarding traffic management would add an additional layer of protection to the District and ensure traffic management measures are implemented with the best interests of the local community at the core.

None of the policies that have been selected for the draft Local Plan have been assessed as being likely to result in significant adverse effects, either in isolation or in combination with other plans and programmes. However, as can be seen in the SA matrices within Appendix E, many of the proposed policies have the potential to result in significant beneficial effects for the District and the people that live, work and visit it.

10 Next steps in the SA process

This chapter briefly describes the next steps in the SA process.

10.1 Complete the SA process

Following consultation it may be necessary to revise or update the SA report in response to specific comments on the SA process or its findings. The SA will also require updating if, as a result of consultation, the policies and allocations in the draft Local Plan are revised. With each revision any new or amended policies or allocations will be subject to SA and compared to the options or sites that were rejected earlier on in the plan preparation process. The SA may also require updating if the Planning Inspector makes changes to the draft Local Plan.

Once the Local Plan is adopted a Sustainability Statement will be produced. This will set out the indicators that will be used to monitor any of the significant effects identified in the SA. It will also summarise how:

- sustainability considerations have been taken into account by the local plan;
- comments on the local plan and SA reports have been taken into account;
- the reasons for the choice of the preferred policies and allocations in light of the alternatives; and
- the indicators and approach to be adopted to monitor significant effects.

10.2 Draft SA monitoring framework

Appendix D sets out a series of potential indicators and targets that could be used to monitor the significant effects of the Local Plan. It identifies the indicators and targets relevant to each SA objective and indicates the availability and source of the information data where known as identified through the review of plans and programmes and the baseline situation.

Such monitoring will enable any unforeseen adverse effects to be identified at an early stage and necessary remedial action to be undertaken (i.e. in line with requirements of the SEA Regulations).

Contextual indicators describe the wider economic, social and environmental background in which the plan operates, such as life expectancy, unemployment rates and GCSE results. In addition some of the indicators (e.g. affordable housing completions and open space standards) have been taken directly from the Local Plan monitoring framework.

The indicators will be revised following the assessment of the draft Local Plan policies and allocations in light of any specific effects that are identified during the assessment process.

It is anticipated that the monitoring of the SA will take place annually alongside the monitoring of the Local Plan from 2015 to 2031 in the Annual Monitoring Report. The SA monitoring framework indicates that there is a strong overlap between the two processes.

11 Conclusion

Future developments will be guided by the policies proposed in the Local Plan. The policies cover a wide range of issues to ensure that sustainable development occurs across the district. Several broad overarching policies add a unified purpose across all policies and help create a framework for future sustainable development. Mitigation processes have been proposed throughout the SA process where relevant in order to maximise the positive (and by association reduce any negative) impacts resulting from the policies.

The land allocations for housing and employment have undergone a robust appraisal to ensure only suitable sites are selected that are appropriate for their intended function.

The SA process has helped create a Local Plan that sets out policies and proposals to guide decisions and investment on development and regeneration up to 2031. Under the SA process policies were appraised to ensure homes, jobs, community facilities, shops and infrastructure will be delivered and that the local environment and townscape are protected characteristics as their functioning underpin the economy and society.

Upon completion of the SA report it can be said that the draft Local Plan will not result in significant adverse effects. As a result, the plan will attain social, environmental and economic sustainability for the Thanet district due to the cohesive but varied nature of the policies. Once adopted, the Local Plan will form the statutory planning framework for determining planning applications and will replace the 'saved' policies from the Thanet Local Plan 2006.

Appendix A

Housing and Employment Land Allocation Assessment Tables And Results

A1 Housing Land Allocations and Assessment Criteria.

The process applied in this Thanet SHLAA generally reflects that established in the Kent & Medway Protocol, as set out for information below. Some local interpretation has been applied to reflect Thanet's circumstances (for example the criteria for assessing whether sites should be assessed in trawl 1 or 2).

POLICY CONSTRAINTS

A - Is the site within any of the following Areas?

Category 1: National and Regional

SPA, Ramsar, SAC, SSSI, National Nature Reserve, AONB, Ancient Woodlands.

Category 2:

Metropolitan Green Belt

Category 3: Local

To be determined by each individual Authority in the light of local circumstances (In respect of Thanet this might include the designated Green Wedges)

B - Is the site currently in use or allocated for employment or other use and remains suitable and required for that use or is protected by a current development plan policy from development for other uses?

C - Is the site neither in nor adjacent to a settlement?

D - Does the site fall within or adjacent to a settlement which has not been identified in a development plan document as a settlement/settlements suitable for future housing development with sufficient capacity to meet future housing requirements?

IF A SITE FALLS WITHIN ANY OF THESE CATEGORIES IT SHOULD BE EXCLUDED FROM THE ASSESSMENT AT THIS STAGE.

SUITABILITY.

A - Is the site allocated for housing in an existing development plan or does it have planning permission for housing?

If yes, the site will be suitable unless circumstances have changed to render it unsuitable. If no, the site should be assessed against the questions set out in B to E as follows.

B - Is the site in a suitable location when measured against the following criteria?

- Within 800m. walking distance of a bus stop or railway station providing two or more services per hour.
- Within 800 m. walking distance of a convenience store, a primary school and a GP surgery.
- Within 30 minutes public transport time of a hospital/health centre, secondary school, employment area, town or district centre.

In the case of Thanet the criterion applied is whether the site falls within a corridor where a range of services is accessible by public transport within 30 minutes.

IF A SITE FAILS TO MEET ANY OF THESE CRITERIA IT SHOULD BE EXCLUDED FROM THE ASSESSMENT AT THIS STAGE UNLESS THE SITE IS OF SUCH A SCALE THAT THESE CONSTRAINTS COULD BE OVERCOME AS A RESULT OF ITS DEVELOPMENT.

C - Does the site have any of the following physical or infrastructure constraints?

- Access
- Highway capacity
- Infrastructure
 - Water Supply
 - Sewerage/Drainage
 - Electricity supply
 - Gas Supply
 - Electricity Pylons
- Contamination/Pollution
- Adverse Ground Conditions
- Hazardous Risk
- Topography
- Flood Zone

If yes, how and when can the constraint be overcome?

IF THE NATURE AND SCALE OF THE CONSTRAINT IS SUCH THAT IT CANNOT BE REMOVED DUE TO COST OR TIMESCALE OR BOTH, IT SHOULD BE DELETED FROM THE ASSESSMENT AT THIS STAGE.

D - Would development have a detrimental impact on the following, either within or adjacent to the site or in its vicinity?

- Townscape
- Landscape
- Trees
- Conservation Areas
- Historic Parks and Gardens

- Listed Buildings
- Scheduled Ancient Monuments
- Sites of Nature Conservation Interest/Protected Species

If yes, could the impact be mitigated through the design process, the imposition of a condition or a legally binding agreement?

IF THE NATURE AND SCALE OF THE IMPACT IS SUCH THAT IT CANNOT BE MITIGATED, THE SITE SHOULD BE EXCLUDED FROM THE ASSESSMENT AT THIS STAGE.

E - Would the amenity of residents be adversely affected by any external, environmental factors?

If yes, could the impact be mitigated to such an extent that the residents' living conditions would be acceptable?

IF THE NATURE AND SCALE OF THE IMPACT ON AMENITY IS SUCH THAT IT CANNOT BE SATISFACTORILY MITIGATED, THE SITE SHOULD BE EXCLUDED FROM THE ASSESSMENT AT THIS STAGE.

AVAILABILITY.

A - Do any of the following legal or ownership factors apply to the site?

- Multiple ownership likely to result in protracted site assembly, part of the site being unavailable for development or a ransom strip situation.
- Existing tenancy or lease agreement, which could affect the timing of the release of the site for development.
- The willingness of an owner of owners to sell.
- The willingness of a developer with control of the site to develop.

If yes, how and when can the constraint be overcome?

IF THERE ARE ANY CONSTRAINTS TO THE DEVELOPMENT OF THE SITE WITHIN THE RELEVANT TIMESCALE WHICH CANNOT BE OVERCOME, (i.e. IT IS NOT AVAILABLE), THE SITE WILL NOT SUBSEQUENTLY BE ASSESSED FOR ITS ACHIEVABILITY.

ACHIEVABILITY.

Can development of the site be achieved during the plan period having taken into account the following market, cost and delivery factors?

A - Market

- Compatibility of adjacent uses
- Land values compared with alternative uses
- Attractiveness of locality
- Market demand
- Projected rate of sales.

B - Cost

- Site preparation to overcome physical constraints
- On-site and off-site planning and infrastructure requirements
- Availability of funding

C - Delivery

- Developers' phasing
- Build-out rates
- Number of developers
- Size and capacity of developer.

If the site is deliverable and developable, in which of the following periods would development take place?

- During the next five years
- During years six to ten
- During years eleven to fifteen
- Beyond year fifteen and a) within plan period or b) beyond plan period, if known.

Information on the timing of overcoming physical, infrastructure, and legal constraints, identified under "Suitability" and "Availability", will be taken into account, together with the "Achievability" criteria when determining the time of development.

The table below shows the allocated sites and their assessment scores for Housing Allocations.

Land Assessment Tables for Call for Sites Locations.

The below matrix represents those SHLAA sites, which were sites submitted to Thanet District Council by landowners, sites allocated/safeguarded for employment, sites within and adjoining the villages and other sites outside built confines. This matrix was utilised to add depth and understanding to create a broad overview for the locations because in general they are larger sites outside the planning system/outside the urban confines and may warrant additional consideration to local factors (e.g. ecology, transport, etc.).

Below is the colour coded key that was utilised throughout.

Assessment criteria	Flood Zone	Green Wedge	Inside/Outside urban/village confines	Relationship to built urban/village confines	Other potential impacts on separation between settlements	Landscape character area	Within 30mins of public transport route	Sustainability	Availability of access	Highway Capacity
Key Code	1	2	3	4	5	6	7	8	9	10
	Zon e 1	No	A = Inside urban area confines.	A = Within urban/village confines	A = None apparent	X = No landscape character designation	Y = Within	A = Existing	A = Existing	A = Existing
	Zon e 2	Part	B = Part inside urban confines or within or part within village confines	B = Abutting urban/village confines	B = Potential to erode corridor between settlements	CCP = Central Chalk Plateau or Quex park	P = Part within	B = Potential	B = Potential	B = Potential
	Zon e 3	Yes	C = Outside urban area confines.	C = Less than 30% of site edge abutting u/v confines P = Poor relationship with		WNS =Former Wantsum North Shore FWC = Former	O = Outside	C = Difficult	C = Difficult	C = Difficult
				confines D = Outside and not abutting urban/village confines		Wantsum Channel				

Assessment criteria	Previously developed	Agricultural land quality	Ecology	Archaeology potential	Contamination potential	Source protection zone	Coastal change	Aircraft noise
Key Code	11	12	13	14	15	16	17	18
	PDL	N/A (often listed as Urban)	4 = Minimal potential for ecological impacts	5 = No archaeology potential	A = No Known Issue	A = Outside	A = Not on coast (more than 100 m beyond shoreline)	A= <57
	Part PDL	Low	3 = Potential for minor ecological impacts	4 = Lesser archaeology through condition	B = Potential Issue	B = Inside	B = Hold the Line (Grey 25%	B = 57-63 (25% shade)

A2 Employment Land Allocations and Assessment Criteria.

The following information has been used to aid the appraisal of Local Plan policies relating to strategic employment land allocations and the retention of existing employment sites.

Site	Size (ha)	Marketability	Sustainability	Deliverability	Total (out of a possible 15)	Comment
Cromptons	2.26	4	5	4	13	Despite a change in market conditions this is a site in good condition occupied by successful well established businesses. It is unlikely that intensification will occur on the site. The site is located in a sustainable location and access to the road network.
Haine Road	6.52	3	5	5	13	This site is well located, has a mix of buildings, functions well and has very few vacancies. Those units that are vacant are being actively marketed. Having said that there is a general downturn in the market. Despite a change in market conditions this site is still an attractive and popular employment site.
Manston Green	0.38	4	4	4	12	The site is well presented with good facilities. The site is occupied by small cottage industries and currently has no vacancies. The site is function well despite a downturn in the market. The site is well established but intensification may not be deliverable due to highway constraints.
Manston Road (N)	1.67	3	4	3	10	The site has remained vacant despite sustainability and fairly good access to facilities but given the downturn in the market is unlikely to be developed in the future.
Pioneer	0.64	4	4	4	12	This site is well maintained, in good condition but constraints on the road network may limit intensification. The site still remains successful despite change in market conditions.
Fullers Yard	0.17	4	4	4	12	The site is in good condition and is an ideal site on the edge of the town centre for small businesses. Access is limited and constraints on the road network mean the site is suited to small enterprises. The site is proving successful despite a change in market conditions.
Jentex	2.09	1	2	1	4	This site contains a redundant fuel oil storage use and redevelopment is not considered viable.
Laundry Road	3.68	4	4	5	13	This is a large site in a rural area that has proved successful, is sustainable and has potential for future expansion. The site is in a good location close to the airport and the strategic road network with the new dualled A256 but is not accessible by public transport.
Magnet and Southern	0.29	1	4	4	9	This is a small single occupied site in a residential area and given the market downturn commercial redevelopment is unlikely.
Manston Business Park	75.2	4	4	4	12	This is a strategic employment site and is centrally located whilst also showing signs of development with 3 new units being built. This site is located away from centres of population and facilities for staff but is well related to the primary road network so is accessible and redevelopment would improve localised facilities for staff.
Pysons Road	22.79	3	4	4	11	This is a popular site with a healthy turnover of businesses that is showing resilience to the market downturn on the whole. Some parts of the site are in need of upgrading and some reinvestment is needed given parts of the site has attracted complaints to environmental health.

Site	Size (ha)	Marketability	Sustainability	Deliverability	Total (out of a possible 15)	Comment
St Lawrence	0.19	3	4	4	12	This is a small site in a residential location next to a school. It is incompatible with surrounding uses with access, lorry turning and parking being poor. Given the downturn in the market the site is unlikely to be redeveloped.
Tivoli Road	2.45	1	3	4	8	This site is in a constrained residential location. It is incompatible with surrounding uses and given the downturn in the market is unlikely to be redeveloped. Contains established business. Good repair.
Westwood Ind Est	25.9	3	4	4	11	This site is unconstrained in nature and is a popular vibrant employment site which could accommodate redevelopment. It is a large site within Margate with good access and road networks to the site.
140-144 Newington Road	1.12	1	4	4	9	The site is located in a predominantly residential area and commercial redevelopment of the site could be incompatible with the surrounding area due to poor access with poor lorry routing. The recent local market downturn is likely to have an effect on the marketability.
All Saints	3.16	1	5	3	9	This site is in a constrained residential location and is in poor condition. It is incompatible with surrounding uses as it is bounded by the railway line and residential properties. Given the downturn in the market is unlikely to be redeveloped. There have also been complaints of noise and paint spraying to Environmental Health.
Eurokent	38.6	3	5	3	11	This site has mixed-use development potential, and is centrally located near Ramsgate. It has good road access, is well presented and is close to the amenities at Westwood.
Hedgend	2.46	3	3	4	10	This is a well located popular site with scope for further development with planning permission for a further 12 units. This site is in a rural location but is well linked by road to the Thanet Way. Access and lorry routing is good. The market downturn does not seem to have affected the take up of units on this site.
Northdown	0.89	3	3	4	10	This is a popular site that is proving resilient to the economic downturn with planning permission for an office building. This is despite highway constraints and fairly poor access.
Princes Road	0.98	2	4	3	9	This site is in a constrained residential location. It is incompatible with surrounding uses and given the downturn in the market is unlikely to be redeveloped. Does contain existing businesses.
Whitehall Road	0.95	3	4	3	10	This site is in a constrained residential location making access problematic. It is incompatible with surrounding uses although it does currently provide inexpensive premises for a number of existing small businesses.

Site	Size (ha)	Marketability	Sustainability	Deliverability	Total (out of a possible 15)	Comment
Manston Road (S)	6.8	1	4	3	8	This poor quality site has reasonably good access but mitigation may be required at Stannar Court.
Thanet Reach	9.74	2	5	4	11	The site is attractive and ready for development. Access to the site and parking are good. Large parts of the site remain undeveloped but uses may be limited by the residential nature of the area.
Factories, Suffolk Av	0.45	1	3	2	6	The site Sis inadequate for employment use and is incompatible with surrounding uses. Lorry routing is particularly poor. Employment use is incompatible with the surrounding area and noise abatement notices have been served. The owner has expressed a wish to locate to a different employment site in Thanet
Dane Valley (developed)	5.04	3	3	3	9	This is a large very popular site occupied by a range of businesses. Parts of the site vary in quality and access and parking is relatively poor. This site functions well despite having access and parking difficulties. Due to its popularity it may benefit from some reinvestment.
Dane Valley (undeveloped)	3.49	1	3	2	6	The remainder of the site is unsuitable for development and this allows for reinvestment in parts of the developed site that need it. Lorry routing and access are poor and restrictive.

Appendix B

Review of Relevant Plans, Policies and Programmes

B1 Review of International through to Local Thanet Plans, Policies and Programmes

A plan may be influenced in various ways by other plans or programmes and by external environmental objectives such as those laid down in policies or legislation. Therefore a review of relevant plans, policies and programmes (PPPs) is essential to highlight these relationships for the Sustainability Appraisal process.

Through the identification of these relationships it is possible to address potential inconsistencies and constraints, enabling potential synergies to be exploited. The review is also useful in raising issues that have already been addressed in other PPPs and therefore may not need to be addressed further in this exercise. Finally the review also provides a useful focus for refining Sustainability Appraisal objectives.

The SEA Directive states that:

The environmental report should provide information on:

'the plan's relationship with other relevant plans and programmes and the environmental protection objectives, established at international, [European] Community or national level, which are relevant to the plan ... and the way those objectives and any environmental considerations have been taken into account during its preparation'.

The following tables outlines all of the policies, plans and strategies at the international, national, regional and local levels which will have a bearing on the Local Plan based on the Sustainability Appraisal objectives

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
International				
The Copenhagen Conference 2009 and Delhi Summit on Sustainable Development	 Sustainable consumption and production patterns. Accelerate the shift towards sustainable consumption and production - 10-year framework of programmes of action; Reverse trend in loss of natural resources. Renewable Energy and Energy efficiency. Urgently and substantially increase [global] share of renewable energy. Significantly reduce rate of biodiversity loss by 2010. 	 No targets or indicators, however actions include: Greater resource efficiency; Support business innovation and take-up of best practice in technology and management; Waste reduction and producer responsibility; and Sustainable consumer consumption and procurement. The need to limit global temperatures rising no more than 2C Create a level playing field for renewable energy and energy efficiency: New technology development; Push on energy efficiency; Low-carbon programmes; Reduced impacts on biodiversity. 	The LDF can encourage greater efficiency of resources. Ensure Policies cover the action areas; The LDF can encourage renewable energy. Ensure policies cover the action areas; The Local Plan can protect and enhance biodiversity. Ensure policies cover the action areas.	SA Framework should include objectives aligned to key messages

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
European Spatial Development Perspective (ESDP)	ESDP considers that there are strong links and impacts from urban development and spatial organisation on sustainable development, as well as on environmental quality, energy consumption, mobility, health and quality of life. The ESDP put forward three spatial policy guidelines: Development of a balanced and polycentric urban system and a new urban-rural relationship; Securing parity of access to infrastructure and knowledge; and Sustainable development, prudent management and production of nature and cultural heritage.	The ESDP does not contain targets. It sets a number of guiding principles: Policies and decisions with implications for spatial development must not have negative impacts on sustainable development; Spatial planning should balance public interest between the objectives of social cohesion and sustainability and need of competitiveness and market imperatives; Conservation of the rich diversity of European territory is paramount; and Spatial planning should be a tool for combating local and global climate change.	Mainly relevant at national and regional scale.	Mainly relevant at national and regional scale.
European Sustainable Development Strategy (ESDS)	 The ESDS focuses on four keypriorities: Limiting climate change and increasing the use of clean energy; Addressing threats to public health; Managing natural resources more responsibly; and Improving the transport system and land use. 	 The ESDS sets a number of headline indicators to meet its priorities. These are Limit climate change and increase the use of clean energy; Address threats to public health; Manage natural resources more responsibly; and Improve the transport system and land-use management. 	Mainly relevant at national and regional scale.	Mainly relevant at national and regional scale.
EC Council Directive on the Conservation of Natural Habitats	The aim of the Habitats Directive is to create a coherent European ecological network known as Natura 2000. This network will consist of a series of	Concerns flora, fauna and natural habitats of EU importance. Seeks to	Plan policies should support the objectives of the directives.	Reflect objectives of the directives in the SA framework.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
of Wild Fauna and Flora (Directive 92/43/EC) 1992	Special Areas of Conservation (SACs) which will protect habitats and species of Community interest.	establish a framework of protected areas, and ensure biodiversity.	Where Local Plan policies may impact on an environmentally designated site, especially if that site is of international importance, under the EC Habitats Directive Article 6 it will require an Appropriate Assessment.	
Our Life, our Insurance European Biodiversity Strategy to 2020 (2011)	This strategy is aimed at reversing biodiversity loss and speeding up the EU's transition towards a resource efficient and green economy.	The EU 2020 biodiversity target is underpinned by the recognition that, in addition to its intrinsic value, biodiversity and the services it provides have significant economic value that is seldom captured in markets. Because it escapes pricing and is not reflected in society's accounts, biodiversity often falls victim to competing claims on nature and its use.	Ensuring that biodiversity forms part of the SA assessment and that the Local Plan addresses biodiversity mitigation measures to reduce the impact of development upon the environment.	SA Objectives must consider biodiversity
Kyoto Protocol to the UN Framework Convention on Climate Change - 1999	The ultimate objective of the Convention is "to achieve stabilisation of atmospheric concentrations of greenhouse gases at levels that would prevent dangerous anthropogenic (human-induced) interference with the climate system."	Reduction of Greenhouse gas emissions by UK by 12.5%, compared to 1990 levels, by 2008 – 2012	Mainly relevant at national and regional scale, however it is influential to achieving sustainable development as it encourages transition to low carbon economy and is therefore an integral factor in planning documents.	Reflect objectives of the protocol within the SA Framework
Waste Framework Directive 92/43/EEC and daughter directives e.g.; Landfill Directive 99/31/EC	Waste production should be minimized through the promotion of clean technology and reusable or recyclable products. Where the possible secondary raw materials should be recovered from waste by recycling, reuse and reclamation or any other process, as well as used to produce energy. Waste should be	Advocates the use of a waste hierarchy – Reduce, reuse and recycle.	Implications for general waste management policies and also policies relating specifically to the waste energy facility.	Reflect objectives of the directives in the SA framework.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	managed with minimal environmental impact.			
Council Directive 79/409/EEC on the conservation of wild birds	The Birds Directive provide for the protection, management and control of all species of naturally occurring wild birds in the European territory of Member States. Requires measures to preserve a sufficient diversity of habitats for all species of wild birds. To conserve the habitat of certain particularly rare species and of migratory species.	Conservation of all species of naturally occurring birds in the wild state in the European territory of the Member States to which the Treaty applies. Seeks to establish a framework of protection and ensure biodiversity. Targets are set by the Member States at national, regional and a local level.	Where a DPD or SPD impact on an environmentally designated site, especially if that site is of international importance, under the EC Habitats Directive Article 6 it will require an appropriate assessment	Relevant at national, regional and local scale.
The Air Quality Framework Directive 1996, and Air Quality Directive (2008/50/EC) June 2008	Relevant objectives are to maintain ambient air quality where it is good and improve it in other cases.	The Directive also sets limits for air pollutants, to be taken into account in national objectives. Where levels of pollutants exceed certain limit values, a plan for attaining the limit value shall be prepared.	Mainly relevant at national and regional level. Local Plan	Reflect objectives of the directive in the SA framework
EC Water Framework Directive 2000/60/EC	This directive expands the scope of water protection to all waters, surface waters and groundwater with the prime objective of achieving "good status" for all waters by a set deadline. Water management based on river basins.	All inland and coastal waters to reach good ecological and chemical status by 2015. By 2010 ensure adequate contribution from key sectors to the recovery of costs of water services.	Mainly relevant at national and regional scale. Take measures to maintain or restore all waters to be detailed in regional and local plans. Plan will need to take account of catchment areas.	Reflect objectives of the directive in the SA framework.
European Flood Risk Directive 2007	Requires Local Authorities to feed in to the Preliminary Flood Risk Assessment (already completed), as well as the Local Flood Risk Strategy (forthcoming), and ensure that objectives within Local Plans	The Directive requires Member States to first carry out a preliminary assessment by 2011 to identify the river basins and associated coastal areas at risk of flooding. For such zones they would then need to draw up flood risk	The European Floods Directive requires Local Plans to compliment the objectives of the Directive. Ensure that plan policies assist in directing development to locations at least risk of flooding.	Reflect objectives of the directive in the SA framework.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	compliment the objectives of the Directive.	maps by 2013 and establish flood risk management plans focused on prevention, protection and preparedness by 2015. The Directive applies to inland waters as well as all coastal waters across the whole territory of the EU.	Plan will need to take	
Integrated Pollution Prevention Control Directive - 1996/61/EC	The Directive contains basic rules for integrated permits, which cover the whole environmental performance of Plants i.e. emissions to air, water and land, generation of waste, use of raw materials, energy efficiency, noise, prevention of accidents, risk management, etc. The permits must be based on the concept of Best Available Technique (BAT).	 In order to receive a permit an industrial or agricultural installation must comply with certain basic obligations. In particular, it must: Use all appropriate pollution-prevention measures, namely the best available techniques (which produce the least waste, use less hazardous substances, enable the recovery and recycling of substances generated, etc.); Prevent all large-scale pollution; Prevent, recycle or dispose of waste in the least polluting way possible; Efficient energy use; Ensure accident prevention and damage limitation; and Return sites to their original state when the activity is over. 	Mainly relevant at national and regional scale.	Mainly relevant at national and regional scale.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
Convention on the protection of Archaeological Heritage	The Convention contains provisions for the identification and protection of archaeological heritage, its integrated conservation, the control of excavations, the use of metal detectors and the prevention of illicit circulation of archaeological objects, and the dissemination of information.	It was ratified by the UK in September 2000, and provides for a broad definition of 'archaeological heritage' that includes 'structures, constructions, groups of buildings, developed sites, moveable objects, monuments of other kinds as well as their context, whether situated on land or under water.	Mainly relevant at national and regional scale.	Mainly relevant at national and regional scale.
EU Energy Efficiency Plan 2011	Energy efficiency is at the heart of the EU's Europe 2020 Strategy for smart, sustainable and inclusive growth and of the transition to a resource efficient economy. Energy efficiency is one of the most cost effective ways to enhance security of energy supply, and to reduce emissions of greenhouse gases and other pollutants.	The European Union has set itself a target for 2020 of saving 20% of its primary energy consumption compared to projections.	The need to ensure that energy efficiency forms part of the Local Plans mitigation strategy to reduce the impact of climate change upon the environment.	
European Landscape Convention 2009	The Convention aims to encourage public authorities to adopt policies and measures at local, regional, national and international level for protecting, managing and planning landscapes throughout Europe. It covers all landscapes, both outstanding and ordinary, that determine the quality of people's living environment. The text provides for a flexible approach to landscapes whose specific features call for various types of action, ranging from strict conservation through protection, management and improvement to actual creation.	Specific measures include: •raising awareness of the value of landscapes among all sectors of society, and of society's role in shaping them; •promoting landscape training and education among landscape specialists, other related professions, and in school and university courses; •the identification and assessment of landscapes, and analysis of landscape change, with the active participation of stakeholders; •setting objectives for landscape quality, with the involvement of the public; and	Plan policies to support overall objectives and requirements of the Convention.Plan policies to establish and Implement landscape protection, management and planning.	SA objectives (Countryside and Historic Environment) must consider the outcomes of the convention should feed into the Local Plan.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	The Convention proposes legal and financial measures at the national and international levels, aimed at shaping "landscape policies" and promoting interaction between local and central authorities as well as trans-frontier cooperation in protecting landscapes. It sets out a range of different solutions which States can apply, according to their specific needs.	•the implementation of landscape policies, through the establishment of plans and practical programmes.		
National				
River Basin Planning Strategy: Water for Life and Livelihoods (Consultation), EA - Jan 2005	 RBMP are the key management unit of the Water Framework Directive. The RBMP objectives of the Strategy are; Create a more integrated, long- term approach to river basin planning and management; Work closely with partners and provide increased opportunity for stakeholder involvement; and Aim to achieve environmental, social and economic benefits concurrently. 	Publish River Basin Management Plans by the end of 2009. Ensure appropriate reference to the Water Framework Directive in Planning Policy Statements.	 Direct regulation of abstraction from and emission to the water environment. Economic instruments – taxes, grants and incentives. New emphasis on collaborative agreements – land use planning and regeneration policies. Links between land use planning and River Basin Management Planning. 	Must address the requirements of the Strategy and Water Framework Directive for integrated, long-term approach and environmental, social and economic benefits.
The Wildlife and Countryside act 1981	 The Act makes it an offence (with exceptions) to; Intentionally kill, injure, or take any wild bird or their eggs or nests; Intentionally kill, injure, or take, possess, or trade in any wild animal listed in Schedule 5; 	No specific targets	The Local Plan must put in place systems that encourage and support the Act and the protection of animals	The SA must ensure the protection of animals as detailed within the act and the duties in terms of SSSI are met

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Prohibits interference with places used for shelter or protection, or intentionally disturbing animals; and, Pick, uproot, trade in, or possess (for the purposes of trade) any wild plant listed in Schedule 8. The Act also provides for the notification of Sites of Special Scientific Interest (SSSI) and requires surveying authorities to maintain up to date definitive maps and statements, for the purpose of clarifying public 			
Habitats Regulations for England and Wales (amended) 2007	rights of way. The Regulations came into force on 30 October 1994, and have been subsequently amended. The Regulations provide for the designation and protection of 'European sites', the protection of 'European protected species', and the adaptation of planning and other controls for the protection of European Sites.	 The 2007 amendments: Simplify the species protection regime to better reflect the Habitats Directive; Provide a clear legal basis for surveillance and monitoring of European protected species (EPS); Toughen the regime on trading EPS that are not native to the UK; Ensure that the requirement to carry out appropriate assessments on water abstraction consents and land use plans is explicit. 	Appropriate Assessment needs to be undertaken in respect of any plan or project which: a) either alone or in combination with other plans or projects would be likely to have a significant effect on a European Site, and b) is not directly connected with the management of the site for nature conservation.	SA will need to consider if there is a requirement for an Appropriate Assessment

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
UK Biodiversity Action Plan (BAP)	The aim of the action plan is to conserve and enhance biological diversity in UK and to contribute to the conservation of national and global biodiversity and include the following aims to maintain and, where practicable, to enhance:		The plan documents must make provisions for the protection and enhancement of biodiversity conservation	The SA should ensure the protection of existing biodiversity and support the development of new areas of conservation
	 The overall populations and natural ranges of native species and the quality and range of wildlife habitats and ecosystems; Internationally and nationally important and threatened species, habitats and ecosystems; Species, habitats and natural and managed ecosystems that are characteristic of Kent; The biodiversity of natural and semi-natural habitats, where this has diminished over 3 recent decades and, Public awareness of, and involvement in, conserving biodiversity. 			
Working with the grain of nature: a biodiversity strategy for England (2002) (Defra)	The strategy builds on the Biodiversity Action Plan and aims to embed biodiversity in policy and decisions and society as a whole. It addresses the following issues; Agriculture - encouraging the management of farmland and agricultural land so as to conserve and enhance biodiversity;	 Agreement targets have been set to bring 95% of SSSIs into favourable condition by 2010 and to reverse the decline in farmland birds. Headline Indicators include: The population of wild birds; The condition of Sites of Special Scientific Interest; Progress with Biodiversity Action Plans; 	The plan documents must support the aims of biodiversity policy across the key issues	The SA must support the strategy by addressing and supporting each of the key issues.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Water – whole catchment approach to wise, sustainable use of water and wetlands; Woodland – management and extension of woodland to promote enhance biodiversity and quality of life; Marine and Coastal Management – to achieve sustainable use and management of coasts and seas using natural processes and eco-system based approaches; and, Urban areas – biodiversity needs to become part of development policy on sustainable communities, urban green space and the built environment. 	 Area of land under agri- environment agreement; Biological quality of rivers; Fish stocks around the UK fished within safe limits; Progress with Local Biodiversity Action Plans; and Public attitudes to biodiversity 		
Rural Strategy 2004, DEFRA - Jul 2004	 The strategy reviews the Rural White Paper, 2000 after the creation of Defra in 2001. It sets out a new devolved and targeted approach to rural policy and delivery over the next 3-5 years. There are three priorities for rural policy; Economic and social regeneration supporting enterprise across rural England but targeting greater resources at areas of greatest need; Social justice for all – tackling rural social exclusion and providing fair access to services and opportunities; 	Reduce the gap in productivity by 2008; Improve accessibility of services for rural people; Production of a second generation Local Public Service Agreement; Provide affordable housing; and Make the countryside more accessible and promote sustainable tourism.	Local policies should seek to support the overarching themes contained within the Rural Strategy. In particular promoting economic development in rural areas and tacking social exclusion, including the promotion of good access to services and facilities. Policies to maintain and to enhance the quality of the countryside should also be considered. The SA framework should consider policies that encompass the overarching actions of the strategy, in particular the promoting access to services and facilities, protecting the	Strategic priorities for creating Sustainable Communities apply equally in rural and urban areas.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	• Enhancing the value of our countryside – protecting the natural environment.		countryside and promoting appropriate economic development	
Saving Lives: Our Healthier Nation White Paper (DoH – 1999)	Strategy is largely an action plan for tackling poor health and improving the health of everyone in England, especially the worst off. Addresses inequality with a range of initiatives on education, welfare to work, housing, neighbourhoods, transport and the environment, which will help improve health.	 By 2010: Reduce the death rate from cancer in people under 75 by at least a fifth; Reduce the death rate from coronary heart disease and stroke and related diseases in people under 75 by at least two fifths; Reduce the death rate from accidents by at least a fifth and to reduce the rate of serious injury from accidents by at least a tenth; Reduce the death rate from suicide and undetermined injury by at least a fifth; and Increased education and training for health. 	Local Plan should support the provision of health care facilities where appropriate.	Consider sustainability objectives that aim to improve human health.
The Planning Response to Climate Change, (ODPM - Sep 2004)	Provides planning professionals with an overview of current thinking and state of knowledge on planning response to climate change. It aims to stimulate planners to look for new strategies to respond to climate change in partnership with developers and the wider community. It aims to strengthen policies that will mitigate and reduce greenhouse gas emissions.	LPA's must be: Familiar with the UK's commitment to its climate change programme; Actively involved in regional climate change studies; Identifying areas at risk of flooding an unstable land on the DPD and SPD; Recognise the availability of water resources in formulating development plans; Include climate change sensitive policies on biodiversity and landscape.	Climate change sensitive development checklist sets out the role of SA and EA in assessing development plans, DPD and SPDs for climate change considerations.	Consider efforts to respond to climate change in the framework

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
		Set a context in which there is less need for travel; Set out a framework for minimizing greenhouse gas emission from waste management; and Consider an integrated framework for climate sensitive built developments.		
The UK Government Sustainable Development Strategy: Securing the Future (DTI - Mar 2005)	 The strategy key themes are: Living Within Environmental Limits - Respecting the limits of the planet's environment, resources and biodiversity – to improve our environment and ensure that the natural resources needed for life are unimpaired and remain so for future generations; Ensuring a Strong, Healthy and Just Society - Meeting the diverse needs of all people in existing and future communities, promoting personal wellbeing, social cohesion and inclusion, and creating equal opportunity for all; 	The Strategy introduces a set of high- level indicators; the UK Framework Indicators to give an overview of sustainable development and priority areas shared across the UK. There will also be a mix of indicators, targets and performance measures in the individual strategies for the UK Government, Scotland, Wales and Northern Ireland. The UK Government Strategy includes all 20 of the UK Framework Indicators and a further 48 indicators related to priority areas.	The Local Plan will have to take into account the Key Objectives and targets of the strategy. The Strategy states that it must be implemented by working across departmental boundaries and through all levels of government. Development must be focused on long-term solutions, ensuring we get the full environmental, social and economic dividend for money spent.	This Strategy is the highest level plan for sustainable development. All aspects of this strategy must be reflected fully within the appraisal process.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Achieving a Sustainable Economy - Building a strong, stable and sustainable economy which provides prosperity and opportunities for all, and in which environmental and social costs fall on those who impose them (polluter pays), and efficient resource use is incentivised; 			
	• Promoting Good Governance - Actively promoting effective, participative systems of governance in all levels of society – engaging people's creativity, energy, and diversity; and			
	• Using Sound Science Responsibly - Ensuring policy is developed and implemented on the basis of strong scientific evidence, whilst taking into account scientific uncertainty (through the precautionary			

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	principle) as well as public attitudes and values.			
Waste not, Want not - A Strategy for tackling the waste problem in England December 2002	Provides a robust and long-term economic and regulatory framework for waste management. Invest in new waste facilities and a package of measures to boost the progress on sustainable waste management. Provide additional funding accompanied by radical reform of delivery structures.	 Slow waste growth from 3% to 2% per annum; Boost the national recycling rates to at least 45% by 2015; Divert significant amounts of waste from landfill; Increase choice for industry, Local Authorities and households over how waste is managed; Stimulate innovation in waste treatment; and Reduce damage to the environment while increasing resource productivity. 	Waste management strategy to be incorporated into waste policies within the DPD and SPD.	SA should include indicator relating to waste. Will also need indicators on re-use, recycling and recovery of waste as well, to demonstrate the movement away from disposal.
Waterways for Tomorrow, (DEFRA – 2000)	Key objective to promote of waterways, encouraging their use and development.	Maximise the opportunities the waterways offer for leisure and recreation; as a catalyst for urban and rural regeneration and for freight transport; Encourage the innovative use of waterways such as water transfer and telecommunication.	Useful in context of regeneration master plans, as well as plan policies for regeneration, leisure and recreation, tourism, heritage and culture, natural environment and transport.	Assess opportunities to include promotion of waterways in the SA framework.
Environment Agency (2009) 'Water for people and the environment' - Water Resources Strategy for England and Wales	 Strategy sets out how water resources in England and Wales should be managed and provides a plan of how to use them in a sustainable way, now and in the future. The Strategy aims to: enable habitats and species to adapt better to climate change; allow the way we protect the water environment to adjust flexibly to a changing climate; 	Target set for England, that the average amount of water used per person in the home is reduced to 130 litres each day by 2030.	LDF should take on board objectives set within the Strategy. These particularly apply to providing efficiency in terms of water use and protecting water resources.	Ensure water resource objectives form part of SA

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 reduce pressure on the environment caused by water taken for human use; encourage options resilient to climate change to be chosen in the face of uncertainty; better protect vital water supply infrastructure; reduce greenhouse gas emissions from people using water, considering the whole life-cycle of use; and Improve understanding of the risks and uncertainties of climate change. 			
'Water for Life' 2011 The White Paper	Water for Life describes a vision for future water management in which the water sector is resilient, in which water companies are more efficient and customer focused and in which water is valued as the precious and finite resource it is. And it explains that we all have a part to play in the realisation of this vision.	Over the long-term introduce a reformed water abstraction regime, as signalled in the Natural Environment White Paper.	Consider a New planning approval system for sustainable drainage;	Ensure water resource objectives form part of SA
Working with the Grain of Nature: A Biodiversity Strategy for England, (DEFRA – 2002)	 The Strategy builds on the Biodiversity Action Plant, 1994 and aims to embed biodiversity in policy and decisions and society as a whole. It addresses the following issues: Agriculture – encouraging the management of farmland and 	Strategy aim to provide biodiversity considerations are embedded in all sections of public policy. Sets out key species for concern in different environments. Aims to bring 95% of SSSI's into favourable condition by 2010 Aims to reverse the decline of farmland birds.	Inclusion of policies to preserve wildlife habitats.	Consideration of direct and indirect impacts of plan policies on the natural environment.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 agricultural land so as to conserve and enhance biodiversity; Water – whole catchment approach to wise, sustainable use of water and wetlands; Woodland – management and extension of woodland to promote enhance biodiversity and quality of life; Marine and Coastal Management – to achieve sustainable use and management of coasts and seas using natural processes and eco- system based approaches; and Urban areas – biodiversity needs to become part of development policy on sustainable communities, urban green space and the built environment. 			
Conserving biodiversity-The UK Approach 2007	 This statement has been prepared by the UK Biodiversity Standing Committee on behalf of the UK Biodiversity Partnership. Its purpose is to set out the vision and approach to conserving biodiversity 	 A shared purpose in tackling the loss and restoration of biodiversity The guiding principles that we will follow to achieve it Our priorities for action in the UK and internationally 	Ensure that the Local Plan addresses the biodiversity, enhancement, creation and protection	Incorporate biodiversity into the SA process and.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	• Within the UK's devolved framework for anyone with a policy interest in biodiversity conservation.	• Indicators to monitor the key issues on a UK basis		
The Conservation of Habitats and Species Regulations 2010	The Conservation of Habitats and Species Regulations 2010 consolidate all the various amendments made to the Conservation (Natural Habitats, &c.) Regulations 1994 in respect of England and Wales	The Regulations provide for the designation and protection of 'European sites', the protection of 'European protected species', and the adaptation of planning and other controls for the protection of European Sites. Under the Regulations, competent authorities i.e. any Minister, government department, public body, or person holding public office, have a general duty, in the exercise of any of their functions, to have regard to the EC Habitats Directive.	Ensure that biodiversity and nature conservation issues are addressed in the SA and Local Plan.	SA Objectives and indicators should consider biodiversity issues
Air Quality Strategy for the UK. Working together for clean air, (DETR - Jan 2000)	Aims to improve and protect ambient air quality in the UK in the medium- term. Sets objectives for 8 main air pollutants to protect health. Performance against these objectives will be regularly monitored.	Contains a number of national air quality targets that were updated by DEFRA in Aug 2002.	Consider use of policies to improve Air Quality.	Consideration of direct and indirect impacts of plan policies on air quality.
Energy White Paper: meeting the energy challenge 2007	The Energy White Paper sets out the Government's international and domestic energy strategy to respond to changing circumstances and address the long term energy challenges faced now and in the future including;	 The paper sets four policy goals; To put ourselves on a path to cutting CO2 emissions by some 60% by about 2050, with real progress by 2020; To maintain the reliability of energy supplies; 	Local Plan should need to include energy policies that aim to meet objectives of strategy	The SA needs to take account of the long term aspirations and targets. Energy indicators should be included in the SA Framework

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 tackling climate change by reducing carbon dioxide emissions both within the UK and abroad; and Ensuring secure, clean and affordable energy as we become increasingly dependent on imported fuel. 	 To promote competitive markets in the UK and beyond; and, To ensure that every home is adequately and affordably heated. 		
Climate Change Act 2008	 The Climate Change Act 2008 makes the UK the first country in the world to have a legally binding long-term framework to cut carbon emissions. It creates a framework for building the UK's ability to adapt to climate change. It creates a new approach to managing and responding to climate change in the UK, by: a. setting ambitious, legally binding targets b. taking powers to help meet those targets c. strengthening the institutional framework d. enhancing the UK's ability to adapt to the impact of climate change e. establishing clear and regular accountability to the UK 	Target: a legally binding target of at least an 80% cut in greenhouse gas emissions by 2050, to be achieved through action in the UK and abroad. Also a reduction of emissions of at least 34% by 2020. The targets are against a 1990 baseline. The 2020 target will be reviewed soon after Royal Assent to reflect the move to all greenhouse gases and the increase in the 2050 target to 80%. Further the Act provides for a carbon budgeting system which caps emissions over five year periods, with three budgets set at a time, to set out our trajectory to 2050. The first three carbon budgets will run from 2008-12, 2013-17 and 2018-22, and must be set by 1 June 2009.	Act sets out a clear precedent for the UK to lead in responding to the threats climate change provides. Ensure that plan policies contribute to meeting the targets set out within the Act.	The SA needs to take account of the long term aspirations and targets. Carbon reduction and greenhouse gas emissions indicators should be included in the SA Framework

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
UK Renewable Energy Strategy (2009)	 Sets out path for meeting legally binding target to ensure 15% of our energy comes from renewable sources by 2020. It puts forward a path to achieving this including the balance of technologies that is most likely to achieve the goal: More than 30% of our electricity generated from renewables – much of this will be from wind power but biomass, hydro and wave will also play an important role 12% of our heat generated from renewables – range of sources including biomass, biogas, solar and heat pumps 10% of transport energy from renewables It sets out the Government's strategic role as well as a number of detailed actions. 	Sets out path for meeting legally binding target to ensure 15% of our energy comes from renewable sources by 2020 It puts forward a path to achieving this including the balance of technologies that is most likely to achieve the goal: • More than 30% of our electricity generated from renewables – much of this will be from wind power but		SA Framework to reflect strategy objectives.
The Carbon Plan 2011	This plan sets out how the UK will achieve decarbonisation within the framework of the Government's energy policy: to make the transition to a low carbon economy while maintaining energy security, and minimising costs to consumers, particularly those in poorer households Low carbon buildings		Incorporation of carbon initiatives/mitigation to reduce the impact of development proposals on the environment.	

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Low carbon transport Low carbon industry Agriculture, land use, forestry and waste 			
Climate Resilient Infrastructure 2011	Alongside the transition to a low carbon society, increasing infrastructure's resilience to climate change impacts is a high priority for the Government, to help protect the economy and its future growth.	To increase the resilience of both new and existing infrastructure, we must be prepared to plan ahead and manage the impacts of climate change. This is an important part of the transition to a green economy.	Ensure that climate change is fully considered and mitigation adequately addressed in the Local Plan.	Ensure that climate change is fully considered by the SA
Making Space for Water: Taking Forward a Government Strategy for Flood and Coastal Erosion Risk Management in England. First Government Response, DEFRA March 2005	The government is trying to implement a more holistic approach to managing flood and coastal erosion. It takes into account all sources of flooding, embedding flood and coastal risk management across a range of government policies and reflecting other relevant government policies in policies and operations of flood and coastal erosion risk management. It aims to manage risks by employing an integrated portfolio of approaches which reflect both national and local priorities to: Reduce threat to people and their property; Deliver the greatest environmental, social and economic benefit consistent with government sustainable development principles.	Progress stakeholder engagement at all levels of decision making; Revise risk management and scheme appraisal guidance; Complete revision of PPG25 into PSS format; Add flood risk assessment question into Standard Planning Application; Make Environment Agency a Statutory Consultee; Incorporate sustainable buildings code; Increase the use of multi-objective schemes in rural areas; and Undertake pilot studies for integrated urban drainage.	Flood risk assessment will become a more important part of planning policies. There will be increased emphasis on integrated systems and multi- objective schemes.	The SA should consider the direct and indirect implications of the plan policies on flooding costal issues at all sites and in particular at sites of environmental designation.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
Natural Environment White Paper – The Natural Choice: securing the value of nature (2011)	Outlines the Government's vision for the natural environment over the next 50 years with practical action to deliver that ambition. It aims to set a clear institutional framework to achieve the recovery of nature: • establish Local Nature Partnerships (LNPs) • create new Nature Improvement Areas (NIAs) • reforms to the planning system	 Specific actions include: removing barriers to learning outdoors creating a new Local Green Areas designation establishing a Green Infrastructure Partnership new phase of the Muck In4Life campaign 	Plan policies should reflect the aims of the White Paper. In particular facilitate the designation of Local Green Areas and ensure a strategic approach to planning for nature within and across local areas.	SA objectives to include green space and infrastructure
National Planning Statements (2011-2012)	 National Policy Statements (NPSs) are produced by Government. They give reasons for the policy set out in the statement, and must include an explanation of how the policy takes account of Government policy relating to the mitigation of, and adaptation to, climate change. They include the Government's objectives for the development of nationally significant infrastructure in a particular sector and state: How this will contribute to sustainable development. How these objectives have been integrated with other Government policies. How actual and projected capacity and demand have been taken into account. 	There are 12 designated or proposed National Policy Statements, setting out Government policy on different types of national infrastructure development, which are: Energy NPSs • Overarching energy • Renewable energy • Fossil Fuels • Oil and Gas Supply and Storage • Electricity Networks • Nuclear Power These are produced by the Department for Energy and Climate Change (DECC). Transport NPSs • Ports • Transport Networks (including rail and roads) • Aviation	The NPSs covering the development of nationally important infrastructure have been included here for information. However, because they relate to developments that would not be consented via policy in the Local Plan or by TDC a review of their policies and contents is not appropriate. However, as the SA is undertaken they may provide helpful contextual information regarding the future development of energy, transport, water, waste water and waste related NPSs.	Not directly applicable

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Consider relevant issues in relation to safety or technology. Circumstances where it would be particularly important to address the adverse impacts of development. Specific locations, where appropriate, in order to provide a clear framework for investment and planning decisions. They also include any other policies or circumstances that Ministers consider should be taken into account in decisions on infrastructure development. 	 These are produced by the Department for Transport. Water, waste water and waste NPSs Water Supply Hazardous Waste Waste Water Treatment These are produced by the Department for Environment, Food and Rural Affairs. 		
The Planning Act 2008	Introduces a new system for nationally significant infrastructure planning, alongside further reforms to the Town and Country Planning system. A major component of this legislation is the introduction of an independent Infrastructure Planning Commission (IPC), to take decisions on major infrastructure projects (transport, energy, water and waste). To support decision-making, the IPC will refer to the Government's National Policy Statements (NPSs), which will provide a clear long-term strategic direction for nationally significant infrastructure development. To energy provision, transport, water supply and waste treatment. The Climate Change	No key targets	The Local Plan and associated documents should take into account any relevant National Policy Statements when published. The proposed National Policy Statements relate in particular	

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
Play Strategy for England (DCMS, 2008)	 Strategy aims that: In every residential area there are a variety of supervised and unsupervised places for play, free of charge; Local neighbourhoods are, and feel like, safe, interesting places to play; Routes to children's play space are safe and accessible for all children and young people; Parks and open spaces are attractive and welcoming to children and young people, and are well maintained and well used; Children and young people have a clear stake in public space and their play is accepted by their neighbours; Children and young people play in a way that respects other people and their families take an active role in the 	Every local authority will receive at least £1 million in funding, to be targeted on the children most in need of improved play opportunities.		Objectives should relate to this with regard to this Strategy promoting sport and physical activity and promoting healthy lifestyles.
	development of local play spaces; and •Play spaces are attractive, welcoming, engaging and accessible for all local children and young people, including disabled children, and children from minority groups in the community.			
Be active: be healthy A Plan for getting the nation moving 2009	Be active, be healthy establishes a new framework for the delivery of physical activity alongside sport for the period leading up to the London 2012 Olympic Games, Paralympic Games	No specific relevant targets	The Local Plan should ensure that open space, sport and recreation are provided for and that development sites enhance opportunities to walk and cycle.	Health indicators to be part of SA Framework

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 and beyond. Programmes outlined in the plan will contribute to Government's ambition of getting 2 million more people active by 2012 and have been designed to leave a lasting legacy from the Games Physical activity has the potential to create a healthier, happier and wealthier nation. four overriding principles: Informing choice and promoting activity Creating an 'active' environment Supporting those most at risk Strengthening delivery. 			
Public Health White Paper 2011	The white paper is designed to build on the successes of previous governments whilst addressing some of the key problems experienced by the NHS over the previous years.	Giving patients greater choice and control, and equipping them to make decisions through the provision of a greater range of data. Focussing on clinical outcomes rather than targets, building on Lord Darzi's review and particularly its focus on quality. The aim is to provide continuous improvement through reduced bureaucracy and greater focus on clinical outcomes.	Access to public health services and facilities	Access to public health services and facilities
Healthy Lives, Healthy People White Paper 2011	The plans set out in this White Paper put local communities at the heart of public health. The Government intends to end central control and give local government the freedom,	Objectives relating to Lifestyle health problems including: • Obesity • Drugs	Ensure the Local Plan polices address these issues.	Ensure that health inequalities are picked up in the SA

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	responsibility and funding to innovate and develop their own ways of improving public health in their area.	• Alcohol consumption Inequalities between rich and poor.		
Health and Social Care Bill 2012	The Bill seeks to address the issues facing the NHS and the need for it to change to meet the challenges it f aces. The Health and Social Care Bill puts clinicians at the centre of commissioning, frees up providers to innovate, empowers patients and gives a new focus to public health State of Public Finances – the NHS has received the tighter funding settlement ever simply doing the same thing in the same way will no longer be affordable in the future.		Recognition that the population of the district will age and as such will require housing, services and facilities that caters for their needs.	Consider health objectives within SA Framework
Noise Policy Statement for England 2010	The aim of this document is to provide clarity regarding current policies and practices to enable noise management decisions to be made within the wider context, at the most appropriate level, in a cost-effective manner and in a timely fashion.	 environmental noise" which includes noise from transportation sources; "neighbour noise" which includes noise from inside and outside people's homes; and "neighbourhood noise" which includes noise arising from within the community such as industrial and entertainment premises, trade and business premises, construction sites and noise in the street. 	Noise mitigation should form an important part of development proposals.	Ensure that noise is adequately captured in the SA and Local Plan.
National Infrastructure Plan 2010	The plan outlines the scale of the challenge facing UK infrastructure and the major investment that is needed to underpin sustainable growth in the	The Plan sets out the Government's vision for major infrastructure investment in the UK:	Infrastructure forms an important part of the evidence base that will support the delivery of the Local Plan.	

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	UK. It focuses on the networks and systems – in energy, transport, digital communications, floodwater, waste management and in science – that provide the infrastructure on which our economy depends. The plan gives clarity on the role of Government in specifying what infrastructure we need and how it can remove barriers to mobilise both private and public sector resources to maintain our world class infrastructure.	 maximising the potential of existing road and rail networks; transforming energy and transport systems to deliver a low carbon economy; transforming the UK's strategic rail infrastructure; meeting future challenges in providing sustainable access to water for everyone; protecting the economy from the current and growing risk of floods and coastal erosion; reducing waste and improving the way it is treated; providing the best superfast broadband in Europe; and ensuring that the UK remains a world leader in science, research and innovation. 		
Confident Communities, Brighter Futures 2010	This report is part of a continuing programme of action to improve the mental health and well-being of the whole population.	Improve the mental health and well- being of the population, and improving the quality and accessibility of services for people with poor mental health.	Ensure that the Local Plan addresses access to health services	SA Framework to respond and include to health and community objectives
National Planning Policy Framework	The National Planning Policy Framework sets out the Government's planning policies for England and how these are expected to be applied. It sets out the Government's requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and	The entire document presents the Governments approach to development in respect of social, economic and environmental issues.	The Local Plan will be in conformity with the NPPF. May require a focused review to ensure Local Plan Policies are in conformity with NPPF	Ensure that SA framework objectives are aligned to NPPF (See Table 4.6)

PPP	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	neighbourhood plans, which reflect the needs and priorities of their communities.			
Localism Act 2011	 The Localism Act is one of the key pieces of legislation introduced by the Government. It is a radical shift of power from central government to local communities. The Main aim of the Localism Act is to devolve more power to local communities to give them greater control over local decisions. The six actions identified in the Localism Bill are: a. to lift the burden of bureaucracy b. empower communities to do things their way c. increase local control of public finance d. diversify the supply of public services e. open up Government to public scrutiny f. strengthen accountability to local people. In terms of planning, the Localism Act enables the Government to abolish regional spatial strategies, introduce Neighbourhood Plans and Local Referendums. 	There are no specific targets contained in The Localism Act. Abolition of regional strategies • Duty to Cooperate • Neighbourhood Planning • Community Right to Build	Ensure that evidence collected to support the Local Plan is locally derived rather than top down. Coordinate plan production and plan delivery with neighbouring authorities and parishes through the duty to cooperate and neighbourhood plans.	Ensure that evidence collected to support the SA is locally derived rather than top down. Coordinate plan production and plan delivery with neighbouring authorities and parishes through the duty to cooperate and neighbourhood plans.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
Enabling the Transition to a Green Economy 2011	This document sets out the range of policy tools the Government are using to support the transition to a green economy, the opportunities that are created and the implications for the way in which businesses operate.	 The Government's vision is to: Grow the economy sustainably and for the long term; Use natural resources efficiently Be more resilient (use of fossil fuels) 	The SA and Local Plan needs to take into account the impact of economic development upon the climate and the way in which the SA appraises these impacts and how the plan will mitigate the effects on the environment.	The SA and Local Plan needs to take into account the impact of economic development upon the climate and the way in which the SA appraises these impacts and how the plan will mitigate the effects on the environment.
The Homelessness Act 2002	 The 2002 act places a duty on local housing authority to formulate a homelessness strategy and; Carry out a homelessness review for their district; Formulate and publish a homelessness strategy based on the results of that review; Publish a new strategy every 5 	No specific targets	The Local Plan policies relating to housing must be compliant with the requirements of the Act.	
The Housing Act 2004	 years. The Housing Act reinforces the role of Councils as strategic enablers with an overview of both public and private sector properties in their area. The Act contains: Extra powers to license private landlords, especially those of houses in multiple occupation; Changes in the way homes are judged as suitable to meet the needs 	Energy efficiency must be at least 20% greater in properties by 2010 than compared with 2000.	Mainly relevant at national and regional scale however objectives set for the South East must be included in the Local Plan	Consider Energy efficiency objectives in the SA framework.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 of the occupier by means of risk assessment; Modernising the right to buy policy to combat profiteering; Home Information Packs to simplify the buying and selling of property; Increase to the qualifying period for council tenants considering purchasing their property under Right To Buy, and also repayment of discounts. 			
Sustainable Communities: Building for the Future (2003)	 To ensure that all tenants have a decent home by 2010. To improve conditions for vulnerable people in private accommodation. To ensure all tenants, social and private, get an excellent service from their landlord. To ensure all communities have a clean, safe and attractive environment in which people can take pride. Low demand and abandonment - bring back life to those cities where there is low demand for housing, and where homes have been abandoned. Land, countryside and rural communities - Ensure that in tackling housing shortages the countryside is protected and enhanced rather than creating urban sprawl. 	No specific targets	Key national policy to be considered in the development of sustainable housing plans Encourage housing to be addressed by local partnerships as part of wider strategy of neighbourhood renewal and sustainable communities. Encourage environmental enhancement to be central to regeneration solutions. Encourage restoration and management of brownfield land. Have due regard for landscape character and designations, and encourage green space networks as basis for development. Address affordable housing need in rural areas as well as urban settlements.	Review SA Framework against these objectives, including the need for affordable housing

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	• Address housing needs of rural communities who are often the guardians of the countryside.			
Laying the Foundations: A Housing Strategy for England, November 2011	 The Housing Strategy sets out a package of reforms to: a. get the housing market moving again b. lay the foundations for a more responsive, effective and stable housing market in the future c. support choice and quality for tenants d. improve environmental standards and design quality. The new strategy addresses concerns across the housing market making it easier to secure mortgages on new homes, improving fairness in social housing and ensuring homes that have been left empty for years are lived in once again. 	Targets: Deliver up to 100,000 new homes by freeing up public sector land with Build Now, Pay Later deals.		
Floods & Water Management Act 2010	Seeks to "localise" responsibility for flood risk, particularly from ordinary watercourses. Key policies within the act include: providing the Environment Agency with an overview of all flood and coastal erosion risk management and unitary and county councils to lead in managing the risk of all local floods; encouraging the uptake of sustainable	 Part 1 of the Act requires the Environment Agency to develop a national strategy for flood and coastal erosion risk. It also requires all lead flood authorities in England to develop and maintain, apply and monitor a strategy for flood risk in the area. Section 30 allows certain authorities to formally designate 	Ensure that plan policies assist in directing development to locations at least risk of flooding and help to reduce overall flood risk.	SA framework to consider flooding and water management in its objectives and indicators

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	drainage systems and providing for unitary and county councils to adopt SUDS for new developments and redevelopments; introduce an improved risk based approach to reservoir safety;	 assets or features which affect flood or coastal erosion risk. Schedule 3 introduces standard for the design, construction, maintenance and operation of new rainwater drainage systems and introduces an approving body (generally the local authority). It amends Section 106 of the Water Industry Act, 1991 to make the right to connect surface water run off to public sewers conditional on the approval of the drainage system by the approving body. 		
Planning for Growth 2011	 The Government's economic policy objective is to achieve strong, sustainable and balanced growth that is more evenly shared across the country and between industries. The Plan for Growth contains four overarching ambitions that will ensure the progress is made towards achieving this economic objective. Key implications for planning are; Radical changes to the planning system to support job creation by introducing a powerful presumption in favour of sustainable development Localise choice about the use of previously developed land, removing targets, while retaining existing 	No specific targets	Ensure plans positively promote growth, deliver Sustainable development and reflect local views.	Ensure SA Framework objectives are in alignment

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 controls on greenbelt land Produce shorter, more focused and inherently pro-growth NPPF to deliver more development is suitable and viable locations Clear expectations that decisions should prioritise growth and jobs Powers to bring forward neighbourhood plans and development orders Enterprise zones with lower levels of planning control Speed up planning system and decision making Extend permitted development rights 			
Safer Places: The Planning System and Crime Prevention	This document identifies seven attributes of places that should be considered in order to make them safer: Access and movement: places with well-defined routes, spaces and entrances that provide for convenient movement without compromising security; •Structure: places that are structured so that different uses do not cause conflict; •Surveillance: places where all publicly accessible spaces are overlooked; •Ownership: places that promote a sense of ownership, respect, territorial responsibility	No specific targets	Local Plan policies should consider design of safer places and crime prevention	SA Objectives to consider crime

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Physical protection: places that include necessary, well-designed security features; Activity: places where the level of human activity is appropriate to the location and creates a reduced risk of crime and a sense of safety at all times; Management and maintenance: places that are designed with management and maintenance in mind, to discourage crime in the present and future.

Minerals Strategy Proposed Alterations to Regional Planning Guidance, South East – Regional	 The Regional Minerals and Waste Strategy sets out a regional framework up to 2030 for the development of minerals such as chalk, clay, sand and gravel; raw materials which are important for both the manufacturing and construction industry by: Encourage the development and construction of sustainable construction practise; Effective management of mineral extraction; The need and use of primary aggregates should be reduced; Advocated the need to adopt long- term statutory recycling and recovery targets; The supply of construction aggregates in the South East should be met from a significant increase in supplies of secondary and recycled materials. A reduced contribution from primary land-won resources and an in increase in imports of marine-dredges 	Development plans should: Encourage development projects to use construction materials that reduce the demand for primary minerals wherever practical. Promote a model shift to increase the proportion of minerals and derived manufactured products transported into and with the region by rail/or air	The mineral strategy to be incorporated into the policies of the Local Plan	Minerals strategy to be cross reference with transport and waste management objectives as part of SA indicators.
Harnessing the Elements - South East Energy Efficiency and Renewable Energy May 2003	The objective of the policies is to promote a more sustainable pattern of energy use and generation while ensuring that development does not harm the region's environment or the quality of life of its people by:	Numerous targets are given across the different policies.	The Local Plan should incorporate the energy and renewable energy objectives of the policy.	SA to include indicator on energy usage and use of renewable energy.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 Promoting measures that will conserve energy; Increase the use of renewable energy sources and support more local, small scale and dispersed pattern of generation; Encourage the incorporation of high standards of energy efficiency in all development; Development plans should include polices and proposals for the development of combined heat and power (CHP) schemes and encourage the integration into major development of CHP and district heating infrastructure; Setting minimal regional targets for electricity generation from renewable resources; Contributing to the achievement for the regional and sub-regional targets from land-based renewable energy; and Support developments that support the principle of renewable energy that has a minimal effect on landscape, wildlife and amenity. 			
River Basin Management Plan – South East River Basin District 2009	The purpose of the South East River Basin District River Basin Management Plan is to focus on the protection, improvement and sustainable use of the water environment. The plan describes the river	 The key challenges identified in the plan include: By 2015, 18 per cent of surface waters (rivers, lakes, estuaries and coastal waters) are going to improve for at least one biological, chemical or physical element, measured as part of an assessment 	The Local Plan should include policies to ensure that the quality of the south east river basin is protected in the future.	The conservation and enhancement of river quality could be reflected in the SA objectives

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 basin district and the pressures that the water environment faces. It shows what this means for the current state of the water environment, and what actions will be taken to address the pressures. It set out what improvements are possible by 2015 and how the actions will make a difference to the local environment – the catchments, estuaries, the coast and groundwater. The key objectives of the plan are to: prevent deterioration in the status of aquatic ecosystems, protect them and improve the ecological condition of waters; aim to achieve at least good status for all water bodies by 2015. Where this is not possible and subject to the criteria set out in the Directive ,aim to achieve good status by 2021 or 2027; meet the requirements of Water Framework Directive protected areas; promote sustainable use of water as a natural resource; conserve habitats and species that depend directly on water; progressively reduce or phase out the release of individual pollutants or groups of pollutants that present a significant threat to the aquatic environment; 	 of good status according to the Water Framework Directive. This includes an improvement of 710 kilometres of the river network in the river basin district, in relation to fish, phosphate, specific pollutants and other elements. 23 per cent of surface waters will be at good or better ecological status/potential and 33 per cent of groundwater bodies will be at good status by 2015. In combination 23 per cent of all water bodies will be at good status by 2015. The Environment Agency wants to go further and achieve an additional two per cent improvement to surface waters across England and Wales by 2015. The biological parts of how the water environment is assessed – the plant and animal communities are key indicators. At least 47 per cent of assessed surface waters will be at good or better biological status by 2015. 		

PPP	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 groundwater and prevent or limit the entry of pollutants; contribute to mitigating the effects of floods and droughts. 			
Destination South East – Tourism and related sport and recreation	 The vision for tourism recognises the value of the industry to quality of life in the South East and contends that its contribution to the spatial development of the South East can be significantly enhanced for the good of the region. The Strategy sets out to deliver the following aims over the period to 2026: Emphasise the sub regional priorities (Thames Gateway, The Coastal Strip, South Downs and New Forest Proposed, Milton Keynes and Ashford, Thames Valley, Oxford and western Oxfordshire); Seek opportunities to diversify the economic base of the region's costal resorts, while consolidating and upgrading tourism facilities in ways which promote higher value activity, reduce seasonality and support urban 	Numerous targets are given across the different policies.	DPD and SPD should prevent inappropriate development, co- ordinate management and environmental initiatives and Identify land for particular types of tourism related development. Also Identifying necessary infrastructure investments.	SA framework to reflect Local Plan objectives in setting indicators in the SA framework.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	Seek opportunities to promotes tourism and recreation based rural diversification should be encouraged where they provide jobs for local residents and are of a scale and type appropriate to their location; and Opportunities should be sought to protect upgrade existing and develop new, regionally significant sporting facilities in the region in accordance with the facilities strategies produced by the national governing bodies for sport.			
England Rural Development programme (South East Regional Chapter)	 Sport. England Rural Development Plan in the South East: Regional Goals: Protect and enhance distinctive; landscapes, countryside character and historic environment; Safeguard and enhance the diversity of habitats and species of the region; Ensure appropriate management of woodland and water resources; Promote environmentally friendly farming; Exploit niche markets for high value products; Ensure economic activity is sustainable; Develop collaborative marketing initiatives; 	Identifies key areas for examination during development of the South East regions rural areas including plan and policy suggestions, good practice comments and strength, weakness, opportunities and threats analysis. Also provides broad regional rural objectives	Should consider objectives and incorporate as possible to align with regional objectives.	The overviews of rural elements are useful for framework targets. Aspirations, objectives to inform SA indicators.

Local Transport Plan for Kent 2011-2016 (LTP3)	 five Themes based on the previous Government's five National Transport Goals as set out in the LTP3 Guidance, but made relevant to Kent: Growth Without Gridlock A Safer and Healthier County Supporting Independence Tackling a Changing Climate Enjoying Life in Kent 	 No formal targets however the following performance indicators which reflect our five LTP3 Themes. Journey time reliability in Kent's urban centres (Canterbury, Gravesend and Maidstone) Principal roads where maintenance should be considered People killed or seriously injured in road traffic accidents Local bus journeys originating in the authority area Per capita reduction in CO 2 emissions Children travelling to school - mode of transport usually used Net satisfaction with the condition of roads, pavements and streetlights 	Implications applicable throughout Local Plan. These objectives need to be addressed in the Local Plan and in many general design as well as locational policies	Ensure framework objectives are in alignment
Kent Design Guide	 The Kent Design Guide aims to achieve environmental excellence by providing practical advice on the process and design of development proposals. The Guide will: apply to all types of development; supplement national and regional guidance; describe Kent's planning policy framework and the process for obtaining planning consent; provide a framework for detailed guidance at local level; 		Will Guide or its principles been adopted as an SPD? The LDF could include policies on promoting sustainable design and incorporate the Guide's recommendations.	The SA objectives could include an objective on promoting sustainable design.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 give examples of successful design and useful checklists for inspiration; and help make sense of the many complex issues that have to be considered in preparing development proposals. 			
Active Lives: Active Lives: The Future of Social Care in Kent 2010-2013	 This document lays out the shared vision for adult social care in Kent for 2010-2013. Since the review of <i>Active Lives</i> in 2007 there have been many changes in social care, both nationally and locally. Kent Adult Social Services will be facing a challenging time in the next few years brought about by: increasing demand as a result of better health care and advances in medicine which mean people, including those with complex health conditions, live longer the impact on public spending caused by the recession increased public expectation that services should meet needs based upon the individual, giving them choice and control fewer young people entering the social care workforce is ageing a number of initiatives and policies launched by the 	There are around 246,994 people over the age of 65 living in Kent (taken from Mid Year. Population Forecasts 2008) and it is estimated that the total number of over 65's will grow by 39.3 per cent by 2021 and that the total population of over 85's will rise by 100 per cent by 2026	Ensure that the LDF integrates key objectives of promoting social inclusion and independence for Kent's residents into its policies and recommendations. It should reflect the needs of disabled people and others with additional needs. The provision of affordable housing could help alleviate recruitment problems.	The SA objectives should reflect the need to promote better public health (this in turn reflects the requirements of the SEA Directive which refers explicitly to 'human health' as an issue for consideration) and social inclusion.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 government (see Appendix 1), setting out a national vision for social care in the future focusing on independence, personalisation; and partnership working. 			
Kent County Council Framework for Regeneration	 'Unlocking Kent's Potential' is a review of the challenges and opportunities facing Kent. It sets out TDC's overarching assessment of the key opportunities and challenges facing Kent over the next ten years. The purpose of the document is to look forward to the future challenges and opportunities facing Kent in global and domestic contexts and to act as a statement of Kent County Councils commitment to tackling the big issues facing the area. 5 Key challenges/ aims: Building a new relationship with Kent business Unlocking talent to support the Kent economy Embracing a growing and changing population Building homes and communities Delivering growth without transport gridlock 	A number of opportunities are identified within Kent's Framework for Regeneration. These include major opportunities to develop the economy of the area through: the development and build out of employment space at Ebbsfleet Valley and Kent Thameside, Ashford, Manston Dover and Sittingbourne; a sequence of transport investment to road and rail and public transport; and cultural regeneration investment in Margate, Folkestone and Cantebury.	The LDF should include policies to respond, where possible, to the key challenges identified in the Framework.	The SA objectives could include objectives related to the key challenges identified in the Framework for Regeneration. The baseline review monitoring should also incorporate indicators that will help to ensure the impact on developing Kent's economy is measured.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	the opportunity to develop and promote Kent as a destination for UK and international visitors.			
Kent Prospects: Economic Strategy for Kent 2009	 Kent Prospects provides the Partnership's framework for influencing, guiding and co- ordinating economic development and regeneration in the County. The 2007- 2012 version takes forward the 20- year mosaic economy scenario and focuses on unlocking constraints and enabling economic development and regeneration opportunities. Kent Prospects contains several priorities which include: Accessibility, infrastructure and connections Increase accessibility and secure investment in infrastructure, roads and public transport Develop ICT Ensure Kent's environmental infrastructure meets growth and regeneration challenges Growth and regeneration Promote economic development and regeneration opportunities Encourage rural enterprise, innovation and skills development Promote opportunities associated with the Olympics and other events 	12 indicators	LDF should seek to support initiatives to develop basic skills and IT skills in particular. Ensure a good supply housing and suitable employment sites. Promote high quality, sustainable design.	12 indicators have been created to monitor performance – some of these may be suitable for SA indicators and monitoring.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
Kent Health and Affordable Warmth Strategy Second Edition	 Enterprise and competitiveness Support innovation, skills and enterprise Develop Kent's tourism product Promote innovation and expand Kent's knowledge base Protect and improve the supply of business sites and focus new investment on sustainable strategic employment sites Pathways to sustainable prosperity Promote sustainable design consumption, resource efficiency and productivity Support development of sustainable enterprises The first Kent Health and Affordable Warmth Strategy was launched in 2001 and set out a number of objectives to help the fuel poor in Kent move into affordable warmth. The second edition builds on these objectives. It defines a fuel poor household as one which needs to spend more than 10% of its income to heat the home to an adequate standard of warmth. There are around 12,500 of Kent residents that are fuel poor and in 2001-2002 there were 890 excess winter deaths in Kent including 60 in Sevenoaks. The most vulnerable group are the elderly with 93% of excess winter deaths occurring in the over 65s. The main cause of 	Householders living in social sector properties will be helped by specific local authority home improvement programmes. Under the Home Energy Conservation Act 1995 (HECA), local authorities became Energy Conservation Authorities (ECAs) and were required to submit an annual energy conservation report to Government. This should assess the energy efficiency of all housing in the local authority area and identify appropriate energy conservation measures that are cost-effective and would result in significant improvements in energy efficiency. The Government introduced an obligation for ECAs to report on fuel	The LDF could promote sustainable design principles for new housing development particularly in relation to insulation and the efficiency of heating systems.	The issue of affordable warmth should be considered when undertaking the SA particularly in appraising policies on sustainable design principles.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	fuel poverty in the UK is a combination of poorly insulated homes, inefficient heating systems and low incomes.	poverty as part of the annual report. The Strategy is closely linked to the Kent Design Guide. Aim 3 Objective (f) states that Creative Environmental Networks will work with Kent Design to ensure that the Guide includes recommendations for new build housing to exceed existing building standards for thermal comfort.		
Learning for life, improvement for all. Education Development Plan 2002 - 2007 (Year 2004-05 Update)	"Learning for Life- Improvement for All" identifies that 'Education, skills and learning are the key to personal success and fulfilment and to the future prosperity and quality of life in Kent'. The commitments are: To attract, support and reward the very best teachers; To help all schools to improve performance but target those few which are not fully developing children's abilities; Early years provision is essential and to develop the social skills of children and give them the best start to education; Secondary schools should work together to provide the maximum degree of choice for young people in their area, ensuring all students have access to a curriculum that is best suited to their needs; To ensure that every child is supported to fulfil his or her potential;	The development plan sets out priorities, criteria, targets and actions to meet the strategic themes.	The Local Plan should observe and comply with the strategy	Ensure the SA objectives are in-line and contribute towards the strategy

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	To help schools to become centres for their communities; and To create responsive structures to tackle underachievement and extend the potential of all pupils.			
Kent County Council Equality Strategy April 2007 – March 2010	The Strategy sets out how TDC will promote equality and community cohesion and tackle unfair discrimination in Kent incorporating TDC's Disability, Gender and Race equality schemes. The strategy focuses primarily on five priority outcomes:	Equality impact assessments to be incorporated as part of the DPD and SPD.	The DPD and SPD should observe and comply with the strategy.	The SA should ensure that the LDF promote the outcomes of the Strategy and incorporate Equality impact assessments as appropriate.
	 Equal and inclusive services and information for all, regardless of age, disability, gender, faith, race or sexual orientation; Creative opportunities for participation and involvement in service planning and decisionmaking; Work with our partners to ensure the county's most vulnerable groups feel safe and free from 			
	 Enhance the quality of our intelligence and monitoring systems, to ensure we can target disadvantage in the county where action is most needed; and Maintain our reputation as an excellent employer.

Kent Joint Municipal Waste Management Strategy	 The purpose of the Strategy is to set out how the KWP intends to manage municipal solid waste arising over the next 20 years focusing on: Strategy Objectives and Policies; Resource Management; Partnerships; Education and Engagement; Waste Minimisation and Re-use; Recycling and Composting; Residual Waste Management Services; Energy Recovery; Disposal to Landfill; and Waste transfer Facilities. 	No specific targets.	Waste management strategy to be incorporated into the waste policies of the Local Plan	SA will include indicator on minimization of waste. Will also need indicators on re-use, recycling and recovery of waste as well, to demonstrate the movement away from disposal.
The Kent Biodiversity Action Plan <u>http://www.kentbap.co.uk/</u>	The aim of the action plan is to conserve and enhance biological diversity in Kent and to contribute to the conservation of national and global biodiversity.	To maintain and, where practicable, to enhance: the overall populations and natural ranges of native species and the quality and range of wildlife habitats and ecosystems; • internationally and nationally important and threatened species, habitats and ecosystems; Species, habitats and natural and managed ecosystems that are characteristic of Kent; The biodiversity of natural and semi- natural habitats, where this has diminished over 3 recent decades.	Ensure Local Plan policies aligns with BAP	Ensure that DPD and SPD encourage conservation and offer protection to areas and species of high conservation importance as identified in the action plan.

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
		To increase public awareness of, and involvement in, conserving biodiversity.		
		To identify priorities for habitat and species conservation in Kent and set realistic targets and timescales for these.		
Kent County Council School Organisation Plan December 2004	The School Organisation Plan (SOP) is a statutory plan, the key purpose of which is to set out how Kent County Council as Local Education Authority intends to meet its statutory	The Education Development Plan for Key Stages 1,2,3 and 4 (school age children) on attainment in English, Mathematics, Science, ICT and across the curriculum;	Must contribute to the national and regional plans and policies towards education. Local Enterprise Partnership Vision and Business Plan	 1: Secure the growth of the Thames Gateway: 2: Promote investment in our coastal communities: 3: Strengthen our rural economy: 4: Strengthen the competitive advantage of strategic growth locations: 	 Within the next 20 years: Established and new businesses across the area will have created between 250,000 and 300,000 new jobs. A further 760,000 people will live in the South East LEP area. The regeneration of the Thames Gateway itself will be largely complete. All our coastal and rural communities will aim to match the prosperity of our small cities and market towns. Formerly deprived areas will be making significant progress towards becoming thriving communities. GVA per head will exceed that for the south east as a whole; unemployment will be well below the average other prosperous European regions. Our workforce will be known for its 'can-do' and entrepreneurial attitude; offering skills and talents which compete with the best in Europe. Our universities will be global businesses in their own right, not only attracting high calibre 'learners' to the UK, but exporting intellectual excellence across the world. Every community across the LEP will be served by super-fast (100 	Consider how Local Plan Policies might contribute to LEP operating plan goals and objectives	The SA should ensure that the DPD and SPD promote the outcomes of the Strategy and incorporate Equality impact assessments as appropriate Ensure SA Framework objectives are aligned to LEP objectives.

		 mbps or greater) broadband networks. A steady flow of public and private investment in strategic infrastructure, including improvements in our road and rail networks, sea ports and airports will ensure that businesses in the LEP benefit from even better connections to key global markets. 		
Vision for Kent 2012-2022	 The Vision for Kent is the community strategy for the county. It focuses on 8 key themes and objectives. where a vibrant and successful economy and targeted regeneration are delivered and sustained where learning is stimulated and supported for everyone - for life, for employment and for enjoyment where people lead healthier lives and enjoy high quality services that meet their needs for health, care and wellbeing where a high quality environment and for current and future generations where communities are stronger, safer and confident in the face of change where residents and visitors enjoy life through an enhanced and accessible range of recreational, 	No specific targets	LDF Policies should support short and long term priorities and strategic objectives outlined in this community strategy. Many of the aims and objectives of the 'Vision' will be addressed and delivered through other district or county-wide strategies, including Thanet's Local Plan.	The SA to reflect and support priorities. Useful for updating baseline data

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	 sporting, artistic, and cultural opportunities where jobs and services are easily accessible for all sections of the community and congestion and pollution are reduced where housing needs are met and decent, high quality homes help create attractive, safe and friendly communities It also highlights a number of strategic, long-term challenges that cut across many or all of these themes. 			
Growing the Garden of England: A strategy for environment and economy in Kent – July 2011	The Kent Environment Strategy is a three-year strategy organised into three themes and ten priorities representing the major challenges and opportunities for Kent over the next 10 to 20 years. Each theme has a 20-year vision, supported by high-level targets. The three themes and their priorities are: 1.Living 'well' within our environmental limits - leading Kent towards consuming resources more efficiently, eliminating waste and maximising the opportunities from the green economy. 2. Rising to the climate change challenge – working towards a low carbon Kent prepared for and resilient to the impacts of climate change. 3.Valuing our natural, historic and living	Theme 1: Reduce Kent's ecological footprint By 2016, Kent will stabilise its ecological footprint on the way to reducing the footprint below 2001 levels by 20262. Theme 2: Reduce carbon emissions in Kent By 2030 Kent's greenhouse gas emissions, measured as CO2 equivalent, will be 60% below 1990 levels .Help the public sector, the business community and Kent residents to manage both positive and negative impacts of climate change, including extreme weather events Realising the value of the natural, historic and living environment The Kent Forum will lead the way in adopting and implementing a consistent	Consider how Local Plan may contribute to achieving county objectives and targets for economic growth and environment	Check SA Framework is aligned with themes and priorities.

A characteristic of growing economies is the effective application of higher value skills and knowledge transfer to create wealth and commercial success. Innovation and commercialising intellectual property supports growth and creates value- added businesses: strong links between businesses and universities / colleges is just one element supporting this.		
Sub County				
The 2009 East Kent Sustainable Community Strategy'	Provides an integrated approach to making region more sustainable. All local authorities have a duty to work with other organisations to produce a sustainable community strategy. This is a document which shows how organisations will work together to improve their area and safeguard its future. This document sets out the clear, long-term vision for East Kent, covering the districts of Canterbury, Dover, Shepway and Thanet. The following are aims and act as work themes		Local plan should consider wider East Kent context and the integrated approach to issues and cross boundary issues highlighted by this strategy.	The SA should ensure that the Local Plan promotes the outcomes of the Strategy and incorporate Equality impact assessments as appropriate.

East Kent Homelessness Strategy 2008-2013	 The strategy outlines 7 strategic priorities: Maximise housing options and choice for customers Prevent rough sleeping Promote sustainable private sector accommodation Help homeless households to secure and retain good quality accommodation Reduce the use of temporary accommodation Tackle youth homelessness Monitor performance and develop best practice in homelessness 	 A series of detailed objectives have been developed to meet each of the key priorities. The strategy helps support the South East Regional Housing Strategy priority to prevent homelessness and specifically Increasing the supply of new affordable housing Housing-related support to enable vulnerable households to maintain tenancies Better use of existing accommodation in both public and private sectors. 	Ensure polices address and support the reduction and prevention of homelessness and meet regional and local priorities.	SA to include indicators on the impact DPD and SPD could have on preventing homelessness.
East Kent Local Investment Plan	 The HCA priorities for the South East are to: Unlock surplus public sector land and brownfield sites for housing developments. Regenerate town and city centres. Deliver new and affordable homes in award winning developments. Work with public sector partners to deliver new infrastructure. Partner with developers, registered social landlords and local authorities 	Additionally there are a number of strategic priorities. Of specific relevance to Thanet DC include: 1. Manston and Central Thanet •Kent International Airport •Parkway Station to link to HS1 •Manston Business Park •Eurokent Business Park •Westwood Housing •Highway improvements	Local Plan can contribute to a number of the key objectives, priorities and targets through delivering development and regeneration in the district and allowing for growth. Policies should be consistent with HCA Projects identified for the district.	Ensure SA objectives comply with aims of Plan

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	to assist in comprehensive estate development.Establish a strong investment programme which will support existing quality.	4. Margate and Cliftonville Housing Intervention and Regeneration Programme This programme involves major interventions and comprises a number of initiatives aimed at rebalancing the failed housing market.		
CAMS Stour catchments	To manage water resources in a sustainable way by providing a structured approach to water resources management in the Stour Catchment. It recognises the needs of abstractors, river users and the environment.	Maintain and improve river quality and water resources. Improve and protect the natural environment (including biodiversity).	Ensure suitable measures are taken to protect the aquatic environment from pollution and over abstraction.	SA to include indicators on the impact DPD and SPD could have on the aquatic environments (coastal and inland).
North East Kent European Marine Sites Management Scheme and Action Plan 2007- 2012	The management plan details actions for the management of the north east coastline under 5 management action types; planning, review, on-ground, monitoring, interpretation and awareness.	Specific objectives are separated between the relative authorities and groups who are responsible for their delivery	The plan documents should support the actions of the management scheme	The SA should ensure the actions are supported by the SA framework
Canterbury City Council Local Development Framework	Canterbury City Council are in the process of developing its own LDF through the production of a Core Strategy and related DPD and SPD documents. These documents will also be subject to Sustainability Appraisals	Targets and indicators will become available over time	The plan documents should consider any cross boundary issues and address them appropriately	The SA should ensure the cross boundary issues are considered
Dover District Council Local development Framework	Dover District Council are in the process of developing its own LDF through the production of a Core Strategy and related DPD and SPD documents. These documents will also be subject to Sustainability Appraisals	Targets and indicators will become available over time	The plan documents should consider any cross boundary issues and address them appropriately	The SA should ensure the cross boundary issues are considered

Corporate Plan 2012-2013, Thanet District Council.	This Plan sets clear objectives and ambitions for Thanet Council for the next 10 years. This plan covers 6 key themes:	This plan identifies why the key themes have been prioritised. Specific actions and a timescale for works are summarised.	Ensure that Local Plan Policies support the themes identified in this Plan	Ensure that SA Framework supports the objectives

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	Thanet's Economy Safe Neighbourhoods Beautiful Thanet Quality Housing Healthy Communities Modern Council			
Community Strategy for Thanet.	This document recorded the process and outcomes of the community strategy co-ordinated by the Thanet Local Strategic Partnership. Key Themes: The economy Lifelong learning A safer community The environment and housing An inclusive community Health and lifestyle.	The community was asked what they would like to see in the area. The top five priorities were: A prosperous, thriving economy with job and training opportunities for all who want them. A safe community where people feel confident and able to take part in community life, social and recreational activities. Homes for all who need them Clean, safe streets and quality public spaces in an environment that we can all be proud of. Opportunities, facilities and activities for young people. Action plans were developed along these priorities.	Ensure that Local Plan policies support the priorities and action plans identified in the Strategy.	SA Framework to be aligned with strategy priorities.
Isle of Grain to South Foreland Shoreline Management Plan (2007)	The SMP is a non-statutory, policy document for coastal defence management planning. The main objective of the SMP is to identify sustainable long-term management policies for the coast. It does this by	Management policy for individual coastal reaches	Support the individual policies as appropriate	Must afford coastal protection in line with SMP

РРР	Key objectives relevant to Local Plan and SA	Key targets and indicators relevant to Local Plan and SA	Implications for the Local Plan	Implications for SA
	recommending policy for smaller different reaches of coastline on the basis of; Hold the line; Advance the line; Managed retreat; and, No active intervention.			
Pegwell Bay to Kingsdown Coastal Flood Risk Management Strategy (2007)	Details the management plans for flood risk management by through the consideration of strategic options for 9 coastal reaches	Strategic management options provided for individual coastal reaches	Support the individual policies as appropriate	Must afford coastal protection in line with the strategy

Appendix C

Biodiversity and Cultural Assets

C1 Thanet Designated Areas

Ramsar Sites

• Thanet Coast and Sandwich Bay

Special Protected Areas

• Thanet Coast and Sandwich Bay

Special Areas of Conservation

- Sandwich bay
- Thanet Coast

Sites of Special Scientific Interest

- Thanet Coast
- Sandwich bay to Hacklinge Marshes

Local Wildlife Sites

- Monkton Chalk Pit
- St Peter's Churchyard, Broadstairs
- Golf Course Roughs, Kingsgate
- Woods and Grassland, Minster Marshes
- Ash Level and Richborough Pasture
- St Nicholas Wade Churchyard
- St Mary Magdalene Churchyard
- Ramsgate Cemetery
- Cliftonville Grasslands

Habitat Action Plans

• The Kent BAP has developed the HAPs for the following;

Thanet District Council

Group	Habitat
Broad Habitats	Acid grasslands
Broad Habitats	Rivers and streams
Broad Habitats	Standing open water and canals
Local habitat	Heathland & Mire
Local habitat	Hedgrows
Local habitat	Intertidal Mud & Sand
Local habitat	Lowland Farmland
Local habitat	Marine Habitats
Local habitat	Neutral & Marshy Grassland
Local habitat	Old Orchards
Local habitat	Urban Habitats
Local habitat	Woodland & Scrub
Priority Habitats	Coastal and floodplain grazing marsh
Priority Habitats	Coastal saltmarsh
Priority Habitats	Coastal sand dunes
Priority Habitats	Coastal vegetated shingle
Priority Habitats	Lowland calcareous grassland
Priority Habitats	Lowland wood-pasture and parkland
Priority Habitats	Maritime cliff and slopes
Priority Habitats	Reedbeds

Species Action Plans

• The Kent BAP has developed the SAPs for the following;

Group	Species
Amphibians	Great Crested Newt (Triturus cristatus)
Butterflies	Pearl-bordered Fritillary (Boloria euphrosyne)
Butterflies	Silver-Spotted Skipper (Hesperia comma)
Butterflies	Heath Fritillary (Mellicta athalia)
Crustaceans	Freshwater White-clawed Crayfish (Austropotamobius pallipes)
Fish	Allis Shad (Alosa alosa)
Fish	Twaite Shad (Alosa fallax)
Local species	Eptesicus serotinus (Serotine bat)
Local species	Luscinia megarhyncos (nightingale)
Local species	Ophrys fuciflora (late spider orchid)
Mammals	Water Vole (Arvicola terrestris)
Mammals	Otter (Lutra lutra)
Mammals	Dormouse (Muscardinus avellanarius)
Vascular plants	Early Gentian (Gentianella anglica)

Regionally Important Geomorphological/Geological Sites

- Monkton Chalkpit Nature Reserve
- St Peter Quarry
- Pegwell Bay infilled dry valley

Registered Parks and Gardens

• Albion Place Gardens

Scheduled Monuments

- Anglo-Saxon cemeteries of Ozengall Grange
- Enclosure and ring ditches 200yds east north east of Minster Laundry
- Quex Park Settlements
- Anglo-Saxon cemetery and associated remains at Monkton, 550m north of Walters Hall Farm
- Double ring ditch and two enclosures 400yds north west of Danes Court
- Settlement one mile east of village
- Monastic Grange and pre-conquest nunnery at Minster Abbey
- Dent-De-lion Medieval Gatehouse
- Group of ring ditches 400yds north west of Great Brooks End Farm
- Salmestone Grange
- Anglo-Saxon cemetery, Parish Church of St Giles and associated remains immediately east of Sarre Mill
- Monastic Grange and pre conquest Nunnery at Minster Abbey
- Anglo-Saxon cemetery, Dane Valley Road
- Ring ditches and enclosure 500yds east south east of College Farm

Conservation Areas

- Acol
- Birchington
- Broadstairs
- Dalby Square
- Ethelbert Road & Athelstan Road
- Kingsgate
- Margate
- Margate Seafront
- Minster
- Monkton
- Northdown
- Pegwell

- Ramsgate
- Ramsgate, Royal Esplanade
- Ramsgate Montefiore
- Reading Street
- St Nicholas at Wade
- St Peters
- Sarre
- Westgate on Sea
- Westgate on Sea East
- Westgate on Sea South

Landscape Character Areas

- Pegwell Bay
- The Former Wantsum Channel
- The Former Wantsum North Shore
- The Central Chalk Plateau
- Quex Park
- The Urban Coast

Appendix D

Full SA Objectives, Indicators and Decision Making Criteria

D1 SA Objectives, Decision Making Criteria and Indicators

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
Social		
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Will the plan: Supply an appropriate quantity of housing to satisfy demand? Supply an appropriate mix of types and tenures of properties in relation to the respective levels of demand? Supply 30% of new homes as affordable homes? Reduce the prevalence of unfit and derelict dwellings within the housing stock?	Net additional dwellings for the current year Net additional dwellings over previous 5 year period or since the start of the relevant plan period, whichever is longer Projected net additional dwellings up to the end of the relevant development plan period or over a ten year period, whichever is longer Annual net dwelling requirement Annual average number of net additional dwellings needed to meet overall housing requirements, having regard to previous years' performance. Number of affordable housing completions. % of new housing sites over 15 units net or 0.5 hectares where provision is made for an element of affordable housing. Average property price compared to average earnings. Number of unfit homes per 1000 dwellings.
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Will the plan: Ensure people are adequately served by key healthcare facilities, regardless of socio- economic status?	Death rates from circulatory disease, cancer, accidents and suicide. Infant mortality rates Conceptions among girls under 18 Life expectancy Amount (and %) of new residential development within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres. Amount and % of residential property within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres.

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Will the plan: Improve educational levels of the population of working age? Improve access to educational facilities for vulnerable and welfare dependant workers?	Proportion of 19 year olds with level 2 qualifications (5 GCSEs, A *-C or NVQ equivalent) % of population of working age qualified to NVQ level 3 or equivalent. Proportion of adults with poor literacy and numeracy skills. Access to education facilities.
4. To increase public safety and reduce crime and fear of crime.	Will the plan: Reduce levels of burglaries, violent offences and vehicle crime? Reduce public perceptions and fear of crime?	Levels of domestic burglaries, violent offences and vehicle crimes. Fear of crime.
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Will the plan: Reduce the proportion of people living in deprived areas. Ensure new residential development is within a reasonable travel distance from key facilities. Ensure existing residences are adequately served by key facilities. Ensure vulnerable people within the community are adequately served by key facilities.	 Proportion of children under 16 who live in low-income households. % of population of working age who are claiming key benefits Percentage of households in fuel poverty. Proportion of population who live in areas that rank within the most deprived 20% of areas in the country. Household income in rural areas. Amount (and %) of new residential development within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres. Amount and % of residential property within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres. Access to key facilities by lower socio economic groups.
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual	Will the plan: Result in communities where residents are satisfied with their local area as a place to live? Result in harmonious and mixed communities?	 % of people who say they are satisfied with their local area as a place to live. % of people who feel that their local area is a place where people from different backgrounds and

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
contribution is valued.		communities can live together harmoniously.
Economic		
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Will the plan: Increase levels of employment in the population of working age? Reduce the proportion of people on unemployment benefits?	Proportion of people of working age in employment Proportion of people claiming unemployment benefits who have been out of work for more than a year % increase or decrease in the total number of VAT registered businesses in the area Percentage change in workplace- based employment
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Will the plan: Increase the GVA per capita of the district's population? Encourage sustainable development of key sites across the district likely to stimulate economic growth? Encourage sustainable development of key services and facilities across the district likely to stimulate economic growth? Deliver industrial and employment development in regeneration areas? Deliver industrial and employment development that reduces unemployment in deprived areas?	GVA per capita Development of key sites to stimulate economic growth across the district. Development of key services and facilities to stimulate economic growth across the district. Development of key sites to stimulate economic growth in priority regeneration areas Proportion of people, in the most deprived areas, of working age in employment Proportion of people, in the most deprived areas, claiming unemployment benefit who have been out of work for more than a year Proportion of young people (18-24 year olds), in the most deprived areas, in full-time education or employment Percentage increase or decrease in work-place based employment in the most deprived areas
9. To protect and enhance the areas natural, semi- natural and street scene to support the tourist economy.	Will the plan: Encourage development that will boost the tourism sector? Protect and enhance natural, semi-natural and built assets that support the tourist economy?	Percentage of jobs in the tourism sector Number of visitors staying overnight and overnight spend How to measure the protection of assets that support the tourist economy?
Environmental		
10. To improve efficiency in land use through the re-use of previously	Will the plan: Encourage locating development on previously developed land, avoiding Greenfield sites?	% of new and converted dwellings completed on previously developed land. Development on previously developed land.

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Encourage an appropriate density and mix of development that reflects the needs of the population? Will the plan: Encourage the redevelopment of derelict land and properties, returning them to appropriate uses?	% of new dwellings completed at (i) less than 30 dwellings per hectare (ii) between 30 and 50 dwellings per hectare (iii) above 50 dwellings per hectare. Net densities achieved on completed housing sites over 10 units. Empty properties brought back into use. Derelict land brought back into reuse Number of hectares of open countryside lost to irreversible development. Number of departures from policy safe guarding green wedges. Number of hectares of best and most versatile agricultural land lost to irreversible development during plan period.
11. To ensure that a sustainable pattern of development is pursued.	Will the plan: Promote development in sustainable locations that limits the need to travel to key facilities and services?	Amount (and %) of new residential development within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Will the plan: Improve landscape quality and the character of open spaces and the public realm? Protect and/or enhance the character and appearance of the District's townscape and countryside?	Land covered by management schemes Access to and the use of the countryside Empty properties brought back into use. Derelict land brought back into reuse
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Will the plan: Preserve or enhance the character and appearance of conservation areas, listed buildings, scheduled monuments and other features of cultural, historical or archaeological value and their setting? Ensure that development is sensitive towards the local environment? Support the restoration and re-use of existing buildings	Buildings of Grade I and II* at risk of decay

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
14. To improve air quality in the District's Air Quality Management Areas.	Will the plan: Encourage improvement in air quality within Air Quality Management Areas (AQMAs)?	Days when air pollution is moderate or high
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Will the plan:Improve public transport links to key facilities for existing development?Ensure new development is appropriately serviced by public transport to enable access to key facilities?Promote a sustainable public transport network that reduces reliance on private vehicles?	Amount (and %) of new residential development within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres. Amount and % of residential property within 30 minutes public transport time of a GP, hospital, primary school, secondary school, areas of employment and major retail centres. Average daily motor vehicle flows. Proportion of travel by mode.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Will the plan: Improve transport links to key facilities within the district? Reduce reliance on private vehicles Support the development of key transport links between Thanet and the wider south East?	Average daily motor vehicle flows. Proportion of travel by mode.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Will the plan: Promote adherence to movement up the waste hierarchy? Promote reduced household waste generation rates? Promote increased waste recovery and recycling?	Percentage of the total tonnage of all types of waste (municipal solid waste, construction and demolition and industrial) that has been recycled, composted, used to recover heat, power and other energy sources, and landfilled.
18. To ensure development within the District responds to the challenges associated with climate change.	Will the plan: Promote a proactive reduction in the volume of greenhouse gas emissions released by development across the District?	Emissions of greenhouse gases from energy consumption, transport and land use and waste management.
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion,	Will the plan: Restrict the development of property in areas of flood risk? Reduce areas available for flood storage?	Number of planning permissions granted contrary to the advice of the Environment Agency on either flood defence or water quality grounds. Properties at risk from flooding. New development with sustainable drainage installed

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
coastal and fluvial flood risk, in accordance with the NPPF.	Ensure adequate measures are in place to manage existing flood risk? Ensure that development does not increase flood risk due to run-off? Ensure development is appropriately future proof to accommodate future levels of flood risk?	
20. To conserve and enhance biodiversity.	Will the plan: Provide opportunities to develop or enhance new and existing wildlife and geological sites? Avoid destruction of important habitats or unique geological features? Avoid damage to designated wildlife and geological sites, protected species and their habitats? Support key objectives of the biodiversity action plan (BAP)? Support existing and /or contribute towards the creation of multifunctional green infrastructure? Support existing and/or create new green networks? Support the delivery of ecosystem services?	Population of wild birds. Condition of Sites of Special Scientific Interest (SSSIs). Extent and condition of key habitats for which Biodiversity Action Plans have been established. Extent of ancient woodlands Achievement on BAP targets Loss of BAP or protected habitat as a result of new development. Area designated as SNCI and Local Nature Reserve Changes in populations of BAP species Changes in the area of BAP habitats % of greenspace gain in new developments
21.To protect and improve the quality and quantity of ground, fluvial and coastal water resources, including European designated sites.	Will the plan: Encourage Compliance with WFD? Encourage compliance with the EC Bathing Waters Directive? Promote management practices that will protect water features from pollution? Avoid consuming greater volumes of water resources than is available to maintain a healthy environment?	Rivers of Good or Fair chemical and biological water quality / Compliance with Water Framework Directive Compliance with EC Bathing Waters Directive Incidents of major and significant water pollution
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably	Will the plan: Promote sustainability principles in the design, procurement, and operation of development? Encourage developers and operators in the District to 'green'	Percentage of new build and retrofit homes meeting EcoHomes Very Good standard Percentage of commercial buildings meeting BREEAM Very Good standard Ecological footprint for the District

Objective Number / Thanet District SA Objective	Decision Making Criteria	Indicators
produced and local products.	their business operations and supply chains? Reduce the consumption rates of raw materials through strong sustainability policies?	
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Will the plan: Encourage reduction in energy use and increased energy efficiency? Encourage the development of renewable energy facilities within the District?	Energy use per capita Installed capacity for energy production from renewable sources

Appendix E Policy SA Tables

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT++ The proposed policy would help encourage a mixture of housing to reflect varying demands. By encouraging inward investment in residential schemes across the district, and seeking cooperation between the applicant and Thanet Council; higher levels of approvals should be attained in comparison to if the developers worked in isolation. This would help deliver choice within the residential market, which would help deliver affordable housing in the district.	Unknown ? Given that future development plans are not known it is not possible to assess the impact of a no policy option.	-
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Direct. ST/LT++ A collaborative approach between the developer and Thanet Council would ensure that sustainability is incorporated into the scheme. This would ensure that developments allow local residents the access to facilities and services and as such would help enhance the provisions and access to healthcare.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local services. As such the developments could create excessive demand on facilities and services. However given that future development plans are not known it is not possible to fully state that it would occur and as such the negative impacts are questionable.	

Policy 1: Policy SP01 NPPF – presumption in favour of sustainable development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent. Direct. ST/LT++ A collaborative approach between the developer and Thanet Council would ensure that sustainability is incorporated into the scheme to the highest standard. This would ensure that proposals assist people in gaining the skills to fulfil their potential. A collaborative approach would ensure schemes are designed to have good access to education and services, consider education requirements and promote and support new educational facilities. Therefore when assessed against the likely magnitude of effects from policy adoption would be significant positive.	Permanent. Direct ST/LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local services. As such the developments could create excessive demand on facilities and services such as schools and thus reduce the quality of the service that is being provided. However given that future development plans are not known it is not possible to fully state that it would occur and as such the negative impacts are questionable.	-
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between the applicant and Thanet Council will ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach will ensure schemes design out crime by delivering high quality development, seek to improve access to green space and sports provision and deliver mixed housing sites including affordable housing. Therefore when the likely	Unknown ? As the details of new developments are not currently known it is not possible to assess the impacts of a no policy option.	-

Page 400

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	magnitude of effects from policy adoption would be significant positive.		
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between the applicant and Thanet Council would ensure that the sustainability credentials of schemes are of the highest standard. This would ensure that all sections of the community have access to services, facilities, opportunities and provide travel choice. By allowing such provisions the SA objective and criteria will be met in a significantly positive manner.	Permanent. Direct ST/LT -/? A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local population. As such by allowing uncontrolled developments, overcrowding and population rises could lead to a rise in deprivation as facilities and services would be unable to cope with the excess demand.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. Policy adoption would directly seek to establish a strong sense of place, using streetscapes and buildings to create attractive and comfortable places to live, work and visit. The impacts would be significant and positive through meeting the requirements of the SA objective.	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT++ The proposed policy underlines Thanet's commitment to pursuing a positive approach in favour of development. Proposals that secure development that improves the economic, social and environmental conditions in the area would therefore be approved wherever possible. This would aid job growth within the district as the policy commits applicants to adhere with the NPPF's definition of sustainable development wherever possible. This would include applications which propose the creation of new jobs within the district, and those proposals that would reduce disparities and create high skill employment opportunities.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local population. As such by allowing uncontrolled developments new developments could increase the competition for jobs and as such not allow all sectors of the community to have access to employment opportunities.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT++ The proposed policy underlines Thanet Council's commitment to pursuing a positive approach in favour of development. This is in line with the requirements contained within the National Planning Policy Framework. A positive approach to development and a commitment by TDC to work with the development applicant would aid economic growth within the district	Neutral. 0 A no policy option would not alter the status quo in relation to economic growth.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	and thus become more attractive to investors. This would directly promote economic growth and regeneration within the district and with the increased attractiveness to investors, it would also help create job growth.		
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT++ Through the proposed policy proposals that secure development which improve the economic, social and environmental conditions of the area would be approved if appropriate. This therefore has the potential to create wealth in the District as the policy signals that Thanet Council would engage positively with all planning applications to make the area attractive which would help promote the tourist industry by assisting natural, semi-natural and street scene opportunities. Such protection would prevent the damaging of assets that attract visitors both in the long term and short term.	Neutral 0. A no policy option could allow developments to sprawl across natural assets and reduce their economic tourist value. However existing legislation protects natural environments (such as SSSI and SPA) so it is unlikely that a no policy option would create a decline and thus would more likely yield neutral effects.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help prioritise development on brownfield	Unknown ? It is not possible to say if a no policy choice would restrict the objective. No information is known to compare land prices between greenfield and urban spaces, whilst the details of future developments is not known yet either.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	sites and seek to avoid development versatile greenfield or agricultural land. The approach would ensure land is used efficiently by bringing vacant land back into use and retaining the openness of the countryside.		
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help prioritise development in a sustainable manner placing it at the core of all plans and developments for the Thanet district. Access to facilities services and also housing demand would be met whilst considering the social, environmental and economic impacts to create a sustainable agenda.	Neutral. 0 Adoption of no policy will not yield any positive or negative effects, as the status quo ensues.	-
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help conserve and enhance the distinctive landscape and townscape environment. Such an approach would also enhance and promote the use of public spaces	Unknown? By not adopting the policy it is unknown the character and quality of the local spaces would decline. It could be conceivable that the areas in question sustain their integrity. Yet similarly without protection decline could be possible due to a lack of safeguarding.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	and preserve the e countryside by encouraging redevelopment of urbanised sites.		
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help maintain and enhance the quality and distinctiveness of both the built environment and areas of archaeological importance, by delivering high quality development, whilst enhancing existing and creating new beneficial areas to public realm to preserve the district's historic and architectural assets.	Neutral. 0 Existing national legislation and directive protect features of the historic and archaeological importance (e.g. listed buildings). Thus a no policy selection would still offer protection to the objective.	
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT++ A collaborative approach that incorporated the NPPF would seek opportunities for proposals to improve air quality in AQMAs, focus development away from existing AQMAs when appropriate and contribute towards a net reduction in GHG emissions.	Permanent. Direct. ST/LT+ By not adopting the policy it is likely that new developments would yield neutral impacts due to current legislation and guidance on a national and international level regarding the management of air pollution (Clean Air Act)	-
15. To provide a sustainable public transport network that allows access to	Permanent. Direct. ST/LT++	Permanent. Direct LT -/?	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
key facilities, services and employment opportunities without reliance on private vehicles.	Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. This would ensure that all sections of the community have access to services, and opportunities that provide travel choice. This would reduce the reliance upon the private car, by helping to promote sustainable modes of transport. The likely magnitude of effects from policy adoption would be significant positive.	A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could saturate and stress current facilities and services leading to a decline in the quality of service.	
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Neutral. 0 Whilst policy adoption provides guidance for the enhancement of transport links to reduce the reliance upon private vehicles, there is no local specificity in relation to the wider Kent regions. As such the objective is met in a neutral capacity due to its specific local context.	Neutral. 0 A no policy option would not alter the status quo.	-
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help safeguard non-renewable resources and re-use primary resources through	Permanent. Direct. ST/LT/? A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local services and infrastructure. As such waste management facilities could end up exceeding capacity and not functioning	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	sustainable waste management practices. This approach would help reduce the use of raw materials and promote sustainable waste management practices.	at their optimal level. However given that existing documentation and waste management strategies are in place the effects are likely to be minor as current practices could potentially cope with the added effects of new developments.	
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Direct. ST/LT++ A collaborative approach would help ensure development is adapted or can be adapted to future climatic conditions, by ensuring sustainable development. A collaborative approach to developing proposals would help provide solutions to ensure that the existing built and natural environment is not more vulnerable to future climatic conditions.	Unknown ? It is not possible to say if a no policy choice would restrict the objective as the details of future developments are not known.	
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT++ A collaborative approach that incorporated the NPPF would seek opportunities for proposals to enhance protection of natural assets which would allow coastal features to be protected and allow them to be further managed.	Neutral. 0 Existing national legislation and directive protect features of the coast. Thus a no policy selection would still offer protection to the objective.	-
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT++ The proposed policy would help ensure the conservation and enhancement of	Neutral. 0 The no policy option is unlikely to affect the biodiversity either way.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	the district's natural habitats, wildlife and green infrastructure. The commitment within this option to work proactively with applicants to find solutions to secure developments planning permissions would improve environmental conditions would ensure that designated sites are protected or enhanced, that proposals contribute to greater connectivity in the biodiversity network, that biodiversity is enhanced and protected in the district and provide opportunities to enhance or create new features.	Current legislation and directives already manages natural assets and sensitive areas and as such the addition of a new policy would only strengthen existing practices.	
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT++ Fostering a collaborative approach between the applicant and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help ensure the conservation and enhancement of the fluvial and coastal sites including those of European designation.	Neutral. 0 The no policy option would not impact the objective. There is existing legislation to meet the WFD and national plans to meet the requirements of the European Directive.	-
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Neutral. 0 Whilst policy adoption provides guidance for the enhancement of sustainable practices and design, there is no specific guidance on the products that must be used and if they should be	Neutral. 0 A no policy option would yield neutral impacts as existing legislation and practices seek to increase sustainability practices and meet the SA objective.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	local. As such due to the objectives specific local context the impact will only be neutral.		
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct. ST/LT++ Fostering a collaborative approach between applicants and TDC would ensure that the sustainability credentials of schemes are of the highest standard. A collaborative approach would help increase energy efficiency and promote renewable energy sources by ensuring proposals promote renewable energy and consider small scale and large scale renewable energy where appropriate.	Neutral. 0 A no policy option would not alter the status quo.	-

Summary

The proposed policy, through support for the promotion of NPPF, would undoubtedly enhance the District due to the positive impacts seen across the majority of the SA objectives. Commonly, a no policy option would yield neutral impacts or negative as uncontrolled developments could over saturate local services and place too high a demand upon them. As such by incorporating the NPPF sustainable practices and designs will be created whereby developers and TDC work together to create a development that sustainably meets the needs of the local population whilst also been considered for its socio-economic and environmental implications.

Policy 2: Policy SP02 Economic Growth

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. and 2	N/A		N/A
3. To provide access to appropriate educational facilities for all sectors of society including focus on training	Permanent. Indirect. ST/LT + Growth in the employment sites and the associated job opportunities could	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	indirectly contribute towards improving the educational attainment of the working age population by creating demand for an appropriately qualified and skilled workforce.		
4. To increase public safety and reduce crime and fear of crime.	Permanent. Indirect. ST/LT + /? Growth in the job opportunities and the overall growth in the economy will help to contribute towards reducing deprivation by increase employment opportunities. Indirectly this could help to reduce levels of crime. However, any links are remote hence the predicted impact is minor and uncertain.	Neutral. 0 A no policy option would not alter the status quo.	-
5. and 6.	N/A		N/A.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. /LT ++ By targeting areas that the Economic Strategy have highlighted as having potential for growth it is likely that the proposed policy would deliver a greater number of job opportunities than the current situation and would have benefits for the district as a whole. Therefore a significant positive effect is predicted.	Neutral. 0 A no policy option would not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the	Permanent. Indirect. LT + The proposed policy is strategic rather than spatial therefore they do not direct employment growth to areas of	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
District to support priority regeneration areas.	deprivation. However, by setting a target for growth the Local Plan has an opportunity to influence this growth.		
9. To protect and enhance the areas	Permanent. Direct. LT + +	Neutral. 0	-
natural, semi-natural and street scene to support the tourist economy.	A significant effect is predicted because the proposed policy directly targets the tourism and visitor sector economies.	A no policy option would not alter the status quo.	
10. To improve efficiency in land use	Permanent. Direct. ST/LT ?	Neutral. 0	-
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	The proposed policy has the potential to have both a positive and negative effect depending on which sites are developed. However, because the proposed policy is spatial the significance of the effects cannot be predicted.	A no policy option would not alter the status quo.	
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT ?	Neutral. 0	-
of development is pursued.	The proposed policy has the potential to have both a positive and negative effect depending on how development occurs. However, because the proposed policy is spatial the significance of the effects cannot be predicted.	A no policy option would not alter the status quo.	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on how development occurs. However, because the proposed policy	Neutral. 0 A no policy option would not alter the status quo.	The quality of design and how future development takes account of character, townscape and the countryside may also be mitigated by other policies.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	is not spatial the significance of the effects cannot be predicted.		
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on how development occurs. However, because the proposed policy is not spatial the significance of the effects cannot be predicted.	Neutral. 0 A no policy option would not alter the status quo.	How future development respects and integrates with heritage and archaeological features may also be mitigated by other issues and policies.
14. To improve air quality in the	Permanent. Direct. ST/LT ?	Neutral. 0	-
District's Air Quality Management Areas.	The proposed policy has the potential to have both a positive and negative effect depending on how development occurs. However, because the proposed policy is not spatial the significance of the effects cannot be predicted.	A no policy option would not alter the status quo.	
15. To provide a sustainable public	Permanent. Direct. ST/LT ?	Neutral. 0	-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy has the potential to have both a positive and negative effect depending on which sites are developed. However, because none of the options are spatial the significance of the effects cannot be predicted.	A no policy option would not alter the status quo.	
16. To develop key sustainable	Permanent. Direct. ST/LT ?	Neutral. 0	
transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	The proposed policy has the potential to have both a positive and negative effect depending on how development occurs. However, because the proposed policy	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	is not spatial the significance of the effects cannot be predicted.		
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. ST/LT ? A growth in the number of businesses within the district is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. These adverse effects could be offset by a growth in the green economy, particularly if this includes businesses that help to divert waste from landfill and might result in overall beneficial effect. Hence an uncertain effect is predicted.	Neutral. 0 A no policy option would not alter the status quo.	Significant adverse effects can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Direct, Indirect. ST/LT ? The proposed policy could result in positive effects by directly reducing greenhouse gas emissions e.g. helping existing business and properties to reduce emissions and/or indirectly contributing to reducing emissions by supporting businesses that support the green industry and renewables sectors (e.g. wind turbine OEMs). However the potential benefits of this option may be outweighed by the overall increase in employment land.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties is addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on how development occurs. However, because the proposed policy is not spatial the significance of the effects cannot be predicted.	Neutral. 0 A no policy option would not alter the status quo.	-
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on development occurs. However, because none of the options are spatial the significance of the effects cannot be predicted.	Neutral. 0 A no policy option would not alter the status quo.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on development occurs. However, because none of the options are spatial the significance of the effects cannot be predicted.	Neutral. 0 A no policy option would not alter the status quo.	-
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct, Indirect. LT +/? The proposed policy has the potential to have both a positive and negative effect depending on development occurs. However, because none of the options are spatial the significance of the effects cannot be predicted. However, there is the potential for this option to result in a	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).

iciency	
tential to A no policy option would no	development management policies
urs	setting out how new development should be designed and contribute towards reducing GHG emissions).
esult in a supply iciency	With the above mitigation measures being implemented the proposed policy has a considerable opportunity for a beneficial effect.
	supply iciency '+ Neutral. 0 tential to A no policy option would no

The proposed policy has no significant negative effects and provides a number of opportunities yield of 5,000 jobs. Notwithstanding the above comments, any potential negative significant effects could be mitigated, either by other Local Plan policies and the site allocation assessment process.

Policy 3: Policy SP03 Land allocated for Economic Development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Indirect. ST/LT - /? Some of the sites that would be protected are within urban areas and could potentially be used for housing. As a result this option might indirectly restrict growth in housing development.	Permanent. Indirect. ST/LT +/? By removing this, the protection of these sites from non-employment uses could have a beneficial effect if this resulted in further housing development occurring.	Other policies within the Local Plan are concerned with the number of houses to be provided and where they should be located. It may be the case that there is sufficient capacity across the District to avoid the need to remove protection from these sites.
2.	N/A		N/A
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent. Indirect. ST/LT +/? Growth in the employment sites and the associated job opportunities could indirectly contribute towards improving the educational attainment of the working age population by creating demand for an appropriately qualified and skilled workforce.	Permanent. Indirect. ST/LT ? Removing the protection of these sites for employment uses could have an indirect adverse effect on education if it results in fewer opportunities for students. But this might be offset if some of these sites where used for providing new or enhancing existing education facilities.	-
4. To increase public safety and reduce crime and fear of crime.	Permanent. Indirect. ST/LT +/? Supporting the continued growth in job opportunities and the overall growth in the economy will help to contribute towards reducing deprivation by increase employment opportunities. Indirectly this could help to reduce levels of crime. However, any links are remote hence the predicted impact is minor and uncertain. Yet the option to	Neutral 0. This option is unlikely to have any direct or indirect effects on this objective.	Although there is no requirement for mitigation, it is recommended that design principles such as 'Secured by Design' are implemented where possible.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	be mixed use in function will allow the potential for other uses to support economic growth and create places that are less vulnerable to crime and reduce the fear and perception of a risk of crime.		
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Neutral 0. The proposed policy is only concerned with the area of land made available for employment opportunities and economic growth rather than the provision of or access to social support facilities. Therefore this objective is not applicable.	Permanent. Indirect. ST/LT ? The no policy option might provide an opportunity to provide facilities, particularly in areas of significant need. However, this option does not specify which alternative uses could be located at these sites instead of employment so it is not possible to assess the effect of this option.	-
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT +/? The proposed policy will indirectly help to support a 'sense of place' by ensuring that jobs are located in accessible areas predominantly outside but also inside the town centres. It would also ensure areas are not dominated by employment uses that could adversely impact on the sense of place.	Permanent. Indirect. ST/LT +/? The no policy option has the potential to have a positive effect because it could allow alternative uses, to employment, to be developed which could also contribute towards creating a vibrant and balanced community with a sense of place.	Although positive effects were identified the uncertain effects of could be mitigated by spatial policy and allocations taking into account potential effects on communities and a sense of place.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to	Permanent. Direct. ST/LT + + The spread of sites means that the associated job opportunities are accessible from the District's main	Permanent. Direct. ST/LT - /? The no policy option could potentially have a negative effect because it could result in development that does not	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
work has the opportunity to secure appropriate paid employment.	urban and residential areas. Focussing future development to areas where existing employment uses are present will also help to support the creation of internal completion for employees which could also provide benefits for the District.	create employment opportunities. However, it is noted that this option might result in other development that contributes towards the economic growth of the District so an 'uncertain effect is predicted'.	
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT ++ This option is likely to have a positive effect on the local economy because it supports the creation of new employment sites that can contribute towards economic growth and GVA. The spread of sites also means that some of these benefits can trickledown to adjacent area and support wider regeneration.	Permanent. Direct. ST/LT - /? This option could potentially have a negative effect because it could result in development that does not create employment opportunities or contribute towards economic growth. However, it is noted that this option might result in other development that contributes towards the economic growth of the District so an 'uncertain effect is predicted'	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have the potential to have both a positive and negative effect depending on how the sites are developed, in terms of the mix of brownfield / greenfield development occurring. However others are located within urban areas and could have a positive effect. As a result an overall uncertain effect is predicted.		-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from			

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
buildings, and encourage urban renaissance.			
11. To ensure that a sustainable pattern of development is pursued.	The majority of existing sites are located on key road routes. As a result they are more likely to be accessible via public transport and non-motorised modes of transport. Therefore a minor beneficial effect is predicted.		All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT ?/+ T Both options could have positive or negative effect on landscape, character of open space and the public realm as well as the appearance of the District's countryside. However, given that the development at the majority of these sites is already substantially complete, the surrounding landscape character is less likely to be sensitive to change. In m m m m to be sensitive to change. m		The uncertainties associated with both options could be mitigated by a combination of site selection to choose locations where development is unlikely to have an adverse effect and by putting in place development management and design policies that result in development that is sensitive to the surrounding townscape, landscape and visual receptors.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option could have positive or negative effect on conservation areas, listed buildings, scheduled monuments and other features of cultural, historical or archaeological value and their setting.		How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using this approach and the requirements of the NPPF.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Both the proposed policy and no policy option could direct development away from the established AOMAs therefore there the likelihood of an adverse effect		Any development that could impact on the AQMA would require relevant assessments to be undertaken to support subsequent planning applications.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT +/? The majority of existing sites are located more likely to be accessible via public tra transport. Therefore a minor beneficial ef	insport and non-motorised modes of	All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT +/? The majority of existing sites are located more likely to be accessible via public tra transport. Therefore a minor beneficial ef	insport and non-motorised modes of	All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT -/? Increased development is likely to genera not be diverted from landfill. It is also lik arising and requiring treatment and/or dis existing trend of reducing landfill capacit within the life of the Plan ⁴⁴ . Potentially th	posal. This is assessed against an y within Kent which could be exceeded	The significant adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's

⁴⁴ Based on data on landfill capacity in Kent from the Environment Agency.

Page 420

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	However, there is significant uncertainty generated under each option because this employment use and the density of devel	is also determined by the nature of the	Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect as a result of both the proposed policy and no policy option because an increase in development land uses could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by the nature of the land use and the density of development.		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	A positive effect is predicted from both the proposed policy and no policy option		It is also assumed that the requirements of the NPPF would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? Both options have the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. However it is noted that none of the sites are predicted as being likely to have a significant effect on an internationally designated site.		-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have the potential to have both a positive and negative effect depending on where development occurs and the type of development.		-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.		There are uncertainties associated with both options because there is insufficient detail regarding the options to make a robust assessment.
			The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.		There are uncertainties associated with both options because there is insufficient detail regarding the options to make a robust assessment. The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

Summary

The proposed policy is predicted as having the potential to result in a significant positive effect, particularly in relation to job creation and supporting economic growth and this is the main differentiator between the options. Minor negative effects could be attributed to the proposed policy, however these and the uncertain effects can be mitigated by development management policies and the site specific assessment of effects that will be required for the allocations. One area where the no policy option performed better was in terms of its potential to have indirect benefits for housing by potentially allowing a greater area of land for housing and other types of development.

Policy 4: Policy SP04 NPPF – Manston Business Park

SA Objective	Proposed Policy	No policy.	Comparison, mitigation and enhancement measures	
1. to 23.	N/A		N/A	
Summary Effects of SP04 are covered in detail as part of SP03.				

Policy 5: Policy SP05 Manston Airport

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Unknown ? As the details of new developments are not currently known it is not possible to assess the impacts of the proposed policy.	Neutral. 0 A no policy option would not alter the status quo.	The soon to be completed Area Action Plan could stipulate that new developments must provide a variety of housing with the view to meeting the demands of a varied housing market should be developed to design out crime across the area for example through well light public areas.
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Unknown ? As the details of new developments are not currently known it is not possible to assess the impacts of the proposed policy.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local healthcare provisions. As such new developments could be introduced and place excess demand upon local healthcare provisions potentially causing a decline in service quality.	The soon to be completed Area Action Plan could stipulate that new developments should be developed to provide sufficient healthcare service facilities to meet the demands of society.

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Unknown ? As the details of new developments are not currently known it is not possible to assess the impacts of the proposed policy.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon existing educational facilities in the region. As such new developments could be introduced and place excess demand upon such provisions for example through creating new housing developments in areas of fully populated school systems which could lead to a decline in educational access and standards.	The soon to be completed Area Action Plan could stipulate that new developments should provide appropriate levels of educational services to meet the demands of the community.
4. To increase public safety and reduce crime and fear of crime.	Unknown ? As the details of new developments are no assess the impacts of a no policy option.	The soon to be completed Area Action Plan could stipulate that new developments should be done so in order to design out crime across the area for example through well light public areas.	
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Unknown ? It is not possible to say if policy adoption would satisfy the objective. No information is known in relation to future site uses and developments and thus cannot be assessed against the objective.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local population. As such by allowing uncontrolled developments, overcrowding and population rises could lead to a rise in deprivation as facilities and services	The soon to be completed Area Action Plan could stipulate that new developments should incorporate appropriate levels of facilities in order to sustain new levels of residents or visitors to the area.

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
		would be unable to cope with the excess demand.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT++ The proposed policy would seek to create an appropriate environment whereby mixed use developments can be possible. Through the protection of environmental and heritage assets an appropriate community fell will be created where landscaping schemes will be designed to be integral to new developments. All of the policy requirements in place will create an atmosphere that will result in residential satisfaction and pride in their region.	Neutral. 0 A no policy option would not alter the status quo.	A no policy option would allow current practices to ensue and thus would not impact the objective in either a positive or negative manner. However adoption of the policy would actively seek to enhance the local sense of place and community feel within the district by ensuring developments are designed in an appropriate manner.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT+/? The proposed policy would allow the Airport site to be developed into a mixed use facility. As such commercial o business properties could be created as could retail facilities. In turn these establishments would create jobs for the local economy. The effects are indirect as the policy does not actively promote job creation but facilities the option for mixed use site at the Airport.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration of the impacts upon the local population. As such residential developments could grow without appropriate facilities and provisions which could lead to the over saturation of employment markets and increased competition for jobs across Thanet. The impacts are questionable as future site developments are not known and the airport is a small area in relation to the wider Thanet vicinity.	

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Unknown ? It is not possible to say if policy adoption would satisfy the objective. No information is known in relation to future site uses and developments.	Neutral. 0 A no policy option would not alter the status quo.	The soon to be completed Area Action Plan could stipulate that new developments promote economic growth within the district.
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT + Under policy adoption proposals to develop the Airport region would not be permitted if they result in any likely environmental harm. As such this would preserve the natural environment around the site which may be utilised for the tourist industry. Similarly the roofscape of any proposals will be mitigated to ensure that they are not obtrusive which would also yield positive effects. The impacts are only minor due to the size of the site.	Neutral 0. A no policy option could allow developments to negatively impact natural assets and reduce their economic tourist value. However existing legislation protects natural environments (such as SSSI and SPA) so it is unlikely that a no policy option would create a decline and thus would more likely yield neutral effects.	
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT + Through adopting the policy the Airport environment could potentially be subjected to developments to create a mixed use and multifunction district. The policy would support such developments and similarly support the growth of the Airport and thus making the site multifunctional. Due to the size of the site and that the policy is site	Unknown ? It is not possible to say if a no policy choice would restrict the objective. No information is known to compare land prices between greenfield and urban spaces, whilst the details of future developments is not known yet either.	-

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
	specific the impacts significance is minor.		
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT ++ Policy adoption would ensure sustainability most directly through the protection of environmental, cultural and heritage assets. Similarly the policy offers flexibility tin that it would allow the site to grow as mixed use whilst keeping the facility in a manner whereby the Airport could be operational. The flexibility and policy requirements to be appropriate for the local surroundings and not to the detriment of the Airport makes policy adoption one that is sustainable.	Neutral. 0 A no policy option would not alter the status quo.	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT + Adopting the policy would ensure any development to or on the Airport site would be designed to minimise the visual impact on the open landscape. Additionally it would account for the local roofscape and skyline in order to minimise mass buildings when viewed from the South. The effects are only minor positive as the policy is site specific and localised.	Unknown? By not adopting the policy it is unknown if the character and quality of the local spaces would decline or enhance as future plans are unknown.	-
13.	N/A		N/A

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
14. To improve air quality in the	Permanent. Direct. ST/LT+	Permanent. Direct. ST/LT+	-
District's Air Quality Management Areas.	Policy adoption would ensure provisions for an air quality assessment to comply with local Air Quality Management Plans to ensure developments do not deteriorate local air quality. However it is not wholly relevant to whole District and is more mitigation than enhancement thus the impacts are minor positive.	By not adopting the policy it is likely that new developments would yield neutral impacts due to current legislation and guidance on a national and international level regarding the management of air pollution (Clean Air Act)	
15. To provide a sustainable public	Permanent. Direct. ST/LT+	Permanent. Direct LT -/?	The soon to be completed Area Action
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Policy adoption would only allow mixed use of Manston Airport if new developments appropriately met the requirements of increased surface travel demand. This could be achieved by developments ensuring sustainable public transport networks and facilities. However the impacts are only deemed minor as it would not impact the significant wider area and is only relevant to the Airport. The impacts are questionable as the policy has no specific public transport information and states developments must meet the demands of increased surface traffic, which could be achieved by public transport infrastructure.	A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could saturate and stress current facilities and services leading to a decline in the quality of service.	Plan could stipulate that new developments should include significant sustainable public transport links in order to mitigate the increased surface traffic
16. To develop key sustainable transport links between Thanet and the	Permanent. Direct. ST/LT +	Neutral. 0	-

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
wider Kent region and beyond, including road, rail and air.	Policy adoption would provide local flexibility to keep the airport in functional use should future opportunities require that provision. As such safeguarding the infrastructure would allow Thanet to be linked to the wider region by air.	A no policy option would not alter the status quo.	
17. to 19	N/A		N/A
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT++ Policy adoption would only allow developments that demonstrate no significant harm to Thanet's SSSI/SAC/SPA/Ramsar sites will occur. As such biodiversity would flourish due to the enhanced protection of sensitive ecological areas. Additionally the policy dictates the appropriate use of landscape schemes which is done correctly could be utilised by local ecology as a habitat if done in a green manner. Thus further strengthening the positive impacts for local biodiversity.	Permanent. Direct. ST/LT+ The no policy option would still offer protection to biodiversity. Current legislation and directives already manage natural assets and sensitive areas and as such the addition of a new policy would only strengthen existing practices.	
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT++ Policy adoption would ensure new developments to either the airport or creation of the site as mixed use would not contaminate groundwater resources and that appropriate mitigation measures	Permanent. Direct. ST/LT+ The no policy option would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	-

SA Objective	Proposed Policy	No policy	Comparison, mitigation and enhancement measures
	will be incorporated to the design to prevent contamination.		
22. and 23.	Unknown ? As the details of new developments are not currently known it is not possible to assess the impacts of a no policy option.	Neutral. 0 A no policy option would not alter the status quo.	The soon to be completed Area Action Plan could stipulate that new developments must provide a variety of housing with the view to meeting the demands of a varied housing market should be developed to design out crime across the area for example through well light public areas.

Summary

Adoption of the policy would provide sustainable impacts in that it would specifically preserve and protect environmental, cultural and heritage features of the local area through the creation of an Area Action Plan as recommended as part of the mitigation strategy. Noise and air pollution would also be mitigated meaning any future plans would ensure sustainability and viability both socially and environmentally. These impacts are largely reflective of existing legislation that would protect such assets under a no policy scenario but commonly the impacts of no policy option are unknown as future developments cannot be assessed as the plans are not known. Over saturation of facilities and services could occur under no policy option as guidance would not be provided to ensure the new local demands are appropriately met. Policy adoption is largely centred upon ensuring the Airport can be mixed use but also retain the potential to be an operational facility. The Area Action Plan for the airport should provide further mitigation and specific local development plan criteria in order to make sure that the unknown impacts are appropriately mitigated.

Policy 6: Policy SP06 Thanet's Town Centres

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand and need	Permanent. Direct. ST/LT + The proposed policy promotes a hierarchy that allows residential development in town centres where this supports the centre's main function.	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	This would reduce the need to travel for residents and provide improved accessibility to key community services and facilities.		
2. To maintain appropriate healthcare	Permanent. Direct. ST/LT +	Neutral. 0	
provision and access to healthcare facilities for all sectors of society.	The designation of a town centre hierarchy allows a proportionate approach to healthcare provision and will result in healthcare services appropriate for the level of town centre and number of residents.	A no policy option would not alter the status quo.	
3. To provide access to appropriate	Permanent. Direct. ST/LT +	Neutral. 0	
educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment	The designation of a town centre hierarchy allows a proportionate approach to educational provision and will result in education facilities appropriate for the level of town centre and number of residents.	A no policy option would not alter the status quo.	
4.	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Indirect. ST/LT + The designation of a town centre hierarchy allows a proportionate approach to community service provision and will result in community services appropriate for the level of town centre and number of residents.	Neutral. 0 A no policy option would not alter the status quo.	-
6. To create vibrant balanced communities where residents feel a	Permanent. Indirect. ST/LT +	Neutral. 0	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
'sense of place' and individual contribution is valued.	By promoting a hierarchical approach to town centre development, appropriate services and facilities will be located in the correct level of town centre. This should help to create balanced, vibrant and sustainable communities.	A no policy option would not alter the status quo.	
7. To provide access to employment	Permanent. Direct. ST/LT +/?	Neutral. 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	The proposed policy has the potential to have a beneficial effect. Development in the town centres will provide job opportunities that can easily be accessed by residents in those towns and development at Westwood would benefit residents in the adjacent residential areas (e.g. Northwood).	A no policy option would not alter the status quo.	
8. To ensure the sustainable	Permanent. Direct. ST/LT +/?	Neutral. 0	-
development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	The proposed policy has the potential to have a beneficial effect. Development in the town centres will contribute towards economic growth.	A no policy option would not alter the status quo.	
9. to 10.	N/A		N/A
11. To ensure that a sustainable pattern	Permanent. Indirect. ST/LT +/?	Neutral. 0	-
of development is pursued.	The proposed policy may help contribute towards a sustainable development pattern, but it is unclear as to whether the overall level of development influenced by this policy	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	will be of a critical mass to shape land use patterns.		
12. to 14	Permanent. Direct. ST/LT ? The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options	Neutral. 0 A no policy option would not alter the status quo.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The retention of town centres as places of service and facility provision will result in a more centrally focused development pattern within town centres that will be accessible, and linked, by public transport.	Neutral. 0 A no policy option would not alter the status quo.	-
16. to 23.			-

	ffects as it promotes a proportionate town co accommodation would be allowed, to a deg		

more likely to be an issue at local town centres where shop frontages are threatened. Not all SA objectives are applicable at this level, though these are assessed further

as part of policies SP07 to SP10.

Policy 7: Policy SP07 - Westwood

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 4.	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Indirect. ST/LT -/? The effects of the proposed policy are potentially negative because if this policy was implemented in isolation it would concentrate development in an area that could be difficult to access by people further away.	Neutral. 0 A no policy option would not alter the status quo.	-
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT ? The effects of the proposed policy are potentially negative because if this policy was implemented in isolation it not directly support the role of town centres. However, indirectly the proposed policy might help to protect the town centres by ensuring that large and unrestricted retail development does not occur in town centres.	Neutral. 0 A no policy option would not alter the status quo.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT +/? The proposed policy has the potential to have a beneficial effect. Development in the town centres will provide job opportunities that can easily be accessed by residents in those towns and development at Westwood would	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	benefit residents in the adjacent residential areas (e.g. Northwood).		
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT +/? The proposed policy has the potential to have a beneficial effect. Development in the town centres will contribute towards economic growth.	Neutral. 0 A no policy option would not alter the status quo.	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT +/? Indirectly, the proposed policy would help to direct large retail development away from the centres that are more suited to tourism development. This would help to avoid developments that might detract from the appeal of the coastal towns as visitor and tourist destinations.	Neutral. 0 A no policy option would not alter the status quo.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT ? Depending on the sites that are allocated, the proposed policy has the potential for both positive and negative effects. Because they could result in the development of both PDL and greenfield sites. Therefore an uncertain effect is predicted.	Neutral. 0 A no policy option would not alter the status quo.	
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT ? The proposed policy would not promote the development of key services in areas that reduce the need for people to	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	travel. However, given the type of development already present at Westwood it is assumed that if any local services were sited at Westwood their catchment area would only be adjacent residential areas.		
12. To conserve and enhance the character and quality of the area's	Permanent. Direct. ST/LT ?	Neutral. 0	-
landscape and townscape particularly associated with town centres and coastal areas.	The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options	A no policy option would not alter the status quo.	
13. To preserve and enhance sites,	Permanent. Direct. ST/LT ?	Neutral. 0	It is anticipated that any potentially
features and areas of historic archaeological or architectural importance, and their settings.	How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options.	A no policy option would not alter the status quo.	negative effects can be mitigated using this approach and the requirements of the NPPF.
14. To improve air quality in the	Permanent. Indirect. ST/LT ?	Neutral. 0	-
District's Air Quality Management Areas.	The effects the proposed policy are uncertain because it might result in some increases in road traffic that impacts on air quality. Likewise, they could result in reduction in emissions if shoppers use more sustainable forms of transport.	A no policy option would not alter the status quo.	
15. To provide a sustainable public transport network that allows access to key facilities, services and employment	Permanent. Indirect. ST/LT +/?	Neutral. 0	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
opportunities without reliance on private vehicles.	The effects of the proposed policy might result in more people travelling by private car, due to parking provision and road links. However, the ultimate aim of the Westwood Relief Strategy is to allow better pedestrian flow between commercial sites in order to promote pedestrian connectivity	A no policy option would not alter the status quo.	
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT ? The effects of the proposed policy might result in more people travelling by private car, due to parking provision and road links.	Neutral. 0 A no policy option would not alter the status quo.	-
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT -/? Increased development is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁴⁵ . Potentially this could result in a significant effect.	Neutral. 0 A no policy option would not alter the status quo.	The significant adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.

⁴⁵ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect because an increase in development land uses could increase consumption of energy and resources thereby increase emissions of GHG gases.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT +/? A positive effect is predicted because land around Westwood is not within any of the Environment Agency's Flood zones or those identified in the SFRA.	Neutral. 0 A no policy option would not alter the status quo.	The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on which sites at Westwood are brought forward for development. However it is noted that none of the sites are predicted as being likely to have a significant effect on an internationally designated site.	Neutral. 0 A no policy option would not alter the status quo.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential	Neutral. 0 A no policy option would not alter the status quo.	The NPPF requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	effects on groundwater resources and Source Protection Zones in this area of the district.		potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect because development could result in an increase in the consumption of resources.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for an adverse effect because an increase in retail could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

The proposed policy has potential to have positive and negative effects depending on the location of development and its relationship with the receiving environment. The proposed policy would primarily deliver these benefits at the Town Centres. Where potentially adverse effects have been predicted it is anticipated that they can be mitigated either by ensuring that development management policies are provided that counter or avoid adverse effects and/or by meeting the requirements of the NPPF.

Policy 8: Policy SP08 – Margate

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT+ The aim of the proposed policy is to keep Margate as mixed use site thus will somewhat seek to address the housing issues within Margate. A minor beneficial effects is predicted because although the effects are direct this option would not affect the entire district.	Neutral. 0 A no policy option would not alter the status quo.	A no policy option would not alter the status quo. However by adopting the policy there is the potential for certain areas of Margate to develop residential premises.
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Neutral. 0 There will not be a change in the status quino policy scenario. Neither will result in the provisions. Additionally as the area is alrealikely to already exist.	-	
3.	N/A		N/A
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT+/? The increased facilities and services created through regeneration should be accompanied by additionally CCTV. Similarly the developments would be designed to factor out crime, through enhanced lighting for example. However the impacts are questionable as the redevelopment may lead to increased nightlife services (e.g. pubs) which may increase fear of crime and disorderly behaviour.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
5. To provide appropriate key facilities	Unknown?	Neutral. 0	-
to support vulnerable people and reduce the level of deprivation identified across the wards.	The policy is centred upon developing Margate into a contemporary seaside resort. In order to make the area sustainable key facilities will have to be provided in order to support the local demands. However no specific provisions are mentioned and the impacts are as such unknown.	A no policy option would not alter the status quo.	
6. To create vibrant balanced communities where residents feel a	Permanent. Direct. ST/LT+	Neutral. 0	-
'sense of place' and individual contribution is valued.	Policy adoption to support the regeneration of Margate into a contemporary seaside resort would help enhance the local community feel. The redevelopment scheme would enhance local appeal and create a sense of pride whilst contributing to socially and economically. In turn increased pride and sense of belonging will follow.	A no policy option would not alter the status quo.	
7. To provide access to employment	Permanent. Direct. ST/LT+	Neutral. 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	By adopting the policy employment opportunities will arise. Through increasing the shops and facilities on offer, including developing Dreamland, a significant number of jobs will be created.	A no policy option would not alter the status quo.	
8. To ensure the sustainable	Permanent. Direct. ST/LT+	Neutral. 0	-
development of the proposed economic growth and encourage employment	Active development of Margate will increase employment opportunities		

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
development at key sites within the District to support priority regeneration areas.	within the area including entertainment, catering and retail jobs. This will aid economic growth of the region as will the development of an amusement park and enhancing transport links; all of which will help create sustainable development.	A no policy option would not alter the status quo.	
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT+ Adoption of the policy will actively encourage the development of the local tourist industry by promoting regeneration of the seaside resort. Additionally the active promotion of the seafront and Dreamland amusement park will enhance the street and semi- natural environments to help increase tourism to ensure that the objective is met.	Neutral. 0 A no policy option would not alter the status quo.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT+ The proposed policy will actively allow developments to redevelop and regenerate the area of Margate. As such reutilisation of land will occur in primary locations (i.e. the seafront) to create a new vibrant contemporary tourist resort.	Neutral. 0 A no policy option would not alter the status quo.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT+ A sustainable pattern of developments would occur through policy adoption	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	by promoting the regeneration of the region; and combining it with enhancing the transport provisions. Utilisation of existing structures is promoted and by ensuring access is sufficient to reach the new developments long term utilisation of Margate as tourist location is promoted.		
12. To conserve and enhance the	Permanent. Direct. ST/LT+	Neutral. 0	-
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Policy adoption will seek to preserve and protect the seafront character and heritage meaning that areas of architectural importance will be preserved. However the impacts are only minor as it is specific to the seafront and not any other areas of Margate.	A no policy option would not alter the status quo.	
13. To preserve and enhance sites,	Permanent. Direct. ST/LT+	Neutral. 0	-
features and areas of historic archaeological or architectural importance, and their settings.	Policy adoption will seek to preserve and protect the town centres and seafront character and heritage meaning that areas of architectural importance will be preserved. However the impacts are only minor as it is specific to the town centres and seafront and not any other areas of Margate.	A no policy option would not alter the status quo.	
14. To improve air quality in the	Permanent. Direct. ST/LT+	Permanent. Direct. ST/LT+	-
District's Air Quality Management Areas.	Policy adoption does not contain any specific measures regarding AQMA's.	By not adopting the policy it is likely that new developments would yield	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	However existing legislation would protect such assets and so positive effects would still ensue due to their legal protection.	neutral impacts due to current legislation and guidance on a national and international level regarding the management of air pollution (Clean Air Act)	
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT+ With policy adoption seeking to enhance the local area and redevelop it into a primary tourist hotspot, an increase in transport provisions is inevitable to allow ease of access. The policy seeks to develop a new road, which will enhance opportunities for the growth of public transport. As such access to Margate improves thus access to employment is eases. The effects are only minor as the Policy will only directly affects Margate.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could saturate and stress current facilities and services leading to a decline in the quality of service.	
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT+ With policy adoption seeking to enhance the local area and redevelop it into a primary tourist hotspot, an increase in transport provisions is inevitable. This is reflected in the policy seeking to develop a new road along the southern edge of the site near the marine terrace to improve access. The effects are only minor as the named infrastructure will not adequately link Thanet to the wider region.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
17. and 18	N/A		N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT+ As policy adoption is centred upon developing Margate into a contemporary seaside resort, protection is inevitable in order to protect the new regeneration protects. However as this has not been explicitly detailed in the policy the effects are unknown.	Neutral. 0 A no policy option would not alter the status quo.	-
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. However it is noted that none of the sites are predicted as being likely to have a significant effect on an internationally designated site.	Permanent. Direct. ST/LT+ The no policy option would still yield positive effects as existing legislation is already in place to protect biodiversity and natural assets across the UK.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT+ Policy adoption has no specific requirements regarding protection of water courses. However national legislation exists which would protect such assets from degradation by future developments.	Permanent. Direct. ST/LT+ The no policy option would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	-
22. and 23	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
Summery			

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy suitable development will be encouraged across Margate. Active support and promotion of developments will be seen to promote a contemporary seaside resort to help develop the area into a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity. Transport provisions will increase to ensure the viability of the location and facilities will grow that will be of benefit to both visitors and locals. As such the impacts of policy adoption are widely positive socio-economic factor, with local character and history preserved throughout.

Policy 9: Policy SP09 – Ramsgate

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT+ The aim of this option is to address the use of Ramsgate as a mixed use site thus consideration will be given to the specific housing issues within Ramsgate. A minor beneficial effect is predicted because although the effects are direct this option would not affect the entire district.	Neutral. 0 A no policy option would not alter the status quo.	
2. To maintain appropriate healthcare	Neutral. 0		There will not be a change in the status
provision and access to healthcare facilities for all sectors of society.	Neither the proposed policy nor no policy removal of healthcare provisions for the established provisions are likely to alread	ocal society. As the area is already well	quo under either option.
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
workers with skills necessary to ensure year round employment.			
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT+/? The increased facilities and services will be accompanied by additionally CCTV and most likely increased policing of the area. Similarly the developments would be designed in a way to factor out crime (e.g. increased lighting and open spaces). However the impacts are questionable as the redevelopment may lead to increased nightlife activity which may promote the fear of crime or vulnerability.	Neutral. 0 A no policy option would not alter the status quo.	-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Unknown? There is no specific guidance in place regarding efforts to increase the facilities to support vulnerable people. However this is due to the policy being centred upon developing Ramsgate into a contemporary tourist hotspot resort. In order to make the area sustainable, appropriate key facilities will have to be provided in order to support the local demands.	Neutral. 0 A no policy option would not alter the status quo.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT+ Policy adoption to support the regeneration of Ramsgate would help enhance the local community feel by	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	actively investing and enhancing the area. The local facilities that would be available to local residents' not just tourists which would increase recreational opportunities. Similarly the redevelopment scheme would enhance local appeal and create a sense of pride.		
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT+ Through increasing the shops and facilities on offer and helping to continue the establishment of a café culture, a variety of jobs will be created for the immediate vicinity. The impacts are only minor positive as redevelopment is already occurring in the Ramsgate area. The addition of 1200m ² for retail floor space will also enhance employment opportunities.	Neutral. 0 A no policy option would not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT+ Through encouraging the continued redevelopment of the Ramsgate region employment opportunities will develop within the area. This will aid economic growth of the region as will the development of leisure, tourism and retail facilities to attract visitors to the area. The impacts are only minor positive as redevelopment is already occurring in the Ramsgate area; with	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	the historic character and café culture already attracting visitors.		
9. To protect and enhance the areas	Permanent. Direct. ST/LT+	Neutral. 0	-
natural, semi-natural and street scene to support the tourist economy.	Adoption of the policy will actively contribute to the regeneration of Ramsgate. Active investment in urban regeneration will enhance the local semi natural and street scene, which will enhance tourism opportunities by creating a vibrant atmosphere.	A no policy option would not alter the status quo.	
10. To improve efficiency in land use	Permanent. Direct. ST/LT+	Neutral. 0	-
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Policy adoption will actively allow developments to regenerate the Ramsgate area particularly around the Port, Harbour and Waterfront. As such reutilisation of land will occur in primary locations (i.e. the seafront) to create a new vibrant contemporary tourist resort.	A no policy option would not alter the status quo.	
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT+	Neutral. 0	-
of development is pursued.	A sustainable pattern of developments would occur through policy adoption by promoting the regeneration of Ramsgate. The local character and heritage will be at the fore of any new developments meaning that local heritage will be preserved. The creation of a tourist hotspot and the provisions of new retail spaces will improve	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	employment opportunities and the financial welfare of the area by increasing investors and businesses. The long term protection of the port area will be central to future sustainability as it will provide a historical feature to attract visitors. With the high speed rail proposal linking Ramsgate to the wider region a significant positive impact will occur upon the objective.		
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT+ Policy adoption will seek to preserve and protect the seafront character and heritage, notably the Royal Harbour and Waterfront locations. Such assets are of local architectural importance and as such will be preserve within the public realm.	Neutral. 0 A no policy option would not alter the status quo.	-
13. To preserve and enhance sites, features and areas of historic	Permanent. Direct. ST/LT+	Neutral. 0	-
archaeological or architectural importance, and their settings.	Policy adoption will seek to preserve and protect the seafront and Royal Harbour location and ensure that all developments contribute to local character and do not detract from the key local features.	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT+ Policy adoption does not contain any specific measures regarding AQMA's. However existing legislation would protect such assets and so positive effects would still ensue due to their legal protection.	Permanent. Direct. ST/LT+ By not adopting the policy it is likely that new developments would yield neutral impacts due to current legislation and guidance on a national and international level regarding the management of air pollution (Clean Air Act)	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT+/? With policy adoption seeking to enhance the local area and redevelop it into a primary tourist hotspot, an increase in transport provisions is inevitable to allow ease of access. However the policy option does not explicitly detail any set criteria regarding transport provisions so the inference is indirect and questionable. Yet as the existing area is largely developed such provision will already exists and would most likely only need minor improvements.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could saturate and stress current facilities and services leading to a decline in the quality of service.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT+/? Policy adoption could aid the enhancement of the transport network as the continued redevelopment of Ramsgate will attract more visitors. Similarly policy adoption will support the future Ramsgate Maritime Policy	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	which will link the area to the wider region. The proposed policy helps the wider strategic role of the port in terms of the benefits for Kent and the wider SE Region by helping to provide a diversity of transport connections to continent, particularly Belgium rather than Northern France. However, the primary links to the port are road based and there is no direct rail link that could help to reduce the quantity of freight that accesses the port by road.		
17. and 18	N/A		N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT+ There is no specific guidance in place regarding the protection form coastal erosion. However as policy adoption is centred upon developing Ramsgate Waterfront and Royal Harbour into a mixed use environment, protection is inevitable in order to protect the new regeneration protects.	Neutral. 0 A no policy option would not alter the status quo.	-
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. However it is noted that none of the	Permanent. Direct. ST/LT+ Adoption of a no policy scenario would yield positive effects as existing legislation is already in place to protect biodiversity and natural assets across the UK. Similarly it would not actively	Proposals will be required to submit an acceptable environmental assessment detailing their local impacts with appropriate mitigation. Where habitat destruction is inevitable the creation of alternative habitats should be mandatory.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	sites are predicted as being likely to have a significant effect on an internationally designated site.	support developments at or close to sensitive environmental assets.	
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT+/? Policy adoption has no specific requirements regarding protection of water courses. However national legislation exists which would protect such assets from degradation by future developments. The impacts are questionable as developments along the Harbour front have the potential to pollute the local water courses through increased local activity leading to surface run off of contaminants or even litter for example.	Permanent. Direct. ST/LT+ Adoption of a no policy scenario would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	Proposals will be required to submit an acceptable environmental assessment detailing their local impacts with appropriate mitigation.
22. and 23	N/A		N/A

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of the Ramsgate district will occur with the developments taking into consideration the local maritime heritage and ensuring character is preserved in order to create a contemporary mixed use site. Employment opportunities will arise as will tourist and economic activity with the creation of retail and tourism facilities. Transport provisions will increase notably by the support of the Ramsgate Maritime Policy which will seek to build upon the conflux of a major seaport, international airport and high speed rail location. As such the impacts of policy adoption are widely positive, with local character and history preserved throughout. However it should be noted that policy adoption may be to the detriment of environmental assets and that housing opportunities are not overly supported within the policy due to the tourist and economic focus.

Policy 10: Policy SP10 - Broadstairs

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Neutral. 0 A no policy option would not alter the sta	Neutral. 0 A no policy option would not alter the status quo.	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Neutral. 0 Neither policy adoption nor rejection will result in the addition or removal of healthcare provisions for the local society. As the area is already well established provisions are likely to already exist.		-
3.	N/A	-	N/A
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT+/? Policy adoption would seek to encourage the regeneration around Broadstairs. As such the increased facilities and services will be accompanied by additionally CCTV. However the impacts are questionable as the area is already largely developed and will most likely have sufficient provisions regarding crime reduction.	Neutral. 0 A no policy option would not alter the status quo.	-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Unknown? The proposed policy is centred upon developing Broadstairs into a thriving town centre with retail and other recreational facilities. In order to make the area sustainable, appropriate key facilities will have to be provided in order to support the local demands.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	However as provisions have not been specifically detailed it cannot be assured and will be down to the discretion of the development plans.		
6. To create vibrant balanced	Permanent. Direct. ST/LT+	Neutral. 0	-
communities where residents feel a 'sense of place' and individual contribution is valued.	Regeneration of Broadstairs would help enhance the local community feel by investing and enhancing the area. The local facilities that grow would be available to local residents' not just tourists which would increase recreational opportunities, which will contribute to a sense of place. Similarly the redevelopment scheme would enhance local appeal and create a sense of pride, particularly along the beachfront and promenade.	A no policy option would not alter the status quo.	
7. To provide access to employment	Permanent. Direct. ST/LT+	Neutral. 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	By adopting the policy and supporting the growth of Broadstairs, employment opportunities will occur. Through increased shops and facilities a variety of jobs will be created. The impacts are only minor positive as the areas already has numerous retail and tourist facilities.	A no policy option would not alter the status quo.	
8. To ensure the sustainable development of the proposed economic	Permanent. Direct. ST/LT+	Neutral. 0	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
growth and encourage employment development at key sites within the District to support priority regeneration areas.	Through encouraging the continued redevelopment of Broadstairs, employment opportunities will develop. This will aid economic growth of the region and the development of leisure, tourism and retail facilities will help attract visitors to the area. The impacts are only minor as the town is relatively small in size in relation to the wider Thanet region.	A no policy option would not alter the status quo.	
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT+ Adoption of the policy will actively encourage the development of the local tourist industry by promoting regeneration of the existing retail facilities along the High Street and Albion Street. Additionally development of the promenade and beachfront will be encouraged; which will enhance tourism opportunities by creating a vibrant atmosphere full of life and character.	Neutral. 0 A no policy option would not alter the status quo.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT+ Policy adoption will actively allow developments to regenerate Broadstairs area particularly along the High Street, Promenade and Beachfront. As such reutilisation of land will occur in primary locations (i.e. the seafront) to	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	create a new vibrant small tourist resort.		
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT+ A sustainable pattern of developments would occur through policy adoption by promoting the regeneration of Broadstairs. The local character and heritage will be persevered whilst developing the beachfront and promenade will increase the tourist trade. The creation of a tourist hotspot and the provisions of new retail spaces will improve employment opportunities and the financial welfare of the area. By encouraging urban renaissance and the growth of the promenade and beach front a wider connectivity to the town centre and waterfront will occur.	Neutral. 0 A no policy option would not alter the status quo.	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT+ Policy adoption will seek to preserve and protect the local character and heritage with enhancements made to the promenade and beach front locations. Such assets are of local townscape importance and as such will be preserved within the public realm.	Neutral. 0 A no policy option would not alter the status quo.	
13. To preserve and enhance sites, features and areas of historic	Permanent. Direct. ST/LT+ Policy adoption will seek to preserve and develop the seafront whilst	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
archaeological or architectural importance, and their settings.	ensuring the Broadstairs retains its character as a small seaside town. All developments are expected to be ensure that they do not occur in a way that will be detrimental to local character and heritage. The impacts are only minor as Broadstairs is a small town in relation to the wider Thanet area.		
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT+ Policy adoption does not contain any specific measures regarding AQMA's. However existing legislation would protect such assets and so positive effects would still ensue due to their legal protection.	Permanent. Direct. ST/LT+ By not adopting the policy it is likely that new developments would yield neutral impacts due to current legislation and guidance on a national and international level regarding the management of air pollution (Clean Air Act)	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT+/? Developments will be encouraged to seek opportunities to increase connectivity between the town centre and beach front and across the general townscape. As such access to facilities, services and employment is expected to grow alongside the access to the promenade. The increased connectivity will lead to a wider public transport network or facility to cycle or walk.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could saturate current facilities and services leading to a decline in their quality.	-
16. To develop key sustainable transport links between Thanet and the	Permanent. Indirect. ST/LT+/?	Neutral. 0	In order to cope with increased transport demand from additional

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
wider Kent region and beyond, including road, rail and air.	With policy adoption seeking to continue the local regeneration, an increase in transport provisions is inevitable to cope with increased demands on the area. However policy adoption does not explicitly contain information regarding improved transport provisions to the wider region hence the impacts are questionable and indirect.	A no policy option would not alter the status quo.	developments, a wider transport network will be required to allow ease of access to the district and south east region.
17. and 18	N/A		N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT+ There is no specific guidance in place regarding the protection from coastal erosion. However as policy adoption is related to developing the promenade and beach front, protection is inevitable in order to protect the new regeneration protects. Such plans have not been detailed thus the effects are unknown.	Neutral. 0 A no policy option would not alter the status quo.	-
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. However it is noted that none of the sites are predicted as being likely to	Permanent. Direct. ST/LT+ A no policy option would still yield positive effects as existing legislation is already in place to protect biodiversity and natural assets across the UK.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	have a significant effect on an internationally designated site.		
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT+/? Policy adoption has no specific requirements regarding protection of water courses. However national legislation exists which would protect such assets from degradation by future developments. The impacts are questionable as developments along the Promenade and Beach Front have the potential to pollute the local water courses through increased local activity leading to surface run off of contaminants or even litter for example.	Permanent. Direct. ST/LT+ A no policy option would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	Proposals will be required to submit an acceptable environmental assessment detailing their local impacts with appropriate mitigation.
22. and 23	N/A		N/A

A no policy option would largely yield neutral impacts as there would not be a change in the status quo. By adopting the policy active regeneration of Broadstairs will occur with the developments promoting the creation of employment opportunities by enhancing the existing commercial, retail and tourist infrastructure. This will add future economic resilience to the area by increasing the attraction of investors and visitors. The active support of developments along promenade and beach front will enhance the tourist economy whilst creating employment opportunities. Similarly by enhancing local character and exiting features a sense of place will be established that is attractive and in keeping with local history. Policy adoption undoubtedly meets the requirements of the SA objectives.

Policy 11: Policy SP11 – Housing Provision

SA Objective	Proposed Policy	No policy ⁴⁶	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent direct LT ++ The proposed policy option would be expected to meet identified need in terms of predicted housing and employment growth	Unknown ? The no policy option may not deliver sufficient numbers and types of homes to accommodate expected need	-
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Unknown ? At this spatial scale, the potential effects of option cannot be assessed.	of the proposed policy and no policy	-
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent direct LT + Both the proposed policy and no policy option are likely to support demand for qualified and educated people to support the aspirations for economic growth set out in all 3 options.		-
4. To increase public safety and reduce crime and fear of crime.	Permanent direct ST/LT + Development of new homes could contribute to the regeneration of areas suffering from high levels of deprivation and/or crime. This could lead to a direct reduction in crime through building works activity (for example by bringing derelict and unsafe sites into active use) and better design/layout of residential areas.		-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent, direct LT + New employment opportunities and the p people living in deprived areas. This can to replace sub-standard stock, and through associated with employment.	be through the provision of new housing	The proposed policy does not discuss localities or proximity to key facilities. Policy should include this as a consideration for new developments.

⁴⁶ No Policy scenario represents housing demand based on past patterns of growth

SA Objective	Proposed Policy	No policy ⁴⁶	Mitigation and enhancement measures
	There is no information within the propo assessment of the likely effects on key fa		
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	The proposed policy ad no policy option are about housing provision based around employment growth. Likely effects on sense of place and community are not evident.		Benefits from housing development and employment should be extended to deprived areas. Policy should attempt to targeted developments in areas with substandard housing stock. New housing development should consider integration with surrounding areas and existing communities.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Unknown ? The proposed policy ad no policy option are about housing provision based around employment growth. However, due to the lack of detail regarding spatial information, the effects are unknown at this time.		Apprentice schemes and targeted employment of "people on unemployment benefits" may be appropriate, particularly for larger house building schemes. New employment opportunities should be targeted at deprived areas to maximise the positive effects on the unemployed.
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	also help stimulate economic growth in c the supply of industrial and employment	eing equal). 9.	N/A		N/A

SA Objective	Proposed Policy	No policy ⁴⁶	Mitigation and enhancement measures
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	The proposed policy and no policy option relate to strategic housing provision. No		Building on previously developed land should be prioritised over greenfield sites where appropriate.
11. To ensure that a sustainable pattern of development is pursued.	The proposed policy and no policy option relate to strategic housing provision. No spatial information has been given, as such the likely effects of new housing on key services and facilities cannot be predicted.		New developments, particularly large scale developments should be encouraged in areas in close proximity to key facilities and services so that those without personal vehicles can access them. Links via public transport should also be considered.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	The numbers of homes proposed are numerical targets only and do not include any information on patterns of development and spatial locations, as such it is not		Mitigating measures should include house building policy which seeks to minimise adverse effects on landscape and townscape character.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	The numbers of homes proposed are numerical targets only and do not include any information on patterns of development and spatial locations, as such it is not possible to assess potential impact on historic sites/assets. The options do not include targets for restoration or reuse. Overall, it is not possible to assess the impacts of these options on these targets.		Mitigating measures should include house building policy which seeks to minimise adverse effects on historic sites and assets. Policy which encourages sustainable restoration and re-use of existing housing stock should be considered.
14. To improve air quality in the District's Air Quality Management Areas.	Unknown ?		Mitigating measures should include policy around house building which seeks to minimise adverse effects on air

SA Objective	Proposed Policy	No policy ⁴⁶	Mitigation and enhancement measures
	No spatial information has been provided housing. As such, it cannot be accurately with or influence existing AQMAs.		 quality and encourage sustainable transport options. Where possible, new development should be located near to existing public transport links and investment in these facilities should also follow from house building to ensure adequate capacity.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent indirect LT +/? Growth in the green sectors suggests growth in more sustainable sectors/industries, which could include sustainable transport systems. If this is the case, there will be positive effects felt on the Thanet public transport networks. Consequently, this might bring about a reduction in private vehicle use. For the housing; no spatial information has been provided for the proposed locations. As such, it cannot be accurately predicted how the housing will affect the existing public transport network. Similarly, the location of the new jobs is unknown.	Unknown ? No spatial information has been provided for the proposed locations of new housing. As such, it cannot be accurately predicted how the housing will affect the existing public transport network. Similarly, the location of the new jobs and their type are unknown.	It is likely development of this much housing will have some effect on public transport networks. Encouraging new housing and employment growth near to existing or proposed transport links will help reduce reliance on private vehicles for commuting. Further, it may be desirable to require investment in public transport from larger scale developers, particularly if facilities serving new developments are not well served (or are considered at full capacity in terms of users).
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Unknown ? The numbers of homes housing proposed are numerical targets only and do not include any information on proximity to existing sustainable transport links.		It is likely development of this much housing will have some effect on public transport networks. Encouraging new housing and employment growth near to existing or proposed transport links

	Longer term there will be increase in cons housing stock (however, with more sustai existing stock).			
	The option does not distinguish itself as p sustainability.	erforming better in terms of		

Areas of new build homes have the potential to create areas that may be perceived as being safer. This is often the case when brownfield or previously developed land is developed and brought back into active use. However, this was not factored into the assessment of the scenarios at this stage, given their strategic nature.

The development of new homes will have no direct effect on the provision of public transport links. The increase in new homes will likely increase demand on public transport facilities indirectly by increasing the population of certain areas. The extent of the effect will depend on the provision of public transport facilities and the availability of public transport options for a given area. Gathering data on capacity of existing public transport facilities will be crucial in understanding the effects increased populations will have. Many of the potentially uncertain effects and adverse effects will be mitigated by other criteria and topic specific policies as well as the site assessment criteria used to assess and select site allocations.

Policy 12: Policy SP12 – Strategic Housing Site Allocations

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
1. to 23.			The potential effects of SP12 are covered in detail as part of SP13, SP14, SP15 and SP16.	
Summary The potential effects of SP12 are covered in detail as part of SP13, SP14, SP15 and SP16.				

Policy 13: Policy SP13 – Strategic Housing Sites - Manston Green

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent Direct LT ++ The proposed policy inherently provides for additional housing within the District, by proposing up to 700 new dwellings on site, including 30% affordable homes and the requirement for as high a proportion of houses as possible.	Neutral 0 The omission of this policy in isolation would not significantly affect the status quo as other housing sites would provide strategic housing allocations.	-
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent Direct ST/LT - Implementation of the proposed policy is likely to place additional burden on community facilities, including local healthcare provision.	Neutral 0 A no policy option would not alter the status quo.	The proposed policy includes criteria for assessment of the effects of housing development, which will identify shortfalls in local healthcare capacity and indicate the level of increased provision that may be required through developer contributions.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent Direct ST/LT + The proposed policy stipulated that a fully serviced area of 2.05ha is to be provided for the provision of a new two- form entry primary school. This would mitigate the impact of new school age children on local primary schools. It is important that the policy provides provision for the development of the new school to at least one-form entry as required by the education authority.	Neutral 0 A no policy option would not alter the status quo.	-
4. To increase public safety and reduce crime and fear of crime.	Temporary/Permanent Indirect ST/LT + Development of new homes could contribute to the reduction of crime and fear of crime through the better design/layout of residential areas.	Neutral 0 A no policy option would not alter the status quo.	-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Unknown ? The effects on existing community facilities cannot be assessed and are therefore unknown at this stage as effects will depend upon the housing mix and tenure.	Neutral 0 A no policy option would not alter the status quo.	As part of the masterplanning process, mitigation in the form of further studies will be required to ensure positive outcomes against this sustainability objective. This will require an assessment of how demand on community facilities may increase as a result of the additional population in the area.
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent Indirect ST/LT - The proposed policy allocated housing on a site that is outside of the existing urban area and is separated from	Neutral 0 A no policy option would not alter the status quo.	It would be important for a future masterplanning process for sites to consider how development, particularly at the edge of the site boundaries, can

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	existing settlements. In addition, there is potential for development to remove corridors between settlements. This would potentially reduce community identity as settlement areas merge.		be designed to limit the potential for settlements to merge.
7. To provide access to employment	Neutral 0	Neutral 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Whilst the policy includes provision for small-scale retail provision within the development, this is unlikely to significantly contribute towards achieving this objective.	A no policy option would not alter the status quo.	
8. and 9	N/A		N/A
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent Direct ST/LT - Implementation of the proposed policy would require the use of greenfield land and would therefore not directly support this sustainability objective.	Neutral 0 A no policy option would not alter the status quo.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent Direct ST/LT - Due to the location of the sites that form the proposed policy, achieving sustainable development patterns might be problematic due to the potential issue of merging settlements.	Temporary/Permanent Direct ST/LT + By limiting development in this location, separation of settlements is maintained, which might help focus development in previously developed areas.	It would be important for a future masterplanning process for sites to consider how development, particularly at the edge of the site boundaries, can be designed to limit the potential for settlements to merge.
12. To conserve and enhance the	Unknown ?	Neutral 0	It would be important for a future
character and quality of the area's landscape and townscape particularly	The effects of the proposed policy on existing landscape character are unknown at this stage as they would	A no policy option would not alter the status quo.	masterplanning process for sites to consider how development may effect landscape character. Development that

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
associated with town centres and coastal areas.	depend upon the ultimate design of the site.		contributes to the landscape character, rather than simply not affecting it, should be encouraged.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Unknown ? The effects of the proposed policy on historic and archaeological sites are unknown at this stage as they would depend upon the ultimate design of the sites and relevant assessment of these effects.	Neutral 0 A no policy option would not alter the status quo.	The proposed policy includes provision for undertaking a pre-design archaeological assessment taking account of presence of significant and sensitive remains and an assessment of the effects on the setting of listed buildings at Ozengell. Undertaking these measures would help identify issues and mitigate negative effects.
14. To improve air quality in the District's Air Quality Management Areas.	Temporary/Permanent Direct ST/LT - The proposed policy promotes development that is likely to result in an increase in car journeys within the District's Air Quality Management Areas. Not all new residents of the new housing provided on site are likely to be from outside of the District, though inward migration resulting from the development is likely to occur.	Temporary/Permanent Direct ST/LT + The no policy option potentially limits the increase of vehicle journeys within the Districts Air Quality Management Area.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective. This would involve maximising connectivity for alternative forms of transport (e.g. walking and cycling) and extending bus service provision.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Unknown ? The proposed policy allocates new housing development in an area that has the potential for sustainable integration of public transport. The sites are within proximity to public transport routes, but the design and integration of site access	Neutral 0 A no policy option would not alter the status quo.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	is important in determining overall accessibility. This is important as there is provision within the proposed policy for improved multi-modal connections for the sites and to assess the potential for bus service extensions		
16.	N/A		N/A

Policy 14: Policy SP14 - Strategic Housing Sites at Birchington

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent Direct LT ++ The proposed policy inherently provides for additional housing within the District, by proposing up to 1000 new	Neutral 0 The omission of this policy in isolation would not significantly affect the status	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	dwellings on site, including 30% affordable homes and the requirement for as high a proportion of houses as possible.	quo as other housing sites would provide strategic housing allocations.	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent Direct ST/LT - Implementation of the proposed policy is likely to place additional burden on community facilities, including local healthcare provision.	Neutral 0 A no policy option would not alter the status quo.	The proposed policy has the potential to significantly affect the status quo by increasing the population covered by individual healthcare facilities. The proposed policy includes criteria for assessment of the effects of development of housing, which will identify shortfalls in local healthcare capacity and indicate the level of increased provision that may be required through developer contributions.
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent Direct ST/LT + The proposed policy stipulated that a fully serviced area of 2.05ha is to be provided for the provision of a new two- form entry primary school. This would mitigate the impact of new school age children on local primary schools. It is important that the policy provides provision for the development of the new school to at least one-form entry as required by the education authority.	Neutral 0 A no policy option would not alter the status quo.	
4. To increase public safety and reduce crime and fear of crime.	Temporary/Permanent Indirect ST/LT +	Neutral 0	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	Development of new homes could contribute to the reduction of crime and fear of crime through the better design/layout of residential areas.	A no policy option would not alter the status quo.	
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Unknown ? The effects on existing community facilities cannot be assessed and are therefore unknown at this stage as effects will depend upon the housing mix and tenure.	Neutral 0 A no policy option would not alter the status quo.	As part of the masterplanning process, mitigation in the form of further studies will be required to ensure positive outcomes against this sustainability objective. This will require an assessment of how demand on community facilities may increase as a result of the additional population in the area.
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent Indirect ST/LT + The proposed policy allocated housing on a site that is outside of the existing urban area but is adjacent to existing settlements. This helps maintain a distinctive settlement pattern within Birchington-on-sea, whilst maintaining green edges with the countryside	Neutral 0 A no policy option would not alter the status quo.	It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, can be designed to fully integrate development within the existing community.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Neutral 0 Whilst the policy includes provision for small-scale retail provision within the development, this is unlikely to significantly contribute towards achieving this objective.	Neutral 0 A no policy option would not alter the status quo.	-
8. and 9.	N/A		

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent Direct ST/LT - Implementation of the proposed policy would require the use of greenfield land and would therefore not directly support this sustainability objective.	Neutral 0 A no policy option would not alter the status quo.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent Direct ST/LT + Due to the location of the site that forms the proposed policy, there is potential for achieving sustainable development patterns as the proposed policy advocates development adjacent to the existing settlement, whilst maintaining green edges.	Temporary/Permanent Direct ST/LT + By limiting development in this location, separation of settlements is maintained, which might help focus development in previously developed areas.	It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, can be designed to limit the potential for settlements to merge.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Unknown ? The effects of the proposed policy on existing landscape character are unknown at this stage as they would depend upon the ultimate design of the site.	Neutral 0 A no policy option would not alter the status quo.	It would be important for a future masterplanning process for this site to consider how development may effect landscape character. Development that contributes to the landscape character, rather than simply not affecting it, should be encouraged.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Unknown ? The effects of the proposed policy on historic and archaeological sites are unknown at this stage as they would depend upon the ultimate design of the site and relevant assessment of these effects.	Neutral 0 A no policy option would not alter the status quo.	The proposed policy includes provision for undertaking a pre-design archaeological assessment taking account of presence of significant and sensitive remains and an assessment of the effects on the setting of listed buildings on site and at Quex Park. Undertaking these measures would

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			help identify issues and mitigate negative effects.
14. To improve air quality in the District's Air Quality Management Areas.	Temporary/Permanent Direct ST/LT - The proposed policy promotes development that is likely to result in an increase in car journeys within the District's Air Quality Management Areas. Not all new residents of the new housing provided on site are likely to be from outside of the District, though inward migration resulting from the development is likely to occur.	Temporary/Permanent Direct ST/LT + The no policy option potentially limits the increase of vehicle journeys within the Districts Air Quality Management Area.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective. This would involve maximising connectivity for alternative forms of transport (e.g. walking and cycling) and extending bus service provision.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Unknown ? The proposed policy allocates new housing development in an area that has the potential for sustainable integration of public transport. The site is within proximity to public transport routes, but the design and integration of site access is important in determining overall accessibility. This is important as there is provision within the proposed policy for improved multi-modal connections for the site and to assess the potential for bus service extensions	Neutral 0 A no policy option would not alter the status quo.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent Direct ST/LT + The provision of a new link road extending from Minnis Road and the A28 will help alleviate the pressures of	Neutral 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	additional traffic on the A28, particularly around The Square in Birchington.		
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent Direct ST/LT - The proposed policy will facilitate housing development, which has the potential to increase the amount of domestic waste produced in the district.	Neutral 0 A no policy option would not alter the status quo.	Mitigation will be required through the design of all new housing developments to ensure that waste minimisation and recycling are promoted during the operation phase of these developments. This would be achieved by maximising the outcomes of other Local Plan policies.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent Direct ST/LT + The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	Neutral 0 A no policy option would not alter the status quo.	 In addition, Policy SP30 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy. 7. To provide access to employment	Neutral 0	Neutral 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Whilst the policy includes provision for small-scale retail provision within the development, this is unlikely to significantly contribute towards achieving this objective.	A no policy option would not alter the status quo.	
8. and 9.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent Direct ST/LT - Implementation of the proposed policy would require the use of greenfield land and would therefore not directly support this sustainability objective.	Neutral 0 A no policy option would not alter the status quo.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent Direct ST/LT + Due to the location of the site that forms the proposed policy, there is potential for achieving sustainable development patterns as the proposed policy advocates development adjacent to the existing settlement, whilst maintaining green edges.	Temporary/Permanent Direct ST/LT + By limiting development in this location, separation of settlements is maintained, which might help focus development in previously developed areas.	It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, can be designed to limit the potential for settlements to merge.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Unknown ? The effects of the proposed policy on existing landscape character are unknown at this stage as they would depend upon the ultimate design of the site.	Neutral 0 A no policy option would not alter the status quo.	It would be important for a future masterplanning process for this site to consider how development may effect landscape character. Development that contributes to the landscape character, rather than simply not affecting it, should be encouraged.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Unknown ? The effects of the proposed policy on historic and archaeological sites are unknown at this stage as they would depend upon the ultimate design of the site and relevant assessment of these effects.	Neutral 0 A no policy option would not alter the status quo.	The proposed policy includes provision for undertaking a pre-design archaeological assessment taking account of presence of significant and sensitive remains. Undertaking these measures would help identify issues and mitigate negative effects.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Temporary/Permanent Direct ST/LT - The proposed policy promotes development that is likely to result in an increase in car journeys within the District's Air Quality Management Areas. Not all new residents of the new housing provided on site are likely to be from outside of the District, though inward migration resulting from the development is likely to occur.	Temporary/Permanent Direct ST/LT + The no policy option potentially limits the increase of vehicle journeys within the Districts Air Quality Management Area.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective. This would involve maximising connectivity for alternative forms of transport (e.g. walking and cycling) and extending bus service provision.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Unknown ? The proposed policy allocates new housing development in an area that has the potential for sustainable integration of public transport. The site is largely within proximity to public transport routes, but the design and integration of site access is important in determining overall accessibility. This is important as there is provision within the proposed policy for improved multi-modal connections for the site and to assess the potential for bus service extensions	Neutral 0 A no policy option would not alter the status quo.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent Direct ST/LT + The provision of a highway improvements including road widening and link roads will help alleviate the pressures of additional traffic on the local transport network.	Neutral 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent Direct ST/LT - The proposed policy will facilitate housing development, which has the potential to increase the amount of domestic waste produced in the district.	Neutral 0 A no policy option would not alter the status quo.	Mitigation will be required through the design of all new housing developments to ensure that waste minimisation and recycling are promoted during the operation phase of these developments. This would be achieved by maximising the outcomes of other Local Plan policies.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent Direct ST/LT + The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	Neutral 0 A no policy option would not alter the status quo.	 In addition, Policy SP30 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy. Mitigating against climate change by reducing emissions. These measures will help enhance effects relating to this sustainability objective.
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent Direct ST/LT + The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	Neutral 0 A no policy option would not alter the status quo.	-
20. To conserve and enhance biodiversity.	Permanent Direct ST/LT +	Unknown ?	The proposed policy includes provision for undertaking a pre-design ecological

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	The proposed policy designates a site for housing that has minor potential for ecological effects, though by keeping development away from Green Wedges, impacts on habitats are could be minimised, assuming the allocated site, ecological value is low.	A no policy option would prevent development on existing greenfield land that may have minor benefits for local ecology.	assessment taking account of the presence of wintering and breeding birds. Undertaking these measures would help identify issues and mitigate negative effects.
21.	N/A		N/A
22. To reduce the global, social and	Unknown ?	Neutral 0	In terms of mitigation, Policy SP30
environmental impact of consumption of resources by using sustainably produced and local products.	A no policy option would prevent development on existing greenfield land that may have minor benefits for local ecology.	A no policy option would not alter the status quo.	 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy. Mitigating against climate change by reducing emissions. These measures will help promote positive effects relating to this sustainability objective. However, the overall effect of this would be dependent on the final design of any emerging housing proposals.
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Unknown ? Effects against this objective are unknown at this stage as the policy does not include explicit reference to	Neutral 0 A no policy option would not alter the status quo.	The success of the proposed policy would depend on the implementation of other Local Plan policies relating to renewable energy provision and energy

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	renewable energy or the requirement for energy efficiency measures.		efficiency. These policies would help promote beneficial effects and support this sustainability objective.

Summary

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities. There may be a need for a new off-site school, which would benefit from identification and implementation that aligns with a phasing programme for the site. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development. However, any new development of greenfield land is likely to have the potential for adverse effects against environmental objectives, particularly relating to landscape and ecology. Mitigation through implementing robust design principles and undertaking further studies relating to potential environmental impacts are likely to help mitigate these adverse effects. The proposed policy advocates housing on a site that connects well with existing urban settlements, though design of the site can help maximise urban connectivity. The site is largely served by public transport, though available capacity on the highway network might be limited. The implementation of highway improvements to serve the site is likely to help free up capacity, which will enable good links with the rest of the District, but particularly the major centres of Margate, Broadstairs and Ramsgate.

Policy 17: Policy SP17 – Land Fronting Nash and Haine Roads

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent Direct LT ++ The proposed policy inherently provides for additional housing within the District, by proposing up to 1020 new dwellings on site, including 30% affordable homes and the requirement for as high a proportion of houses as possible.	Neutral 0 The omission of this policy in isolation would not significantly affect the status quo as other housing sites would provide strategic housing allocations.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
2. To maintain appropriate healthcare	Permanent Direct ST/LT -	Neutral 0	
provision and access to healthcare facilities for all sectors of society.	Implementation of the proposed policy is likely to reduce burden on local healthcare and community facility provision, as there is explicit criteria that 2ha of land should be reserved for the development of a new medical centre and community assemble facility	A no policy option would not alter the status quo.	
3. To provide access to appropriate	Permanent Direct ST/LT +	Neutral 0	-
educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	The proposed policy stipulated that a fully serviced area of 2.05ha is to be provided for the provision of a new two- form entry primary school. This would mitigate the impact of new school age children on local primary schools. It is important that the policy provides provision for the development of the new school to at least one-form entry as required by the education authority.	A no policy option would not alter the status quo.	
4. To increase public safety and reduce	Temporary/Permanent Indirect ST/LT +	Neutral 0	-
crime and fear of crime.	Development of new homes could contribute to the reduction of crime and fear of crime through the better design/layout of residential areas.	A no policy option would not alter the status quo.	
5. To provide appropriate key facilities	Unknown ?	Neutral 0	As part of the masterplanning process,
to support vulnerable people and reduce the level of deprivation identified across the wards.	The effects on existing community facilities cannot be assessed and are therefore unknown at this stage as	A no policy option would not alter the status quo.	mitigation in the form of further studies will be required to ensure positive outcomes against this sustainability objective. This will require an

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	effects will depend upon the housing mix and tenure.		assessment of how demand on community facilities may increase as a result of the additional population in the area.
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent Indirect ST/LT + The proposed policy allocated housing on a site that is outside of the existing urban area but is adjacent to existing settlements. This helps maintain a distinctive settlement pattern within the local area surrounding Nash Road and Haine Road, whilst maintaining green edges with the countryside.	Neutral 0 A no policy option would not alter the status quo.	It would be important for a future masterplanning process for this site to consider how development, particularly at the edge of the site boundaries, can be designed to fully integrate development within the existing community.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Neutral 0 Whilst the policy includes provision for small-scale retail provision within the development, this is unlikely to	Neutral 0 A no policy option would not alter the status quo.	-
8. and 9.	significantly contribute towards achieving this objective.		N/A
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent Direct ST/LT - Implementation of the proposed policy would require the use of greenfield land and would therefore not directly support this sustainability objective.	Neutral 0 A no policy option would not alter the status quo.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent Direct ST/LT ++	Temporary/Permanent Direct ST/LT +	It would be important for a future masterplanning process for this site to

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	Due to the location of the site that forms the proposed policy, there is potential for achieving sustainable development patterns as the proposed policy advocates development within the existing urban environment, whilst maintaining green edges.	By limiting development in this location, separation of settlements is maintained, which might help focus development in previously developed areas.	consider how development, particularly at the edge of the site boundaries, in order to maximise the potential for achieving sustainable development patterns.
12. To conserve and enhance the	Unknown ?	Neutral 0	It would be important for a future
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	The effects of the proposed policy on existing landscape character are unknown at this stage as they would depend upon the ultimate design of the site. Development that contributes to the landscape character, rather than simply not affecting it, should be encouraged.
13. To preserve and enhance sites,	Neutral 0	Neutral 0	-
features and areas of historic archaeological or architectural importance, and their settings.	A proposed policy would not alter the status quo.	A no policy option would not alter the status quo.	
14. To improve air quality in the District's Air Quality Management Areas.	Unknown ? The proposed policy promotes development that is likely to result in an increase in car journeys within the District's Air Quality Management Areas. Not all new residents of the new housing provided on site are likely to be from outside of the District, though inward migration resulting from the development is likely to occur. However, there is a requirement for ongoing monitoring of local air quality	Temporary/Permanent Direct ST/LT + The no policy option potentially limits the increase of vehicle journeys within the Districts Air Quality Management Area.	The results of any local air quality monitoring are likely to indirectly affect performance against this objective, via TDC's ongoing air quality review and assessment programme.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	attached to the proposed policy, which may inform TDC's ongoing air quality review and assessment programme.		
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Unknown ? The proposed policy allocates new housing development in an area that has the potential for sustainable integration of public transport. The site is within proximity to public transport routes, but the design and integration of site access is important in determining overall accessibility. This is important as there is provision within the proposed policy for improved multi-modal connections for the site and to assess the potential for bus service extensions	Neutral 0 A no policy option would not alter the status quo.	As part of the masterplanning process, in particular the undertaking of a site Transport Assessment, mitigation in the form of further work will be required to ensure positive outcomes against this sustainability objective.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent Direct ST/LT + The provision of a highway improvements identified through further traffic studies will help alleviate the pressures of additional traffic on the local transport network.	Neutral 0 A no policy option would not alter the status quo.	-
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent Direct ST/LT - The proposed policy will facilitate housing development, which has the potential to increase the amount of domestic waste produced in the district.	Neutral 0 A no policy option would not alter the status quo.	Mitigation will be required through the design of all new housing developments to ensure that waste minimisation and recycling are promoted during the operation phase of these developments. This would be

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			achieved by maximising the outcomes of other Local Plan policies.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent Direct ST/LT + The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	Neutral 0 A no policy option would not alter the status quo.	 In addition, Policy SP30 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy. Mitigating against climate change by reducing emissions. These measures will help enhance effects relating to this sustainability objective.
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent Direct ST/LT + The proposed policy designates a site for housing that is more than 100m from the coastal area, minimising risks from sea level rises.	Neutral 0 A no policy option would not alter the status quo.	-
20. To conserve and enhance biodiversity.	Permanent Direct ST/LT + The proposed policy designates a site for housing that has minor potential for ecological effects, though by keeping development away from Green Wedges, impacts on habitats are could be minimised, assuming the allocated site, ecological value is low.	Unknown ? A no policy option would prevent development on existing greenfield land that may have minor benefits for local ecology.	The proposed policy includes provision for undertaking a pre-design ecological assessment taking account of the presence of wintering and breeding birds. Undertaking these measures would help identify issues and mitigate negative effects.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
21.	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Unknown ? A no policy option would prevent development on existing greenfield land that may have minor benefits for local ecology.	Neutral 0 A no policy option would not alter the status quo.	 In terms of mitigation, Policy SP30 states that new development must take account of: Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy. Mitigating against climate change by reducing emissions. These measures will help promote positive effects relating to this sustainability objective. However, the overall effect of this would be dependent on the final design of any emerging housing proposals.
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Unknown ? Effects against this objective are unknown at this stage as the policy does not include explicit reference to renewable energy or the requirement for energy efficiency measures.	Neutral 0 A no policy option would not alter the status quo.	The success of the proposed policy would depend on the implementation of other Local Plan policies relating to renewable energy provision and energy efficiency. These policies would help promote beneficial effects and support this sustainability objective.

The promotion of the proposed policy is beneficial in terms of socio-economic objectives as there is a clear contribution to the District's housing supply and improvements to community facilities, such as the provision of a new school, medical centre and community facility. There is also potential for additional community facilities improvements, depending on further studies to be undertaken during design that will state any additional requirements as a result of development.

Policy 18: SP18 – Type and Size of Dwellings

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent LT + Proposals for housing developments will be expected to address the SHMA recommendations to ensure a varied make-up of the market and affordable housing types and sizes needed are met.	Permanent LT - It is assumed that without the affordable housing target, developers would not necessarily factor this in, and the supply would stagnate in the context of very high need. This would mean continued growth in the number of homes but reduced housing mix	The need for affordable housing is high in Thanet meaning a sustainable supply is required. The target of 1,500 new affordable homes across Thanet per annum is only likely to be met if an overall 5,000 new homes are delivered per annum. The 30% target as mentioned in 10h would not compromise the viability of larger housing developments. All other options are likely to have a neutral impact.
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Unknown? Policy adoption impacts are largely dependent upon the location of the developments. This policy should maintain the status quo and not alter the accessibility or provision of healthcare facilities. However should the housing	Neutral 0 It is assumed that if no target was applied, developers would tend away from building affordable housing. However, it is assumed that the chosen locations for affordable housing (built	Largely neutral effects based on the assumption that if affordable housing was situated away from other housing, accessibility to these important facilities would be considered.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	occur in rural areas away from existing facilities, this will result in affordable housing being located away from healthcare facilities.	by whoever) would still need to be in close proximity to healthcare facilities.	Ensure for off-site and rural options that proximity to healthcare is still considered.
3.	N/A		N/A
4. To increase public safety and reduce crime and fear of crime.	Temporary/Permanent Indirect ST/LT + Development of new homes could contribute to the reduction of crime and fear of crime through the better design/layout of residential areas.	Permanent LT - It is assumed that this would result in under provision of affordable housing. This could have knock on effects to homelessness which in turn affect crime.	Those policies which will lead to lower supply of affordable housing and/or create areas in which affordable housing is concentrated away from other developments may result in increased crime levels.
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent LT + Assuming that new development will be tested in terms of its accessibility to key facilities, this means the housing therein will have adequate access. However as the development plan and location are not yet known it not possible to fully assess the impact, thus questionable positivity will occur. However the policy will prevent the loss of existing homes meaning that established residential areas with access can ensue.	Permanent LT - It is assumed that without the affordable housing target, developers would not necessarily factor this in, and the supply of appropriate affordable housing units would stagnate in the context of very high and specific need. Assuming that more vulnerable people in society are more likely to depend on affordable housing, this means these people would suffer from reduced supply in housing potentially increasing deprivation.	Negative effects will occur when the growth in supply of affordable is reduced.
6. To create vibrant balanced communities where residents feel a	Permanent LT + Policy adoption would be expected to address the recommendation regarding	Permanent LT - If affordable housing was created off- site, there would be a risk of	Sense of place is likely to be affected by design of individual developments. As such the amount and location of

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
'sense of place' and individual contribution is valued.	the make-up of market and affordable housing types and sizes needed. As such by creating the appropriate supply of relevant housing. It will ensure that a certain amount of affordable housing is integrated with all larger housing developments and result in a mix of people from different socio-economic background within housing developments.	concentrating people from different socio-economic backgrounds in certain areas. This could bring about pockets of deprivation.	affordable housing is unlikely to affect this. Harmonious and mixed communities will be created when affordable housing is integrated with wider housing developments, not when segregated affordable housing communities are created.
7. and 8.	N/A		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Unknown ? House building will continue under this policy. It is not known where this will occur. If it occurs near tourist or natural, semi natural or built assets there could be an impact, however more spatial information is required to inform this decision.		The majority of effects are uncertain because this depends on how and where development occurs.
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent LT + Policy will seek to increase the supply of housing in line with SHMA recommendations. Not possible to predict effects on previously developed land or greenfield.	Permanent LT - Assuming this option results in a fall in supply of affordable housing, the mix of development will not match up to the need. Not possible to predict effects on previously developed land or greenfield	These options will, on the whole, affect the housing needs of the Thanet population which has a rising need for affordable housing.
11. To ensure that a sustainable pattern of development is pursued.	Unknown ? House building will continue under both the proposed policy and no policy option. It is not known where this will occur. If development occurs near or within more densely populated (and therefore better served) areas, there will be a positive effect		It is not possible to ascertain the pattern of development for the proposed policy.

Page 503

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	through reduced need to travel. The oppositive rural areas.	ite will be true of development in more	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Unknown ? House building will continue under the proposed policy and no policy option. It is not known where this will occur (i.e. if development will avoid sensitive areas) or how landscape and townscape design / mitigation will be employed.		Impacts on landscape and townscape can be reduced through sensitive design, choice of materials and locating development in sensitive locations.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	House building will continue under the proposed policy and no policy option. It is not known where this will occur (i.e. if development will avoid sensitive areas.		Specific projects which occur as a result of the proposed policy will need to consider their impact on historic archaeological or architectural features.
14. To improve air quality in the District's Air Quality Management Areas.	Unknown ? The proposed policy has the potential to affect the housing mix and the economic viability of some house building projects. It is not clear where development will occur, as such it is unclear how the need to travel and car use will be influenced, and as such effects on air quality cannot be predicted.	Unknown ? It is unclear how the need to travel and car use will be influenced as a result of this policy option; as such effects on air quality cannot be predicted.	It is not possible to ascertain the pattern of development for the proposed policy.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Neutral 0 No effects assuming affordable housing is implemented as part of a sustainable land management strategy.		No effects anticipated unless areas of affordable housing are created away from new/existing developments (off site, or on the fringes). If this occurs, transport assessments will need to confirm that the housing is adequately served by public transport.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
16.	N/A	N/A		
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent ST/LT - Given that the policy option supports housing growth of an appropriate size and types there will be a short term marginal increase in waste from construction. There will also be a longer term increase in waste streams from those residents.	Permanent ST/LT - The no policy option would still result in housing construction, though this would be dictated by the market. There will be a long-term increase in waste streams from residents as well as short term construction impacts.	Waste will be likely during construction. The quantities can be minimised through best practice measures. For operation, design should include space for recycling bins to encourage users to recycle waste.	
18. and 19	N/A		N/A	
20. To conserve and enhance biodiversity.	Permanent LT - Assuming that development in the rural areas is likely to increase the risk of impact on greenfield land and any ecological assets therein, the proposed policy may have a minor negative effect.	Permanent LT - Assuming that development in the rural areas is likely to increase the risk of impact on greenfield land and any ecological assets therein, the proposed policy may have a minor negative effect.	Specific projects which occur as a result of these options will need to consider their impact on historic biodiversity assets within Thanet.	
21.	N/A		N/A	
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Unknown ? The proposed policy and no policy option have the potential to affect the housing mix and the economic viability of some house building projects. It is not clear how sustainably housing will be built in terms of operational standards, or use of best practice construction methods.		Ensure policy around new build properties encourages sustainable practices.	
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.				

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
	sustainably housing will be built in terms of operational standards, or use of best practice construction methods.			
Summary				
The proposed policy adheres to the SHMA recommendations to ensure that the make-up of the market and affordable housing types and sizes is accounted for. Similarly developments resulting in a net loss will not be prohibited unless in exceptional circumstances. As such housing sustainability is appropriately met through the adoption of policy SP18.				

Policy 19: SP19 – Affordable Housing

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, ST/LT + The proposed policy would maintain the status quo and deliver 30% affordable housing. The housing topic paper states that an economic viability study of development in Thanet has found that the headline district wide 30% affordable housing target would be not impact on scheme viability. Therefore it is assumed that development will not be restricted with this target.	Permanent LT It is assumed that without the affordable housing target, developers would not necessarily factor this in, and the supply would stagnate in the context of very high need. This would mean continued growth in the number of homes but reduced housing mix.	-
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Neutral 0 Both the no policy option and no policy of	ption would not alter the status quo.	
3. To provide access to appropriate educational facilities for all sectors of society including focus on training	Neutral 0		-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	None of the options alter the accessibility educational attainment.	or provision of education facilities or	
4. To increase public safety and reduce crime and fear of crime.	Neutral 0 All other things being equal this would maintain the status quo. It is assumed that this means no change in the levels of crime or public perceptions of crime.	Permanent LT - It is assumed that this would result in under provision of affordable housing. This could have knock on effects to homelessness which in turn affect crime.	-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent LT + Assuming that new development will be tested in terms of its accessibility to key facilities, this means the affordable housing therein will have adequate access.	Permanent LT It is assumed that without the affordable housing target, developers would not necessarily factor this in, and the supply would stagnate in the context of very high need. Assuming that more vulnerable people in society are more likely to depend on affordable housing, this means these people would suffer from reduced supply in housing potentially increasing deprivation.	-
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent LT + This will maintain the status quo. It will ensure that a certain amount of affordable housing is integrated with all larger housing developments and result in a mix of people from different socio- economic background within housing developments.	Permanent LT - It is assumed that without the affordable housing target, developers would not necessarily factor this in, and the supply would stagnate in the context of very high need.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
		This could potentially result in less integration in new/existing communities.	
7. and 8	N/A.		N/A.
9. To protect and enhance the areas	Unknown ?		-
natural, semi-natural and street scene to support the tourist economy.	House building will continue under the proposed policy and no policy options. It is not known where this will occur. If it occurs near tourist or natural, semi natural or built assets there could be an impact, however more spatial information is required to inform this decision.		
10. To improve efficiency in land use	Permanent LT +	Permanent LT -	-

Policy 25: Policy SP25 – Protection of European, SSSI and National Nature Reserves	
--	--

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 8.	N/A.		N/A.
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent, Direct, ST/LT + The proposed policy likely to have a positive contribution towards this objective by protecting features that contribute to the character of the area and also support the visitor economy.	Neutral 0 A no policy option would not alter the status quo.	-
10. and 11	N/A.		N/A.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent, Direct. LT ++ The proposed policy would help to maintain areas of nature conservation importance, which would aid in the conservation of wider coastal and rural landscapes.	Neutral 0 A no policy option would not alter the status quo.	-
13. to 18	N/A.	•	N/A.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent Indirect LT + Certain types of green infrastructure and green space can provide protection from flooding. Encouraging their development and/or protection will have a positive effect by safeguarding green spaces which can act as flood mitigation. Active protection and enhancement of nature conservation areas will prevent unacceptable development, particularly on Thanet's coastal areas.	Neutral 0 A no policy option would not alter the status quo.	
20. To conserve and enhance biodiversity.	Permanent Direct LT ++ The proposed policy is inherently supportive of this objective. Policy support for green spaces and opens space etc. can have positive effects on biodiversity by protection such areas from potentially adverse impacts and activity.	Neutral 0 A no policy option would not alter the status quo.	-
21.to 23	N/A.		N/A.
Summary	•		

The proposed policy is largely a reflection of existing legislation and will yield the most substantial environmental protection and sustainability. The protection of open spaces would yield environmental benefits. The proposed policy will be restrictive to infrastructure and housing as protecting environmental assets will mean developments upon such lands will most likely be prohibited and thus restricted to other areas of Thanet.

Policy 26: Policy SP26 -	Protection of Open Space
--------------------------	--------------------------

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A.		N/A.
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent, Direct, ST/LT + The proposed policy will help to maintain a sense of place by restricting the amount of sprawling growth that occurs and could result in the towns and neighbourhoods losing their identity.	Permanent LT -/? Without protection the sense of place in many areas could be adversely affected. The magnitude of the effect is uncertain because this would depend scale of any open space loss.	-
7. and 8.	N/A.		N/A.
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent, Direct, ST/LT +. The proposed policy is likely to have a positive contribution towards this objective by protecting features that contribute to the character of the area and also support the visitor economy.	Permanent LT -/? Without protection many areas could be adversely affected. The magnitude of the effect is uncertain because this would depend scale of any open space loss.	-
10. and 11.	N/A.		N/A.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent; Direct. LT ++ Active protection and enhancement of open space areas will prevent unacceptable development and actively contribute to a retention and improvement of landscape / townscape character.	Permanent LT - Without this policy support the loss of public open spaces could have a detrimental effect on this objective.	-
13. to 18	N/A.	•	N/A.
19. To ensure appropriate development control procedures in place to manage	Permanent Direct LT +	Unknown ?	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Certain types of green infrastructure and green space can provide protection from flooding. Active protection and enhancement of open space areas will prevent unacceptable development, particularly on Thanet's coastal areas and create a natural buffer zone between development and potential areas at risk from flooding and erosion.	The effects of the no policy option are unknown because it may not have any effect on flood risk or it could result in the loss of natural greenspace resulting in an increased risk from flooding.	
20. To conserve and enhance	Permanent Indirect LT +	Permanent LT -	-
biodiversity.	The proposed policy provides support for green spaces and opens space etc. can have positive effects on biodiversity by protection such areas from potentially adverse impacts and activity. The protection of open space areas will indirectly protect natural and semi- natural habitats that support a range of species.	Without this policy support the loss of public open spaces could have a detrimental effect on this objective.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	townscape value that contribute the quality of townscape.	detrimental to the overall townscape value.	
13. to 23	N/A		N/A
Summary			

The proposed policy is predicted as being likely to have positive effects on townscape and indirectly the role that areas of high value townscape has on the sense of place, people's satisfaction with where they live and cultural heritage features within those areas. There is also the added ability of the proposed policy to encourage the reuse of listed buildings to aid urban renaissance and also to enhance the protection of the historical and archaeologically important sites across Thanet.

Policy 30: Policy SP30 – Climate Change

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Unknown ? Depending on the nature of the measures required this could have a potentially adverse effect on housing supply if it affects viability. However, it is noted that over the long term the effect might be beneficial if it results in housing that is more viable in a warmer and drier climate.	Neutral. 0 A no policy option would not alter the status quo.	The robust design of housing sites should incorporate climate change requirements whilst not being detrimental to viability.
2. to 6.	N/A		N/A
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent, indirect ST + Indirectly, there may be some small scale opportunities to support jobs within the green sector by requiring	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	retrofit projects to adapt to climate change.		
8. to 12	N/A		N/A
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Unknown ? The proposed policy might result in some impact on listed buildings, if they undergo refurbishment.	Neutral. 0 A no policy option would not alter the status quo.	Any refurbishment in line with climate change issues should be sympathetic to the historic environment.
14. to 18.	N/A	·	N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent, direct LT + The proposed policy will enhance provisions with regards to the management of flood risk yet it would potentially occur in differing ways, but with the same effects.	Neutral. 0 A no policy option would not alter the status quo.	
20. to 23.	N/A	·	N/A
	rotect assets through ensuring climate chan ler the effects it can have on climate chang		oposed policy also ensures that the

Policy 31: Policy SP31 – Healthy and Inclusive Communities

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent, direct LT + The proposed policy would ensure the continued development and maintenance of health services across the region. In order to enhance services on offer, policy adoption would be required to enhance the services available.	Neutral. 0. A no policy option would not see a decline in health services due to existing budgets being in place.	
3. to 4.	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent, direct LT + The proposed policy would ensure a healthy inclusive community can be created especially in deprived regions which could be subject to potential developments. Without such polices it is possible the deprivation could worsen due to a lack of polices to raise local living standards and create healthy inclusive communities. Adoption of the proposed is highly recommended due to the multifaceted approach which will help to decrease deprivation across Thanet.	Permanent. Direct ST/LT -? Under a no policy option there would not be a requirement for developments to contribute towards creating a healthy and inclusive community. Over time deprivation could rise as a result of communities being isolated and non- inclusive.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent, direct LT + The proposed policy would increase the potential social interactions across the community and the subsequent health benefits would follow. By increasing the opportunities for interaction a sense	Neutral. 0. A no policy option would not impact the current community structure as there would not be a decline in existing services and offerings that contribute to the community.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
	of community feel can be enhanced within individuals due to the appreciation of neighbours. A no policy option would not detract current community interactions but adoption of the policy would indirectly increase the potential for community interactions to meet this sustainability objective.			
7. to 11	N/A	N/A		
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent, direct LT + The proposed policy would help conserve the character and quality of the natural and urban landscapes. This would encourage environmentally sustainable mixed use areas of character and charm.	Unknown ? Through a no policy option it is unknown if the character and quality of the local spaces would decline. It could be conceivable that naturally the areas in question sustain their integrity yet similarly without guidance for new developments decline could be possible due to a lack of safeguarding.	Mitigation is required in order to ensure that mixed use developments do not over reach in terms of character and detract from aesthetic value from the area. Appropriate planning policies and procedures should be in place to ensure that the proposals are adequate and relevant to ensure the conservation and enhancements of local character.	
13. to 23.	N/A		N/A	

Summary

Adoption of the proposed policy would yield significant positive effects upon a variety of objectives, with regards to the improvements in available health care for the community. Whilst A no policy option is not likely to cause significant negatives the added policy and effort to enhance services would create a more robust sustainability approach. Social benefits could be seen through increased recreational provisions in an environmental conscientious manner. Through creating a healthier lifestyle approach within designs and facilities the region would significantly benefit in comparison to if A no policy option was pursued. The proposed policy also encourages environmentally sustainable mixed use areas of character and charm, alongside appropriate building practices and as such a multifaceted approach to creating an appropriate healthy and inclusive community can be achieved.

I	Policy 32: Policy SP32 – Community	7]	Infrastructure

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A		N/A
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent; Direct, ST/LT ++ Policy adoption would increase accessibility to new and existing health care facilities.	Neutral. 0. A no policy option would not see a decline in health services due to existing budgets being in place.	-
3.	N/A		N/A
4. To increase public safety and reduce crime and fear of crime.	Permanent; Direct, ST/LT + + The proposed policy would result in a significant beneficial effect for future development by requiring this to be considered as part of development design.	Permanent. Direct ST/LT -? The no policy option could result in development that does not integrate safety features into its design and development therefore an adverse effect is predicted	-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent; Direct ST/LT + + Policy adoption would see TDC work with organisations to increase key facilities across the region, including health care facilities. Open spaces would also be preserved which will help promote a healthier lifestyle through open public spaces being utilised recreationally. In turn this would reduce the level deprivation by raising general health standards.	Permanent. Direct ST/LT -? Under a no policy option there would not be a requirement for developments to contribute towards creating a healthy and inclusive community. Over time deprivation could rise as a result of communities being isolated and non- inclusive.	
6. To create vibrant balanced communities where residents feel a	Permanent; Indirect ST/LT +/? The proposed policy includes the safe guarding of open spaces for recreation	Neutral. 0 A no policy option would not impact the current community structure as	-

ivities Through providing reational facilities amongst the other es detailed in the policy, community nosphere and spirit can grow due to a althier approach to living. In turn this	there would not be a decline in existing services and offerings that contribute to the community.	
a cause a rise in a sense of belonging hin the community due to the cential increased social interaction I healthy option facilities within the a.		
		N/A
l hea		

The effects of the proposed policy are considered positive as the policy contributes towards supporting existing facilities and promoting the development of new facilities to address current and future shortages. The effects of the no policy option are adverse because over the long term would not allow the capacity of facilities to be increased. All of the other remaining uncertain effects associated with the proposed policy can potentially be mitigated by development management policies.

Policy 33: Polic	v SP33 – Expa	nsion of Primary	and Secondary	Schools

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. and 2			
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent; Direct ST/LT+ Through expanded current infrastructure wider opportunities can be provided for local education. By utilising existing infrastructure it would be easier to integrate night school at secondary schools to provide	Neutral. 0 A no policy option would not adversely affect the education of the local population. A no policy option however could cause a local education stagnation and overcrowding of schools.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	opportunities for locals to increase their skill set.		
4.	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent; Indirect LT + By providing a means of educating the younger population it is possible to reduce the level of deprivation by increasing educational standards. In turn this could lead to a future rise local skilled labour and a move away from deprivation. This is a potential long term indirect impact.	Permanent, Indirect LT - The effects of the no policy option are adverse because over time the lack of facilities to provide an increase in educational standards and the subsequent accompanying effects, would lead to increase in population within the deprivation category.	-
6.	N/A		N/A
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent; direct ST/LT + Expansion of schools would provide opportunities both in the short and long term for employment. Construction services and skills would be utilised throughout the building phases whilst the increased capacity would need to be staffed by local residents and as such providing potential for long term employment.	Neutral. 0 Through A no policy option, there would be no opportunities created but it would not cause a decline in other local opportunities. As such the job market would most likely be unaffected.	
8. to 23.	N/A	•	N/A

The proposed policy would attribute significant success with regards to the education SA objectives. It is also likely that the proposed policy will be required over the life of the plan if there is to be sufficient school place provision to meet the anticipated growth in the residential population. The potential improvement within the

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
facility can be tailored to the needs of the the opportunity to potentially offer night	local area. There are potential society bend	e schools. Whilst expansions can accommod efits under the options such as increased en ties for the wider community. A no policy o owding of resources.	nployment form both options alongside

Policy 34: Policy SP34 – Safe and Sustainable Travel

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A		N/A -
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Indirect. ST/LT. + Policy adoption could result in the provision of safe, secure and convenient access for all road users. The policy would increase the provision for sustainable modes of transport including cycling which would indirectly aid health enhancements by providing an opportunity for exercise. Similarly increased sustainability would reduce traffic emissions and reliance upon vehicles, which would also benefit local health.	Neutral. 0. A no policy option will not alter the status quo.	-
3.	N/A		N/A
4. To increase public safety and reduce crime and fear of crime.	Permanent. Indirect. ST/LT. + Policy adoption could result in the provision of safe, secure and	Unknown? Given that the details and plans of future developments are not known it is	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	convenient transport access for all road users in new developments. Subsequently it would be possible to design out crime by creating safe appropriate developments.	not possible to quantify the effects upon the SA objective.	
5. to 10.	N/A	N/A	
11. To ensure that a sustainable pattern	Permanent. Direct. LT +	Neutral. 0.	-
of development is pursued.	Policy adoption would pursue sustainable practices by increasing the provision of safe, secure and convenient access for all road users in new developments. The policy would increase the provision for sustainable modes of transport including cycling. This would have additional benefits in that the local air quality and the health of residents would improve due to the increased travel options instead of relying upon cars	A no policy option will not alter the status quo.	
12. and 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT. + Policy adoption could allow the utilisation of a sustainable transport method that would reduce emissions through decreased road traffic thus improve the AQMA's.	Neutral. 0. This option will not alter the status quo, given current national legislation guidance to improve air quality.	-
15. To provide a sustainable public transport network that allows access to	Permanent. Direct. ST/LT. ++	Neutral. 0.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy would require new developments to be designed to reduce the need to travel privately and enhance the local public transport network. Therefore, the option would have a significant role in reducing the use of private vehicles due to the increase in public transport provisions.	A no policy option will not alter the status quo.	
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT. + The proposed policy would require new development create a safe and sustainable transport network by promoting walking, cycling and the use of public transport. Increasing such provisions will connect Thanet to the wider region in a sustainable manner, however the impacts are only deemed minor as the policy does not make reference to rail or air.	Neutral. 0. A no policy option will not alter the status quo.	-
18. to 23	N/A		N/A
Summary			

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits alongside environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Policy support for the growth of sustainable transport would robustly meet the demands of the public and the SA objectives.

Policy 35: Policy SP35 – A	Accessible Location
----------------------------	---------------------

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A	N/A	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Indirect. ST/LT. + The proposed policy would seek to ensure that developments are appropriately served by a range of transport options including by foot, cycle or public transport.	Neutral. 0. A no policy option will not alter the status quo.	-
3.	N/A	•	N/A
4. To increase public safety and reduce crime and fear of crime.	Unknown? Given that the details and plans of future developments are not known it is not possible to quantify the effects upon the SA objective.	Neutral. 0. A no policy option will not alter the status quo.	-
5. to 10.	N/A	•	N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. LT + Policy adoption would pursue sustainable practices by striving to ensure that new developments would be situated appropriately to reduce the need travel but ensure that any required travel safe, secure and convenient in order to access facilities and services. The policy would increase the provision for sustainable modes of transport including cycling. This would have benefits in that local air quality and	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	health of residents would improve due to the increased options of travel.		
12. and 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT. + The proposed policy would seek to increase the accessibility to local services via foot, cycle or public transport. The utilisation of a sustainable transport method that would reduce emissions through decreased road traffic.	Permanent. Direct. ST/LT. + The no policy option will not alter the status quo, given current national legislation guidance to improve air quality.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT. ++ The proposed policy would require new development to mitigate the need to travel large distances to reach services and facilities by situating the developments in more accessible areas for public transport, pedestrians and cyclists. Therefore, the proposed policy would have a significant role in reducing the reliance on cars, whilst encouraging the use of sustainable transport or reducing the need to travel.	Neutral. 0. A no policy option will not alter the status quo.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT. + Policy adoption would seek to ensure that developments which increase the need for travel are appropriately serviced by a range of services that are accessible by foot, cycle or public	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	transport. This could link Thanet to wider south east region by providin methods of transport to areas to previously poorly accessible region	ng	
17. to 23	N/A		N/A
Summary			

The proposed policy would actively seek to grow and enhance safe sustainable methods of transport. In turn this could yield health benefits along side environmental air quality improvements. A no policy option would largely yield neutral effects due to no change in the status quo. Additional benefits of the proposed policy are likely to stem from promoting the need for developments to be located in accessible locations. This in turn could promote public transport use and reduce the need for private vehicles whilst also ensuring that developments are appropriately situated in relation to facilities and services.

Policy 36: Policy SP36 – Transport Infrastructure

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, Indirect + This might make future housing developments more appealing if residents have more choice in the modes of transport available to them.	Neutral. 0. A no policy option will not alter the status quo.	-
2. to 10.	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Neutral. 0. Neither the proposed policy nor the no policy option will not alter the status quo.		-
12. and 13	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the	Permanent, Direct LT +	Neutral. 0.	-
District's Air Quality Management Areas.	The proposed policy will contribute towards improving air quality by helping to reduce reliance on fossil fuel derived energy sources that are the source of atmospheric pollutants such as NO ₂ .	A no policy option will not alter the status quo.	
15. To provide a sustainable public	Permanent, Direct LT +	Neutral. 0.	-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	This option will support accessibility by increasing the range of modes available and helping to reduce reliance on private car use.	A no policy option will not alter the status quo.	
16. to 18	N/A		N/A
19. to 21	N/A.		N/A.
22. To reduce the global, social and	Permanent Direct LT ++	Neutral. 0.	-
environmental impact of consumption of resources by using sustainably produced and local products.	The combined effect of the proposed policy, along with additional infrastructure policies, will make a significant contribution towards achieving this objective by promoting the efficient use of fuel for transportation.	A no policy option will not alter the status quo.	
23. To increase energy efficiency and	Permanent Direct LT ++	Neutral. 0.	-
the proportion of energy generated from renewable sources in the area.	The combined effect of the proposed policy, along with additional infrastructure policies, will make a significant contribution towards	A no policy option will not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	achieving this objective by promoting the use of sustainable materials, re- using buildings and structures where possible and minimising waste in construction and operation and supporting the installation of low carbon and renewable energy efficient use of fuel for transportation.		
Summary The proposed policy is likely to have a positive effect against a number of sustainability objectives. Furthermore, the proposed policy is likely to have significant beneficial cumulative effects when considered with policies relating to greenhouse gas emissions and efficient use of resources.			

Policy 37: Policy SP37 – Connectivity

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 23	N/A		No SA required as this policy relates to transport modelling
Summary No SA required as policy relates to statement of intent to lobby for investment			

Policy 38: Policy SP38 – Strategic Road Network

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 23	N/A		No SA required as this policy relates to transport modelling
Summary No SA required as policy relates to statement of intent to undertake modelling of impact on strategic road network outside the district			

Policy 39: Policy SP39 – New Rail Station

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT ? An uncertain effect is predicted because creating a new station might help to boost the image of the area by making it more accessible. However, creating a new station away from the existing urban centres could detract from their sense of place if fewer people visit.	Neutral. 0. A no policy option will not alter the status quo.	The uncertain and associated with the proposed policy could be mitigated by combining it with other policies that ensure that where the station is located supports non-car transport links to the Airport, and employment sites and residential areas.
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT ++/? The proposed policy provides considerable potential benefit as it would increase accessibility to jobs across Kent and into Central London. A new station would allow a greater proportion of resident's easier access to	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	jobs in other towns along the HS1 route and also opportunities in the Thames Gateway and East and Central London. A new station could also provide a focus for further employment development if designed appropriately.		
	The effect is indirect because the proposed policy does not guarantee that the employment opportunities will be created or available to residents using the link.		
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT ++ The proposed policy would provide the potential benefits as it would contribute towards economic growth throughout Thanet. A new station would allow a greater proportion of resident's easier access to jobs in other towns along the HS1 route and also opportunities in the Thames Gateway and East and Central London. It would also support the visitor economy by increasing access to the District and the Airport. As a consequence this is likely to have a significant effect on per capita GVA.	Neutral. 0. A no policy option will not alter the status quo.	
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT ++ /? The proposed policy will create potential benefits, due to its proximity and potential for connectivity to the Airport. A new station would support	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	the visitor economy by attracting visitors to the area as well as providing the UK tourism market with enhanced access to the Airport, although the station and associated infrastructure could have an adverse visual and landscape effect		
10. To improve efficiency in land use	Permanent. Direct. ST/LT -/?	Neutral. 0.	During the design and construction
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	The proposed policy is likely to result in the development of a greenfield site and would therefore not be in support of this objective.	A no policy option will not alter the status quo.	there might be opportunities to re-use materials, existing features (e.g. drainage) to minimise potentially adverse effects.
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT + /?	Neutral. 0.	N/A.
of development is pursued	A new rail station would increase transport access for both Ramsgate and rural communities within its environs, opening up increased travel opportunities within Thanet and to London. However, pressure may be placed on land surrounding the new rail station to be developed for commuter housing, hence the uncertainty of the effects against this objective.	A no policy option will not alter the status quo.	
12. To conserve and enhance the	Permanent. Direct. ST/LT -/?	Neutral. 0.	The quality of design and how future
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	The proposed policy has the potential to alter the landscape character and have visual impacts in the area around the station.	A no policy option will not alter the status quo.	development takes account of character townscape and the countryside will be addressed under other issues and policy options.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	A new station would be mostly likely located on a greenfield site. However, during the design and construction there might be opportunities to re-use materials, existing features (e.g. drainage) to minimise potentially adverse effects.		
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? The proposed policy could have positive or negative effect on, listed buildings, scheduled monuments and other features of cultural, historical or archaeological value and their setting.	Neutral. 0. A no policy option will not alter the status quo.	How future development respects and integrates with heritage and archaeological features will be addressed under other issues and policy options including NPPF.
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct ST/LT + The proposed policy has the potential to have a positive effect. The policy could potentially result in modal shift away from private car use which might contribute towards achieving the objectives of the AQMA. However, the policy is unlikely to fully address the root cause of air quality issues in the District so the effect is considered minor	Neutral. 0. A no policy option will not alter the status quo.	_
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT ++ The proposed policy provides the greatest benefits to the provision of a sustainable transport network and would help to support modal shift,	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	particularly for commuters from settlements outside of Ramsgate. This will help to expand rail capacity within the District, access to the Airport by non-private car and would also increase the transport for commuters to access the district from elsewhere and also increase access to other centres in Kent and London via the HS1 route.		
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT ++ The proposed policy provides the greatest benefits to the provision of a sustainable transport network and would help to support modal shift, particularly for commuters from settlements outside of Ramsgate. This will help to expand rail capacity within the District, access to the Airport by non-private car and would also increase the transport for commuters to access the district from elsewhere and also increase access to other centres in Kent and London via the HS1 route.	Neutral. 0. A no policy option will not alter the status quo.	
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT -/? Increased development is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and	Neutral. 0. A no policy option will not alter the status quo.	The potentially significant adverse effect of the proposed policy can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England

Page 549

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁴⁷ . Potentially this could result in a significant effect.		2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Direct. ST/LT ? Although the development of a new station and related infrastructure will result in the emission of GHG. There is the potential for these emissions to be offset by reduced emissions from modal shift away from private car use.	Neutral. 0. A no policy option will not alter the status quo.	The scale of the potential benefits of the proposed policy are, at this level of assessment, unclear due to insufficient detail about the scale of potential emissions reductions from modal shift. It is suggested that development management policies include this as a requirement of any future development to fully understand the contribution that these measures could make to tackling climate change.
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct ST/LT 0 A neutral effect is predicted because the broad area described for the station is outside the flood zones. If the development is greater than 1ha, which is quite likely, it will also require a FRA which will identify how surface runoff levels will be maintained or enhanced.	Neutral. 0. A no policy option will not alter the status quo.	It is also assumed that the requirements of the NPPF would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ?	Neutral. 0.	The effects of land allocation has been assessed as part of the site allocations process as detailed within this SA. For

⁴⁷ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	The proposed policy has the potential to have a positive or a negative effect. This is dependent upon where the development occur and also the type of development. However the proposed site is unlikely to have an effect on any locally designated sites.	A no policy option will not alter the status quo.	example it will be possible to assess potential effects upon this particular objectives through studying the Kent BAP.
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs (though a general site is safeguarded for the development), the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district.	Neutral. 0. A no policy option will not alter the status quo.	The effects of land allocation has been assessed as part of the site allocations process as detailed within this SA. The NPPF also requires unacceptable risks to water to be mitigated therefore development plans and national policy should provide adequate safeguards, particularly for aquifers and SPZs. This would subsequently address the potential uncertainty.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.	Neutral. 0. A no policy option will not alter the status quo.	There are uncertainties associated with the proposed policy because there is insufficient detail regarding the proposed development to make a robust assessment.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct, Indirect. ST/LT ? There is the potential for an adverse effect as the development of a new station could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. However, these may be offset by reductions in emission from modal shift from cars to trains. So an uncertain effect is predicted.	Neutral. 0. A no policy option will not alter the status quo.	There are uncertainties associated with the proposed policy because there is insufficient detail to make a robust assessment at this stage.
	significant beneficial effects, particularly in	0 1 2	· · · ·

visitor economy) and providing infrastructure to support modal shift. However, without further details of the proposed policy it is not possible to assess whether it is likely to result in significantly greater benefits than the no policy option. Where potentially adverse or uncertain effects have been predicted mitigation measures can be used to ameliorate the effects.

Policy 40: Policy E01 – Retention of existing employment sites

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Indirect. ST/LT - /? Some of the sites that would be protected are within urban areas and could potentially be used for housing. As a result this option might indirectly restrict growth in housing development.	Permanent. Indirect. ST/LT +/? By removing this, the protection of these sites from non-employment uses could have a beneficial effect if this resulted in further housing development occurring.	-
2.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
3. To provide access to appropriate	Permanent. Indirect. ST/LT +/?	Permanent. Indirect. ST/LT ?/+	-
educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Growth in the employment sites and the associated job opportunities could indirectly contribute towards improving the educational attainment of the working age population by creating demand for an appropriately qualified and skilled workforce.	Removing the protection of these sites for employment uses could have an indirect adverse effect on education if it results in fewer opportunities for students. But this might be offset if some of these sites where used for providing new or enhancing existing education facilities.	
4. To increase public safety and reduce crime and fear of crime.	Permanent. Indirect. ST/LT +/? Supporting the continued growth in job opportunities and the overall growth in the economy will help to contribute towards reducing deprivation by increase employment opportunities. Indirectly this could help to reduce levels of crime. However, any links are remote hence the predicted impact is minor and uncertain.	Permanent. Indirect. ST/LT +/? If it is assumed that this option would result in the development of these sites there is also the potential for other uses to support economic growth and create places that are less vulnerable to crime and reduce the fear and perception of a risk of crime.	There are no significant differences between the policy and no policy options. Although there is no requirement for mitigation it is recommended that design principles such as 'Secured by Design'.
5.	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent Indirect. ST/LT +/? The proposed allocation will indirectly help to support a 'sense of place' by ensuring that jobs are located in town centres but are not over dominated by employment uses that could adversely impact on the sense of place.	Permanent Indirect. ST/LT +/? The no policy option has the potential to have a positive effect because it could allow alternative uses, to employment, to be developed which could also contribute towards creating a vibrant and balanced community with a sense of place.	Although positive effects were identified the uncertain effects of could be mitigated by spatial policy and allocations taking into account potential effects on communities and a sense of place.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent Direct. ST/LT + + The spread of sites means that the associated job opportunities are accessible from the District's main urban and residential areas. Focussing future development to areas where existing employment uses are present will also help to support the creation of internal completion for employees which could also provide benefits for the District.	Permanent Direct. ST/LT - /? This option could potentially have a negative effect because it could result in development that does not create employment opportunities. However, it is noted that this option might result in other development that contributes towards the economic growth of the District so an 'uncertain effect is predicted'.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent Direct ST/LT + + The proposed policy is likely to have a positive effect on the local economy because it supports the creation of new employment sites that can contribute towards economic growth and GVA. The spread of sites also means that some of these benefits can trickledown to adjacent areas and support wider regeneration.	Permanent Direct. ST/LT - /? The no policy options could potentially have a negative effect because it could result in development that does not create employment opportunities or contribute towards economic growth. However, it is noted that this option might result in other development that contributes towards the economic growth of the District so an 'uncertain effect is predicted'	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy options have the potential to have both a positive and negative effect depending on where the sites are located. As a result an overall uncertain effect is predicted.		-
10. To improve efficiency in land use through the re-use of previously	Permanent Indirect. ST/LT +/?	Permanent. Direct. ST/LT -/?	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	The proposed policy will retain already allocated sites for future employment redevelopment. This reduces dependency on additional, non- employment land, to satisfy demand	The no policy options have the potential to result in a negative effect on this objective because there is chance that they will result in the development of greenfield sites.	
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT +	·	-
of development is pursued.	The majority of existing sties area located urban areas in the District.	d on key road routes on the edge of main	
	As a result they are more likely to be acc motorised modes of transport. Therefore		
12. To conserve and enhance the	Neutral. 0.		-
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	The proposed policy and no policy option could have positive or negative effect on landscape, character of open space and the public realm as well as the appearance of the District's countryside. However, given that these sites are already developed the surrounding landscape character is less likely to be sensitive to change less likely to be sensitive to change.		
13. To preserve and enhance sites,	Permanent. Direct. ST/LT ?		How future development respects and
features and areas of historic archaeological or architectural importance, and their settings.	The proposed policy and no policy option on conservation areas, listed buildings, so of cultural, historical or archaeological va	cheduled monuments and other features	integrates with heritage and archaeological features will be addressed under development management and design policy options.
			It is anticipated that any potentially negative effects can be mitigated using this approach and the requirements of the NPPF.
14. To improve air quality in the District's Air Quality Management	Permanent. Indirect. ST/LT ?	Production and the Court	Development management policy options will address the potential
Areas.	The proposed policy and no policy option established AQMAs therefore there the li	a direct development away from the kelihood of an adverse effect occurring is	uncertainty.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			Furthermore, any development that could impact on the AQMA would require relevant assessments to be undertaken to support subsequent planning applications.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT +/? The majority of existing sties area located on key road routes on the edge of main urban areas in the District. As a result they are more likely to be accessible via public transport and non-motorised modes of transport. Therefore a minor beneficial effect is predicted.		All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	The majority of existing sties area located on key road routes on the edge of main urban areas in the District. As a result they are more likely to be accessible via public transport and non- motorised modes of transport. Therefore a minor beneficial effect is predicted		All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT -/? Increased development is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁴⁸ . Potentially this could result in a significant effect.		The significant adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste

⁴⁸ Based on data on landfill capacity in Kent from the Environment Agency.

Page 555

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	However, there is significant uncertainty generated under the proposed policy or no determined by the nature of the employm	o policy option, because this is also	facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	There is the potential for a negative effect because an increase in development land uses could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by the nature of the land use and the		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	A positive effect is predicted because land around employment sites is not within any of the Environment Agency's Flood zones or those identified in the SFRA.		It is also assumed that the requirements of the NPPF would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy and no policy option have the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. However it is noted that none of the sites are predicted as being likely to have a significant effect on an internationally designated site.		-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy and no policy option have the potential to have both a positive and negative effect depending on where development occurs and the type of development.		-
22. To reduce the global, social and environmental impact of consumption	Permanent. Direct, Indirect. ST/LT -/?		There are uncertainties associated with both options because there is

4. To increase public safety and reduce	Permanent. Indirect. ST/LT +/?	Neutral. 0.	-
crime and fear of crime.	The proposed policy might help to increase levels of activity and natural surveillance in residential areas because there will be people present during weekday working hours	A no policy option will not alter the status quo.	
5.	N/A.		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT + The proposed policy has the potential to make a contribution towards this objective, as it provides the opportunity for home workers to contribute towards the local community. Supporting home working will have positive effect on the sense of place and community be reducing the 'dormitory town effect'. For example home workers are more likely to use local shops and facilities rather than those in the town centres which will help to make the local centres more viable and vibrant	Neutral. 0. A no policy option will not alter the status quo.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT + The proposed policy is not directly about job creation. However, it would support flexibility in the way people work which may allow people who have not been able to get into work due to other commitments (e.g. childcare) might be able to.	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT + The proposed policy is not directly about economic growth. However, it would support flexibility in the way people work which may allow people who have not been able to get into work due to other commitments (e.g. childcare) might be able to. As a result they are more likely to make positive contribution to the wider economy and growth.	Neutral. 0. A no policy option will not alter the status quo.	-
9. to 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Indirect. ST/LT +/? The proposed policy is likely to have a beneficial effect in supporting this objective as it reduces the need for office space. However, these impacts might be felt elsewhere, such as London. The proposed policy potentially has a positive effect because key facilities (e.g. schools, health care and amenities) are often located in close to residential areas. However the benefits will only be minor and indirect.	Neutral. 0. A no policy option will not alter the status quo.	-
12. to 13	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT +/? The proposed policy could potentially help to reduce emissions by reducing their need to travel and could support a more sustainable pattern of development. Potential indirect effect if the proposed policy results in fewer people travelling by car, thereby reducing road traffic emissions. However the scale of any effect will be small therefore a minor effect is predicted.	Neutral. 0. A no policy option will not alter the status quo.	The no policy option does not provide stimulus that would accelerate the improvement and greater provision of communication infrastructure hence the neutral effect.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy has the potential to allow people to reduce their need to travel. Requiring it on new development may also benefit existing residential areas if it makes providing more connectivity and the increased speed / capacity more cost effective for service providers. The proposed policy will provide the infrastructure that will help people to reduce their need to travel, by working from home. But this policy will not guarantee that residents and businesses will do this, therefore there is a degree of uncertainty associated with this option.	Neutral. 0. A no policy option will not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
16. To develop key sustainable	Permanent Indirect ST/LT +/?	Neutral. 0.	-
transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	The proposed policy could potentially help to support a more sustainable pattern of development. Potential indirect effects of the proposed policy results in fewer people travelling by car. However the scale of any effect will be small therefore a minor effect is predicted.	A no policy option will not alter the status quo.	
17.	N/A		N/A
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. ST/LT +/? The proposed policy could potentially help to reduce emissions by reducing their need to travel and could support a more sustainable pattern of development. Potential indirect effects may occur if fewer people are travelling by car, thereby reducing road traffic emissions. However the scale of any effect will be small therefore a minor effect is predicted.	Neutral. 0. A no policy option will not alter the status quo.	
19. to 22	N/A		N/A
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. ST/LT +/? The proposed policy might have a positive effect because it would help to reduce the need of people to travel. However, there is a degree of uncertainty because greater numbers of	Neutral. 0. A no policy option will not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	people working from home might result in the less efficient use of energy (e.g. lighting and heating numerous homes rather than offices or workplaces).		
Summary			

The proposed policy clearly has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working) and by indirectly helping to make residential areas and local centres more vibrant by increasing day time weekday activity. It should however be noted that the potential sustainability benefits of this option are only likely to be realised as part of wider sustainability interventions. Any potentially uncertain and/or adverse effects can be mitigated by the requirements of the NPPF and at the local level through development management policies.

Policy 42: Policy E03 – Digital Infrastructure

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Indirect. ST/LT +/? The proposed policy has the potential to improve access to services, particularly in new developments. But this cannot be assessed in detail until the location of new development is known. An uncertain effect is predicted because until it is known where developments will occur; it is not possible to determine if vulnerable people will benefit.	Neutral. 0. A no policy option will not alter the status quo.	Any uncertainties could be addressed by working with developers and providers to ensure people in deprived areas can access these facilities.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT +/? If this infrastructure means that people can work and live in the same area this option could contribute towards support the vibrancy and sense of place.	Neutral. 0. A no policy option will not alter the status quo.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT +/? This infrastructure will help to support existing business and provide the facilities required by business (e.g. high speed broadband). By providing these facilities the District will be able to compete on a more equal basis with other areas and indirectly this will support job creation.	Neutral. 0. A no policy option will not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT +/? This infrastructure will help to support existing and new business and provide the facilities required by business (e.g. high speed broadband). By providing these facilities the District will be able to compete on a more equal basis with other areas and indirectly this will support the growth in GVA.	Neutral. 0. A no policy option will not alter the status quo.	-
9. and 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Indirect. ST/LT +/? The proposed policy has the potential to allow people to reduce their need to travel and could support a more	Neutral. 0. A no policy option will not alter the status quo.	-

19.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
20. To conserve and enhance biodiversity.	Permanent. Indirect. ST/LT ? An uncertain effect is predicted because the physical manifestation of telecommunication infrastructure can sometimes be intrusive (e.g. impact on the habitats of protected species).	Neutral. 0. A no policy option will not alter the status quo.	Any potentially adverse effects of the infrastructure would be mitigated by NPPF policy and also possibly development management policies. Any infrastructure works would also be subject to relevant legislation.
21.	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT +/? The proposed policy could potentially help to reduce the consumption of resources by providing faster and more accurate information transfer through technology. This option might have a positive effect if it allows businesses to manage their supply chains more efficiently.	Neutral. 0. A no policy option will not alter the status quo.	-
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. ST/LT +/? The proposed policy is the more sustainable options. However the predicted effect is minor and would be dependent on other policies to result in a positive effect. This option might have a positive effect because it would help to put into place the infrastructure to support smart grids or other technologies. However, it will not drive an overall increase in renewable generation.	Neutral. 0. A no policy option will not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
and reduced business travel) and supportin	tial to support the achievement of a number ng the creation of jobs and economic growt ts can be mitigated by implementing the sug	h by ensuring that the communication infra	astructure is also provided. Any

Policy 43: Policy E04 – Primary and Secondary Frontages

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT+ The socio benefits of actively encouraging safeguarding and setting permitted activities along primary and secondary frontages would enhance local appeal and create a sense of pride, through creating community hubs to encompass culture, leisure, arts and heritage. Regeneration of primary and secondary would help enhance the local community feel by investing and enhancing the area. The local facilities that grow would be available to local residents' not just tourists which would increase recreational and functional opportunities in one centralised location.	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT+ By adopting the policy and supporting safeguarding of uses, within primary and secondary frontages, employment hubs can be created. Through allowing only set types of activity main shopping and retail services or office spaces can be prioritised to create a central hub of activity which could lead to the growth of employment opportunities and investment.	Neutral. 0 A no policy option would not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT+ Through safeguarding primary and secondary frontages, a centralised location can be created to meet the demands of consumers. As a result, the potential negative effects of a mixed use frontage will not be realised. However, secondary frontages will be allowed to utilise cultural, leisure, art and heritage uses, which will ensure a flow of tourism for multiple reasons and not just retail or business. Primary and secondary frontages will therefore help create viable business opportunities, facilitating regeneration and employment. As such sustainability will grow as specific locations will act as hubs of	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	commercial activity and provide a clear spatial strategy for towns.		
9. To protect and enhance the areas	Permanent. Direct. ST/LT+	Neutral. 0	-
natural, semi-natural and street scene to support the tourist economy.	Adoption of the policy will preserve areas along the primary and secondary frontage for specific uses. As such the street scene will become a vibrant enhanced atmosphere of activity weather for tourism, business or retail.	A no policy option would not alter the status quo.	
10. To improve efficiency in land use	Permanent. Direct. ST/LT+	Neutral. 0	-
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Policy adoption will actively allow developments to regenerate along the primary and secondary frontages. As such reutilisation of land will occur in primary central locations of Towns within Thanet.	A no policy option would not alter the status quo.	
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT+	Neutral. 0	-
of development is pursued.	Through encouraging safeguarding of uses, within primary and secondary frontages, a centralised location can be created to meet the demands on consumers. As such the inhibition that could be created through a mixed use locality will be avoided and consequently will not restrict business activity through a loss of specific identity. However the secondary frontages will be allowed to utilise cultural, leisure, art and heritage uses to	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	ensure a flow of tourism for multiple reasons and not just retail or business. As such sustainability will grow as set locations will act as hubs of activity and provide a clear spatial strategy for towns.		
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT +/? Policy adoption will seek to develop the primary and secondary frontages of the towns within Thanet. Given the areas are targeted for business and tourist use it is likely that the policy will positive enhance the townscape character in order to attract business activity.	Neutral. 0 A no policy option would not alter the status quo.	-
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Indirect. ST/LT+ Policy adoption will seek to preserve and develop primary and secondary frontages with Thanet whereby each area has a specific functioning in order to promote business productivity. In order to attract investment and opportunities aesthetic value and local environment will play a role for tourists and business partners. As such by safeguarding certain activities in towns the preservation of architecturally important sites will be assured as it adds	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	character and appeal for potential customers.		
14. to 23	N/A		N/A
Summary			

Policy adoption has the potential to have a significant sustainability effect on towns. Whilst it restricts the housing market by only allowing residential properties upon non ground floors in the primary frontage, economic functioning will enhance. Through safeguarding primary and secondary frontages into set business activities whether tourism, retail or business the frontages will not undermine one another through a conflict of use and subsequently create areas that do not undermine one another. Indirectly by adopting the policy and creating centralised hubs of activity business opportunities could potentially grow and increase employment opportunities. As a no policy option would not alter the status quo of the local economy, policy adoption undoubtedly meets the requirements of the SA objectives.

Policy 44: Policy E05 - Sequential and Impact Test

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 4.	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they will help to support small scale town centre development in locations that can be accessed without the need to rely on public transport and are close to area s of deprivation and that could benefit from the job and economic opportunities	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy the potential to have a positive effect on this objective because they both help to support local and district centre's function and helps to support their sense of place.	Neutral. 0 A no policy option would not alter the status quo.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT +/? All of the options have the potential to have a positive effect in terms of job creation.	Neutral. 0 A no policy option would not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT +/? The proposed policy has the potential to have a positive effect on this objective because they would both help to support a range and variety of town centre uses that can be accessed in local and district centres. Therefore some minor benefits for economic growth are predicted.	Neutral. 0 A no policy option would not alter the status quo.	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT + The proposed policy would directly support the function of the local centres and will help to minimise development in areas of natural / semi-natural features of interest.	Permanent, indirect ST/LT - No policy option could encourage development in rural areas that would be more visually appropriate for town centres. If developments required in the town centre occur elsewhere this could reduce the town centres ability to cater to tourists	+

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Indirect. ST/LT +/? The proposed policy is likely to have a positive effect because, the majority of land within local centres have already been developed and therefore are already PDL.	Neutral. 0 A no policy option would not alter the status quo.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they support the provision of small convenience type stores in residential areas, thereby reducing the need for people to use private vehicles as much.	Permanent, direct ST/LT - No policy option could encourage an unsustainable pattern of development	-
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy as the effect will be determined by the design and scale of the development and how it relates to the existing townscape.	Permanent, direct ST/LT - No policy option could encourage development in rural areas that would be more visually appropriate for town centres?	The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy as it has the potential to enhance or detract from existing areas of heritage quality (e.g. the Conservation Areas).	Neutral. 0 A no policy option would not alter the status quo.	How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using this approach and the requirements of the NPPF.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the	Permanent. Direct. ST/LT ?	Permanent, direct ST/LT ?	-
District's Air Quality Management Areas.	The effects of the proposed policy is uncertain because they might result in some increases in road traffic that impacts on air quality. Likewise, they could result in reduction in emissions if shoppers use more sustainable forms of transport.	No policy option could lead to town centres developments located away from AQMAs.	
15. To provide a sustainable public	Permanent. Direct. ST/LT +	Permanent, direct ST/LT -	-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy has a the potential to have a positive effect on this objective because it supports the provision of small convenience type stores in residential areas, thereby reducing the need for people to use private vehicles as much.	No policy option could encourage developments appropriate for town centres to be located in areas further from transport hubs.	
16. To develop key sustainable	Permanent. Indirect. ST/LT +/?	Neutral. 0	-
transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	The proposed policy has the potential to have a positive effect on this objective because they support the provision of small convenience type stores in residential areas, thereby reducing the need for people to use private vehicles as much.	A no policy option would not alter the status quo.	
17. To reduce waste generation and	Permanent. Indirect. ST/LT -/?	Neutral. 0	The adverse effect can be mitigated
disposal and achieve the sustainable management of waste	Increased development from the proposed policy is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also	A no policy option would not alter the status quo.	through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan. Potentially this could result in a significant effect. However, there is significant uncertainty about the amount of waste that might be generated under each option because this is also determined by the nature of the employment use and the density of development.		England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. ST/LT -/? There is the potential for a negative effects associated with the proposed policy because an increase in development could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by the nature of the land use and the density of development.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy because the sites that are developed may or may not be	Neutral. 0 A no policy option would not alter the status quo.	The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
fluvial flood risk, in accordance with PPS25.	located in the Environment Agency's Flood zones or those identified in the SFRA.		
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy could have an adverse effect ecology and BAP species or positive effect, depending on where development occurs and how it occurs.	Neutral. 0 A no policy option would not alter the status quo.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district.	Neutral. 0 A no policy option would not alter the status quo.	- The NPPF also requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT -/? There is the potential for a negative effect associated with the proposed policy because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. ST/LT -/? There is the potential for an adverse effect associated with the proposed policy because an increase in retail could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

Summary

The proposed policy has both positive and negative effects against the sustainability objectives. The proposed policy is likely to only support out of town centre development that contributes to sustainable economic growth, the local sense of place, and sustainable transport. This was on the basis that locating small convenience type shops in or close to residential areas, by setting thresholds lower than NPPF, would avoid larger retail units being developed that could detract and potentially weaken the market for the larger retailers at the Town Centres. All of the adverse or uncertain effects can be avoided, or mitigated to a certain extent, by development management type policies, the implementation of the NPPF and compliance with environmental legislation.

16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT ? The effects of the proposed policy and no are not spatial and could result in visitors forms of transport or increasing the use of	and tourist taking both more sustainable	All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	 Permanent. Indirect. STT - / ? Increased development as a result of the proposed policy is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan⁵⁰. Potentially this could result in a significant effect. However, there is significant uncertainty about the amount of waste that might be generated as this is also determined by the nature of the use and the density of development. 	Neutral. 0 A no policy option would not alter the status quo.	The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.

⁵⁰ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. STT - / ? There is the potential for a negative effects as a result of the proposed policy because development could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by the nature of the land use and the density of development.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on development occurs. However, because none of the options are spatial the significance of the effects cannot be predicted.	Neutral. 0 A no policy option would not alter the status quo.	- It is also assumed that the requirements of the NPPF would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy could have an adverse or positive effect on ecology and BAP species, depending on where development occurs and how it occurs.	Neutral. 0 A no policy option would not alter the status quo.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? It is not possible to make a specific and robust comparison of the options without more detail about the nature and the location of the development.	Neutral. 0 A no policy option would not alter the status quo.	-

	No policy	Mitigation and enhancement measures
Permanent. Indirect. STT - / ? There is the potential for negative effects from the proposed policy as development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
Permanent. Indirect. STT - / ? There is the potential for an adverse effect from the proposed policy because an increase in tourist accommodation could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
	There is the potential for negative effects from the proposed policy as development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified. Permanent. Indirect. STT - / ? There is the potential for an adverse effect from the proposed policy because an increase in tourist accommodation could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of	There is the potential for negative effects from the proposed policy as development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified. Permanent. Indirect. STT - / ? There is the potential for an adverse effect from the proposed policy because an increase in tourist accommodation could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. Both the proposed policy and the no policy option are likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements.

	are spatial the significance of the effects cannot be predicted.		
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy could have an adverse or positive effect on ecology and BAP species, depending on where development occurs and how it occurs.	Neutral. 0 A no policy option would not alter the status quo.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? It is not possible to make a specific and robust comparison of the proposed policy without more detail about the nature and the location of the development.	Neutral. 0 A no policy option would not alter the status quo.	-
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. STT - / ? There is the potential for a negative effect as a result of the proposed policy because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. STT - / ? There is the potential for an adverse effect as a result of the proposed policy because an increase in tourist accommodation could indirectly	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.		should be designed and contribute towards reducing GHG emissions).

Summary

The proposed policy is likely to have a significant effect on job creation and economic growth in the tourist and visitor economy. The protection of tourist accommodation could detract from the community sense of place due to the presence of accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However providing tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy is likely to have uncertain effects. This is particularly because the options do not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

Policy 48: Policy E09 -	- Protection of Existing Tourist Accommodation

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct, ST/LT -/? The proposed policy could result in an adverse effect, particularly if facilities become vacant, boarded up and occupy a prominent position within a coastal town or other settlement, whilst the owners seek to prove they are no longer	Permanent. Direct. ST/LT ? Without this policy the effects are uncertain because it would not influence whether or not a site or facility is retained or lost	The uncertain effects of the proposed policy could be mitigated by spatial policy and allocations taking into account potential effects on communities and a sense of place.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	economically viable (a required under the policy). The increased presence of tourist accommodation could create less of a community feel, due to visitors who utilise the accommodation, not residing for significant lengths of time to contribute to the local community. However there is a degree of uncertainty as to whether or not an adverse effect would occur as sites that prove they are not economically viable could be redeveloped and enhance regeneration of the local area and provide new facilities and services.		
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT ? The proposed policy could be beneficial if it supports the visitor economy by ensuring the safeguarding of tourist accommodation for a significant amount of time to allow for the tourist industry to re-establish itself and continue to provide an income during high season and prevent the loss of employment. However it could also have an adverse effect if it prevents applications for reasonable changes of use that could create potentially more sustainable job opportunities that exist all year round.	Permanent. Direct. ST/LT ? Without this policy the effects are uncertain because it would not influence whether or not a site or facility is retained or lost and it is not clear whether there would be an effect on job opportunities.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT ? The proposed policy could be beneficial if it supports the visitor economy by ensuring that appropriate visitor accommodation is provided across Thanet. However it could also have an adverse effect if it prevents applications for reasonable changes of use that could contribute towards economic growth.	Permanent. Direct. ST/LT ? Without this policy the effects are uncertain because it would not influence whether or not a site or facility is retained or lost and it is not clear whether there would be an effect on economic growth.	Uncertain effects could be mitigated by spatial policy and allocations that direct development towards regeneration areas so that the benefits from the development of new employment sites are more likely to reach those in greatest need. With this mitigation in place both options would result in a significant beneficial effect.
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT ? E09 could be beneficial if it supports the visitor economy by ensuring that appropriate visitor accommodation is provided across Thanet. However it could also have an adverse effect if it prevents applications for reasonable changes of use that could contribute towards economic growth.	Permanent. Direct. ST/LT ? Without this policy the effects are uncertain because it would not influence whether or not a site or facility is retained or lost and it is not clear whether there would be an effect on economic growth.	Uncertain effects could be mitigated by spatial policy and allocations that direct development towards regeneration areas so that the benefits from the development of new employment sites are more likely to reach those in greatest need. With this mitigation in place both options would result in a significant beneficial effect.
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct, ST/LT -/? E09 could have an adverse effect if it prevents applications for reasonable changes to the accommodation sites and as a result developers seek alternative greenfield sites for development.	Permanent. Direct. ST/LT ? Without this policy the effects on PDL and greenfield sites are uncertain.	Given the limited amount of PDL available it is unlikely that development of greenfield sites can be avoided. Instead the potentially adverse effects of greenfield development could be mitigated via development management type policies.
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT ? The effects of the proposed policy and no are not spatial and could result visitors an forms of transport or increasing the use of	d tourist taking both more sustainable	All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			policies) that support the integration of employment sites with public and non- motorised transport network.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct, ST/LT -/? The proposed policy could result in an adverse effect, particularly if accommodation becomes vacant, boarded up and occupy a prominent position within a coastal town or other settlement, yet marginally passes the economic viability tests which will prevent it from being redeveloped or replaced, despite the landowner's wishes. However there is a degree of uncertainty as to whether or not an adverse effect would occur.	Permanent. Direct. ST/LT ? Without this policy the effects are uncertain because it would not influence whether or not a site or facility is retained or lost.	The uncertainties associated with all of the options could be mitigated by a combination of site selection to choose locations where development is unlikely to have an adverse effect and by putting in place development management and design policies that result in development that is sensitive to the surrounding townscape, landscape and visual receptors.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct, ST/LT -/? The proposed policy could result in an adverse effect, as if tourist accommodation is unfeasible developments could occur which could potentially remove architecturally important features from the local area by structures of historic and architectural importance. However there is a degree of uncertainty as to whether or not an adverse effect would occur.	Permanent. Direct. ST/LT ? Without this policy the effects are uncertain because it would not influence whether or not a site or facility is retained or lost	How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using this approach.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT ? Neither the proposed policy nor the no po development so it is not possible to make	blicy option identify specific sites for an informed assessment of the effects.	Any development that could impact on the AQMA would require relevant assessments to be undertaken to support subsequent planning applications.
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The effects of the proposed policy and the no policy option are uncertain because they are not spatial and could result in visitors and tourist taking both more sustainable forms of transport or increasing the use of private cars.		All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	The effects of the proposed policy and no policy option are uncertain because they are not spatial and could result in visitors and tourist taking both more sustainable forms of transport or increasing the use of private cars.		All of the potentially significant or uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of employment sites with public and non- motorised transport network.
17. To reduce waste generation and disposal and achieve the sustainable management of waste		verted from landfill. of resources by using sustainably produced and local products.	policy option because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type		development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	There is the potential for an adverse effect as a result of both the proposed policy and no policy option, because an increase in tourist accommodation could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

Summary

The proposed policy would ensure a fair assessment of economic viability across a minimum of a calendar year. This would safeguard jobs for a period of time alongside ensuring tourist accommodation is present for at least one more low/high season cycle to assess if the tourist trade will re-establish itself and be increasingly profitable. The policy would also ensure knee jerk decisions are not made by landowners to redevelop their assets. Protection of tourist accommodation could detract from the community sense of place due to the presence of accommodation that potentially may not contain residents that actively contribute to community consistently through the year. However safeguarding tourist accommodation will have economic benefits in that it will ensure there is sufficient accommodation for tourists to visit the area and contribute to the local economy.

The proposed policy likely to have a number of uncertain effects. This is particularly because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.

20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option could have an adverse or positive effect on ecology and BAP species, depending on where development occurs and how it occurs.		-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ?		-

 $^{^{\}rm 53}$ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
	It is not possible to make a specific and robust comparison of effects of the proposed policy and the no policy option without more detail about the nature and the location of the development.			
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. STT -/? There is the potential for negative effects as a result of both the proposed policy and no policy option because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).	
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. STT -/? There is the potential for an adverse effect from both the proposed policy and no policy option as an increase in development could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).	
Summary The proposed policy is likely to have a positive effect, on job creation, economic growth and potentially the use of previously developed land. However, without this policy there would be a greater degree of uncertainty as to whether or not these effects would be realized, and would be positive or negative. The proposed policy is likely to have uncertain effects, because the policy does not identify in any detail where development is likely to occur. This uncertainty can be addressed during the assessment of specific site allocations. All of the other remaining negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements.				

Policy 52: Policy E13 – Language Schools

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The criteria set out in the proposed policy will help to minimise potentially adverse effects on neighbouring residents and communities near language schools.	Permanent. Indirect. ST/LT ? The effects of the no policy option are uncertain because without policy support no new schools would be developed which might reduce the antisocial side effects. But it would not address any wider issues, hence an uncertain effect.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT + The proposed policy will continue to contribute towards the local job market by allow further expansion of language schools which in turn is likely to create some job opportunities.	Neutral. 0 A no policy option would not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT +/? The proposed policy will continue to contribute towards the local economy by allowing further expansion of language schools which in turn is likely to create some job opportunities. The magnitude of the effect is uncertain because the extent of future economic growth from language schools is uncertain.	Permanent. Direct, ST/LT -/? The effects of the no policy option are negative because removing policy protection would not result in further language economic growth. The magnitude of the effect is uncertain because the extent of future economic loses from this option.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas	Permanent. Direct. ST/LT +/?	Permanent. Direct, ST/LT -/?	-
natural, semi-natural and street scene to support the tourist economy.	The proposed policy will continue to contribute towards the local tourist economy by allowing further expansion of language schools which in turn is likely to create some job opportunities. The magnitude of the effect is uncertain because the extent of future economic growth from language schools is uncertain.	The effects of the no policy option are negative because removing policy protection would not result in further tourism economic growth from language schools. The magnitude of the effect is uncertain because the extent of future economic loses from this option.	
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Indirect. ST/LT ?	Neutral. 0	-
	The effects of the proposed policy are uncertain because, depending on the location of development it could have a positive or negative effect.	A no policy option would not alter the status quo.	
11. To ensure that a sustainable pattern	Permanent. Indirect. ST/LT ?	Neutral. 0	-
of development is pursued.	There is the potential that if language schools are constructed significantly out of the town centres that they cannot be accessed by public transport or by walking.	A no policy option would not alter the status quo.	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT +/?	Neutral. 0	The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options.
	The proposed policy is likely to have a positive effect by preventing the development of language schools that could adversely affect the local character of a town or area.	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? The effects of the proposed policy are uncertain because the criteria do not define where the schools should be located or how they should take into account heritage and architectural features.	Neutral. 0 A no policy option would not alter the status quo.	How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using this approach and the requirements of the NPPF.
14. To improve air quality in the District's Air Quality Management	Neutral. 0		-
Areas.	The effects of both the proposed policy and no policy option are neutral because language school students are unlikely to travel by private car so won't impact on air quality. Likewise, removing policy support would prevent future development of language schools.		
15. To provide a sustainable public	Neutral. 0		-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The effects of both the proposed policy and no policy option are neutral because language school students are unlikely to travel by private car so won't impact on air quality. Likewise, removing policy support would prevent future development of language schools.		
16.	N/A		N/A
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. ST/LT -/? Increased development from the proposed policy may result in the generation of greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal.	Neutral. 0 A no policy option would not alter the status quo.	The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁵⁴ . Potentially this could result in a significant effect. However, there is significant uncertainty about the amount of waste that might be generated under each option because this is also determined by the nature of the employment use and the density of development.		Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. ST/LT -/? There is the potential for a negative effect because an increase in development could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by the nature of the land use and the density of development.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy because it does not specify the location or type of development that might occur.	Neutral. 0 A no policy option would not alter the status quo.	The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.

⁵⁴ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy because it does not specify the location or type of development that would occur as a result of the options.	Neutral. 0 A no policy option would not alter the status quo.	Any potentially adverse effects of the proposed policy would be mitigated by NPPF policy and also possibly development management policies. Any infrastructure works would also be subject to relevant legislation.
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district and the Bathing Waters Directive (for Broadstairs).	Neutral. 0 A no policy option would not alter the status quo.	The NPPF also requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct. ST/LT -/? There is the potential for an adverse effect as a result of the proposed policy because an increase in language schools could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

Summary

The proposed policy is likely to result in positive effects, particularly in terms of job creation and supporting economic growth associated with language schools. The potentially negative or uncertain effects associated with the proposed policy can be mitigated by development management policies. The no policy option would avoid a lot of the potentially adverse effects associated with the proposed policy. However, over the long term in particular it could have a negative effect on the economy, if opportunities to increase the provision in this sector are lost.

Policy 53: Policy E14 – Quex Park

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + Creation of the Quex Park facility would aid site diversification to create a tourism and leisure development with the upkeep of the House and Gardens estate. Ensuring the protection of such	Unknown? A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	-

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
	heritage assets would give opportunities for locals to utilise such facilities and create a community atmosphere and pride within the region for upkeep a cultural asset.		
7. To provide access to employment	Permanent. Direct. ST/LT +	Unknown?	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Policy adoption would allow the protection and development of Quex Park and support their future role in the visitor economy. Subsequently policy adoption would be a positive effect on job opportunities by the promotion of the tourist and leisure facilities.	A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT + Policy adoption would allow the protection and development of Quex Park and support their future role in the visitor economy. Subsequently policy adoption would be a positive effect on job opportunities by the promotion of the tourist and leisure facilities.	Unknown? A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	Uncertain effects could be mitigated by spatial policy and allocations that direct development towards regeneration areas so that the benefits from the development of new employment sites are more likely to reach those in greatest need. With this mitigation in place both options would result in a significant beneficial effect
9. To protect and enhance the areas	Permanent. Direct. ST/LT +	Unknown?	-
natural, semi-natural and street scene to support the tourist economy.	Policy adoption would allow the protection and development of Quex Park and support their future role in the visitor economy. Subsequently policy adoption would be a positive effect on supporting the tourist economy.	A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT +/? Policy adoption would allow local assets to be retained and preserved which might help to prevent over development on the partly greenfield site of Quex Park.	Unknown? A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT ? The effects of both the proposed policy at they could result visitors and tourist via n increasing the use of private cars. Similar or unsustainable development practices th specific details of development plans are	The potentially uncertain effects identified can be mitigated by other policies that support the integration of increased sustainability practices and an enhanced transport network and local access to key facilities without placing excess stress on the existing infrastructure.	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT ? There is minimal difference between the specific nature of the development under impacts cannot be quantified. Similarly n because it would not influence whether or	The uncertainties associated with both policy options could be mitigated by development management and design policies that result in Quex Park development structures that are sensitive to the immediate landscape and visual receptors.	
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT + Policy adoption would allow a key site within Thanet and the associated assets of the estate to be retained and protected as such preventing any adverse effects on the historic or architectural assets through the safeguarding policy to promote the site	Unknown? A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	How future developments on the site integrate with heritage and archaeological features will be addressed under development management and design policy options.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
	for tourism and leisure but not to the detriment of the heritage assts.		
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT++/? Policy adoption does not provide any specific guidance in relation to air quality management. However given that policy adoption would be supported by national legislation in relation to air quality the effects would still be positive.	Permanent. Direct. ST/LT+ By not adopting the policy it is likely that new developments would yield neutral impacts due to current legislation and guidance on a national and international level regarding the management of air pollution (Clean Air Act).	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The effects of policy adoption are uncertain because the option is not specific with regards to improvement of public transport. Yet under policy adoption the results could be more visitors and tourist taking sustainable forms of transport to reach the Quex Park site. As such improvements to the local public transport network may occur but are not guaranteed.	Neutral. 0 A no policy option would not alter the status quo.	The unknown effects of the proposed policy can be mitigated by other policies (e.g. development management and transport policies) that support the integration of Quex Park with public and non-motorised transport network
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT ? The effects of the options are uncertain because they are not spatial and could result visitors and tourists taking both more sustainable forms of transport or increasing the use of private cars.		All of the potentially significant or uncertain effects identified here can be mitigated by other policies that support the integration of a transport network within new developments.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT - / ? Increased development as a result of the proposed policy on Quex Park is likely to generate greater volumes of waste, which might not by diverted from landfill. Yet		The adverse effect can be mitigated through wider waste management policy at the national and county scales

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
	similarly under no policy option, develops the safeguarded nature of policy adoption waste arising and requiring treatment and		which will include new Energy from Waste facilities and the increased diversion of material from landfill.
	However, there is significant uncertainty a generated under either option as policy ad protocols will already be in place across to developments via non safeguarding under until future plans become apparent, or if n neutral due to a status quo.		
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. ST - / ? There is the potential for a negative effect because development could occur under either option (under no policy scenario the site could be developed in any possible manner) which could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood is likely to be questionably minor as the Quex Park site is not significant in size.		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Both policy options have the potential to have both a positive and negative effect yet it is dependent on how works are undertaken on the Quex Park estate.		Ensure that BAP are also selected in order to reduce the effects and mitigate any potential negative impacts upon the SA objective.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT++ Policy adoption could have an adverse or positive effect on ecology and BAP species, depending on where development occurs and how it occurs. Yet national policies and legislation would protect biodiversity and environmental assets.	Permanent. Direct. ST/LT++ Adoption of a no policy scenario would still yield positive effects as existing legislation is already in place to protect biodiversity and natural assets across the UK	-

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct.ST/LT++/? It is not possible to fully quantify the effects of policy adoption as the sites specific characteristics regarding water are not known neither are the actual detailed plans of development locations in relation to any apparent assets. Yet national policies and legislation would protect such assets through the WFD.	Permanent. Direct.ST/LT++/? Adoption of a no policy scenario would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	-
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. STT - /? There is the potential for a negative effect because development upon the Quex Park site could occur via either scenario which in turn; could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the site is not overly large.		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. STT - /? Policy adoption could increase the presence of traffic and the accompanying consumption of resources in order to power the developments that would occur. As such energy usage would increase across the Quex Park site. However the scale of increase is unknown as is the prospect for any renewable onsite energy generation which has not been disclosed as a possibility or not.	Unknown? A no policy option would have unknown effects as the facility may or may not be managed. Resultantly the effects upon the objective are unknown.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

The proposed policy and no policy option commonly reflected one another in that the impacts were the same either as the future development specifics were unknown or that national legislation that already exists ensured that the objective would be met under either option. However under policy adoption it would be ensured that a

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
•	would yield significant economic benefits	local employment and helping develop a to which may not be attained under a no polic	-

Policy 54: Policy E15 – New build development for economic development purposes in the rural area

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
1. To 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Neutral. 0 The effects of both the proposed policy and no policy option are neutral because neither aims to provide new facilities or improve access to them.		-
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Neutral. 0 The proposed policy would not alter the status quo.	Permanent. Indirect. ST/LT -/? The no policy option would not have these safeguards and as result might lead to amenity conflicts, particularly if there are nearby residential areas in a village.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT + Both the proposed policy and the no policy option have the potential to indirectly support the creation of rural job opportunities. However the scale of any such development is likely to be limited so a minor effect is predicted.		Both options present an opportunity for TDC to work with future developers and operators to put in place measures and agreements (outside of the plan making process) to also try and secure schemes and training to help people, particularly the young unemployed, to take advantage of future job creation.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect by supporting rural economic growth and could make a significant contribution towards the district's per capita GVA.	Permanent. Direct. ST/LT +/? There is more uncertainty about the effects from the no policy option because over the long term potential benefits might be lost if the development results in adverse local impacts and/or reduces the productivity attributed to rural economies.	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT + The proposed policy would directly support this objective by ensuring that development does not detract from the value of the countryside as part of the tourist economy.	Permanent. Direct. ST/LT -/? The effects of the no policy option are negative because without the criteria, there may be development with the potential to detract from the natural environment and the visitor economy.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Indirect. ST/LT +/? The proposed policy could result in a positive effect because farm and rural buildings are often preferred for redevelopment because of their architectural interest.	Permanent. Indirect. ST/LT ? The no policy option is less likely to have a benefit than the proposed policy because it does not directly support rural development.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Indirect. ST/LT ? The proposed policy is likely to affect development patterns, but the level and nature of effects depends on the location and characteristics of developments.	Neutral. 0 A no policy option would not alter the status quo.	All of the uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of rural development sites with public and non-motorised transport network.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT ? The proposed policy is likely to affect the landscape in some form, but the level and nature of effects depends on the size and characteristics of developments.	Neutral. 0 A no policy option would not alter the status quo.	The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options. Potentially, any large scale development could require a Landscape and Visual Impact Assessment (LVIA) to be undertaken to assess the effects of applications as they come forward.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? The effects of both the proposed policy a because depending on where developmen affect designated heritage features and ar	How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using this approach and the requirements of the NPPF.	
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT 0 Both options are unlikely to alter the status quo.		Any development that could impact on the AQMA would require relevant assessments to be undertaken to support subsequent planning applications
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy may have a positive effect because it would support the process of rural regeneration and development. If development is located near existing rural settlements, it might	Permanent. Direct. ST/LT -/? The effects of the no policy option are potentially adverse because rural economic development might result in adverse local traffic impacts.	There is a degree of uncertainty associated with both options because the site specific issues of potential rural economic development cannot be assessed.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
	help to reduce the distance residents have to travel to get to work or access services		
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT +/? The proposed policy may have a positive effect because it would support the process of rural regeneration and development. If development is located near existing rural settlements, it might help to reduce the distance residents have to travel to get to work or access services	Permanent. Direct. ST/LT -/? The effects of the no policy option are potentially adverse because rural economic development might result in adverse local traffic impacts	There is a degree of uncertainty associated with both options because the site specific issues of potential rural economic development cannot be assessed.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Development as a result of both the proposed policy and the no policy option is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁵⁵ . Potentially this could result in a significant effect.		The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill. In addition to this It should also be noted that sustainable forms of waste management (e.g. Anaerobic digestion) might contribute towards a more diverse rural economy

 $^{^{\}rm 55}$ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
18. To ensure development within the District responds to the challenges associated with climate change.	There is the potential for a negative effect because an increase in development as a result of the proposed policy and no policy option could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for both the proposed policy and no policy option because they do not specify the location or type of development that would occur as a result of the options.		The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	An uncertain effect is predicted for both the proposed policy and no policy option because they do not specify the location or type of development that would occur as a result of the options.		Any potentially adverse effects of either of the proposed policy or no policy option would be mitigated by NPPF policy and also possibly development management policies. Any infrastructure works would also be subject to relevant legislation.
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district and the Bathing Waters Directive (for Broadstairs).		The NPPF also requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect from the proposed policy and no policy		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures	
of resources by using sustainably produced and local products.	resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.		setting out how new development should be designed to contribute towards resource efficiency).	
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for an adverse effect from both the proposed policy and the no policy option because an increase in development could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).	
Summary Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because it would allow Thanet to gain the benefits from rural economic development, whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy				

Policy 55: Policy E16 – Conversion of rural buildings for economic development purposes

option because it has been included to reflect the sustainability issues of a 'policy void'.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy would ensure that new developments utilising existing properties and structures were in keeping with local setting and as such	Neutral. 0 A no policy option would not alter the status quo.	The uncertain effects of the proposed policy could be mitigated by including criteria to avoid potential amenity conflicts (e.g. noisy economic related development located close to residential areas).

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	reutilisation of rural buildings would help enhance the community feel.		
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT + The proposed policy has the potential to indirectly support the creation of rural job opportunities. However the scale of any such development is likely to be limited so a minor effect is predicted.	Permanent, direct ST/LT - No policy option could hinder economic development/opportunities in rural areas.	Both policy options present an opportunity for TDC to work with future developers and operators to put in place measures and agreements (outside of the plan making process) to also try and secure schemes and training to help people, particularly the young unemployed, to take advantage of future job creation.
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect by supporting rural economic growth and could make a significant contribution towards the district's per capita GVA.	Permanent, direct ST/LT - No policy option would not support priority regeneration areas and not affect the status quo.	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT + The proposed policy would directly support this objective by ensuring that development does not detract from the value of the countryside as part of the tourist economy.	Neutral. 0 A no policy option would not alter the status quo.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT + The proposed policy would support reutilisation of rural farming buildings being converted thus meeting the objective.	Permanent, direct ST/LT - No policy option could encourage greenfield development, directly causing a negative impact on this objective??	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT +	Neutral. 0	
of development is pursued.	Policy E16 would allow reutilisation of existing structures which are likely to be placed and serviced appropriately by the current infrastructure that serviced the original building.	A no policy option would not alter the status quo.	
12. To conserve and enhance the	Permanent. Direct. ST/LT +	Neutral. 0	-
character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Option E16 could potentially support this objective by ensuring that development ties into and complements the surrounding landscape.	A no policy option would not alter the status quo.	
13. To preserve and enhance sites,	Permanent. Direct. ST/LT +	Neutral. 0	-
features and areas of historic archaeological or architectural importance, and their settings.	The proposed policy could potentially support this objective by ensuring that development is designed to be sympathetic and avoid adverse effects on designated heritage features and archaeology.	A no policy option would not alter the status quo.	
14. To improve air quality in the	Permanent. Direct. ST/LT 0		Any development that could impact on
District's Air Quality Management Areas.	Both options are unlikely to alter the status quo.		the AQMA would require relevant assessments to be undertaken to support subsequent planning applications
15. To provide a sustainable public transport network that allows access to	Permanent. Direct. ST/LT +	Permanent, direct ST/LT -	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy would likely already be serviced by key facilities and infrastructure due to utilisation of existing rural properties.	No policy option might move key facilities, services and employment opportunities further away from residential areas and so would require further transport provisions	
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT ? The proposed policy might help to minimise or avoid potentially adverse effects. However it might not prevent isolated development (outside of settlements).	Neutral. 0 A no policy option would not alter the status quo.	All of the uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of retail sites with public and non-motorised transport network.
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT -/? Development under the proposed policy is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁵⁶ . Potentially this could result in a significant effect.	Neutral. 0 A no policy option would not alter the status quo.	The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased diversion of material from landfill.

⁵⁶ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. STT -/? There is the potential for a negative effect because an increase in development associated with the proposed policy could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is also determined by the nature of the land use and the density of development.	Permanent, direct LT – No policy option could encourage greenfield development which would negatively impact the environment by removing carbon sinks?!?	The uncertainties and negative effects can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy because they do not specify the location or type of development that would occur as a result of the options.	Neutral. 0 A no policy option would not alter the status quo.	The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy because they do not specify the location or type of development that would occur as a result of the options.	Permanent, direct LT - No policy option could encourage greenfield development which would encroach on ecologically valuable habitat?	- Any potentially adverse effects of the proposed policy would be mitigated by NPPF policy and also possibly development management policies. Any infrastructure works would also be subject to relevant legislation.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy has the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district and the Bathing Waters Directive (for Broadstairs).	Neutral. 0 A no policy option would not alter the status quo.	The NPPF also requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct. ST/LT + The proposed policy would positively meet the objective as reutilisation of existing structures would mean that there is a reduced need to find resources for construction. However, the proposed policy does not guarantees that diversification projects will result in the re-development or reuse of existing buildings, structures and infrastructure.	Permanent, direct ST/LT - No policy option would encourage the building of new structures, which requires more material and so it might be harder to ensure all materials are sustainably produced and/or local.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for an adverse effect from the proposed policy because an increase in development could indirectly increase consumption of energy and resources thereby	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not necessarily directly linked to area of land allocated.		
Summary			
sustainable transport all ber	any positive effects and under the utilisation of existin nefit. However the policy is limited by the locations of lization of existing structures would have significant e	existing structures which may not be appr	ropriately placed for economic development

Policy 56: Policy E17 – Farm Diversification

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Neutral. 0 The effects of both the proposed policy and no policy option are neutral because neither aims to provide new facilities or improve access to them. If, as part of diversification, facilities were located on a farm any effects on this objective would be purely incidental. This applies to both options.		-
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Neutral. 0 The proposed policy would not alter the status quo.	Permanent. Indirect. ST/LT -/? The no policy option would not have these safeguards and as result might lead to amenity conflicts, particularly if there are nearby residential areas in a village.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT + Both the proposed policy and the no policy option have the potential to indirectly support the creation of rural job opportunities. However the scale of any such development is likely to be limited so a minor effect is predicted.		Both policy options present an opportunity for TDC to work with future developers and operators to put in place measures and agreements (outside of the plan making process) to also try and secure schemes and training to help people, particularly the young unemployed, to take advantage of future job creation.
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect by supporting rural economic growth and could make a significant contribution towards the district's per capita GVA.	Permanent. Direct. ST/LT +/? There is more uncertainty about the effects from the no policy option because over the long term potential benefits might be lost if the diversification results in adverse local impacts and/or reduces the productivity of the farm.	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT + The proposed policy would directly support this objective by ensuring that development does not detract from the value of the countryside as part of the tourist economy. Furthermore, diversification provides a greater opportunity to convert existing farm and rural buildings that may be under used and bring them back in to use thereby reducing development pressure on greenfield land.	Permanent. Direct. ST/LT -/? The effects of the no policy option are negative because without the criteria development with the potential to detract from natural environment and the visitor economy might occur.	-

Page 630

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Indirect. ST/LT +/? The proposed policy could result in a positive effect because farm and rural buildings are often preferred for redevelopment because of their architectural interest.	Permanent. Indirect. ST/LT ? The no policy option is less likely to have a benefit than the proposed policy because it does not directly support diversification.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Indirect. ST/LT +/? The proposed policy might have a positive effect when diversification type development occurs, particularly because of the criteria concerned with traffic impacts.	Neutral. 0 A no policy option would not alter the status quo.	All of the uncertain effects identified here can be mitigated by other policies (e.g. development management and transport policies) that support the integration of retail sites with public and non-motorised transport network.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT +/? The proposed policy might have a positive effect when diversification type development occurs, particularly because of the criteria concerned with landscape and visual effects	Neutral. 0 A no policy option would not alter the status quo.	The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options. Potentially, any large scale development could require a Landscape and Visual Impact Assessment (LVIA) to be undertaken to assess the effects of applications as they come forward.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? The effects of both the proposed policy and the no policy option are uncertain because depending on where development occurs, it scale and design it might affect designated heritage features and archaeology.		How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			this approach and the requirements of the NPPF.
14. To improve air quality in the District's Air Quality Management Areas.	Neutral 0 Both options are unlikely to alter the stat	us quo.	Any development that could impact on the AQMA would require relevant assessments to be undertaken to support subsequent planning applications
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy may have positive effect because it would support the development of farms, which if located near rural settlements might help to reduce the distance residents have to travel to get to work or access services	Permanent. Direct. ST/LT -/? The effects of the no policy option are potentially adverse because agricultural diversification might result in adverse local traffic impacts.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT +/? The proposed policy may have positive effect because it would support the development of farms, which if located near rural settlements which might help to reduce the distance residents have to travel to get to work or access services	Permanent. Direct. ST/LT -/? The effects of the no policy option are potentially adverse because agricultural diversification might result in adverse local traffic impacts	-
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. STT -/? Development as a result of both the proposed policy and the no policy option is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing		The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from Waste facilities and the increased

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	landfill capacity within Kent which could Potentially this could result in a significant		diversion of material from landfill. In addition to this It should also be noted that sustainable forms of waste management (e.g. Anaerobic digestion) might form part of the diversification.
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent. Indirect. STT -/? There is the potential for a negative effect result of the proposed policy and no polic energy and resources thereby increase em- likelihood of this effect is not clear at this the nature of the land use and the density	y option could increase consumption of issions of GHG gases. But the extent and stage because this is also determined by	The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for both t because they do not specify the location of as a result of the options.		The requirements of the NPPF would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for both t because they do not specify the location of as a result of the options.		Any potentially adverse effects of the proposed policy would be mitigated by NPPF policy and also possibly development management policies. Any infrastructure works would also be subject to relevant legislation.
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? Both the proposed policy and no policy o positive and negative effects depending o	ption have the potential to have both n where development occurs, the features	. The NPPF requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide

However, the extents of these effects are uncertain because the type and scale of development is not specified.		other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).	
23. To increase energy efficiency and	Permanent. Direct, Indirect. ST/LT -/?		The uncertainties can be addressed by	
the proportion of energy generated from renewable sources in the area.	e proportion of energy generated There is the potential for an adverse effect from both the proposed policy and		other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).	
Summary				
Both the proposed policy and no policy option have positive and negative effects. However, the proposed policy is more likely to result in neutral and beneficial effects than the no policy option because, by the use of criteria, it would allow the District to gain the benefits from agricultural diversification whilst avoiding many of the potential downsides (e.g. traffic impact, visual and landscape effects and adverse effects on nature conservation). All of the negative and uncertain effects associated with the proposed policy can potentially be mitigated either by development management policies or the NPPF requirements. However it may not be possible to enhance the effects of the no policy option because it has been included to reflect the sustainability issues of a 'policy void'.				

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 6	N/A	·	N/A
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT + The proposed policy will help to support economic growth in the agricultural sector which, according the Topic Paper, is likely to result in some job growth over the life of the plan.	Permanent. Indirect. ST/LT ? The effects of the no policy option are uncertain because removing policy protection might provide the sector with greater flexibility to exploit new opportunities and markets, or might result in the long term loss of valuable farmland for short term gain.	Both policy options present an opportunity for TDC to work with future developers and operators to put in place measures and agreements (outside of the plan making process) to also try and secure schemes and training to help people, particularly the young unemployed, to take advantage of future job creation.
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT + The proposed policy will help to support economic growth in the agricultural sector, by limiting any loss of land to those areas under other designations within the Local Plan.	Permanent. Indirect. ST/LT ? The effects of the no policy option are uncertain because removing policy protection might provide the sector with greater flexibility to exploit new opportunities and markets, or might result in the long term loss of valuable farmland for short term gain.	-
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Indirect. ST/LT ? The effects of both the proposed policy and no policy option are uncertain because retaining best and most versatile land might, in some locations restrict the growth of tourist economy. However, the no policy option might result in development that damages the natural /semi-natural environment.		-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from	Permanent. Direct. ST/LT ++ The proposed policy will have a benefit as it would directly prevent	Permanent. Indirect. STT -/?	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
buildings, and encourage urban renaissance.	development on greenfield / agricultural land.	The no policy option might, indirectly contribute towards development on greenfield sites.	
11.	N/A		N/A
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT +/? The proposed policy might have a positive effect because it will help to retain presence of agricultural land, which is a key part of the district's landscape character.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because there are no details about the nature of development that would occur.	. The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options. Potentially, any large scale development could require a Landscape and Visual Impact Assessment (LVIA) to be undertaken to assess the effects of applications as they come forward.
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? The effects of both the proposed policy and no policy option are uncertain because depending on where development occurs, it scale and design it might affect designated heritage features and archaeology.		How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially negative effects can be mitigated using this approach and the requirements of the NPPF.

	uncertain because by removing the policy could reduce GHG emissions (e.g. renew		should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT +/? By maintaining agricultural land use the proposed policy is more likely to have a beneficial effect by supporting infiltration and minimising surface runoff.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the no policy option because it does not specify the location or type of development that might occur.	The requirements of the NPPF would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct, Indirect. ST/LT -/? A potentially adverse effect is predicted for the proposed policy because it could prevent habitat creation or enhancement (although it is noted that by the use of set aside, buffer strips etc. intensive agriculture can enhance biodiversity).	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the no policy option because it does not specify the location or type of development that would occur as a result of the options.	Any potentially adverse effects of either of the options would be mitigated by NPPF policy and also possibly development management policies. Any infrastructure works would also be subject to relevant legislation.
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district and the Bathing Waters Directive (for Broadstairs).		The NPPF also requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Direct, Indirect. ST/LT -/? There is the potential for a negative effect from both the proposed policy and no policy option, as development could result in an increase in the consumption of		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			should be designed to contribute towards resource efficiency).
23.	N/A		N/A
Summary			

The proposed policy has the potential to contribute towards the economy, avoiding increases in flood risk and significant benefits for the protection of greenfield land from development. All of the negative and uncertain effects associated with both the proposed option and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the volume of 'uncertain' effects.

Policy 58: Policy E19 – Agricultural Related Development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT +/? The proposed policy does have the potential to have a positive effect on this objective, particularly where there is demand that out strips supply in rural areas and/or a lack of local affordable housing.	Neutral. 0 A no policy option would not alter the status quo.	-
2. To 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Indirect. ST/LT +/? The proposed policy has the potential to have a positive effect on this objective because they might allow people and services to be located in rural	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	settlements making them easier to access.	on access, particularly in deprived areas.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they both help to support rural settlement and areas function and helps to support their sense of place.	Permanent. Indirect. ST/LT -/? The effects of the no policy option are potentially negative because it might not provide the level of support required for rural settlements and areas.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT + The proposed policy will help to support job retention and creation within rural areas and the agricultural section in particular.	Permanent. Indirect. ST/LT -/? The no policy option may have an adverse effect because without any policy it might result in further losses of opportunities to create rural and agricultural jobs.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT + The proposed policy will help to support redevelopment and growth of businesses in rural areas that can help to support the forecast growth in the food and agricultural sectors creation within rural areas and the agricultural section in particular. In addition, it is likely to have an indirect effect on the economy by potentially increasing the access that rural businesses have to potential employees as well as the economic benefits of housing growth.	Permanent. Indirect. ST/LT -/? The no policy option may have an adverse effect because without any policy it might result in further losses of opportunities to grow the agricultural sector.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT ? The effects of both the proposed policy and the no policy option. This is because depending on the nature of development and where they are located they could have a positive or negative effect.		-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT ? The effects of the proposed policy and no policy option are unclear. This is because depending on the nature of development and where they are located they could have a positive or negative effect.		Potential effects on greenfield sites will be assessed as part of the site allocation SA as will density of development. This will allow a more robust assessment of the predicted effects to be made.
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT + The proposed policy has a the potential to have a positive effect on this objective because they could result in development that helps to reduce the distance that people have to travel to access services.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects.	-
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for both the proposed policy and no policy option because the effect will be determined by the design and scale of the development and how it relates to the existing townscape.		The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for both the proposed policy and no policy option because they have the potential to enhance or detract from existing areas of heritage quality (e.g. the Conservation Areas).		How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			negative effects can be mitigated using this approach and the requirements of the NPPF.
14.	N/A	N/A	
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT + The proposed policy has a the potential to have a positive effect on this objective because they could result in development that helps to reduce the distance that people have to travel to access services.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they could result in development that helps to reduce the distance that people have to travel to access services.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects.	-
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. ST/LT -/? Increased development as a result of the proposed policy and the no policy option is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁵⁸ . Potentially this could result in a significant effect. However, there is significant uncertainty about the amount of waste that might be generated under each option		The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from

⁵⁸ Based on data on landfill capacity in Kent from the Environment Agency.

Page 641

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	because this is also determined by the nature of the employment use and the density of development.		Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	hallenges There is the potential for a negative effect because an increase in development		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for both the proposed policy and no policy option because the sites that are developed may or may not be located in the Environment Agency's Flood zones or those identified in the SFRA.		The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option could have an adverse effect ecology and BAP species or positive effect, depending on where development occurs and how it occurs.		-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district.		The NPPF also requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.
22. To reduce the global, social and environmental impact of consumption	Permanent. Indirect. ST/LT -/? There is the potential for a negative effect from both the proposed policy and no policy option because development could result in an increase in the consumption		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
of resources by using sustainably produced and local products.	of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.		setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	policy option because an increase in development could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
Summary	contribute towards the economy rural house		

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option is specific about where development would occur uncertain effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy and resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is not predicted as being likely to have any positive effects where they are not counteracted by potentially adverse effects as illustrated by the 'uncertain' effects.

	proposed developments are unknown at this stage.		
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct. ST/LT++/? Policy adoption would ensure that developments do not undermine other policies. Consequently due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption to positively meet the sustainability criteria. The scale of impact is unknown as details of the proposed developments are unknown at this stage.	Neutral. 0 A no policy option would not alter the status quo.	-

Summary

Under policy adoption there are specific requirements that developments must undertake in order to be granted permission. One concerns the management of natural conservation sites and infrastructure provisions. The policy states that developments must not conflict with another policy, resultantly all SA objectives are positively met as alternative polices all provide positive impacts to the objectives. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

	compatible with size, form, historic character and scale of the local environment and as such the local townscape will be suitably conserved and enhanced.		
13. to 23.	N/A		N/A
Summary			

Under the proposed policy, housing in Cliftonville West and Margate central would have specific guidance to ensure a positive sustainability outcome was achieved and that updated or new residential accommodation actively contributed to the establishment of vibrant local communities. Policy adoption would ensure historic character and scale was preserved. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy 72: Policy H04D – Land at Walter's Hall Farm, Monkton

Policy 73: Policy H04E – Land south side of A253, Cliffsend

Policy 74: Policy H04F – Land north of Cottington Road, Cliffsend

Policy 75: Policy H04G – Land south side of Cottington Road, Cliffsend

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT++/? Policy adoption would ensure that housing developments in rural areas adhered to the provisions of the proposed policy. As such this would ensure that developments do not undermine other policies. Consequently due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption to positive meet the sustainability criteria. The scale of impact is unknown as details of proposed developments are unknown at this stage. Developments would be expected to demonstrate a variety of housing is being provided and address how any affordable elements will be incorporated.	Neutral. 0 A no policy option would not alter the status quo.	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Direct. ST/LT+/? Under policy adoption the developments are less likely to have an adverse effect upon the objective as they would be expected to incorporate care housing, where practical. As such this would provide an increased network of healthcare facilities.	Neutral. 0 A no policy option would not alter the status quo.	
3. To provide access to appropriate educational facilities for all sectors of society including focus on training	Permanent. Direct. ST/LT+/?	Neutral. 0	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	With the proposed policy, developments are less likely to have an adverse effect on existing capacity with the education system.	A no policy option would not alter the status quo.	
4. To increase public safety and reduce crime and fear of crime.	Permanent. Indirect. ST/LT+/? This may have a beneficial effect if it results in development that that is designed with safety and crime taken into account.	Neutral. 0 A no policy option would not alter the status quo.	-
5. To provide appropriate key facilities	Permanent. Indirect. ST/LT+/?	Neutral. 0	-
to support vulnerable people and reduce the level of deprivation identified across the wards.	By directing development towards existing rural settlements there is a greater chance that new residents could benefit from access key facilities already present in the rural settlements.	A no policy option would not alter the status quo.	
6. To create vibrant balanced	Permanent. Direct. ST/LT++/?	Neutral. 0	-
communities where residents feel a 'sense of place' and individual contribution is valued.	This could have a major beneficial effect by helping to support rural communities (e.g. by ensuring that the mix of housing maintains the character and community feel of the settlements).	A no policy option would not alter the status quo.	
7. To provide access to employment	Permanent. Direct. ST/LT++/?	Neutral. 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment. The scale of impact is unknown as details of the proposed developments are unknown at this stage.	Neutral. 0 A no policy option would not alter the status quo.	

Summary

Under the proposed policy, housing in rural settlements would have specific guidance to ensure a positive sustainability outcome was achieved. The developments must also comply with guidance of Policy H01 which provides positivity to all SA objectives and as such the effects would also be felt under adoption of the proposed policy. Additionally policy adoption would ensure historic character and scale was preserved; the requirement of bird surveys also shows environmental conscientiousness. Combining the requirements of the proposed policy with positive sustainability practices in relation to rural housing will occur. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy 76: Policy H05 – Rural Housing Need

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of	Permanent LT +	Permanent LT -	-
housing including an appropriate mix of types and tenures to reflect demand.	The proposed policy is likely to free up more land for affordable homes. The	It is assumed that without the affordable housing target, developers	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	freeing up of land will increase supply, lowering the price of land. This may have the effect of making affordable housing more viable thus increasing the development.	would not necessarily factor this in, and the supply would stagnate in the context of very high need. This would mean continued growth in the number of homes but reduced housing mix	
2. To maintain appropriate healthcare	Neutral 0	Neutral 0	-
provision and access to healthcare facilities for all sectors of society.	Policy adoption will ensure that new rural developments will have appropriate access to and are within an acceptable proximity to local services such as healthcare facilities. The policy will only ensure that there is access and will not actively enhance such provisions thus the impacts are neutral.	It is assumed that if no target was applied, developers would tend away from building affordable housing. However, it is assumed that the chosen locations for affordable housing (built by whoever) would still need to be in close proximity to healthcare facilities.	
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Neutral 0 Policy adoption will ensure that new rural developments will have appropriate access to and are within an acceptable proximity to local services such as schools. No effect on education levels is anticipated.	Neutral 0 It is assumed that if no target was applied, developers would tend away from building affordable housing. However, it is assumed that the chosen locations for affordable housing (built by whoever) would still need to be in close proximity to education facilities.	-
4. To increase public safety and reduce	Permanent LT -	Permanent LT -	-
crime and fear of crime.	The proposed policy could reduce integration and create areas where people on lower incomes are concentrated (not integrated with those on higher incomes). This could in turn	It is assumed that the no policy option would result in under provision of affordable housing. This could have indirect effects to homelessness which in turn affect crime.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	create pockets of deprivation which could raise crime levels.		
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Neutral 0It is assumed that if affordable housing was provided on land adjoining existing developments, the chosen locations for affordable housing would still need to have access to key facilities.If this policy results in increased supply of affordable housing, it may have a positive effect on lifting people out of deprivation.	Permanent LT - Assuming that more vulnerable people in society are more likely to depend on affordable housing, this means these people would suffer from reduced supply in housing potentially increasing deprivation.	_
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent LT - The proposed policy will have the effect of pushing affordable housing out to the fringes of rural areas. This could result in more affordable housing around rural areas, but will not likely result in full integration.	Permanent LT - If affordable housing was created off- site, there would be a risk of concentrating people from similar socio-economic backgrounds in specific areas, which could bring about pockets of deprivation.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent ST + The proposed policy could result in an increase in house building which could in turn result in more construction employment opportunities.	Permanent ST + The no policy option could result in an increase in house building as house builders could potentially charge more for all hew housing. This could result in more construction employment opportunities.	-
8.	N/A	-	N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent LT -/? A minor negative effect is anticipated assuming that the proposed rural housing development will be predominantly greenfield or contain some degree of natural and semi- natural land. Development could also occur near tourist or natural, semi natural or built assets and could result in an adverse impact. However further spatial and development information is required to inform this.	Unknown ? House building will continue under this policy. It is not known where this will occur. If it occurs near tourist or natural, semi natural or built assets there could be an impact, however more spatial information is required to inform this.	
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent LT - A negative effect is anticipated assuming that the proposed wording "outside the confines of a rural settlement" will be predominantly undeveloped and/or greenfield. This is not likely to be considered efficient land use. This may be off-set by growth in supply of affordable housing.	Permanent LT - Assuming this option results in a fall in supply of affordable housing, the mix of development will not match up to the need. Not possible to predict effects on previously developed land or greenfield.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent LT+ The proposed policy would ensure that new rural developments are of an appropriate style and mix to accommodate existing local needs. Similarly developments will have to be acceptable in terms of access, proximity	Unknown ? House building will continue under the no policy option. It is not known where this will occur. If development occurs near or within more densely populated (and therefore better served) areas, there will be a positive effect through	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	and to local services and their relationship to the rural settlement and landscape. Thus sustainable development will be pursued.	reduced need to travel. The opposite will be true of development in more rural areas.	
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent LT -/? The proposed policy will allow developments that are in keeping with the local rural setting and as such do will not significantly undermine the local landscape and townscape. However, as the policy does not seek to enhance or grow such assets, there is potential for minor detrimental impacts associated with landscape character and quality.	Unknown ? House building will continue under the no policy option. It is not known where this will occur (i.e. if development will avoid sensitive areas) or how landscape and townscape design / mitigation will be employed.	-
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Unknown ? House building will continue under the proposed policy and no policy option. It is not known where this will occur (i.e. if development will avoid sensitive areas, structures of in situ remains) or how design / mitigation will be employed. No account has been taken for restoration projects in these options.		-
14. To improve air quality in the District's Air Quality Management Areas.	Permanent LT - Locating housing in more rural areas may increase the need to travel and encourage the uptake of private vehicles. This could result in more cars on the road and potentially have a marginal effect on air quality	Unknown ? It is unclear how the need to travel and car use will be influenced as a result of this policy option; as such effects on air quality cannot be predicted.	-
15. To 16	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
17. To reduce waste generation and	Permanent ST/LT -	Neutral. 0	-
disposal and achieve the sustainable management of waste	If the proposed policy has the effect of increasing housing building there will be a short term marginal increase in waste from construction. There will also be a longer term increase in waste streams from those residents.	A no policy option would not alter the status quo.	
18. To ensure development within the	Permanent ST/LT -	Neutral. 0	-
District responds to the challenges associated with climate change.	If the proposed policy has the effect of increasing housing building there will be a short term marginal increase in carbon emissions from construction. There will also be a longer term increase in carbon emissions from heating, lighting etc. from new residents.	A no policy option would not alter the status quo.	
19.	N/A		N/A
20. To conserve and enhance biodiversity.	Permanent LT - Assuming that development in the rural areas is likely to increase the risk of impact on greenfield land and any ecological assets therein, the proposed policy may have a minor negative effect.	Neutral. 0 A no policy option would not alter the status quo.	These options are predominantly strategic and relate to targets. There is no spatial information. Specific projects which occur as a result of these options will need to consider their impact on historic biodiversity assets within Thanet.
21.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Both the proposed policy and no policy option have the potential to affect the		Ensure policy around new build properties encourages sustainable practices.	
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Unknown ? Both the proposed policy and no policy option have the potential to affect the housing mix and the economic viability of some house building projects. It is not clear how sustainably housing will be built in terms of operational standards, or use of best practice construction methods.		Ensure policy around new build properties encourages sustainable practices.	
Summary. The proposed policy would release land for appropriate residential development, yet it could be to the detriment of environmental sustainability. In addition rural locations may be isolated from provisions and facilities, which may be detrimental for certain groups of first time buyers, particularly those with young families.				

Policy 77: Policy H06 – New agricultural dwellings

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT ? The proposed policy will have a limited effect on the mix or type of housing that is available	Neutral. 0 A no policy option would not alter the status quo.	-
2. To 4.	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce	Permanent. Indirect. ST/LT +/?	Permanent. Direct. ST/LT ?	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
the level of deprivation identified across the wards.	The proposed policy has the potential to have a positive effect on this objective because they might allow people and services to be located in rural settlements making them easier to access.	The effects of the no policy option is uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects on access, particularly in deprived areas.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they both help to support rural settlement and areas function and helps to support their sense of place.	Permanent. Indirect. ST/LT -/? The effects of the no policy option are potentially negative because it might not provide the level of support required for rural settlements and areas.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Neutral. 0 The proposed policy would not alter the status quo.	Permanent. Indirect. ST/LT -/? The no policy option may have an adverse effect because without any policy it might result in further losses of opportunities to create rural and agricultural jobs.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT + The proposed policy is likely to have an indirect effect on the economy by potentially increasing the access that rural businesses have to potential employees as well as the economic benefits of housing growth.	Permanent. Indirect. ST/LT -/? The no policy option may have an adverse effect because without any policy it might result in further losses of opportunities to grow the agricultural sector.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT ? The effects of the proposed policy and the no policy option are unknown. This is because depending on the nature of development and where they are located they could have a positive or negative effect.		-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT ? The effects of the proposed policy and the no policy option are unknown. This is because depending on the nature of development and where they are located they could have a positive or negative effect.		-
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because it could result in development that helps to reduce the distance that people have to travel to access services.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy, development could potentially occur anywhere, which could have positive or negative effects.	-
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy and the no policy option because the effect will be determined by the design and scale of the development and how it relates to the existing townscape.		The quality of design and how future development takes account of character, townscape and the countryside will be addressed under other issues and policy options
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ? An uncertain effect is predicted for the proposed policy and the no policy option because they have the potential to enhance or detract from existing areas of heritage quality (e.g. the Conservation Areas).		. How future development respects and integrates with heritage and archaeological features will be addressed under development management and design policy options. It is anticipated that any potentially

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
			negative effects can be mitigated using this approach and the requirements of the NPPF.
14.	N/A		N/A
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they could result in development that helps to reduce the distance that people have to travel to access services.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT + The proposed policy has the potential to have a positive effect on this objective because they could result in development that helps to reduce the distance that people have to travel to access services.	Permanent. Direct. ST/LT ? The effects of the no policy option are uncertain because without a site specific policy development could potentially occur anywhere, which could have positive or negative effects.	-
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. ST/LT -/? Increased development from the proposed policy and the no policy option is likely to generate greater volumes of waste, which might not by diverted from landfill. It is also likely to increase the total quantity of waste arising and requiring treatment and/or disposal. This is assessed against an existing trend of reducing landfill capacity within Kent which could be exceeded within the life of the Plan ⁵⁹ . Potentially this could result in a significant effect.		The adverse effect can be mitigated through wider waste management policy at the national and county scales (e.g. EU Landfill Directive targets, the Government Review of Waste Policy in England 2011 and Kent County Council's Mineral and Waste Plan) which will include new Energy from

⁵⁹ Based on data on landfill capacity in Kent from the Environment Agency.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	However, there is significant uncertainty generated under each option because this employment use and the density of devel		Waste facilities and the increased diversion of material from landfill.
18. To ensure development within the District responds to the challenges associated with climate change.	There is the potential for a negative effect because an increase in development as a result of the proposed policy and the no policy option could increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage because this is		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	An uncertain effect is predicted for the proposed policy and the no policy option because the sites that are developed may or may not be located in the		The requirements of the NPPF and would be applied to any forthcoming planning applications which would also help to mitigate any adverse effects.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT ? The proposed policy and the no policy option could have an adverse effect ecology and BAP species or positive effect, depending on where development occurs and how it occurs.		-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT ? The proposed policy and the no policy option have the potential to have both a positive and negative effect depending on where development occurs, the features associated with each site and the type of development. This is particularly relevant to potential effects on groundwater resources and Source Protection Zones in this area of the district.		The NPPF requires unacceptable risks to water to be mitigated therefore development management policies and national policy should provide safeguards for aquifers and SPZs in particular. This will address the potential area of uncertainty identified here.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT -/? There is the potential for a negative effect from the proposed policy and the no policy option because development could result in an increase in the consumption of resources. However, the extents of these effects are uncertain because the type and scale of development is not specified.		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed to contribute towards resource efficiency).
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct. ST/LT -/? There is the potential for an adverse effect from the proposed policy and the no policy option because an increase in development could indirectly increase consumption of energy and resources thereby increase emissions of GHG gases. But the extent and likelihood of this effect is not clear at this stage and is not		The uncertainties can be addressed by other policies in the Local Plan (e.g. development management policies setting out how new development should be designed and contribute towards reducing GHG emissions).

Summary

The proposed policy has the potential to contribute towards the economy, rural housing supply, job creation and reducing the need for people to travel to access jobs, services and local facilities. However because neither option is specific about where development would occur, effects on the built environment, landscape, heritage, ecology and the water environment are uncertain. Potentially adverse effects have also been predicted in terms of energy an resource consumption as well as waste generation because new development will result, to a lesser or greater extent, in these effects. All of the negative and uncertain effects associated with both the proposed policy and no policy option can potentially be mitigated either by development management policies or the NPPF requirements. The no policy option is predicted to have both positive and negative effects, but the balance of this is unknown at this stage, as illustrated by the 'uncertain' effects.

Policy 78: Policy H07 – Care and Supported Housing

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent Direct ST/LT + Policy support would actively support developments that contain care or supported housing. Such support would	Unknown ? As future development plans are not yet known it is not possible to say if A no	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	improve provisions for appropriate housing for potentially vulnerable residents within the District and as such would satisfy a specific target markets housing needs. However as the policy is focussed on a certain market the effects are only minor positive.	policy option would actively help or hinder the objective.	
2. To maintain appropriate healthcare	Permanent Direct ST/LT +	Permanent; Direct. LT -/?	-
provision and access to healthcare facilities for all sectors of society.	Care homes and supported housing would provide care and assistance for its residents. Policy support actively promote the creation of such facilities that provide healthcare assistance. As such the objective is undoubtedly met however the provisions are not for all sectors of society and as such the effects are only minor positive.	No policy support potentially would not alter the status quo. As such healthcare provisions would not decline nor would they improve. However uncontrolled developments could lead to oversaturation of facilities due to increased stresses if the developments are not conducted sustainably. As such the impacts are questionably negative.	
3. To 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent Direct ST/LT + Increasing the support for the provisions of care homes and supported housing across Thanet would provide aid and assistance to vulnerable populations. Policy support would actively encourage the creation of such facilities to ensure the needs were met of the vulnerable and thus reduce the potential for deprivation across the wards. The effects are minor significant	Permanent; Indirect. LT -/? No policy support potentially would not alter the status quo. However the potential uncontrolled developments could lead to excessive demand upon current facilities and thus increase the number of people deprived of effective healthcare services, which in turn could raise the levels of deprivation. As such the impacts are questionably negative	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	as the policy support would not benefit all areas of society but would significantly aid certain vulnerable categories.		
6.	N/A		N/A
7. To provide access to employment	Permanent Indirect ST/LT +	Neutral. 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	The opportunity to grow the care home and supported housing markets would indirectly increase labour opportunities. Not only would the developments require construction but they would also require staffing and as such provide opportunities for the local population to seek employment.	A no policy option would not alter the status quo.	
8. To 10	N/A		N/A
11. To ensure that a sustainable pattern	Permanent Direct ST/LT +	Neutral. 0	-
of development is pursued.	By increasing local services and provisions key facilities will grow and enhance across the district. Thus the opportunity to grow the care home and supported housing markets would enhance local sustainability	A no policy option would not alter the status quo.	
12. To 23	N/A	•	N/A
Summary			1

The proposed policy would undoubtedly increase the provisions and facilities available across Thanet. As such levels of deprivation and access to healthcare will enhance whilst it also indirectly provides the opportunity for employment. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. This could lead to the decline in the quality of life and increase deprivation across the area.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent Direct ST/LT ++ Adopting the policy would support growth of accessible homes whereby a percentage would be suitable for wheelchair users as well as many being constructed to lifetime standards. Policy adoption would actively promote housing developments that have increased accessibility. Housing developments of more than 15 units must have at least 20% of the units constructed to Lifetime Home Standards, with developments over 100 unit contains containing the same plus at least 2% of units with wheelchair access. Policy adoption would therefore ensure new developments meet the demands of a wider target market through increasing the proportion of homes with adequate access and and/or increasing the life time of housing units.	Unknown ? As future development plans are not yet known it is not possible to say if A no policy option would actively help or hinder the objective.	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Unknown ? Policy support for increasing accessible homes has an unknown impact on	Neutral. 0 A no policy option would not alter the status quo.	-

Policy 79: Policy H08 – Accessible Homes

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	access and maintenance of appropriate healthcare provisions		
3. To 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent Indirect ST/LT + Policy support has the potential to reduce deprivation in Thanet. It would provide the opportunity for residents to move to new build homes knowing that they are built for longevity whilst also providing a less restricted market for wheelchair users meaning they also have a wider choice of homes. By providing the opportunity to move to new homes equipped for life deprivation can be indirectly reduce on a minor scale.	Permanent Indirect. LT -/? Under no policy support there is the potential that new developments would occur in an unrestricted manner. As such this could lead to less provision of good quality, suitable accommodation. Similarly there could be less desire to build accessible homes for wheelchair users. In turn the housing market could become restricted for certain users meaning they can only reside in certain properties that may be beyond their financial circumstances. Deprivation could occur as a result of financial demands or a force of appropriate homes being located in deprived areas if these are only location s with applicable access. However the effects are not clear at this stage as future developments and the circumstances of each individual cannot be assessed.	
6. To 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent; Direct ST/LT + The opportunity to grow housing developments whereby to 20% are built to meet the Lifetime Homes standards	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	would increase Thanet's sustainability by providing housing longevity.		
12. To 23	N/A	N/A	
Summary			

By adopting the proposed policy, deprivation has the potential to be indirectly reduced by providing access to new development homes for wheelchair users whilst the developments would also have at least 20% built to lifetime standards meaning sustainability and the quality of housing would meet the demands of the local market. Subsequently the potential for positive impacts upon the objectives is largest through policy adoption to improve accessible homes. A no policy option could lead to unrestricted development within Thanet which could lead to excess demand upon current facilities and services. Similarly A no policy option may or may not meet future housing demands as plans are not known. As such sustainability would be negligible in comparison to policy adoption.

Policy 80: Policy H09 - Non self-contained residential accommodation

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, indirect ST/LT +/ ? HMOs can provide a good standard of housing particularly for affordable housing and meet the needs of specific groups. The proposed safeguards associated with all options can also have a positive effect on the quality of adjacent residential areas by minimising amenity impacts.	Neutral. 0 A no policy option would not alter the status quo.	Understanding which areas are selected and the correct threshold of housing to be allowed will be crucial in understanding the effect of the proposed policy
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent, Direct LT ? The effects associated with the proposed policy are unknown at this	Neutral. 0 A no policy option would not alter the status quo.	The proposed policy should consider proximity to key facilities including healthcare. This should be a consideration in any proposed policy.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	stage as spatial information is not available		This is particularly the case for affordable housing and family homes which may house children or the elderly.
3.	N/A		N/A
4. To increase public safety and reduce crime and fear of crime.	Permanent, indirect ST/LT +/ ? The proposed policy could help to minimise future issues associated with amenity conflict between HMOs and other types of dwelling in residential areas. So positive effect is predicted.	Neutral. 0 A no policy option would not alter the status quo.	-
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent, Direct ST/LT ? Understanding spatial elements of any option will be crucial in ascertaining the accessibility to key facilities and the socio-economic effects of development. All decisions around HMOs should include extensive criteria to ensure proper management so that deprivation and poor living conditions to not result from HMOs. Decisions on these policies can have long term effects in these areas therefore their considerations should be central to any policy.	Neutral. 0 A no policy option would not alter the status quo.	
6. To create vibrant balanced communities where residents feel a	Permanent, indirect LT ? The proposed policy could potentially result in HMO integration in certain	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
'sense of place' and individual contribution is valued.	areas where it has not yet been witnessed. If done correctly, this could result in some degree of integration and mixed communities. If managed correctly, this could have positive social effects. If managed incorrectly, communities could suffer. Data on the locations and long term management strategy are crucial to understanding the likely effect.		
7. and 8	N/A.		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent, Indirect LT – It is unlikely that the proposed policy will affect the tourist sector significantly. However, if HMOs are concentrated in tourist centres and they are poorly managed, there may be amenity effects which could have knock on effects on tourism.	Neutral. 0 A no policy option would not alter the status quo.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent, direct LT +? It is assumed that the proposed policy will be predominantly focussed on previously (or currently) developed areas and that greenfield land will not be affected. However, this is not made explicit in the supporting text.	Neutral. 0 A no policy option would not alter the status quo.	HMO concentration (particularly when looking at options for targets) should be based on demand/need, thus ensuring appropriate density and mix. Derelict properties should be considered for HMO development, where appropriate.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
11. To ensure that a sustainable pattern	Permanent, indirect ST/LT +/?	Neutral. 0	-
of development is pursued.	There is a degree of uncertainty relating to the proposed policy. However, it has the potential to support the re-use of existing buildings and can provide a more efficient use of land by reutilising existing structures through regeneration projects and preventing urban sprawl.	A no policy option would not alter the status quo.	
12.	N/A.		N/A
13. To preserve and enhance sites,	Permanent, direct LT ?	Neutral. 0	All of the potentially adverse effects
features and areas of historic archaeological or architectural importance, and their settings.	Potential high impact, however the nature of the effects depends on location. Allowing HMOs may bring buildings back into use and can sometimes ensure buildings are managed and maintained However, poor management can lead to negative impacts	A no policy option would not alter the status quo.	will be mitigated by other policies in the Local Plan.
14. To improve air quality in the	Permanent, direct LT ?	Neutral. 0	Short term air quality effects will be
District's Air Quality Management Areas.	By definition HMOs are more likely to be located in existing settlements close to existing transport links. Therefore there will be greater opportunity for residents to take advantage of existing public transport services. However, it could equally result in greater numbers of private car trips and this could have a detrimental effect on	A no policy option would not alter the status quo.	mitigated by other policies in the Local Plan.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	air quality in the short to medium term. Conversely, in the long term the effects are more likely to be neutral as less polluting vehicles replace older versions.		
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent, indirect ST/LT +/? Effects on public transport from increasing density within existing housing stock will have a marginal impact on any local public transport services. However, in many cases the HMOs are located close to urban centres with existing access to public transport a positive effect is predicted. Restricting homes in certain areas or setting thresholds may lead to housing supply growth elsewhere in less sustainable (i.e. served by public transport) locations.	Neutral. 0 A no policy option would not alter the status quo.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent, indirect ST/LT +/? Effects on public transport from increasing density within existing housing stock will have a marginal impact on any local public transport services. However, in many cases the HMOs are located close to urban centres with existing access to public transport a positive effect is predicted.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent, direct LT - / ? All of the options could increase the number "households" within a property and result in an overall increase in the quantity of waste that needs to be treated or disposed of.	Neutral. 0 A no policy option would not alter the status quo.	This potentially adverse effect will be mitigated by other policies Opportunities for good management and best practice – behaviour change in shared properties
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent, indirect ST/LT +/ ? The proposed policy could reduce the need to travel and may also result in other beneficial effects e.g. more efficient heating of properties due to higher densities.	Neutral. 0 A no policy option would not alter the status quo.	-
19. To 21.	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent, direct LT +/ ? All of the options provide opportunities to integrate sustainability principles into conversions or new build. Conversions are also likely to consume fewer building materials compared with new build.	Neutral. 0 A no policy option would not alter the status quo.	-
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent, direct LT +/ ? The proposed policy could potentially reduce the need to travel and may also result in other beneficial effects e.g. more efficient heating of properties due to higher densities.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
Summary				
uses of HMO's would not be fully restrict	hability across Thanet and is likely to yield ted through the policy option, which would to in the region would be accounted for and	be a positive impact given that HMO's of	ten provide student accommodation and	

(e.g. in Broadstairs given its proximity to East Kent College and University Campus). It would take into account the specific local housing make up to ensure there is not an over saturation of such houses in one region and thus allow their spread across Thanet. It is specific in detail and guidance as it allows a controlled utilisation of the whole Thanet area as opposed to specific locations.

Policy 81: Policy H10 – Accommodation for Gypsy and Travelling Communities

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Neutral 0 Both options are unlikely to alter the stat	Neutral 0 Both options are unlikely to alter the status quo.	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent, direct LT + /? The proposed policy will make a positive contribute towards this objective by requiring consideration of access to healthcare facilities. Developments will not be allowed to impede the existing quality of services and must also have reasonable access to key facilities.	Permanent, direct LT -/? A no policy option would allow developments to occur in any location without consideration for the impacts upon the objective.	-

	N/A Permanent, direct LT + /? This option will make a positive contribute towards this objective by requiring consideration of access to transport infrastructure. Permanent, direct LT + Allocating based on set site criteria allow the sites to be selected according to access to nearby key facilities and connecting public transport.	N/A Permanent, direct LT + /? This option will make a positive contribute towards this objective by requiring consideration of access to transport infrastructure. Permanent, direct LT + Allocating based on set site criteria allow the sites to be selected according to access to nearby key facilities and connecting public transport.

Summary

Adoption of the proposed policy will ensure any new gypsy and traveller communities are appropriately placed to have access to existing services and facilities without placing undue stresses upon them. However support for creating appropriate sites may be to the detriment of environmental assets yet this is questionable due to existing legislation protecting such assets. The no policy option could allow unrestricted developments that may be to the detriments of local services and facilities.

Policy 82: Policy H11 – Residential use of empty property

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT+ Policy adoption allow the utilisation of empty properties and bring empty properties into residential use. Additionally the policy states proposals must not undermine other policies. Subsequently housing needs of the local population can be met by allow utilisation of vacant properties for residential purposes. However the impacts are only of minor significance as the policy will generally concern the utilisation of small vacant developments as opposed to a large scale development.	Neutral. 0 A no policy option would not alter the status quo.	-
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts will be of minor significance as the policy will most likely concern the utilisation of small vacant developments as opposed to a large scale development.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts are anticipated to be only of minor significance as policy adoption concerns reutilisation of properties and not regarding new large scale developments for example which would create a larger impact.	Neutral. 0 A no policy option would not alter the status quo.	
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts will be of minor significance as the policy will most likely concern the utilisation of small vacant developments as opposed to a large scale development. Additionally the reutilisation of vacant properties could aid fear of crime by reducing the public fears over what activities are occurring within the empty property.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
5. To provide appropriate key facilities	Permanent. Direct. ST/LT+	Neutral. 0	-
to support vulnerable people and reduce the level of deprivation identified across the wards.	Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts are anticipated to be only of minor significance as policy adoption concerns reutilisation of properties and not regarding new large scale developments for example which would create a larger impact.	A no policy option would not alter the status quo.	
6. To create vibrant balanced	Permanent. Direct. ST/LT+	Neutral. 0	-
communities where residents feel a 'sense of place' and individual contribution is valued.	Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts will be of minor significance as the policy will most likely concern the utilisation of small vacant developments as opposed to a large scale development. The reutilisation of vacant properties could enhance the community feel as active reutilisation of vacant properties could improve the local vicinity by redeveloping damaged	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	or 'tired' properties thus increasing a local sense of pride and belonging.		
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts are anticipated to be only of minor significance as policy adoption concerns reutilisation of properties and not regarding new large scale developments for example which would create a larger impact.	Neutral. 0 A no policy option would not alter the status quo.	
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts are anticipated to be only of minor significance as policy adoption concerns reutilisation of properties and not regarding new large scale developments for example which would create a larger impact.	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts are anticipated to be only of minor significance as policy adoption concerns reutilisation of properties and not regarding new large scale developments for example which would create a larger impact.	Neutral. 0 A no policy option would not alter the status quo.	
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT+ Policy adoption would ensure empty properties could be reutilised for residential purposes as such this would reduce the amount of vacant properties. Promotion of reutilising the existing buildings across Thanet would positively meet the objective and help avoid developments spreading into through encouragement of brownfield housing redevelopment. The impacts are anticipated to be only of minor significance as policy adoption concerns reutilisation of properties and does not relate to new developments.	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. 	developments as opposed to a large scale development.		
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts will be of minor significance as the policy will most likely concern the utilisation of small vacant developments as opposed to a large scale development.	Neutral. 0 A no policy option would not alter the status quo.	

Summary

The proposed policy states that developments must be compatible with nearby uses, which in turn could act as a catalyst for the improvement of local infrastructure and services. Policy adoption implements an all-encompassing policy that will be specific to housing but will also incorporate other policy benefits for the wider promotion of sustainability. A no policy option would largely yield neutral impacts as there would not be a change in the status quo.

Policy 83: Policy H12 – Retention of existing housing stock

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Direct. ST/LT+ Policy adoption would aid the retention of existing housing stock and prevent its destruction. As such the safeguarding ensures a sustainable	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon current housing. As such	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	supply of home will be affordable to existing residents who potentially cannot afford new build properties. Similarly any developments that could destroy properties must make a contribution to the local area housing objectives, as mitigation.	new developments could destroy and bulldoze existing housing stock. However the impacts are questionable as future development plans are not yet known.	
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Direct. ST/LT+ Policy adoption would allow for the loss of existing houses provided that development plans were directly related to increasing the provision for community facilities, among other mitigation suggestions. As such healthcare centres and other medical infrastructure could be granted planning permission and as such increase the services on offer to the local society.	Neutral. 0 A no policy option would not alter the status quo.	For health care facilities, target vacant land or brownfield sites rather than currently occupied residential units.
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	Permanent. Direct. ST/LT+ Policy adoption would safeguard existing housing from inappropriate developments. However the policy would allow the construction of community facilities to replace housing units, as such provisions to increase educational facilities is supported.	Neutral. 0 A no policy option would not alter the status quo.	-
4. To increase public safety and reduce crime and fear of crime.	Unknown?	Neutral. 0	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	Policy adoption has unknown impacts. By retaining housing in areas designed against crime it is a positive. However in certain areas crime is more prevalent due to poor design and layout; as such their retention is a negative impact upon society.	A no policy option would not alter the status quo.	
5. To provide appropriate key facilities	Permanent. Direct. ST/LT+	Neutral. 0	-
to support vulnerable people and reduce the level of deprivation identified across the wards.	Policy adoption would safeguard existing housing stock. However under the clauses developments that provide provisions of community facilities will be allowed provided the location is compatible with the local residential area. As such this will allow key facilities to grow within existing housing areas, assuming that the developments designed and planned in an appropriate manner.	A no policy option would not alter the status quo.	
6. To create vibrant balanced	Neutral. 0	Neutral. 0	-
communities where residents feel a 'sense of place' and individual contribution is valued.	Through adopting the policy existing housing stock would actively be retained. As such communities would not have to endure upheaval and relocation on terms that were not of their choosing. As such a sense of place would remain in line with the current scenario.	A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Neutral. 0/? Policy adoption relates to safeguarding existing housing stock and thus would not actively seek to create employment opportunities. Yet as the policy contains clauses to allow certain types of developments the effects are questionable as tourist developments would be permitted and as such could yield the creation of jobs.	Neutral. 0 A no policy option would not alter the status quo.	
8.	N/A		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Indirect. ST/LT+ Policy adoption would allow the development of tourist areas in the place of existing residential areas, provided they comply with Policy E07. As such policy adoption would support the creation of a tourist economy in a manner that would reflect Policy E07 and its relevant benefits. As such the effects are indirect and likely to minor as often developments will likely seek alternative locations to those that are currently occupied by residents.	Neutral. 0 A no policy option would not alter the status quo.	
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from	Permanent. Indirect. ST/LT+ Policy adoption would safeguard existing housing developments which would constitute efficient land use by preventing the creation of new	Neutral. 0 A no policy option would not alter the status quo.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
buildings, and encourage urban renaissance.	residential units if the current supply can meet existing demands. The impacts are anticipated to be minor significance as policy adoption concerns retention of existing housing stock rather than reutilisation of materials and buildings.		
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT+ Policy adoption would ensure that developments do not undermine other policies. Due to alternative policies positively meeting the requirements of the objective, a carryover of impacts will occur under policy adoption. The impacts will be of minor significance as the policy will most likely concern the utilisation of small vacant developments as opposed to a large scale development.	Neutral. 0 A no policy option would not alter the status quo.	Under policy support all other policies must be accounted for and not undermined thus the SA objective criteria would be met as more specific policies meet the demands, thus the effects carry over into this policy option.
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Unknown? Policy adoption has unknown impacts. By retaining existing housing areas retention of character and appeal could be likely. Yet similarly areas that detract from the charm of such towns may also be retained. Thus the impacts cannot be wholly assessed as the positive or negative impacts are purely on an individual basis.	Neutral. 0 A no policy option would not alter the status quo.	Areas that have been safeguarded should be appropriately enhanced and developed to keep functioning as its current use but build upon enhancing the local areas landscape and townscape.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Unknown? Policy adoption has unknown impacts. By retaining existing housing archaeological and architectural important features are likely to be preserved. However if a development meets the policy clauses then the features could be lost under new development.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local archaeology and character. As such new developments could remove local features of importance from their setting. The effects are somewhat questionable as future developments are not known in their plan and scale.	Any new developments in areas of archaeological or architectural importance with features of note should seek to retain and enhance the features as part of the new development plan and design in order to preserve the local setting and environment.
14. To improve air quality in the District's Air Quality Management Areas.	N/A		N/A
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT+/? Policy adoption would ensure the preservation of existing residential units that will likely already have the appropriate infrastructure for a suitable public transport network. The impacts are positive but questionable as certain developments are allowed under the policy clauses and as the provisions in place may be lost.	Permanent. Direct LT -/? A lack of policy support could allow developments to be granted permission without the consideration for the impacts upon local transport services. As such new developments could result in the destruction of the existing housing stock which has the appropriate transport network in place to meet the demands of the SA objective.	Should a no policy option be selected or if any developments meet the policy clauses of what is a permitted development over existing housing, then transport mitigation should be provided. This should be performed through ensuring new plans incorporate public transport in accessible locations in order to meet the demands of the local population in at least the same manner that current infrastructure does.
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Indirect. ST/LT+/? Policy adoption would ensure that existing housing is safeguarded unless one or more of the policy clauses were	Neutral. 0 A no policy option would not alter the status quo.	Under the proposed policy, it is likely that public transport will be required and as such would still meet the SA objective via the construction of road

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	met. By safeguarding existing housing it is likely that current sustainable transport infrastructure exists. Any new developments under policy adoption that meet the criteria clauses; must provide community facilities which would include transport provisions. As such the effects are positive in either scenario yet minor and indirect as the policy does not directly concern transport. The impacts are questionable as a residential development being safeguarded is unlikely to contain a railway station or airport.		infrastructure. Thus the impacts are only minor and questionable as it is unlikely that rail or air transport links will be within close proximity to the style of developments in question within the policy.
17. To 19	N/A		N/A
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT+ Policy adoption would safeguard existing housing properties and only allow their redevelopment under certain conditions. As such this could prevent the construction of new housing developments as existing structures meet the demands of the local population. In turn this would be preventing urban sprawl and developments upon currently open land thus preserving the integrity off local environmental receptors.	Permanent. Direct. ST/LT+ Adoption of a no policy scenario would still yield positive effects as existing legislation is already in place to protect biodiversity and natural assets across the UK.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Direct. ST/LT+ Policy adoption would ensure that existing housing stock is safeguarded. As such this could prevent the construction of new housing developers given that existing structures meets the demand of the local population. In turn preventing urban sprawl and developments upon currently open land would preserve the integrity off local environmental receptors.	Permanent. Direct. ST/LT+ Adoption of a no policy scenario would still yield positive effects as existing legislation is already in place to protect water assets across the UK.	-
22. to 23	N/A	·	N/A

Summary

Through the proposed policy, there would be the safeguarding of existing housing stocks. This would mean that a variety of housing types would be available to the market whilst also preserving other land that has not been identified for residential purposes by ensuring utilisation of existing assets. Similarly the social benefits would be the prevention of social upheaval of residents in favour of developments whist also retaining existing services and infrastructure that will most likely currently service the area to an appropriate level without causing disruption. However the policy would not actively grow employment and economic upturn yet the clauses provide the flexibility to allow tourist developments and community facilities to grow, which indirectly would create employment. A no policy option commonly would not alter the status quo and in some cases would allow unrestricted developments which could be to the detriment of several objectives. As such adoption of the policy protects existing housing which has significant social implications whilst providing flexibility for economic growth in an appropriate sustainable manner.

Policy 84: Policy GI01 – Locally Designated Wildlife Sites

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 8	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent Direct ST/LT ++ Introduction of designated wildlife site would aid the preservation of local wildlife. In turn the tourist industry would benefit through the preservation of specific local species which may attract tourists to the area.	Permanent Direct ST/LT + Existing legislation protects natural environments and wildlife so it is unlikely that a no policy option would create a decline. Protected species surveys are commonly apart of Natural England advice currently and so without further polices wildlife protection does exist	When developments are inevitable upon protected lands, then it should be promoted that an equivalent habitat will be created elsewhere.
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent Indirect ST/LT + Through protecting named wildlife sites against the pressures to develop upon them, positive regeneration can be encouraged in appropriate areas through implementation of the proposed policy.	Unknown? It is not possible to say if a no policy option would restrict the objective. No information is known to compare land prices between wildlife sites and urban, as such urban renaissance cannot be assessed. It could be possible that A no policy option could lead to urban sprawl and a decline of the natural assets.	-
11. To ensure that a sustainable pattern of development is pursued.	Permanent, Direct ST/LT + Through implementation of the proposed policy, it is possible that protecting land would encourage sustainable practices. The stricter planning requirements for the developers, would promote sustainable approaches in order to preserve the quality and heritage of wildlife.	Neutral. 0 Adoption of a no policy option will not yield any positive or negative effects. This is due to existing local directives and legislation providing protection regarding wildlife. As such development practices would have to be conducted in an appropriate sustainable manner under current guidance.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
12. To 19.	N/A		N/A	
20. To conserve and enhance biodiversity.	Permanent; Direct ST/LT + + Implementation of the proposed policy would protect local wildlife sites from development pressure. This would aid the support of BAP and other requirements of Natural England.	Neutral. 0 A no policy option would not alter the status quo. Existing legislation would protect wildlife and protected species.	-	
21.To 23	N/A		N/A	
Summary Adoption of the proposed policy would undoubtedly enhance the protection of wildlife sites. With that said A no policy option would not damage such assets due to existing legislation. However by adding local specificity and control through the proposed policy, adoption would ensure sustainability practices are upheld by new developments with the desire to enhance and connect designated wildlife sites.				

Policy 85: Policy GI02 – Regionally Important Geological Sites (RIGS)

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 8	N/A		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent, Direct ST/LT +. Through restricting developments that would have a detrimental effect upon regionally important geological sites, local assets can be preserved. By protecting such areas the tourist industry could be indirectly supported by preventing the damaging of natural	Permanent, Direct. ST/LT - Without policy protection RIGS could be lost or developed, which would detract from the natural and semi- natural quality of undeveloped areas of the district.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	assets that attract visitors both in the long term and short term.		
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent; Indirect ST/LT + Through protecting the RIGS sites from developments, more efficient land use can be supported, by limiting appropriate sites to existing developed areas	Neutral. 0 Given the spread and distribution of RIGS this option (i.e. not protecting RIGS) the effect on this objective is only expected to be neutral.	-
11.	N/A		N/A
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent, Indirect ST/LT + Protection of RIGS may indirectly have a beneficial effect, as it could prevent development in areas of areas of landscape quality.	Neutral. 0 A no policy option would not alter the status quo.	-
13. to 19.	N/A		N/A
20. To conserve and enhance biodiversity.	Permanent, Direct SWT/LT ++ By increasing the protection of geological assets, natural assets would be more protected, which would reduce anthropogenic impacts and urbanisation of greenfield sites. In turn this would preserve the biodiversity and allow it to flourish under increased protection.	Neutral. 0 A no policy option is unlikely to affect the biodiversity either way. Current legislation and directives already manages natural assets and sensitive areas and as such the addition of a new policy would only strengthen existing practices.	-
21. То 23	N/A	L	N/A
Summary			

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	betection to RIGS given that existing legislat et specific environmentally related SA object areas of significance.		

Policy 86: Policy GI03 – Protected Species and other significant species

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 8.	N/A		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent, ST/LT ++ The proposed policy will help protect both wildlife and protected species, which would strengthen local protection of natural assets. In adopting the dual policy option wildlife and protected species would be preserved and keep a tourist value to the local economy.	Neutral 0. No policy option could allow developments to sprawl across natural assets and reduce their economic tourist value, which would negatively impact local wildlife. However existing legislation protects natural environments and wildlife so it is unlikely that a no policy option would create a decline. Protected species surveys are commonly apart of Natural England advice currently and so without further polices wildlife protection does exist	When developments are proposed then it should be promoted that an equivalent habitat will be created in a suitable alternative location.
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from	Permanent Indirect ST/LT + Through a combined wildlife and protected species policy, positive urban regeneration can be encouraged, through encouraging reutilisation of	Unknown? Protected species are legally protected and would be unaffected even without planning policy.	

Page 710

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
buildings, and encourage urban renaissance.	current infrastructure away from green assets.	However, indirectly, by not protecting locally designated sites this option might contribute towards the unstainable land use (i.e. green field developments).	
11. To ensure that a sustainable pattern	Permanent, Direct ST/LT +	Neutral. 0	-
of development is pursued.	The proposed policy would robustly protect wildlife and land heritage. It would also encourage the future growth of such assets by discouraging local or adjacent developments.	A no policy option will not yield any positive or negative effects. This is due to existing local directives and legislation providing protection regarding wildlife. As such development practices would have to be conducted in an appropriate sustainable manner under current guidance.	
12. To 19	N/A		N/A
20. To conserve and enhance	Permanent; direct ST/LT ++	Neutral. 0	
biodiversity.	Development of wildlife sites in conjunction with protected species would increase the overall effectiveness of the proposed policy and aid the enhancement of biodiversity on a dual level. Creating a combined approach would allow unilateral policies to ensure the full protection of wildlife and relevant species to aid the full enhancement of local biodiversity.	A no policy option would have a neutral impact. Existing legislation would protect wildfire and protected species.	
21.То 23	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
Summary				
Adoption of the proposed policy would undoubtedly enhance the protection of both wildlife and protected species. Many objectives regarding the protection of biodiversity and wildlife are met. With that said A no policy option would not damage such objectives due to existing legislation.				

Policy 87: Policy GI04 – Amenity Green Space and Equipped Play Areas.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. 	Indirectly all of these options will add to and support and enhance biodiversity.	enhanced with new developments and this could lead to a reduction in habitat quality and connectivity.		
21.To 23	N/A		N/A	
Summary The proposed policy has the potential to positive impact on this objective by delivering new development that includes adequate open space, landscaping and provision of wildlife habitats.				

Policy 90: Policy GI07 – Jackey Bakers

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent; Direct LT ++ Allowing the utilisation of the sports complex for the wider community will increase social interactions and opportunities to mix with others. As such an increased sense of place and community feel could be established through using the medium of sport as a tool of meeting people.	Neutral. 0. A no policy option would not have an effect either way. It would create a business as usual approach and as such the sports complex would not hinder nor enhance social aspects of the district.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent; Indirect ST/LT + The proposed policy provides for a potential increase in the facilities of the sports complex, which would require staffing, and potential ancillary	Neutral. 0 A no policy option would not alter the status quo.	Adoption of the proposed policy could increase local employment opportunities through increased demand on the sport centre requiring additional staff. The proposed policy should be

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
	developments could yield employment opportunities for local residents.		favoured due to its opportunity to create local jobs.	
8. and 9	N/A		N/A	
10. To improve efficiency in land use	Permanent; Indirect ST/LT +	Unknown ?		
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Through redevelopment and increased utilisation of the sports ground, positive regeneration can be encouraged of the sports facility area and wider local district. Additionally if the facility can become a leading sports venue then local regeneration can occur as businesses will become increasingly attracted to the area to utilise new opportunities.	A no policy option would have unknown impacts as at this stage it is not easy to quantify future changes as they are currently unknown		
11. То 19	N/A		N/A	
20. To conserve and enhance	Permanent, Indirect LT -/?	Neutral. 0	Future developments of the site could	
biodiversity.	Implementation of the proposed policy may involve the potential expansion and development of area could lead to the utilisation of green spaces which could cause a decline in local biodiversity.	A no policy option would not alter the status quo.	be subjected to EIA or appropriate planning practices to ensure biodiversity is protected in the local vicinity.	
21.То 23	N/A	-	N/A	
Summary	1		1	

Adoption of the proposed policy could help provide social benefits through an additional facility to utilise. Subsequent health and social benefits from exercise would also follow. The potential for expansions and increased footfall at the site could create more employment/business opportunities within the immediate vicinity. This could be through direct employment at the site or even through local business needing extra staff. A no policy option would not actively support the aims of several

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
objectives. The overall benefits of the policy potentially outweighs the negatives as the site is not a new build and the environmental effects should not be on a large scale.			

Policy 91: Policy QD01 – General Design Principles

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent; Direct ST/LT + The proposed policy will ensure that the design of new residential development is robustly undertaken to provide proportionate, well designed units based on demand. The policy is unable to define tenure requirements however, so positive effects are limited	Neutral. 0 A no policy option would not alter the status quo.	-
2. to 5.	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent direct ST + The proposed policy places significant emphasis on the integration of new developments and surrounding locations in terms of scale, massing and character.	Neutral. 0 A no policy option would not alter the status quo.	-
7. to 10.	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent direct LT + Through integrating new developments within the character and uses of existing locations, the proposed policy will help	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	contribute towards implementing compatible land uses.		
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent indirect LT + The proposed policy aims to ensure that new developments are complimentary with existing buildings and areas. The primary aim of this is to retain the local character of defined areas.	Neutral. 0 A no policy option would not alter the status quo.	-
13. to 17.	N/A		N/A
18. To ensure development within the District responds to the challenges associated with climate change.	Permanent indirect LT + The robust design of new developments will ensure that climate change resilience is integrated in to land use patterns. Effects will depend on the degree to which design measures are implemented, but designs that limit energy use will also assist in meeting this objective.	Neutral. 0 A no policy option would not alter the status quo.	-
19. to 22.	N/A		N/A
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent direct LT + The proposed policy will help to implement strong design principles as part of new development, which should help towards increasing energy efficiency in new developments.	Neutral. 0 A no policy option would not alter the status quo.	-
Summary

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
there is also the potential for increasing re-	rds a number of SA objectives, most notablesilience to climate change and reducing the robust policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact of the no policy option is unlikely to impact option ito impact optio	e effect on climate change, through implen	nenting robust design standards and

Policy 92: Policy QD02 – Living Conditions

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy has the potential to positively impact the objective by delivering new developments that can be designed to promote a sense of place. This would be achieved by providing adequate services and opportunities for individuals to keep the community clean and tidy.	Permanent, direct ST/LT - No policy option could encourage developments that are not courteous toward neighbouring buildings and would not support the provision of shared recreational space in new housing developments	-
7. and 8	N/A		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Indirect. ST/LT + The proposed policy has the potential to positively impact on this objective by setting criteria to promote design quality that considers existing buildings and residents. This will help to make new developments pleasant places for people to live, work and visit which	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	will have indirect benefits for the visitor and tourist economy.		
10. and 11	N/A		N/A
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent direct ST/LT +/? The proposed policy is likely to have a significant beneficial effect on the character of the public realm, open spaces and the character and appearance of the District's townscape. However, the specific policy criteria and mechanism for achieving these outcomes will require further development and assessment in subsequent stages of the development of the Local Plan.	Permanent, direct ST/LT - No policy option could encourage developments that are not compatible with neighbouring buildings and are detrimental to townscape character.	-
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Indirect. ST/LT +Although no aspect of the proposed policy refers explicitly to heritage features the proposed policy has the potential to positively impact on this objective ensuring that all development takes into account their effects on the character of the area and the setting of nearby buildings and areas of public realm.	Neutral. 0 A no policy option would not alter the status quo.	-
14. to 16.	N/A		N/A
17. To reduce waste generation and disposal and achieve the sustainable management of waste	Permanent. Indirect. ST/LT + This will have a significant beneficial effect for the by providing the	Permanent, direct ST/LT - No policy option could encourage developments that do not provide space	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	necessary space for refuse disposal in new developments	for refuse disposal, or for the adequate separation of waste	
18. To 23.	N/A		N/A
C C			

The proposed policy has the potential to positive impact on the objectives by encouraging the natural drying of clothes and providing adequate space for refuse disposal. The proposed policy has the potential to have a number of positive effects, including indirect effects on a sense of place and the desire people have to live at certain location or in a given settlement, supporting the visitor economy by working with and enhancing the built environment and by requiring development to take into account and work with their setting including heritage areas and features. However the most significant effect of the proposed policy is the requirement for developments to take into account their surroundings, residential amenities and neighbouring buildings in order to have a on the landscape and townscape.

Policy 93: Policy QD03 - Advertisements

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT ++ The proposed policy has the potential to positively impact the objective by delivering new developments that can be designed to promote a sense of place. This would be achieved by providing adequate services and opportunities to individuals to keep the community clean and tidy and preventing inappropriate advertisements.	Permanent, direct ST/LT - No policy option could allow advertisements to dominate community space, detracting from its unique character	-
7. to 11.	N/A		N/A

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent direct ST/LT +/? The proposed policy is likely to have a significant beneficial effect on the character of the public realm, open spaces and the character and appearance of the District's townscape, by establishing criteria for the appearance and illumination of advertising	Permanent, direct ST/LT - No policy option could encourage applications for advertising that are not compatible with the surrounding area, or other forms of advertising.	-
13. to 23.			
	ositive effect on the creation of vibrant com dered as part of any application for advertis		

Policy 94: Policy QD04 - Telecommunications

specific aspects, such as the appearance and the illumination of advertising.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 4	N/A		N/A
5. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	Permanent. Indirect. ST/LT +/? The proposed policy is likely to have a positive effect, though there is potential for an uncertain effect until it is known where developments will occur. At this stage, it is not possible to determine if vulnerable people will benefit.	Neutral. 0 A no policy option would not alter the status quo.	The uncertainties could be addressed by working with developers and providers to ensure people in deprived areas can access these facilities.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT +/? If this infrastructure means that people can work and live in the same area this option could contribute towards support the vibrancy and sense of place.	Neutral. 0 A no policy option would not alter the status quo.	-
7. To provide access to employment opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	Permanent. Indirect. ST/LT +/? This infrastructure will help to support existing business and provide the facilities required by business (e.g. high speed broadband). By providing these facilities the District will be able to compete on a more equal basis with other areas and indirectly this will support job creation.	Neutral. 0 A no policy option would not alter the status quo.	-
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT +/? This infrastructure will help to support existing and new business and provide the facilities required by business (e.g. high speed broadband). By providing these facilities the District will be able to compete on a more equal basis with other areas and indirectly this will support the growth in GVA.	Neutral. 0 A no policy option would not alter the status quo.	-
9. and 10.	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Indirect. ST/LT +/? The proposed policy will provide the infrastructure that will help people to reduce their need to travel, either by	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	working from home or by using video conferencing to reduce the need to travel on business. However uncertainty exists as it provides an infrastructure to do so and is facilitative in capacity.		
12. To conserve and enhance the character and quality of the area's landscene and tourscene particularly	Permanent. Indirect. ST/LT ? An uncertain effect is predicted because	Neutral. 0 A no policy option would not alter the	Any potentially adverse effects of the infrastructure would be mitigated by
landscape and townscape particularly associated with town centres and coastal areas.	the physical manifestation of telecommunication infrastructure can sometimes be intrusive (e.g. masts), but in others can be minor or negligible (e.g. below ground cable).	status quo.	NPPF policy and also possibly development management policies (e.g. to screen / hide masts).
13. To preserve and enhance sites, features and areas of historic	Permanent. Indirect. ST/LT ?	Neutral. 0	Any potentially adverse effects of the infrastructure would be mitigated by
archaeological or architectural importance, and their settings.	An uncertain effect is predicted because the physical manifestation of telecommunication infrastructure can sometimes be intrusive (e.g. visual effects of masts on the setting of listed buildings or excavations impacting on below ground archaeology	A no policy option would not alter the status quo.	NPPF policy and also possibly development management policies (e.g. to screen / hide masts).
14. To improve air quality in the	Permanent. Indirect. ST/LT +/?	Neutral. 0	-
District's Air Quality Management Areas.	Potential indirect effects of the proposed policy results in fewer people travelling by car, thereby reducing road traffic emissions. However the scale of any effect will be small therefore a minor effect is predicted.	A no policy option would not alter the status quo.	
15. To provide a sustainable public transport network that allows access to	Permanent. Indirect. ST/LT +/?	Neutral. 0	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy will provide the infrastructure that will help people to reduce their need to travel, either by working from home or by using video conferencing to reduce the need to travel on business. But this policy will not guarantee that residents and businesses will do this, therefore there is a degree of uncertainty associated with this option.	A no policy option would not alter the status quo.	
16. To develop key sustainable	Permanent. Indirect. ST/LT +/?	Neutral. 0	-
transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Potential indirect effects of the proposed policy results in fewer people travelling by car. However the scale of any effect will be small therefore a minor effect is predicted	A no policy option would not alter the status quo.	
17.	N/A	·	N/A
18. To ensure development within the	Permanent. Indirect. ST/LT +/?	Neutral. 0	-
District responds to the challenges associated with climate change.	Potential indirect effects of the proposed policy results in fewer people travelling by car, thereby reducing road traffic emissions. However the scale of any effect will be small therefore a minor effect is predicted.	A no policy option would not alter the status quo.	
19.	N/A		N/A
20. To conserve and enhance biodiversity.	Permanent. Indirect. ST/LT ? An uncertain effect is predicted because the physical manifestation of	Neutral. 0 A no policy option would not alter the status quo.	Any potentially adverse effects of the infrastructure would be mitigated by NPPF policy and also possibly

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	telecommunication infrastructure can sometimes be intrusive (e.g. impact on the habitats of protected species).		development management policies. Any infrastructure works would also be subject to relevant legislation.
21.	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT +/? The proposed policy may have a positive effect if it allows businesses to manage their supply chains more efficiently.	Neutral. 0 A no policy option would not alter the status quo.	-
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Indirect. ST/LT +/? The proposed policy may have a positive effect because it would help to put into place the infrastructure to support smart grids or other technologies. However, it will not drive an overall increase in renewable generation.	Neutral. 0 A no policy option would not alter the status quo.	-

The proposed policy has the potential to support the achievement of a number of the SA objectives by reducing the need to travel (e.g. supporting home working and reduced business travel) and supporting the creation of jobs and economic growth by ensuring that the communication infrastructure is also provided. Any potentially uncertain and/or adverse effects can be mitigated by implementing the suggested methods and at the local level also through development management policies.

Policy 95: Policy HE01 - Archaeology

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent; Indirect ST/LT + The proposed policy will provide protection and guidance for heritage assets. Indirectly the options will help to support sense of place locally by ensuring that local assets are protected which contribute to the local atmosphere.	Permanent. Indirect. ST/LT ? As the scale of future developments are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	-
7.	N/A		N/A
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT + The proposed policy has the ability to indirectly lead to minor positive impacts upon the objective. All options will safeguard heritage assets in their own given way. The protection of heritage assets would promote sustainability and economic growth of the district by ensuring such assets can be utilised for business and tourism. By safeguarding such assets the business and tourist industry growth will aid the creation of job opportunities and help increase GVA per capita.	Permanent. Indirect. ST/LT ? As the scale of future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Indirect. ST/LT + The proposed policy will provide protection and guidance for heritage assets. Indirectly the options will help to support the local tourist economy as such features provide help to attract visitors to the local area.	Permanent. Indirect. ST/LT ? As the scale of future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have an unknown impact upon the objective. This is due to future developments being unknown in design and location and as such the ability to assess the impacts of land reutilisation is restricted.		The proposed policy could be developed to try to actively promote the reuse of local spaces and materials, where possible, in order to encourage urban renaissance.
11.	N/A		N/A
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT + The proposed policy will provide protection and guidance for heritage assets. Indirectly the options will help to enhance and preserve local character by providing safeguarding policies for local heritage which is integral to local landscape and townscape.	Permanent. Indirect. ST/LT ? By not adopting the policy it is unknown if the character and quality of the local spaces would decline. It could be conceivable that local heritage sustains its integrity; yet similarly without guidance a decline could be possible due to a lack of safeguarding.	-
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ++ The proposed policy will provide explicit protection and guidance for heritage assets. Given the proposed	Permanent. Indirect. ST/LT ? A no policy option has unknown impacts as the scale of future developments are not yet known and as	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	policy is specific towards heritage assets, the impacts will be significant and direct upon the objective.	such the impacts cannot be wholly assessed. It could be conceivable that local heritage sustains its importance and appeal; yet similarly without guidance a decline could be possible due to a lack of safeguarding.	
14. to 21.	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT + As the proposed policy is seeking to protect heritage assets it is likely that the objective will be met indirectly. Through the protection of heritage assets appropriate design and developments will occur with a focus on 'green' processes. This will meet the objectives criteria but most specific to this is option 17j which will seek proposals to enhance local environmental performance whilst remaining sensitive to local assets.	Permanent. Direct. ST/LT ? A no policy option has unknown impacts as the scale of future developments are not yet known and as such the impacts cannot be wholly assessed.	
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent. Direct. ST/LT ? All policy options have an unknown impact upon the objective. This is due to a lack of specificity in relation to energy efficiency and renewable energy within the options.	Permanent. Direct. ST/LT ? A no policy option has unknown impacts as the scale of future developments are not yet known and as such the impacts cannot be wholly assessed.	-

objectives. The effects of the no policy of	ption are uncertain because without specific	ective 13, but a succinct fully rounded heri e policies in the Local Plan it is not certain ould be either positive or negative in relati	to what extent the NPPF on its own

Policy 96: Policy HE02 – Development in Conservation Areas

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT + The propose policy will preserve and protect heritage, cultural and environmental assets all of which provide an ambience and sense of place within a community.	Permanent. Indirect. ST/LT ? As future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	-
7.	N/A		N/A
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT + The proposed policy will have positive impacts as by preserving conservation areas and listed assets sustainable growth will occur by preserving assets of economic and tourist value and directing regeneration projects to areas that require growth as opposed to at the expense of existing heritage and environmental assets.	Permanent. Indirect. ST/LT ? As future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
9. To protect and enhance the areas	Permanent. Direct. ST/LT +	Permanent. Indirect. ST/LT ?	
natural, semi-natural and street scene to support the tourist economy.	The proposed policy will directly positively impact the objective as they will offer protection to assets and areas that contribute to tourist economy by acting as areas of attraction and interest.	As future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	
10. To improve efficiency in land use	Permanent. Direct. ST/LT ?		-
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Both the proposed policy and no policy option have an unknown impact upon the objective. This is due to future developments being unknown in design and location and as such the ability to assess the impacts of land reutilisation is restricted.		
11.	N/A		N/A
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT ++ The proposed policy has the ability to provide positive impacts upon the objective. The proposed policy will significantly protect conservation areas by ensuring new developments are not to the detriment of registered or listed heritage or environmental assets.	Permanent. Indirect. ST/LT ? By not adopting the policy it is unknown if the character and quality of the local spaces would decline. It could be conceivable that local heritage sustains its integrity; yet similarly without guidance a decline could be possible due to a lack of safeguarding.	-
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ++ The proposed policy will have a significant positive effect upon the objective as they have specific relevance to ensure developments protect and enhance sites, features and	Permanent. 	areas of historic archaeological or architectural importance.	its importance and appeal; yet similarly without guidance a decline could be possible due to a lack of safeguarding.	
14. To 23	N/A		N/A
Summary			

The proposed policy has direct and indirect effects on the character and sense of place of settlements; helping to support the economy and visitor economy in particularly as visitor attractions in their own right; and contribute to the character of townscapes. Two significant beneficial effects were predicted on SA objectives 12 and 13 (to conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas; and to preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings).

Policy 97: Policy HE03 – Local Heritage Assets

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent; Indirect ST/LT + The proposed policy will provide protection and guidance for heritage assets. Indirectly the options will help to support sense of place locally by ensuring that local assets are protected which contribute to the local atmosphere.	Permanent. Indirect. ST/LT ? As future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	-
7.	N/A		N/A
8. To ensure the sustainable development of the proposed economic growth and encourage employment	Permanent. Indirect. ST/LT +	Permanent. Indirect. ST/LT ?	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
development at key sites within the District to support priority regeneration areas.	The proposed policy has ability to indirectly lead to minor positive impacts upon the objective. The proposed policy will safeguard heritage assets in their own given way. The protection of heritage assets would promote sustainability and economic growth of the district by ensuring such assets can be utilised for business and tourism. By safeguarding such assets the business and tourist industry growth will aid the creation of job opportunities and help increase GVA per capita.	As future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Indirect. ST/LT + The proposed policy will provide protection and guidance for heritage assets. Indirectly the options will help to support the local tourist economy as such features provide help to attract visitors to the local area.	Permanent. Indirect. ST/LT ? As future development are not yet known, it is not possible to fully assess the impacts of a no policy option to protect heritage features.	-
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent. Direct. ST/LT ? Both the proposed policy and no policy option have an unknown impact upon the objective. This is due to future developments being unknown in design and location and as such the ability to assess the impacts of land reutilisation is restricted.		The proposed policy could be developed to try to actively promote the reuse of local spaces and materials, where possible, in order to encourage urban renaissance.
11.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Indirect. ST/LT + The proposed policy will provide protection and guidance for heritage assets. Indirectly the proposed policy will help to enhance and preserve local character by providing safeguarding policies for local heritage which is integral to local landscape and townscape.	Permanent. Indirect. ST/LT ? By not adopting the policy it is unknown if the character and quality of the local spaces would decline. It could be conceivable that local heritage sustains its integrity; yet similarly without guidance a decline could be possible due to a lack of safeguarding.	-
13. To preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their settings.	Permanent. Direct. ST/LT ++ The proposed policy will provide protection and guidance for heritage assets. Given the proposed policy is specific towards heritage assets the impacts will be significant and direct upon the objective.	Permanent. Indirect. ST/LT ? A no policy option has unknown impacts as future developments are not yet known and as such the impacts cannot be wholly assessed. It could be conceivable that local heritage sustains its importance and appeal; yet similarly without guidance a decline could be possible due to a lack of safeguarding.	-
14. To 21.	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT + With the proposed policy seeking to protect heritage assets it is likely that the objective will be met indirectly. Through the protection of heritage assets appropriate design and developments will occur with a focus on 'green' processes.	Permanent. Direct. ST/LT ? A no policy option has unknown impacts as future developments are not yet known and as such the impacts cannot be wholly assessed.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
23. To increase energy efficiency and	Permanent. Direct. ST/LT ?		-	
the proportion of energy generated from renewable sources in the area.	Both the proposed policy and no policy option have an unknown impact upon the objective. This is due to a lack of specificity in relation to energy efficiency and renewable energy within the options.			
Summary				
The proposed policy will have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adoption of the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain because without specific policies in the Local Plan, it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
	assets appropriate design and developments will occur with a focus on 'green' processes.		
23. To increase energy efficiency and	Permanent. Direct. ST/LT ?		-
the proportion of energy generated from renewable sources in the area.	Both the proposed policy and no policy option have an unknown impact upon the objective. This is due to a lack of specificity in relation to energy efficiency and renewable energy within the options.		

The proposed policy is likely to have direct and indirect effects on the character and sense of place of settlements, help to support the economy and visitor economy in particularly as visitor attractions in their own right and contribute to character of townscape. Only one significant beneficial effect was predicted on SA objective 13. Adopting the proposed policy should be promoted as not only would it be beneficial to SA objective 13, but a succinct fully rounded heritage protection would benefit all objectives. The effects of the no policy option are uncertain, because without specific policies in the Local Plan it is not certain to what extent the NPPF on its own would protect heritage assets, whilst future developments are not yet known which could be either positive or negative in relation to many of the objectives.

Policy 100: Policy CC01 – Fluvial and Tidal Flooding

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, indirect LT +/? The proposed policy has the potential to make a positive contribution towards this objective by making sure that housing development does not occur in areas of flood risk or exacerbate the risk of flooding to other areas through the implementation of poor drainage systems.	Permanent, direct LT – Disregard to flood risk could see houses damaged by floods and/or exacerbate flooding in other areas.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
2. To 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent, direct LT + The proposed policy likely to result in development located in sustainable locations that takes into account coastal, fluvial and surface water flooding.	Permanent, direct LT – Development in an area of flood risk is unsustainable due to potential flood damage to residential, retail, commercial and community facilities.	-
12. To 18	N/A		N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent, direct LT + The proposed policy will enhance provisions with regards to the management of flood risk yet it would potentially occur in differing ways, but with the same effects.	Permanent, direct LT – No policy option would allow developments to take place without appropriate measures to manage flood risk.	-
20. То 23	N/A	•	N/A

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk, though the positives are likely to outweigh any inhibiting of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from flooding.

Policy 101: Policy CC02 – Surface Water Management

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, indirect LT +/? The proposed policy has the potential to make a positive contribution towards this objective by making sure that housing development exacerbate the risk of flooding to other areas through the implementation of poor drainage systems.	Permanent, indirect LT – Lack of sustainable drainage systems could compromise water quality in groundwater source protection zones, put housing areas. at increased flood risk, and increase pollution from run- off.	-
2. To 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent, direct LT + The proposed policy likely to result in development located in sustainable locations that takes into account coastal, fluvial and surface water flooding.	Neutral. 0 A no policy option would not alter the status quo.	-
12. To 18	N/A		N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent, direct LT + The proposed policy will enhance provisions with regards to the management of flood risk yet it would potentially occur in differing ways, but with the same effects.	Permanent, indirect LT – No policy option would allow developments to take place without appropriate measures to manage flood risk.	
20. To 23	N/A		N/A
Summary			

Summary

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change or flood risk through the implementation of sustainable drainage systems, though the positives are likely to outweigh any inhibiting

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
of house building. However, the proposed policy will aid flood mitigation efforts but potentially at the expense of local archaeological and architectural integrity. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development.			

Policy 102: Policy CC03 – Coastal Development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, indirect LT +/? The proposed policy has the potential to make a positive contribution towards this objective by making sure that housing development does not occur in areas of coastal flood risk or erosion.	Permanent, direct LT – Lack of provision toward the prevention of erosion and damage caused by erosion could put houses and occupants at risk.	-
2. To 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent, direct LT + The proposed policy is likely to result in development located in sustainable locations that takes into account coastal, fluvial and surface water flooding.	Permanent, direct LT- Development in an area at risk to coastal erosion or without erosion management measures is unsustainable due to potential damage from coastal erosion.	-
12. To 18	N/A		N/A
19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with PPS25.	Permanent, direct LT ++ The proposed policy will enhance provisions with regards to the management of coastal flooding and coastal erosion. This would protect	Permanent, direct LT- No policy option would allow developments to take place without appropriate measures to manage coastal flooding and coastal erosion.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	various land uses from the effects of coastal change.		
20. To 23	N/A		N/A

Overall the proposed policy does not affect many of the SA objectives. The proposed policy could result in the restriction of housing developments by introducing measures to combat climate change, flood risk and coastal erosion through the implementation of restrictive criteria for new developments. The effects of the no policy option are negative as this would place various existing and future land uses at risk from inappropriate development within coastal areas, particularly within 40m of the coastline or cliff top.

Policy 103: Policy CC04 – Sustainable Design

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent, direct LT + The proposed policy is in line with current government policy (e.g. building regulations) and would require future development to comply the standards applicable at that point in time. As a result viability of future housing development is unlikely to be affected.	Permanent, direct LT - New housing developments would be allowed to pursue unsustainable practices, which could potentially lead to poor quality housing being developed.	
2. To 9	N/A		N/A
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings,	Permanent, direct LT + + The proposed policy supports property redevelopment and re-use as well as the	Neutral. 0 A no policy option would not alter the status quo.	-

	helping to reduce reliance on fossil fuel derived energy sources that are the source of atmospheric pollutants such as NO ₂ .	schemes, which could rely on fossil fuels that would worsen air quality	
15. To 17	N/A		N/A
18. To ensure development within the	Permanent direct LT ++	Neutral. 0	-
District responds to the challenges associated with climate change.	The proposed policy will make a significant contribution towards achieving this objective by promoting the use of sustainable materials, re- using buildings and structures where possible and minimising waste in construction and operation and supporting the installation of low carbon and renewable energy.	A no policy option would not alter the status quo.	
19. To 21	N/A		N/A
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent direct LT ++ The proposed policy will make a significant contribution towards achieving this objective by promoting the use of sustainable materials, re- using buildings and structures where possible and minimising waste in construction and operation and supporting the installation of low carbon and renewable energy.	Permanent, indirect LT – Not promoting district heating schemes would encourage less efficient and less sustainable heating schemes.	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent direct LT ++ The proposed policy will make a significant contribution towards achieving this objective by promoting the use of sustainable materials, re- using buildings and structures where possible and minimising waste in construction and operation and supporting the installation of low carbon and renewable energy.	Permanent, indirect LT – Not promoting district heating schemes would encourage less efficient and less sustainable heating schemes	-

The proposed policy is unlikely to have an adverse sustainability effect. It is likely to have significant beneficial effects on transport, greenhouse gas emissions, waste minimisation, and efficient use of resources, and will also contribute towards reducing local atmospheric pollutants. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels as part of individual heating installations.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
7. To provide access to employment	Permanent, direct LT +	Neutral. 0	-
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	The proposed policy could, indirectly, support the green economy in terms of jobs associated with the installation and operation of renewable energy.	A no policy option would not alter the status quo.	
8. To ensure the sustainable	Permanent, direct LT +	Neutral. 0	-
development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	The proposed policy could, indirectly, support the green economy in terms of jobs associated with the installation and operation of renewable energy.	A no policy option would not alter the status quo.	
9. to 13	N/A.		N/A.
14. To improve air quality in the	Permanent, direct LT +	Neutral. 0	-
District's Air Quality Management Areas.	The proposed policy will contribute towards improving air quality by helping to reduce reliance on fossil fuel derived energy sources that are the source of atmospheric pollutants such as NO ₂ .	A no policy option would not alter the status quo.	
15. to 17	N/A.		N/A.
18. To ensure development within the	Permanent direct LT +	Neutral. 0	-
District responds to the challenges associated with climate change.	The proposed policy will make a contribution towards achieving this objective by supporting the installation of low carbon and renewable energy.	A no policy option would not alter the status quo.	
19.	N/A.		N/A.

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
20. To conserve and enhance biodiversity.	Permanent indirect LT + The proposed policy will contribute towards conserving biodiversity by ensuring that any potential development of renewable energy facilities at Richborough is not detrimental to nearby sites of conservation value, or that any potential effects will be fully mitigated.	Neutral. 0 A no policy option would not alter the status quo.	-
21.	N/A		
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent direct LT ++ The proposed policy will make a significant contribution towards achieving this objective by promoting the use of sustainable materials, re- using buildings and structures where possible and minimising waste in construction and operation and supporting the installation of low carbon and renewable energy.	Neutral. 0 A no policy option would not alter the status quo.	-
23. To increase energy efficiency and the proportion of energy generated from renewable sources in the area.	Permanent direct LT ++ The proposed policy will make a significant contribution towards achieving this objective by promoting the use of sustainable materials, re- using buildings and structures where possible and minimising waste in construction and operation and	Neutral. 0 A no policy option would not alter the status quo.	_

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures		
	supporting the installation of low carbon and renewable energy.				
Summary	Summary				
The proposed policy explicitly states a presumption in favour of renewable technologies within developments at Richborough, assuming that there are no detrimental impacts, particularly biodiversity effects. This supports a range of the sustainability objectives. The no policy option will have a largely neutral effect, though could have significant adverse effects associated with the continued use of fossil fuels.					

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent direct LT ++ The proposed policy will have a significant beneficial effect on air quality particularly where future development might otherwise have detrimental effect by providing planning policy controls.	Permanent, indirect ST - Without policy adoption there is a risk that development could occur that indirectly exacerbates air quality problems. However, this is likely to be limited to the short term as air quality improves due to lower emissions from road vehicles and more efficient heating systems etc.	-
15. to 19	N/A		N/A
20. To conserve and enhance biodiversity.	Permanent direct LT + The proposed policy will have a beneficial effect on biodiversity in the long term by helping to reduce	Permanent, indirect ST - Without policy adoption there is a risk that development could occur that indirectly has a detrimental effect on	-

biodiversity through air pollution.

atmospheric pollutants that can have a

Policy 108: Policy SE01 – Potentially Polluting Development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	detrimental effect on the status and condition of designated wild life sites such as SSSIs, SACs and SPAs.	However, this is likely to be limited to the short term as air quality improves due to lower emissions from road vehicles and more efficient heating systems etc.	
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent direct LT + The proposed policy will have a beneficial effect on water quality by providing planning policy controls to mitigate potentially polluting activities.	Permanent, indirect ST - Without policy adoption there is a risk that development could occur that indirectly exacerbates air quality problems. However, this is likely to be limited to the short term as air quality improves due to lower emissions from road vehicles and more efficient heating systems etc.	-
22. and 23	N/A	·	N/A

The proposed policy result in beneficial effects because it would allow the District to control polluting development through the planning system. The policy will be beneficial in terms of improving air quality and the quality of water resources, as well as benefits for biodiversity. The no policy option performs negatively against the objectives as it provides no such control.

Policy 109: Policy SE02 – Landfill Sites and Unstable Land

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 9	N/A		N/A
10. To improve efficiency in land use through the re-use of previously	Permanent. Indirect ST/ +	Neutral. 0	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	The policy will have beneficial effect on land use by helping to provide a framework that would allow land previously used for landfill to be used for development	A no policy option would not alter the status quo.	
11. to 23	N/A		N/A
C			

The proposed policy is likely to affect the use / development of previously developed land. A beneficial effect is predicted because the proposed policy will ensure that developers have better understanding of the potential structural and design issues they will have to address during construction. As a result this could help to make development of PDL more viable and less risky for developers and give others the confidence that potential instability issues have been considered. This particularly important in areas with a dynamic coastline. The no policy option would not affect the status quo.

Policy 110: Policy SE03 – Contaminated Land

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 9	N/A		N/A
10. To improve efficiency in land use through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	Permanent indirect LT + The policy will have beneficial effect on land use by helping to provide a framework that would allow potentially contaminated previously developed land to be used for development	Neutral. 0 A no policy option would not alter the status quo.	-
11. to 23	N/A		N/A
Summary			

The proposed policy will have beneficial effect on land use by helping to provide a framework that would allow potentially contaminated previously developed land to be used for development. A no policy option is likely to have a neutral effect as other legislation would require developers to remediate their sites.

Policy 111: Policy SE04 – Ground Water Protection

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent indirect LT + The proposed policy will have a significant beneficial effect on groundwater quality by providing planning policy controls to mitigate potentially polluting activities/developments.	Permanent indirect LT -/? Without policy adoption there is a risk that development could occur that indirectly exacerbates groundwater problems.	-
12. to 19	NA		
20. To conserve and enhance biodiversity.	Permanent direct LT + The proposed policy will have a beneficial effect on groundwater quality and areas of biodiversity fed by groundwater sources such as areas of coastal marshland.	Permanent indirect LT -/? Without policy adoption there is a risk that development could occur that indirectly exacerbates groundwater problems with knock-on effects for areas of biodiversity.	-
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent direct LT ++ The proposed policy will have a significant beneficial effect on groundwater quality by providing planning policy controls to mitigate	Permanent, indirect ST/LT -/? Without policy adoption there is a risk that development could occur that indirectly exacerbates groundwater problems.	-

	potentially polluting activities/developments.				
22. to 23.	NA		N/A		
Summary					
The proposed policy would benefit objectives related to sustainable development, biodiversity and the protection of water quality. However groundwater is protected by other legislation so it is uncertain whether the no policy option would actually result in detrimental effects.					

Policy 112: Policy SE05 – Air Quality

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 13.	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent direct LT ++ The proposed policy will have a significant beneficial effect on air quality particularly where future development might otherwise have detrimental effect by providing planning policy controls.	Permanent, indirect ST - Without policy control there is a risk that development could occur that indirectly exacerbates air quality problems. However, this is likely to be limited to the short term as air quality improves due to lower emissions from road vehicles and more efficient heating systems etc.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent, Direct, LT + The proposed policy will contribute towards providing a sustainable transport network by promoting a shift towards the use of sustainable low emission transport; and ensuring that development is located where it is	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	accessible to support the use of public transport, walking and cycling.		
16. to 19	N/A		N/A
20. To conserve and enhance	Permanent direct LT +	Permanent, indirect ST -	-
biodiversity.	The proposed policy will have beneficial effects on biodiversity in the long term by helping to reduce atmospheric pollutants that can have a detrimental effect on the status and condition of designated wild life sites such as SSSIs, SACs and SPAs.	Without policy control there is a risk that development could occur that indirectly exacerbates air quality problems. However, this is likely to be limited to the short term as air quality improves due to lower emissions from road vehicles and more efficient heating systems etc.	
21.То 23	N/A	N/A	
Summary			

The proposed policy is more likely to result in beneficial effects than the no policy option because, by the use of criteria, it would allow the District to control polluting development through the planning system. The proposed policy would contribute towards promoting more sustainable, low emission forms of transport as well as providing beneficial effects in relation to both air quality and biodiversity.

Policy 113:	Policy SE06 -	Noise Pollution

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 6	N/A		N/A
7. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT + Adoption of the proposed policy would ensure that residents and other sensitive receptors are protected from unacceptable noise at both existing and future development locations.	Unknown ? A no policy option has unknown effects. This is due to the fact that it is hard to predict how potential residents would react to noise pollution and what they deemed inappropriate. As such with not knowing how the target market would react it is difficult to say if a no policy option would restrict the viability or not considering location is also unknown.	-
8. To 23.	N/A		N/A
Summary			

The proposed policy would ensure that residents and other sensitive receptors are protected from unacceptable noise at both existing and future development locations.

Policy 114: Policy SE07 – Noise Action Plan Important Areas

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 5.	N/A		N/A
6. To create vibrant balanced	Permanent. Indirect. ST/LT +	Unknown ?	-
communities where residents feel a 'sense of place' and individual	The proposed policy would ensure that noise pollution is managed in line with	A no policy option has unknown effects. This is due to the fact that it is	
contribution is valued.	the Environmental Noise Directive and	hard to predict how potential residents	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	ensure that that communities and residential amenity is protected from unacceptable noise.	would react to noise pollution and what they deemed inappropriate. As such with not knowing how the target market would react it is difficult to say if a no policy option would restrict the viability or not considering location is also unknown.	
7. То 23	N/A		N/A
Summary The proposed policy would ensure that noise pollution is managed in line with the Environmental Noise Directive and ensure that that communities and residential amenity is protected from unacceptable noise.			

Policy 115: Policy SE08 – Aircraft Noise

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Indirect.ST/LT + The proposed policy would directly reduce nuisance from noise making sites a more sustainable option for residential development.	Unknown ? A no policy option has unknown effects. This is due to the fact that it is hard to predict how potential residents would react to noise pollution and what they deemed inappropriate. As such with not knowing how the target market would react it is difficult to say if a no policy option would restrict the viability or not considering location is also unknown.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
2. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect.ST/LT + The proposed policy would indirectly cause residential areas to be more appealing due to less nuisance from noise. As such residents could potentially be more settled in an area where they feel less disrupted from aircraft noise pollution via aircraft. Resultantly a sense of place and community feel could be aided due to the increased resident satisfaction in the area they live within.	Unknown ? The effects of the no policy option are unknown in its effect upon the community. The parameters in terms of development location and target market is not disclosed so it is difficult to infer the impacts on a non-policy option being selected.	
7. To 23	N/A		N/A
Summary			

The proposed policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise pollution within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy 116: Policy SE09 – Aircraft Noise and Residential Development

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand.	Permanent. Indirect.ST/LT + Although the policy makes a positive contribution to reducing noise nuisance within residential development, it does not go as far as seeking to reduce noise nuisance impacts in areas external to properties such as gardens, parks etc., or for impacts within properties when windows are open. Greater controls on where development is located in relation to noise nuisance would further increase the sustainability of new residential development.	Unknown? A no policy option has unknown effects. This is due to the fact that it is hard to predict how potential residents would react to noise pollution and what they deemed inappropriate. As such with not knowing how the target market would react it is difficult to say if a no policy option would restrict the viability or not, considering location is also unknown.	-
2. To 5	N/A		
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent Indirect. ST/LT The proposed policy could indirectly cause residential areas to be more appealing, due to less noise nuisance from the airport. As such residents could potentially be more settled in an area where they feel less disrupted from aircraft induced noise pollution. Resultantly a sense of place and community could grow due to the increased satisfaction of the residents.	Unknown? The adoption of no policy option is unknown in its effect upon the community. The parameters in terms of development location and target market is not disclosed so it is difficult to infer the impacts on a non-policy option being selected.	-
7. To 10	N/A		

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. LT + The proposed policy is likely to yield sustainable practices by ensuring that residential developments apply appropriate measures to reduce noise nuisance.	Permanent. Direct. LT - A no policy option could allow unviable developments across the district due to a lack of guidance and direction to ensure appropriate measures are implemented in relation to mitigation of noise nuisance.	-
12. To 23	N/A		N/A

The policy would ensure that housing would become increasingly viable and sustainable due to the concerted efforts to reduce noise nuisance within potentially nearby developments. The knock on effects of this would be a happier residential population which could translate into increased social interaction and happiness due to happier opinion of the local surroundings. However, the policy stops short of addressing the impacts of noise nuisance on external spaces. A no policy option could allow potential developments to grow in undesirable locations near the airport which are noisy due to the airport activity.

Policy 117: Policy SE10 – Light Pollution

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 11	N/A		N/A
12. To conserve and enhance the character and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Permanent. Direct. ST/LT + The proposed policy would have direct benefits for landscape and townscape with a landscape and visual assessment required (to cover light pollution effects) for developments that fall in E1 category (National Parks, AONBs etc.)	Permanent, Direct ST/LT- A no policy option may result in negative effects on landscape and townscape as a result of light spillage and pollution from new developments.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures	
113. to 19.	N/A		N/A	
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT + The policy would have direct benefits for wildlife (e.g. bats) with lighting within developments needing to be designed to prevent disturbance to wildlife.	Permanent, Direct ST/LT – A no policy option may result in negative effects on wildlife as a result of light spillage and pollution from new developments.	-	
21.to 23	N/A	N/A		
Summary The policy supports objectives to conserve the character of the areas townscape and landscape as well as biodiversity by minimising the potential impacts of light spillage and pollution. A no policy option could lead to negative effects with respect to townscape and biodiversity.				

Policy 118: Poli	cy CM01 – Pr	ovision of New	Community Facilities	5

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A		N/A
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Direct. ST/LT + The proposed policy is likely a to have a positive effect by ensuring that the land use allocations for existing facilities are retained and that additional facilities can be provided in the future as and when demand increases.	Permanent. Direct, LT – A no policy option may result in the loss of local healthcare facilities, with buildings and land given over to other uses.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
3. To provide access to appropriate	Permanent. Direct. ST/LT +	Permanent. Direct, LT –	-
educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.	The proposed policy is likely to have a positive effect by ensuring that the land use allocations for existing facilities are retained and that additional facilities can be provided in the future as and when demand increases.	A no policy option may result in the loss of local educational facilities, with buildings and land given over to other uses.	
4.	N/A		N/A
5. To provide appropriate key facilities	Permanent. Direct. ST/LT +	Permanent. Direct, LT –	
to support vulnerable people and reduce the level of deprivation identified across the wards.	The proposed policy is likely to have a positive effect by ensuring that community facilities are retained at a local level to support vulnerable people.	A no policy option may have an adverse effect as it may result in the loss of existing community facilities that support local people. The most vulnerable members of society are likely to be disproportionately affected by those losses.	
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy will have a beneficial effect by supporting the continued role of facilities that can contribute towards a sense of place.	Permanent. Direct, LT - A no policy option might have an adverse effect on 'sense of place' if existing facilities are lost.	-
7 To 14	N/A		N/A
15. To provide a sustainable public	Permanent. Indirect. ST/LT +	Permanent. Indirect, LT –	-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy is likely to have an indirect positive effect by ensuring that community facilities are retained at a local level. This should enable	A no policy option may result in the loss of local community facilities, with greater travel distances required to	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	more sustainable modes of travel to be used to access facilities.	access alternative services and greater reliance on private motor vehicles.	
15. To 23	N/A		N/A
Summary			

The proposed policy supports objectives to maintain and enhance existing key facilities and services, especially local services such as those in rural areas. By protecting, and allowing for enhancement of such facilities it ensures that they are still available for the most vulnerable members of society. It also promotes more sustainable modes of travel by ensuring services are available at local level and can be accessed by cycling and walking, rather than reliance on private motor vehicles. Conversely, the no policy option is likely to perform adversely against these aspects.

1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Indirect. ST/LT + The proposed policy has the potential to have a positive impact on this objective by delivering new development that has good connectivity for pedestrians and cyclists and considers disabled access. This will help to support sense of place and community.	Neutral. 0 A no policy option would not alter the status quo.	-
7. To 13	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT + This proposed policy has the potential to result in direct beneficial effect on air quality by supporting modal shift towards low carbon emission travel (such as electric vehicles).	Permanent, direct ST/LT - No policy option could encourage use of private motor vehicles which would be detrimental to air quality.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT + The proposed policy supports the objective by requiring travel plans that indicate measures to improve accessibility and promote sustainable and low carbon emission travel (e.g. Electric vehicles, walking and cycling). Indirectly this proposed policy is likely to contribute towards this objective by promoting walking and cycling strategies and their links to public transport networks.	Permanent, direct ST/LT - Without a transport assessment or travel plan, developments may not commit to promoting sustainable and low carbon emission travel and may therefore favour the use of private motor vehicles.	
16. to 23	N/A		N/A
Summary			•

The proposed policy has the opportunity to promote more sustainable, low carbon modes of travel. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency on the use of private motor vehicles.

Policy 123: Policy TP02 - Walking

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. To 5	N/A		N/A
6. To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy would have the potential to have a positive impact on this objective by delivering new development that has good connectivity for pedestrians and cyclists and considers disabled access. This will help to support sense of place and community.	Neutral. 0 A no policy option would not alter the status quo.	
7. to 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Direct. ST/LT + The proposed policy has the potential to result in an indirect beneficial effect on air quality by supporting modal shift away from the use of private cars and to a 'cleaner' mode of travel.	Permanent, direct ST/LT - No policy option could perpetuate private car use which would be detrimental to air quality	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT + The proposed policy is likely to contribute towards this objective by improving access (e.g. for cyclists and pedestrians) to key facilities and services. It would also support the provision of a sustainable public transport network by ensuring that new developments make it easier to walk to	Permanent, direct ST/LT - No policy option could encourage developments that rely on/are designed for private vehicles	-

	key facilities such as shops and pub transport hubs. This would make it easier for people to use alternatives private car use.		
16. to 23	N/A		N/A
Summary The policy has the potential to have a positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access. However, it relies on a modal shift in travel behaviour from residents living within new developments. The no policy option would retain dependency			

on the use of private motor vehicles.

Policy 124: Policy TP03 – Cycling

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A		N/A
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Direct. ST/LT. + The proposed policy would increase the provision for sustainable modes of transport via increasing the provisions for cycling. This would aid health enhancements by providing a method of exercise. Similarly increased sustainability would reduce traffic emissions and reliance upon vehicles, which would also benefit local health.	Neutral. 0 A no policy option would not alter the status quo.	-
3.	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT. + The proposed policy would ensure that new residential developments provide secure facilities for parking and storage of cycles. Thus reducing the public perception of crime due to adequate storage facilities.	Unknown? Given that the details and plans of future developments are not known it is not possible to quantify the effects upon the SA objective.	-
5.	N/A		N/A
6 To create vibrant balanced communities where residents feel a 'sense of place' and individual contribution is valued.	Permanent. Direct. ST/LT + The proposed policy has the potential to positive impact on this objective by delivering new development that has good connectivity for pedestrians and cyclists and considers disabled access. This will help to support sense of place and community.	Neutral. 0 A no policy option would not alter the status quo.	
7. To 10	N/A		N/A
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. LT + The proposed policy would pursue sustainable practices by increasing provision for cycling across the district. This would have additional benefits in that local air quality and health of residents would improve due to the increased options of travel either by public transport improvements or cycling for example.	Neutral. 0 A no policy option would not alter the status quo.	-
12 and 13	N/A	1	N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT. + The proposed policy could allow the utilisation of a cycling which would reduce emissions through decreased road traffic.	Neutral. 0 A no policy option would not alter the status quo.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT. ++ The proposed policy would require new development to be designed to enhance cycling provisions. Therefore, the option would help reduce the use of private vehicles due to the increase in alternative transport provisions. Indirectly this option is likely to contribute towards this objective by improving access (e.g. for cyclists and pedestrians) which in turn could improve access to key transport links.	Neutral. 0 A no policy option would not alter the status quo.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT. + The proposed policy would require new development to appropriately incorporate sufficient provisions for cycling as mode of transport including parking and in substantial developments changing facilities. Increasing such provisions will connect Thanet to the wider region in a sustainable manner. The impacts are only deemed minor as cycling is unlikely to be an appropriate choice if	Neutral. 0 A no policy option would not alter the status quo.	-

Page 779

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	residents are travelling substantial distances.		
17. to 23	N/A		N/A
Summary	·		

Page 780

The proposed policy has the potential to positive impact on the objectives by delivering new development that has good connectivity for pedestrians and considers disabled access.

Policy adoption would actively seek to increase safe and appropriate cycling provisions at the earliest opportunity within new developments and grow the cycling network across Thanet. There are numerous sustainability benefits for doing so, particularly regarding improved travel options, improved air quality and enhanced health all indirectly via the potential to reduce road traffic and vehicle use. Under a no policy option the status quo would ensure the effects would largely be neutral.

Policy 125: Policy TP04 – Public Transport

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 3	N/A		N/A.
4. To increase public safety and reduce crime and fear of crime.	Permanent. Direct. ST/LT ++ The proposed policy could result in the provision of safe, secure and convenient access for all road users in new developments. The proposed policy would increase the provision for sustainable modes of transport and public transport spaces and facilities. Such investments into new facilities would allow opportunities to factor out the fear of crime within public transport through modernisation. It would also	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	allow safe provision for secure cycle spaces and ensures to improve personal security.		
5. to 10	N/A		N/A.
11. To ensure that a sustainable pattern	Permanent. Direct. ST/LT ++	Neutral. 0	-
of development is pursued.	The proposed policy would pursue sustainable practices by increasing public and sustainable transport measures across the district to ensure adequate provisions are in place for all to access facilities and services on offer. As such the policy would increase local sustainability by ensuring appropriate development of the public transport network to increase sustainable travel opportunities for all members of society to utilise.	A no policy option would not alter the status quo.	
12. and 13	N/A		N/A.
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT. + The proposed policy could allow the utilisation of public transport which could lead to the reduction or mitigation of traffic capacity and reduce the number of private vehicle upon the roads thus reducing the negative environmental conditions. In turn local air quality could improve as a result of the management plans.	Permanent. Direct. ST/LT. + This option will not alter the status quo, given current national legislation guidance to improve air quality.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Direct. ST/LT. ++ The proposed policy require new development to be designed to reduce the need to travel, be accessible to public transport and meet the needs of pedestrians and cyclists. Therefore, the option would have a significant role in reducing reliance on the car, encouraging the use of sustainable transport or reducing the need to travel.	Neutral. 0 A no policy option would not alter the status quo.	-
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT. + The proposed policy would increase the public transport network across Thanet and actively increase investment into such provisions where new developments are concerned. This in turn will increase the connectivity in sustainable modes across the district and wider Thanet area. The impacts are only minor positive as the public transport network includes road and rail but not air so the connectivity to the wider area and beyond is unlikely.	Neutral. 0 A no policy option would not alter the status quo.	-
17. To 21	N/A		N/A.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/LT +/? The proposed policy increased provisions for public transport, which would reduce the reliance upon private vehicle travel. In turn the increased	Neutral. 0 A no policy option would not alter the status quo.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	utilisation of more sustainable modes of transport would reduce the districts consumption of fuel.		
23.	N/A		N/A.

Adoption of the proposed policy to support the growth and active investment into public transport provisions has the potential to yield significant positive effects. The proposed policy would increase travel opportunities and reduce the number of vehicles upon roads which would have environmental and health benefits. Additionally it would increase the connectivity across the district and ensure all members of society have access to facilities, services and employment. A no policy option would not alter the status quo and as such would not actively seek to improve the public transport network.

Policy 126: Policy TP05 - Coach Parking

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 8	N/A		N/A
9. To protect and enhance the areas natural, semi-natural and street scene to support the tourist economy.	Permanent. Indirect. ST/LT +/? The proposed policy provides for designated parking areas for coaches within Margate and Broadstairs. The retention of these coach parks will help keep coach traffic away from main tourist areas, including the Main Sands in Margate and the High Street in Broadstairs. This will help retain the attraction of tourism in these locations.	Permanent, direct ST/LT - No policy option could encourage development pressure on these existing sites, which would transfer coach parking to on street locations	-
10. to 13	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
14. To improve air quality in the	Permanent. Indirect. ST/LT +/?	Permanent, direct ST/LT -	-
District's Air Quality Management Areas.	The proposed policy would help keep the time spent by coaches on the local transport network to a minimum and would therefore be beneficial in terms of improving the local air quality in the main tourist areas of Margate and Broadstairs.	No policy option could encourage development pressure on these existing sites, which is likely to lead to increased coach movements on the local transport networks whilst seeking appropriate places to pull up or park.	
15. To provide a sustainable public	Permanent. Indirect. ST/LT +/?	Permanent, direct ST/LT -	-
transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	The proposed policy would help reduce the time that coaches are spent using the local transport network seeking appropriate places to pull up or park, which would help alleviate congestion on the local transport network and aid the movement of buses and other vehicles.	No policy option could create added pressure on the local transport network, which may increase congestion to the detriment of other road users, including buses.	
16. to 23	N/A		N/A
Summary			•

The proposed policy seeks to maintain and potentially enhance coach parking, which will have beneficial effects to the local tourist industry and for the local road network. Any development pressures applied to these sites, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy 127: Policy TP06 – Car Parking

SA Objective	Proposed Policy	No policy.	Mitigation and enhancement measures
1. to 14	N/A		N/A
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy would help reduce the time that vehicles are spent using the local transport network seeking appropriate places to pull up or park whilst utilising local services or seeking access to residential property. This would help alleviate congestion on the local transport network and aid the movement other vehicles.	Permanent, direct ST/LT - No policy option could create added pressure on the local transport network, which may increase congestion to the detriment of other road users.	-
16. to 23	N/A		N/A

Summary

The proposed policy seeks to implement appropriate standards of parking for various uses. This would mean that parking provision, outside of town centres, would increase proportionately with the types of development implemented. The no policy option would potentially lead to a comparative lack of parking if developers are not duty bound to provide appropriate parking provision within developments.

Policy 128: Policy TP07 – Town Centre Public Car Parks

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 8	N/A		N/A
9. To protect and enhance the areas	Permanent. Indirect. ST/LT +/?	Permanent, direct ST/LT -	-
natural, semi-natural and street scene to support the tourist economy.	The proposed policy provides for a retention of public car parks within	No policy option could encourage development pressure on these existing	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	Margate, Ramsgate and Broadstairs. The retention of these car parks will help keep traffic away from main tourist areas, including the Main Sands in Margate and the High Street in Broadstairs. This will help retain the attraction of tourism in these locations. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur.	sites, which would transfer public parking to on street locations	
10. to 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT +/? The proposed policy would help keep the time spent by private vehicles on the local transport network to a minimum and would therefore be beneficial in terms of improving the local air quality in the main town centres of Margate, Ramsgate and Broadstairs.	Permanent, direct ST/LT - No policy option could encourage development pressure on these existing sites, which is likely to lead to increased vehicle movements on the local transport networks whilst seeking appropriate places to pull up or park.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy would help reduce the time that vehicles spend using the local transport network seeking appropriate places to pull up or park, which would help alleviate congestion on the local transport network and aid the movement of other vehicles.	Permanent, direct ST/LT - No policy option could create added pressure on the local transport network, which may increase congestion to the detriment of other road users.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
16. to 23	N/A		N/A

The proposed policy seeks to maintain public parking provision, which will have beneficial effects to the local tourist industry and for the local road network. It is important that the proposed policy includes provision for requiring replacement parking should development of public car parks occur. Any development pressures applied to public car parks, which might be experienced as part of the no policy option, is likely to lead to detrimental effects on the tourist industry as traveller stress is likely to be increased, and increased congestion on the local road networks, particularly during the tourist season.

Policy 129: Policy TP08 – Freight and Service delivery

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 7.	N/A		N/A
8. To ensure the sustainable development of the proposed economic growth and encourage employment development at key sites within the District to support priority regeneration areas.	Permanent. Indirect. ST/LT +/? The proposed policy would help reduce the time that service vehicles spend using the local transport network seeking appropriate places to pull up or park whilst delivering or collecting from local services. This would help alleviate congestion on the local transport network and aid the movement other vehicles.	Permanent, direct ST/LT - No policy option could create added pressure on the local transport network, which may increase congestion to the detriment of other road users.	-
9. to 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT +/? The proposed policy would help keep the time spent by service vehicles on the local transport network to a	Permanent, direct ST/LT - No policy option could encourage on street servicing of businesses, which is likely to lead to increased congestion	

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	minimum and would therefore be beneficial in terms of improving the local air quality in town centres.	on the local transport networks whilst seeking appropriate places to pull up or park, as well as the potential obstacle caused by on street parking.	
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy would help reduce the time that service vehicles spend using the local transport network seeking appropriate places to pull up or park whilst delivering or collecting from local services, which would help alleviate congestion on the local transport network and aid the movement of other vehicles.	Permanent, direct ST/LT - No policy option could create added pressure on the local transport network, which may increase congestion to the detriment of other road users.	
16. to 23	N/A		N/A

The proposed policy seeks to implement appropriate standards for the servicing of businesses. This would reduce on street deliveries, which would have beneficial effects relating to local air quality and traffic congestion. The no policy option would potentially lead to a comparative lack of service bays if developers are not duty bound to provide appropriate provision within developments.

Policy 130: Policy TP09 – Car parking provision and Westwood

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1. to 9.	N/A		N/A
10.	Permanent. Indirect. ST/LT +/?	Permanent, Indirect ST/LT -	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	The proposed policy aims to maintain current car parking standards at Westwood for existing developments, with the additional aim of ensuring that new commercial development promotes alternative forms of transportation. By limiting the potential for private car journeys to Westwood, development sites identified for future commercial development will not be jeopardised by additional parking.	The no policy option would potentially lead to a significant increase in the amount of parking provision at Westwood, which would potentially replace or reduce additional development opportunities within the area.	
11. to 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT +/? The proposed policy aims to maintain current car parking standards at Westwood for existing developments, with the additional aim of ensuring that new commercial development promotes alternative forms of transportation. By limiting the potential for private car journeys to Westwood, congestion would potentially be reduced that would have an indirect effect on local air quality.	Permanent, Indirect ST/LT - The no policy option would potentially lead to a significant increase in the amount of parking provision at Westwood that would encourage private car use. This would likely lead to an increase in congestion on surrounding roads that would adversely affect local air quality.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT +/? The proposed policy would help encourage the implementation of more sustainable transport links within and to	Permanent, Indirect ST/LT - The no policy option would retain dependency on use of private cars, which may result in increased congestion on the roads surrounding	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	Westwood, enabling more journeys to be made by bus and cycle.	Westwood. This would potentially affect bus services that get caught up in within the congestion.	
16. to 23	N/A	N/A	
Summary			

The proposed policy seeks to maintain parking provision at Westwood, whilst limiting the potential for increased parking provision associated with new commercial development. This would have beneficial effects on local air quality and the local transport network, as pollution and congestion associated with private car use is limited. The no policy option would retain dependency on use of private cars, which may result an ongoing increase in pollution and congestion on the roads surrounding Westwood.

Policy 131: Policy TP10 – Traffic Management

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
1.	N/A		N/A
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	Permanent. Indirect. ST/LT. + An increase in traffic management practices across new developments could yield an indirect positive benefit in that road traffic accidents could be reduced. The traffic management plans could create a safer travelling environment and as such reduce injuries and collisions which would potentially ease stresses and requirements upon healthcare services.	Permanent. Indirect. ST/LT. + A no policy option would meet the demands of the objective due to the Traffic Management Act 2004.	-
3. to 10	N/A		N/A

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
11. To ensure that a sustainable pattern of development is pursued.	Permanent. Direct. ST/LT ++ The proposed policy would pursue sustainable practices by increasing traffic management measures to ensure the best use of local highway network in terms safety, traffic capacity and environmental conditions. As such the policy would increase local sustainability by ensuring appropriate developments to meet the variety of natural and anthropogenic needs of the district, via a specific local policy.	Permanent. Direct. ST/LT. + A no policy option will not alter the status quo, given current national legislation guidance to improve sustainable traffic management practices.	
12. and 13	N/A		N/A
14. To improve air quality in the District's Air Quality Management Areas.	Permanent. Indirect. ST/LT. + The proposed policy could allow the utilisation of a traffic management system on highway networks which could lead to the reduction or mitigation of traffic capacity and negative environmental conditions. In turn local air quality could improve as a result of the management plans.	Permanent. Direct. ST/LT. + A no policy option will not alter the status quo, given current national legislation guidance to improve air quality.	-
15. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent. Indirect. ST/LT. + The proposed policy would ensure that new developments impose an appropriate management strategy to best make use of highways in terms of traffic capacity. In turn this could indirectly lead to an increase in public	Permanent. Direct. ST/LT. + A no policy option will not alter the status quo, given current national legislation guidance to improve traffic management practices.	-

SA Objective	Proposed Policy	No policy	Mitigation and enhancement measures
	transport provisions in order to reduce road traffic congestion which would meet the requirements of the objective by promoting sustainable public transport networks.		
16. To develop key sustainable transport links between Thanet and the wider Kent region and beyond, including road, rail and air.	Permanent. Direct. ST/LT. + The proposed policy would improve traffic management practices. And enhance practices to mitigate traffic capacity to better utilise the highway network. As such sustainable transport links would grow due to less congestion and ease of use to access the wider region around Thanet.	Permanent. Direct. ST/LT. + A no policy option will not alter the status quo, given current national legislation guidance to improve traffic management practices, which would ease congestion and improve access to the wider region.	-
17. to 23	N/A		N/A
Summary There is minimal difference between the	proposed policy and no policy option. Both	ontions seek to enhance sustainability of t	he District and commonly do so in

There is minimal difference between the proposed policy and no policy option. Both options seek to enhance sustainability of the District and commonly do so in similar ways given that the local policy regularly reflects the Traffic Management Act 2004. As such adoption of the proposed policy or the no policy option would be beneficial, yet incorporating the local specific plan regarding traffic management would add an additional layer of protection to the District and ensure traffic management measures are implemented with the best interests if the local community at the core.

Appendix G

Justification of Preferred Options

ANNEX 2

Thanet District Council

Draft Thanet Local Plan to 2031

Justification for Preferred Options

Justification for Preferred Options

Justification for the Preferred Options

The Council carried out a consultation on Issues and Options for the new local plan from 3rd June - 14 August 2013. Comments were invited on various options that could form new planning policies.

We have considered the responses to that consultation, and comments made in the Sustainability Appraisal report that was produced for that consultation.

The following tables set out the options that were considered, and why they have been accepted or rejected, to explain why the policies in the Preferred Options plan are considered to be the most appropriate.

Economy

Issues and Options Issue 1

Issue 1 - What level of employment growth should be planned for up to 2031?

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

Policy SP02 - Economic Growth

Non-Strategic

None

Issue	Options in interim SA	Sustainability Appraisal	-	Why other options have been rejected
Level of employment to be planned for	1a – baseline scenario		high. The NPPF says we	The Economic Lower growth option would not
	1b – policy on scenario	boosting the green	foreseeable types of	accord with positive economic strategy
	1c – risk based scenario		employment growth. Given past poor	required by the NPPF.
			performance there is a need for a step change in	There are concerns regarding delivery of the
			-	Higher economic growth option given economic
			supports the Council's Economic and	uncertainties and rate of

			Regeneration Strategy. It also supports population growth when combined with potential airport growth.	change to date. The Economic Baseline option would not deliver step change in employment growth needed or meet the growth expectations of the NPPF.
Should we plan for additional employment growth at the airport?		This option is still to be fully appraised for SA	by NPPF to support such growth. The airport is a potential significant asset which needs positive planning framework to help in it's delivery of airport related or	potential future and contrary to the NPPF's instructions to support all sectors of the economy. To not plan for additional employment growth at the airport would be ignoring a potential major
What level of growth at the airport	1d – additional low growth	The option for airport high growth resulted in the		The low growth option is not enough to sustain a
	1e – additional high growth 1f – no growth		Economic and Employment Assessment shows that a mid range is more realistic and deliverable. Evidence	functioning airport High growth is likely to be unrealistic given the uncertainty of aviation

Thanet and East Kent. Negative effects are associated with the effects of large scale employment growth such as greenhouse gas emissions from the construction and operation of new facilities. The low growth option had less dramatic effects and the no growth option	demonstrates that the no growth and low growth options are not viable. High growth, given the uncertainty of growth at the airport in the context of the 2009 Airport Masterplan is unlikely to be deliverable. Should the airport not be viable in	here are not likely to be significant in the plan's timeframe.

Issue 3 - How can we promote our infrastructure assets?

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

Policy SP05 - Manston Airport

Policy SP09.3 - Ramsgate Port

Non-Strategic

None

This issue also informs Policy SP39 - New Rail Station in the Transport and Infrastructure Section

Issue	Options in interim SA	Sustainability Appraisal	-	Why other options have been rejected
Airport		5 5		3b. This option would be harmful to the airport's
		being likely to have benefits in terms of contributing towards job creation, economic growth, supporting the visitor economy and providing measures to	economy. Having a policy relating to the airport allows us to include policy provisions which safeguard the environment. A flexible	contrary to the NPPF's instructions to support all sectors of the economy.

	effects such as impacts on landscape, noise and air quality. Removing this policy safeguard has less positive effects, but there	types of economic development in line with	stifling an important growth sector of the economy and wider impact and therefore contrary to the NPPF.
3f – no support for a new station 3g – support improvements to Ramsgate Station	growth (particularly the visitor economy) and providing infrastructure to support modal shift.	and encourage sustainable travel. Evidence suggests that existing stations are at capacity and improvements to existing	Not planning for a parkway could stifle economic growth. The NPPF requires that Local Plans make provision for infrastructure to build a strong, responsive, competitive economy.

		particular.		
Port	3c - continue to safeguard the port 3d – cease policy protection	The option to safeguard the port has the greatest potential benefits particularly with respect to supporting economic growth. It also contributes towards maintaining the towns sense of character as a port town as well as indirectly contribute towards transport infrastructure in Kent and the wider region.	NPPF requires Local	3d. Ceasing policy protection for the port would potentially restrict economic growth opportunities and would be contrary to the NPPF.

Issue 4 - How should Thanet's Town centres develop?

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

Policy SP06 - Thanet's Town Centres

- Policy SP07 Westwood
- Policy SP08 Margate
- Policy SP09 Ramsgate
- Policy SP10 Broadstairs

Non-Strategic

Policy E04 - Primary and Secondary Frontages

Policy E05 - Sequential and Impact Test

Policy E06 - District and Local Centres

Issue	Options in interim SA	Sustainability Appraisal		Why other options have been rejected
	hierarchy	5 5	retail hierarchy. The	5c – Evidence suggests that given the uncertain future of retail there is no

		services such as banks.	know what type of	
		This has the same	commercial leisure	
		sustainability impacts as	development is likely to	
		the option above.	come forward there is a	
			need to be flexible.	
			5f. Plan for an additional	
			20% floor space for A2-	

		The continue to	A5 uses in town centres need to provide for all town centre development. This is required to provide a balanced and functional town centre, and increase the vitality and viability of town centres.	
Use of vacant premises in Ramsgate and Margate	requirement to accommodate need for town centre development in the existing premises where possible	existing vacant units was unlikely to have significant negative effects and was predicted as likely to have a positive effect on job creation, supporting the economy, sustainable travel and the tourist economy. Uncertain effects were those on	centre development in vacant town centre units within Margate and Ramsgate. The best location for town centre development is within the commercial core where many vacant units are located in Margate and Ramsgate. This is needed to support function and vitality of town centres. It would	5g (i) identifying additional land outside the core town centre to accommodate need would not be the most sequentially preferable location, and would not constitute the best use of land. This approach would extend town centres unnecessarily and be harmful to vitality and viability of the town centres especially in terms of footfall.

			comprise the most sequentially preferable location and locating town centre development here would have the most positive impact on vitality and viability of town centres.	
Westwood	5i – accommodate development on a new adjacent site	The option to accommodate need on sites outside of existing commercial areas scores negatively as it would potentially require development on greenfield land whereas the option to accommodate need in existing commercial areas supports the sustainable use of land by directing development to areas of previously developed land. Both options had positive effects in terms of supporting job creation and economic growth.	development within the existing commercial area. There is sufficient land available with the existing commercial area to accommodate development need to the end of the plan period. This would help to	sequentially preferable location and would not be accordance with the NPPF. It could potentially harm the vitality and viability of the town centre particularly with regard to footfall.

			commitments within the commercial areas provide for significant amount of the identified need during the plan period.	
Broadstairs	centres development close to existing commercial area 5k – accommodate need for town centre development at Westwood	commercial area scored the best especially in terms of accessibility, job creation, economic growth and the sustainable distribution of development and supporting a shift away	centre development close to the existing commercial area. This is the most sequentially preferable option as it provides for the need where it arises and is therefore in accordance with the NPPF. It also reduces the need to travel for Broadstairs residents. It is the most sustainable option and promotes the vitality and viability of town centres as well as supporting local communities.	5k – This option is potentially harmful to viability and viability of Broadstairs as it is not providing for the need where it arises.

		cannot easily be accessed on foot or by bicycle thereby requiring people to use the private car.		
District and Local Centres	5I allow retail development to support community needs	allows retail development in district and local centres to support community needs is likely to contribute towards sustainable economic growth, local sense of place and sustainable transport. This is on the basis that locating small	retail development in District and Local Centres reduces the need to use car as it provides everyday convenience	Not proving these facilities in District and Local centres would mean that people have to travel further to meet their everyday small scale shopping needs and this is not sustainable.
Thresholds for impact	5m – set local thresholds	Setting a local threshold	5m. Setting a local	5n No locally set

	development outside town centres 5n – do not set local thresholds for out of town centre development but use the NPPF thresholds	likely to result in more beneficial effects than using the thresholds set out in national policy. This is on the basis that locating small convenience type shops in or close to residential areas would avoid larger retail units being developed that could detract and potentially	policy is responsive to local circumstances. The NPPF suggests that thresholds are set locally (although it does provide a default threshold where this is not the case). Due to the function and role of	be contrary to government advice as the NPPF encourages local planning authorities to set local thresholds.

	in these effects.	

The following policies and options are currently undergoing the Sustainability Appraisal process:

Policy Name	Draft Policy Wording	Options
E16 Conversion of rural buildings	Where it can be demonstrated that	Preferred option- to have a policy that
	the building is not needed for	supports conversion or rural buildings
	agricultural use the conversion of	for economic development purposes
	rural buildings to other uses for	as this is in accordance with the NPPF.
	economic development purposes	The other option was no policy.
	will be permitted where all the	
	following criteria are met:	
	1) Their form, bulk and general	
	design are in keeping with the	
	character of the surrounding	
	countryside.	
	2) The proposed use is acceptable in terms of its impact on the surrounding area and the local highway network.	
	3) Demonstrate through a structural survey that the building is capable of conversion.	
	4) Any alterations associated with	

the conversion would not be detrimental to the distinctive character of the building (or its setting), its historic fabric or features.	
5) If the building forms part of a complex of agricultural or industrial buildings, a comprehensive strategy is put forward which shows the effects on the use of the remaining complex, and on any listed buildings and their settings.	
6) Where the building currently contains protected species, mitigation should be provided.	

Issue 6 - How can we support the visitor economy?

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

None

Non-Strategic

- Policy E07 Serviced Tourist Accommodation
- Policy E08 Self catering Tourist Accommodation
- Policy E09 Protection of Existing Tourist Accommodation
- Policy E10 Major Holiday Beaches
- Policy E11 Intermediate Beaches
- Policy E12 Undeveloped Beaches
- Policy E13 Language Schools
- Policy E14 Quex Park

	demonstrated that they		
7i – policy protecting	5	We should protect sites	
	•	that are considered	
except where it can be	a positive effect on	important to Thanet's	
demonstrated that the		visitor economy	

7j si pa TI 7i of	 protect identified tes which are of articular importance to hanet's visitor economy k – no policy protection f existing tourism acilities 	within existing settlements and would also contribute towards retaining important historic and architectural features that are linked to the current and historic tourist and visitor economy of the District. However, blanket protection without the criteria that would allow alternative uses where	i.e. Dreamland ads this helps to grow the tourism industry in line with the Council's Economic and Regeneration Strategy. Hotel development is also an important element of improving the tourism industry. Policy wording will require hotels to demonstrate viability in order to restrict the loss of accommodation stock to attract the overnight visitor.	
		Policy to protect specific sites that are of importance to the visitor economy are likely to have a positive effect, on job creation, economic		

	growth and potentially the use of previously developed land. However, without this policy there would be a greater degree of uncertainty as to whether or not its effects would be positive or negative.		
7I – continue policy support for language schools subject to criteria 7m – remove policy support fro language schools	result in positive effects than not supporting them, particularly in terms of job creation and supporting economic growth. Any potentially negative	Language schools are a major contributer to Thanet's economy and should be encouraged in line with the NPPF.	Not supporting language schools could impact on Thanet's economy and would be contrary to the NPPF.

<u> </u>			
beaches – three zones of beaches – major holiday beaches, intermediate and undeveloped 7r – No policy protection	potential to result in significant positive effects for the District as a result of ensuring that development only occurs near beaches that is appropriate to the type of beach. As a result the potential amenity, visual, landscape and ecological conflicts that might occur are avoided. Furthermore, it has the potential to indirectly support the character and sense of place associated with the different types of	beaches according to their character and level of facilities available. This approach protects undeveloped beached which are important habitats and directs development to the major holiday beaches in order to support the visitor economy. This assists with economic development and employment generation as well as protecting the environment and is	Not applying policies to the beaches depending on their character would potentially mean that development is directed to areas where nature conservation is more important. Providing certainty for development helps support economic development and therefore beach policies are considered important.

Issue 7 - How can we support communications infrastructure and home working?

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

None

Non-Strategic

Policy E02 - Home Working

Policy E03 - Digital Infrastructure

Issue	Options in interim SA	Sustainability Appraisal	Preferred Option and Justification	Why other options have been rejected
How can we support communications infrastructure and home working	developments to be provided with appropriate communications 4b – no requirement for telecommunications infrastructure	developments to provide appropriate communications infrastructure has the potential to achieve a number of SA objectives by reducing the need to	4a. Require new developments to provide telecommunications. It supports the local economy, reduces the need to travel so is more sustainable and is in accordance with the NPPF	Not requiring new developments to provide appropriate communications infrastructure is missing an opportunity to enhance local economic growth and competitiveness of the District.

support, subject to criteria for home working 4d – no support for home working	contribute to SA objectives by reducing the need to travel and indirectly helping to make residential areas more vibrant by increasing daytime activity.	Support home working subject to local impacts because it supports the local economy and reduces the need to travel and is therefore more sustainable	The NPPF requires that Local Plans to facilitate flexible working practices such as the integration of residential and commercial uses within the same unit so therefore not supporting home working would be contrary to the NPPF.
support, for work hubs, particularly in rural areas 4f – Make no provision for work hubs (provide them j on business parks and within town centres	allocations for workhubs would benefit rural areas as well as urban ones and would help distribute job creation and the economic benefits of business growth in rural areas. It also indirectly offers a sense of place and vibrancy to counteract the effects of commuter/dormitory settlements.	Make no specific provision but provide for work hubs on business parks and in town centres. Providing for enough land to accommodate work hubs is proactively meeting development needs in accordance with the NPPF. Providing for them on business parks is also sustainable as the employment sites have been assessed in terms of sustainability.	If workhubs are needed then not providing for them would be contrary to the NPPF. The NPPF requires that Local Plans identify sites to meet anticipated needs over the plan period.

Housing

these be rejected.

The following policies and options are currently undergoing the Sustainability process:

Policy Name	Draft Policy Wording	Options
SP18 Type and size of dwellings (aspect encouraging higher proportion of houses than recommended in Strategic Housing Market Assessment)	This encourages housing developments to incorporate a higher proportion of houses (than flats) than recommended in the SHMA and indicates justification will be required for schemes containing a higher proportion of flats than recommended.	Dwelling completions in the district have in the last few years included a proportion of flats substantially higher than recommenmded in the SHMA. This aspect of the policy seeks to redress the balance. Alternative option would be to not incorporate this apspect. However, this would likely significantly extend the time period within which the overall stock may come to reflect the balance recommended in the SHMA.

H06 New agricultural dwellings	This policy restricts proposals for new agricultural dwellings to cases where there is a genuine requirement , and subject to consideration of design access and location, and to be restricted to occupation for such purpose.	The policy is considered to reflect the NPPF approach to restricting isolated homes in the countryside unless special circumstances exist. The policy aims to ensure that any such development genuinely meets such circumstances.
H07 Care and Supported Housing	This policy aims to support provision of good quality suitable accommodation for people needing care and support and that C2 uses are appropriately located.	The policy is considered important to facilitate provision of such housing in line with evidence of need. An option would be no policy. However, this could imply lack of support for such proposals.
H08 Accessible homes	This policy identifies the level of Lifetime Homes and Wheelchair Design housing that may be required as part of the housing mix.	There is evidence of need for such accommodation, and the policy aims to faclitate its provision in line with that. Alternative option of no policy may result in no such accommodation being provided, contrary to the requirements of the NPPG and evidence of need.
H11 Residential Use of Empty Property	This policy supports proposals to bring empty property within built confines into residential use subject to compatibility with nearby uses and other policies.	The NPPF requires us to identify and bring back into residential use empty housing and buildings in line with local strategies. Thanet has a large stock of empty and under-used property much of which is being, and could be usefully

		be, brought into residential use. Alternative option of no policy could discourage proposals or fail to signal that such proosals are generally to be encouraged.
H12 Retention of existing housing stock	Policy restricting loss of existing housing unless proposal relates to community facilities , tourism related uses, otherwise complying with area based housing objectives and providing there is no conflict with certain other policies.	Alternative options 1 Policy as summarised 2 policy excluding exceptions 3 policy including additional exceptions 4 no policy Preferred option policy as summarised is considered appropriate to support the objective of increasing the overall housing stock, and with suffcient specific exceptions to support the Plan's objectives.

Environment & Quality of Life

Issues and Options Issue 11

Issues and Options Issue 11 - How do we maintain a physical separation of open countryside between Thanets Towns and Villages?

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

	 buildings, 2) existing features including trees, natural habitats, boundary treatments and historic street furniture and/or surfaces that positively contribute to the quality and character of an area are 	

1	
retained and protected	
3) microclimate is factored into design proposals and that public spaces receive adequate sunlight,	
4) materials are of a high quality and respond to the context to help create local distinctiveness,	
5) an integrated approach is taken to surface water management as part of the overall design,	
6) a coordinated approach is taken to the design and siting of street furniture, boundary treatments, lighting, signage and public art,	
7) trees and other planting is incorporated, appropriate to both the scale of buildings and the space available,	
8) species are selected to enhance biodiversity through the use of native planting and/or species capable of adapting to our changing climate, and	
9) the design considers the needs of all users and adopts the principles of inclusive design.	

Issues and Options Issue 14 - How can we adapt to the effects of, and mitigate against the effects of climate change

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

SP30 - Climate Change

Non-Strategic

- Policy CC01 Fluvial and Tidal Flooding
- Policy CC02 Surface Water Management and Water Quality
- Policy CC03 Coastal Development
- Policy CC04 Sustainable Design
- Policy CC05 Renewable Energy Installations

Policy CC06 - District Heating

- Policy CC07 Solar Parks
- Policy CC08 Richborough

Issues and Options Issue 16 - Provide High Quality Homes and Neighbourhoods

The policies in the Preferred Options Local Plan as a result of the Issues and Options considerations are as follows:

Strategic

Policy SP28 - Quality Development

Non-Strategic

- QD01 General Design Principles
- QD02 Living Conditions
- GI04 Amenity Green Space and Equippled Play Areas
- GI06 Landscaping and Green Infrastructure in New Developments
- Policy CC02 Surface Water Management and Water Quality

Issue 16 – Provide high quality homes and neighbourhoods	Options in interim SA	Sustainability Appraisal	•	Why other options have been rejected
Amenity value and character	16a – Consideration of impact of development on residential amenity value	•	16a, 16b and 16c – High quality design and a good standard of amenity can help support the	
	16b – Consideration of impact of new development	significant of the options is the	economic strategy and contribute towards a	

	on the character and	roquiromont for	higher standard of headle	
	on the character and		higher standard of health	
		•	and wellbeing. This is	
		into account its	particularly important in	
		surroundings,	Thanet where some	
	16c – Consideration of impact			
	•	J	the design and quality of	
			developments have not	
	on neighbouring buildings		been to a very high	
			standard.	
		townscape. Specific		
		policy criteria and		
		mechanism for		
		achieving these	These options comply	
			with the NPPF, and were	
		•	supported in the	
		and assessment in	consultation.	
		subsequent stages of		
		the local plan.		
Movement and access in	16d – Provision of	16d will help support	16d – It is important to	
new development	pedestrian/cyclist/vehicle	alternatives to private	provide for different	
	movement in new	car use by ensuring	transport modes both in	
	development	that infrastructure and	terms of practicalities as	
		facilities are integrated	people will still travel by	
	16e – Provision of disabled	into the design.	car, and enabling safe	
	access		and convenient cycling	
		16e will have a positive	and walking routes which	
		effect in improving	will contribute to reducing	
		access to new	carbon emissions by	
		developments for	providing an alternative	
		vulnerable groups and	means of transport as	
		will also help to make	well as health benefits.	
		new developments	Option supported but	

		all abilities are happy to live.	considered more appropriate to locate in other sections of the plan 16e – Option supported but considered more appropriate to locate in other sections of the plan.	
Open space and green space	development 16g – Provision of landscaping and planting, green infrastructure 16h – Provision of wildlife habitats and corridors	local health benefits by providing opportunities for people to exercise more and live healthier lifestyles. 16h is likely to have a significant positive effect on habitat creation and	16f – The NPPF states that access to high quality open spaces can make an important contribution to the health and well being of communities. It states that assessments should identify deficits and needs for open space to determine what provision is required. Thanet is currently deficient in public open space provision so this option is appropriate, as well as to create pleasant living environments and support a healthy community 16g – This option will help create high quality areas	

			where people will want to live as well as contribute to the GI network 16h – This option will improve biodiversity and also quality of life for Thanets residents	
Crime prevention and contributing towards public art	16i – Measures to prevent crime and disorder 16j – Integration of public art	only benefit new development. Both options would likely have a significant effect	should create safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion. This option was well supported in the public consultation with one comment suggesting that fear of crime can undermine other policies designed to improve the	16j – The incorporation of public art received little support in public consultation and is not considered necessary for the sustainable development of the district. The NPPG suggests that public art is not a priority in suggesting that planning obligations should not be sought for anything clearly not necessary to make a development acceptable in planning terms, giving public art as an example.

Other policy issues	16k – Provisions for clothes	16k could contribute	16k – Ensuring sufficient	
	drying facilities and refuse	towards reducing	space for clothes drying	
	disposal/dustbin storage	greenhouse gas	facilities contributes to	
		emissions and energy	health and wellbeing in	
	16I – incorporation of	consumption by	the provision of a space

		climate change	made for waste storage,	
		adaptation and	particularly in enabling	
		indirectly contribute	recyclable and general	
		towards habitat	waste to be segregated.	
		creation with SUDs in	5 5	
		the form of ponds or	16I – This option is	
		waterbodies.	considered appropriate	
			as it contributes towards	
			reducing surface water	
			flooding, can provide new	
			habitats and biodiversity,	
			and can contribute to	
			health and well being.	
			However SUDs will be	
			inappropriate in some	
			areas due to potential	
			contamination of the	
			groundwater. This issue,	
			and relevant policy, will	
			be addressed under a	

			separate policy. 16m – This option is necessary to ensure advertisements do not compromise public safety, are not a public nuisance and do not detract from the important qualities of conservation areas.	
Areas of high townscape value	policy protection for AHTVs 16o – Removal of policy protection 16p – Identify areas that are of high townscape value and protect and enhance through policy	have positive effects on townscape and indirectly on the sense of place, peoples satisfaction with where they live and cultural heritage features. 16o has the potential for adverse effects on the sense of identity of towns and could potentially harm the visitor economy and result in adverse, visual townscape and heritage effects.	protection from the existing AHTVs, the Local Plan will include stronger design policies with an emphasis on the qualities identified in the existing AHTV areas. This will ensure those qualities are protected and enhanced in all areas of the district rather than only those with an AHTV designation. It is considered that stronger design policies should remedy the concerns raised regarding option 0	policy protection 16p – There are many areas of the district that are of high townscape

Housing density 16q – Housing de in zones 16r – Housing der decided by density surroundings of a site 16s – Continue de requirement H1 in	nsity ty of pplication ensity n TLP 2006	positive effect on sense of place, townscape, heritage features and the sustainable use of land resources. By allowing different densities of development the options have indirect benefits for sustainable transport by increasing the numbers of people living close to town centres where public	their own approach to housing density to reflect local circumstances and that this should be guided by design policies.The Quality Development Topic Paper identifies different types of areas and suggested density units as recommended in the Kent Design Guide. However it was considered most	16s – This requirement was set based on national and regional targets – both of which no longer exist. Therefore it is
		accessed more easily.	be fairly flexible and which reflects or is compatible with the density of the surroundings as many areas already have a variety of densities in a relatively small area and distinguishing density areas would not be clear cut.	
Garden land16t – Policy restrictdevelopmentdevelopment on g	garden land	16t can contribute indirectly towards biodiversity by helping		16t – Restricting all garden development is not considered and

16u – No restriction	to retain gardens and their role as important areas of habitat within urban areas and towns.	appropriate option as there will be instances where a proposed development on garden land would improve the
		area. 16u – No restriction or criteria could make it difficult to provide justified reasons for refusal for inappropriate development that would not contribute to high quality developments and a pleasant environment.

The following policies and options are currently undergoing the Sustainability Appraisal process:

Policy Name	Draft Policy Wording	Options
Designing Landscape and the Public Realm	External spaces, landscape, public realm, and boundary treatments must be designed as an integral part of new development proposals and coordinated with adjacent sites and phases. Development will be supported where it is demonstrated that: 1) the design relates to the character and	Policy now combined with General design policy

intended function of the spaces and surrounding buildings,	
2) existing features including trees, natural habitats, boundary treatments and historic street furniture and/or surfaces that positively contribute to the quality and character of an area are retained and protected	
 microclimate is factored into design proposals and that public spaces receive adequate sunlight, 	
4) materials are of a high quality and respond to the context to help create local distinctiveness,	
5) an integrated approach is taken to surface water management as part of the overall design,	
6) a coordinated approach is taken to the design and siting of street furniture, boundary treatments, lighting, signage and public art,	
 trees and other planting is incorporated, appropriate to both the scale of buildings and the space available, 	
8) species are selected to enhance	

	biodiversity through the use of native planting and/or species capable of adapting to our changing climate, and	
	9) the design considers the needs of all users and adopts the principles of inclusive design.	
Advertisements	Applications for advertisements will be considered in relation to their effects upon amenity and public safety. Regard will be paid to the surrounding location, manner of illumination (if proposed), material composition, design and relationship to the land, building or structure to which they are to be affixed. Advertisements should not dominate but should be in balance with the character, townscape and architecture of the buildings on which they are situated. In and adjoining conservation areas the Council will require that the design and siting of advertisements does not detract from, and preferably makes a positive contribution to, the character and/or appearance of the area.	
Telecommunications Development	that the following criteria are met.	Option 1 – Include Telecommunications policy Option 2 – No specific policy

T		
	proposed apparatus and associated	
	structures should seek to minimise impact	
	on the visual amenity, character and	
	appearance of the surrounding area.	
	If on a building, apparatus and	
	associated structures should be sited and	
	designed to minimise impact to the external	
	appearance of the host building.	
	5	
	3) If proposing a new mast, it should be	
	demonstrated that the applicant has	
	explored the possibility of erecting	
	apparatus on existing buildings, masts or	
	other structures. Such evidence should	
	accompany any application made to the	
	Council.	
	() If any a single deviation and in a	
	4) If proposing development in a	
	sensitive area, the development should not	
	have an unacceptable effect on areas of	
	ecological interest, areas of landscape	
	importance, archaeological sites,	
	conservation areas or buildings of	
	architectural or historic interest.	
	When considering applications for	
	telecommunications development, the	
	Council will have regard to the operational	
	requirements of telecommunications	
	networks and the technical limitations of	
	the technology.	

Issues and Options Issue 17 - Protecting and enhancing Thanet's heritage assets and their setting

		day.	locations where reliance	
		Encourage more people	e on private cars is reduced	
		to walk, cycle or use	and where transport	

	 Making better use of High Speed 1 rail link. Dealing with any "pinch points" in the transport network Improving through- traffic flows at Westwood and facilitating convenient and safe movement within the area The level and location of public car parking needed in the town centres Addressing the deficiencies in the transport system to deal with existing problems or accommodate future growth. 	network is/will be able to cope. (Expected by NPPF and responsive to fact that some network junctions have capacity limitations) Policy to clarify that development will be expected to contribute as appropriate to improvements to local highway network as identified in Transport Strategy. Policy to support implementation of a scheme to relieve potential traffic congestion issues at Westwood (To support continued function of the area as a major destination) Policy to safeguard car parking provision at coastal town centres and seek to rationalise level and disposition of provision at Westwood. (Sufficient car parking is	
--	---	--	--

important to the functions of the town centres).
Need to avoid over-provision at Westwood.
Policies to encourage developers and service providers to address existing and potential deficiencies. (compatible with government policy in NPPF.

The following policies and options are currently undergoing the Sustainability process:

Policy Name	Draft Policy Wording	Options
SP34 Safe and Sustainable Travel	Policy expressing Council's commitment to working with partners to manage travel demand and sustainable modes, and requiring	Policy considered consistent with NPPF and interim sustainability appraisal objectives.
	development applications to promote safe and sustainable travel.	Alternative of no policy would undermine expression of commitment to promoting sustainable travel.
SP35 Accessible location	This policy refers to expected location of development proposals generating a significant number of trips asnd supports clusteringor co-location of services at locations accessible ion foot and by public transport.	This policy aims to reduce the need to travel and promotes use of sustainable modes. This is consistent with the NPPF objective to balance the transport system in favour of sustainable tramsport modes and

		choice about mode of travel. Alternative option of no policy could weaken the Plan's ability to direct development to locations that will assist this objective.
SP36 Tansport Infrastructure	This policy requires provision of relevant transport infrastructure	Absence of such a policy may undermine the ability to assess, and require development to secure, the type and level of supporting transport infrastructure required. Alternative of no policy could place a significant and unsustainable burden on existing infrastructre and undermine sustainable development.
SP37 Connectivity	This policy states that the Council will continue to lobby for investments to secure improved rail journey times for CTRL and domestic services between Ramsgate and Ashford	Prospective improvements will improve the attractiveness of the district as a place in which to invest and from which to commute, in turn supporting a more mixed community structure, a wider employment base, more local spending and potential job creation. Alternative option of no policy could imply lack of support for these investments.
SP38 Strategic Road Network	This policy expresses a commitment to work with neighbouring districts to assess the impact of planned growth and movement upon particular junctions on the strategic road network.	This policy reflects the need for the Highways Agency to assess the impacts of local development on the Strategic Road Network in order to assess what investement may be needed to maintain appropriate

		capacity. Alternative option of not expressing and following such commitment could lead to uncertainty about deliverability of development in terms of transport infrastructure capacity.
SP39 New Rail Station	Policy supporting development (and safeguarding the proposed site) of a new railway station suitably located west of Ramsgate subject to criteria regarding vehicular access, suitable level of car parking, integration with wider public transport services, mitigation of noise impacts, compatibility with landscape character and location to minimise loss of best and most verasatile agricultural land.	This project which is being led by the County Council is expected to generate social and economic benefits for, and beyond, the district. The policy expresses support for the project and safeguards the proposed site from alternative development. Alternative option of no policy could signify lack of support for the project and undermine feasibility of its delivery.

Policy Name	Draft Policy Wording	Options
TP01 Transport Assessments and Travel Plans	Policy setting requirement (where appropriate) for development proposals to provide Transport Assessments and Travel Plans.	Policy reflects NPPF and is considered helpful reference to clarify expectation.
		Alternative of no policy could erode

		awareness of this requirement.
TPO2 Walking	Policy setting expectation that new developent should be designed to facilitate safe and convenient pedestrain movement, and encouraging proposals to provide and	Policy considered appropriate as promoting sustainable travel modes consistent with NPPF. Alternative of no policy might undermine ability to effectively incorporate these considerations in dealing with development proposals.
TPO3 Cycling	Policy	
		Policy considered appropriate as promoting sustainable travel modes consistent with NPPF. Alternative of no policy might undermine ability to effectively incorporate these considerations in dealing with development proposals.
TPO4 Public Transport	Policy setting expectation for new development to take account of the need to facilitate use of public transport and supporting proposals to provide certain facilities to facilitate such travel.	
TP05 Coach parking	Policy safeguarding specific existing	Policy considered appropriate in order

	and potential sites for coach parking.	to safguard and augment coach parking facilities to support Thanet's visitor economy. Alternative of no policy could result in existing and proposed coach parking areas being lost to alternative development.
TPO6 Car parking.	Policy providing guidance on the level of car parking expected in new developments, including exceptions/ and continued relaxation within defined town cenre areas.	Policy considered consistent with and appropriate in light of NPPF. Continued relaxation in town centre areas considered appropriate in order that development in sustainabel locations is not precluded due to lack of space for parking provision. Alternative of no policy would result in lack of certainty by developers as what level of parking may be appropriate in particular locations and circumstances.
TPO7 Town centre and public car parks	Policy safeguarding town centre car parking	Policy considered appropriate in order to retain a sufficient quantity of suitably located town centre car parking in support of their function and vitality consistent with the NPPF. Alternative of no policy could lead to proposals eroding sufficient and suitably located provision.

Policy Name	Draft Policy Wording	Options
TP08 Freight and Service Delivery	Policy stateing new development proposals will be expected to demonstrate adequate off-street servicing.	Policy considered approprate to safeguard movement of goods and people and accommodate efficient delivery of goods in accordance with the NPPF.
		Alternative of no policy could result in conflict with safe and convenient movement in the vicinity.
TP09 Car parking at Westwood	Policy retaining expectation for development proposals to demonstrate measures to encourage element of customers to arrive by non car modes of travel, a corresponding reduction in parking provision below general guidelines, and to consider proposals that may generate parking in light of compatibility with the Westwood Relief Scheme.	Policy considered appropriate as Westwood area is characterised by a significant level of traffic movement, exacerbated by movement between different car parks in the vicinity around the intersection of two main roads. Alternative option of no policy could result in additional visits by private cars and increased movement between car parks undermining convenient and safe movement by other modes.
TP10 Traffic management	Policy supporting development required to implement traffic management measures designed to realise best use of the highway network in terms of safety, traffic capacity and environmental conditions.	Policy considered appropriate expression of support and consistent with the the NPPF reference to creating safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians. Alternative of no policy could imply lack of support.

1 Introduction

Since 2013, Ove Arup & Partners Limited (Arup) has been supporting Thanet District Council (TDC) in undertaking a Sustainability Appraisal (SA) of the emerging Thanet District Local Plan. As part of the emerging Local Plan, the way in which housing provision is to be addressed is an important issue for Thanet and its residents, due to its unique coastal setting and rural environment.

The concept of a new settlement to address housing demand was put forward as part of the Local Plan Issues and Options consultation in the summer of 2013. As limited details regarding a new settlement option were known at this time, the option performed poorly within the sustainability appraisal as there would be a high level of greenfield development requiring additional infrastructure and public transport investment in order to function. In addition, public support for a greenfield approach to housing was low. As such, the poorly performing option was discounted as a viable solution to addressing Thanet's housing demand.

Since the Issues and Options consultation, additional housing demand has been identified within Thanet resulting in a need to review the preferred housing strategy. For completeness, it was decided that a review of a potential new settlement option should be undertaken, but exploring the opportunity to implement robust mitigation in order to facilitate as sustainable new settlement scenario as possible.

This report explores the potential ways that a new settlement option could be implemented in a sustainable manner in order to improve performance against the sustainability objectives adopted for the Local Plan sustainability appraisal. The contents of this report are:

- Section 2 a review of the existing new settlement option and the need for re-evaluation
- Section 3 a literature review reporting the way in which new settlement policies have been progressed through local plans and the mitigation they incorporate
- Section 4 key mitigation measures that should be incorporated as part of a new settlement option
- Section 5 an indication of how a range of new settlement options might perform against the sustainability appraisal objectives, assuming that key mitigation measures are implemented.

2 New Settlement Option

2.1 Local plan option (2013)

In 2013, TDC identified the potential for a new settlement option to be considered as part of a viable solution to housing demand in Thanet. This was in response to Issue 9 of the Issues and Options Consultation¹, which asked for comments on the 'broad approach to the location of future homes'.

Issue 9 sought the views on a number of options relating to using previously developed land for housing; how greenfield housing should be accommodated; and where greenfield housing should be accommodated. These options are outlined in Table 1 below

 \wedge

Emphasis on previously developed land	How greenfield element should be accommodated	Where greenfield element should be accommodated	
9a. Maximise development provisions within the existing built up areas of the towns and villages in order to minimise use of greenfield land.	9d. A single location	9g. Adjoining the urban area	
9b. Focus on urban areas but with criteria (please state) for example to safeguard back gardens / family homes / sites that are not previously developed land.	9e. At a small number of locations	9h. Adjoining the villages	
9c. Focus provision on greenfield sites and aim to	9f. At dispersed sites	9i. Freestanding countryside sites	
restrict housing sites in the urban area to those important	$\mathcal{I}(\mathcal{O})^{\vee}$	9j. In the Green Wedges	
for regeneration.	S	9k. Housing in the form of a new settlement	

Table 1: Issue 9 – housing options

During the review of consultation responses, it was evident that there was public concern with the concept of a housing strategy based on a new settlement (option 9k). Very few responses to Issue 9 supported the concept of greenfield development, whilst the majority of responses advocated the development of existing urban areas with limited settlement expansion

2.2 Sustainability appraisal performance

Table 2 highlights the Sustainability Appraisal (SA) performance of the new settlement option as reported in the Interim SA Report². The SA objectives represent those used in the interim assessment of options. The assessment text includes statements where there were specific impacts associated against

¹ Thanet District Council (2013) Thanet's New Local Plan - Options consultation

² Arup (2013) Local Plan – Issues and Options: Summary Interim Sustainability Appraisal Report

individual objectives, as well as statements where text is common amongst all options relating to future homes. The latter is identified in Table 2, where text refers to 'options'.

Table 2: Sustainability appraisal performance of option 9k (Housing in the form of a new settlement).³

SA Objective	9k Housing in the form of a new settlement		
1. To provide a sustainable supply of housing including an appropriate mix of types and tenures to reflect demand and need.	Permanent, Direct and Indirect ST/LT + These options would lead to new development in different areas. As such, there will be some effect on the housing market and the supply of different types of housing.		
2. To maintain appropriate healthcare provision and access to healthcare facilities for all sectors of society.	N/A		
3. To provide access to appropriate educational facilities for all sectors of society including focus on training vulnerable and welfare dependant workers with skills necessary to ensure year round employment.			
4. To increase public safety and reduce crime and fear of crime.			
5. To provide a sustainable public transport network that allows access to key facilities, services and employment opportunities without reliance on private vehicles.	Permanent, Direct ST/LT A new settlement could be located away from existing facilities and services and could also result in the greater reliance on private car use		
6. To provide appropriate key facilities to support vulnerable people and reduce the level of deprivation identified across the wards.	to access services		
7. To create vibrant balanced communities	Unknown ?		
where residents feel a 'sense of place' and individual contribution is valued.	These options are strategic in nature; as such the effects on communities cannot be predicted at this stage. There will be some impact on existing and new communities, but this is likely to vary significantly according to where the development is, it's design etc.		
8. To provide access to employment	Permanent, Direct and Indirect ST/LT +		
opportunities for all sectors of society ensuring that everyone who wants to work has the opportunity to secure appropriate paid employment.	All options will bring about house building which in turn will bring about construction employment. Indirectly by supporting housing development there will also be greater pool of potential employees to support economic growth.		
9. To ensure the sustainable development of	Permanent, Direct and Indirect ST/LT +		
the proposed economic growth and encourage industrial and employment	All options will bring about house building which in turn will bring about capital spending,		

³ Objective 5 and Objective 16 provided duplication of traffic related objectives. The two objectives have been rationalised into one objective for the Sustainability Appraisal and the assessment of new settlement options against the sustainability appraisal objectives.

SA Objective	9k Housing in the form of a new settlement			
development at key sites within the District to support priority regeneration areas.	demand along the supply chain and construction employment. As described above the options will also, indirectly, support the economy over the long term by helping to create a larger pool of potential employees.			
10. To protect and enhance the areas natural,	Permanent, Direct LT -			
semi-natural and street scene to support the tourist economy.	All greenfield development has the potential to result in the loss of natural and semi-natural landscape features and as a result they all have impact on natural and semi-natural resources.			
11. To improve efficiency in land use	Permanent, Direct LT			
through the re-use of previously developed land and existing buildings, including reuse of materials from buildings, and encourage urban renaissance.	All options will result in development of greenfield land. No information exists on development density, housing mix and/or re-use of derelict land.			
12. To ensure that a sustainable pattern of	Permanent, Direct ST/LT			
development is pursued.	A new settlement could be located away from existing facilities and services and could also result in the greater reliance on private car use to access services			
13. To conserve and enhance the character	Permanent, Direct LT -/?			
and quality of the area's landscape and townscape particularly associated with town centres and coastal areas.	Assuming that development is likely to increase the risk of impact on the countryside and other sensitive landscapes; a minor negative effect is anticipated. However it should be noted that a more effective assessment of effects can be undertaken as part of the site allocations process.			
14. To preserve and enhance sites, features	Unknown ?			
and areas of historic archaeological or architectural importance, and their settings.	This cannot be assessed effectively at the district wide scale.			
15. To improve air quality in areas where air	Permanent, Direct LT - /?			
quality (pollutant) levels exceed national standards.	All developments have the potential to result in adverse effects if vehicle movements result in greater emissions from private vehicles.			
16. To provide a sustainable public transport	Permanent, Direct ST/LT			
network that allows access to key facilities, services and employment opportunities without reliance on private vehicles. (also included as social and economic objective)	A new settlement could be located away from existing facilities and services and could also result in the greater reliance on private car use to access services			
17. To develop key sustainable transport links between Thanet and the wider Kent district and beyond, including road, rail and air.				
18. To reduce waste generation and disposal	Permanent, Direct ST/LT -/?			
and achieve the sustainable management of waste	All options bring about new housing development. Development of new housing will bring about construction (short term) and operational waste (long term).			

SA Objective	9k Housing in the form of a new settlement		
19. To ensure development within the District responds to the challenges associated with climate change.	Permanent, Direct LT -/? All three options will bring about growth in housing development which will bring about long term increase greenhouse gas emissions from household activities such as heating, cooking and electricity consumption. The option to build on dispersed sites will also bring with it an increased need to travel. Indirect impacts associated with travel could come about if housing developments are placed away from local centres and existing public transport links.		
20. To ensure appropriate development	Neutral 0		
control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance with development management policies and NPPF	It is assumed that development would only be permitted in line with Environment Agency guidance and NPPF, where it can be proven that development is not at risk of flooding, and where it does not increase the risk of flooding elsewhere		
21. To conserve and enhance biodiversity.	Permanent, Direct LT -/?		
	It is assumed that development on greenfield sites will increase the risk of negative impact on ecological assets across Thanet. Development across dispersed sites is likely to increase this risk. However these effects are site specific and cannot be effectively assessed at this level.		
22.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	N/A		
23. To reduce the global, social and	Permanent, Direct ST -/?		
environmental impact of consumption of resources by using sustainably produced and local products.	All options relate to house building. As such, both options will result in increased unavoidable short term demand for scarce resources. None of the options distinguishes itself as performing better in terms of sustainability (including resource use) and neither point towards a level of refurbishment of existing properties. All options will bring about higher levels of resource use through house building.		
24. To increase energy efficiency and the	Permanent, Direct ST/LT -/?		
proportion of energy generated from renewable sources in the area.	All options relate to house building which will increase the number of houses across the Thanet area (all things being equal). As such, it will result in increased unavoidable short term energy demand. Longer term there will be increase in consumption of energy from increased housing stock (however, with more sustainable design this should be less than existing stock).		

From looking at the assessment of the new settlement option, it is clear that effects are polarized as either positive or negative, with few unknowns.

Positive effects were generally those relating to socio-economic sustainability objectives. This includes **housing supply**, where a new settlement option provides

a case for large scale development that includes a mix of tenures and types, providing the opportunity for integrating housing needs within a new community. Additionally objectives relating to **employment** and **economic growth** would also experience positive benefits, primarily linked to the construction industry, but also linked to the increase in employment pool available locally and within the south east region.

Unknown effects were predicted in relation to the objective concerning the creation of vibrant balanced communities, as the outcome effects would depend greatly on the location and design of any new settlement.

Neutral effects are predicted in relation to **flooding and coastal erosion**, as it is unlikely that a new settlement will be located in an area deemed to be at risk from these processes.

Negative effects were likely to be realised by those sustainability objectives with an environmental focus, related to infrastructure and those with a land use context. In relation to providing **sustainable public transport networks**, developing **key sustainable transport links** and ensuring a **sustainable pattern of development** is pursued, negative effects are likely to be experienced due to the location of a new settlement in relation to existing facilities and services, notably those in Margate, Broadstairs, Ramsgate and Westwood Cross.

The quality of Thanet's natural, semi-natural and street scene environments are likely to be affected by all types of greenfield development (including the new settlement option), which may affect the **tourist economy** within the area. Thanet's **landscape and townscape** quality may also suffer from all housing options, though the effects would be dependent on detailed design and ultimate site allocations. As with all other options, new housing developments are likely to increase private car use in the area, resulting in detrimental effects on the areas **air quality**. This might be realised more through a poorly located new settlement option. The effects on objectives relating to **waste**, **climate change**, **resource consumption** and **energy efficiency** are negative and are dependent on absolute numbers of new housing rather than the location of them. The **biodiversity** of Thanet is also likely to be detrimentally affected due to the types of areas required for implementing a new settlement option being large, open and predominantly greenfield.

2.3 New Settlement Re-evaluation

Based on the information available at the issues and options stage of the local plan process, it is understandable why a new settlement option was assessed poorly. However, given that the required housing provision within Thanet has been increased from 12,000 to 15,660 as a result of the revised Strategic Housing Market Assessment (SHMA)⁴, more detailed assessment of the new settlement option has been requested based on the location of indicative sites and the potential for incorporating mitigation. The purpose is to see if, and how, a new settlement option could be developed in a more sustainable manner.

REP/601675/001 | Issue | 11 November 2016

2-LONDON/PTG/ICL/D6S/000/06/16/524 - TDC LOCAL PLAN SEA/4 INTERNAL PROJECT DATA/4-05 REPORTSINEW SETTLEMENT MITIGATION STUDY/THANET MITIGATION STUDY CLEAN VERSION 20160913.DOCX

⁴ GL Hearn (2016) Thanet Strategic Housing Market Assessment

The location of indicative sites has been provided by TDC's Strategic Housing Land Availability Assessment (SHLAA) and omission sites, whilst mitigation that could benefit a new settlement option has been identified from a literature review that has covered specific stages of the SA and local plan processes. This review is reported in section 3.

3 New Settlements – Literature Review

For this literature review, four stages of the planning of a new settlement were reviewed, from the SA of options and the SA of policy text, to the implementation via adopted policies, and masterplanning. These cases were located in England and Scotland and ranged from 2005 to 2016. Most plans involved entirely new rural settlements, such as Northstowe in South Cambridgeshire⁵, while some were large developments bordering established towns and villages that would function as self-contained new settlements, such as the West of Stonehouse development in Stroud⁶. In most cases, a new settlement was considered alongside other strategies to meet housing demand, such as expanding villages or increasing housing density in town centres.

As expected, each SA covers three broad themes: economic, social, and environmental performance. Within environmental performance there are many specific sub-themes, the most common being ecology, flood risk, transport, emissions, climate change resilience, air quality, noise, and heritage.

The first stage of planning studied was the issues and options SA stage of Local Plan preparation. At this stage, many policy options are compared, thus there is a low level of certainty in the details of the new settlement (for example: settlement size and location, design and density of housing), which results in a very high level assessment. Once the policy option has been chosen, another SA is undertaken to add detail to previous findings. Once the findings of the SA have been incorporated into the draft policy, the finalised policy should include details of the new settlement and measures to ensure any development that takes place is sustainable. Finally, once a masterplan is devised for a new settlement, more detailed site specific measures can be included to mitigate and enhance any sustainability issues.

In the earliest stages of a local plan, most new settlements share many common poorly performing sustainability themes, many of which could be improved with careful mitigation once more detail is known about the new settlement. The main issue with new settlements to meet housing targets, is their long lead times - for many local councils, the new settlement will only be fully established after the local plan period. Linked to this is the significant infrastructure investment required to provide utilities, transport, and facilities to the new housing. If the new settlement does not provide all the facilities required to be self-sufficient, it may put additional pressure on already pressured nearby town centres, as is the case for the new settlement options in Lichfield⁷, as well as increasing travel via private car. Any increase in private car use has negative implications for local noise and air quality, which would exacerbate air quality issues if the new settlement was located in an Air Quality Management Area, such as in Aylesbury Vale⁸. This infrastructure investment is especially large if the new settlement is planned on

⁸ Lepus Consulting (2015) Sustainability Appraisal of the Aylesbury Vale District Council Issues and Options Consultation. Reasonable Alternatives SA Report

greenfield land. Most councils aimed to utilise brownfield land for new settlements, however some councils have very little brownfield land to build on, such as in Wealden⁹. Building on greenfield land brings several adverse environmental impacts; firstly the new settlement would likely have an adverse effect on views and the local landscape (as the character changes from rural to urban), and may have in-combination effects on the setting of heritage assets. Building on greenfield land would also adversely affect ecology by decreasing connectivity and removing habitat. In addition, greenfield land normally has little artificial light, so a new settlement would introduce light pollution and adversely affect nocturnal wildlife. Finally, if the new settlement is located near a sensitive ecological area, it may have a detrimental effect on the habitat either directly, for example increased recreational use and encroachment, or indirectly, for example increased nitrogen deposition on the Ashdown Forest SSSI in Wealden.

Conversely, there are many sustainability themes where a new settlement can perform well. The main advantage of planning an entire new settlement is the ability to design in sustainability from the outset. This is supported by economies of scale which allow green technologies like district heating, renewable energy, and recycling facilities to become viable. This also applies to community, health, and education facilities as well as employment opportunities, which could serve both the new settlement and the wider area, improving access to essential services where there may be a deficiency. This has the indirect effect of enhancing the rural economy as well. Furthermore, focussing development on a new settlement would alleviate development pressure on historic towns and villages, as is the case in Uttlesford¹⁰. The housing provided in the new settlement should also include affordable housing and specialty housing as part of the masterplan. During planning, education facilities and employment can be strategically placed close to housing and green transport can be prioritised in the settlement design to promote use of sustainable transport. To encourage outdoor activity and walking as a mode of transport, green infrastructure should be used which would also serve as ecological mitigation and enhancement, especially if habitat corridors were planned. Finally, landscaping could be used not only for visual amenity, but also as part of Sustainable Drainage Systems (SuDS) to reduce flood risk and encourage water efficiency.

The preparation and implementation of a local plan provides an opportunity to address crime, fear of crime and safety as part of the local policy agenda. A strong commitment to address crime and safety ensures potential developers consider these issues appropriately, contributing to more sustainable communities. Within the Uttlesford Local Plan¹¹, the concept of designing safe new settlements extended to the consideration of the community safety and ability to reduce antisocial behaviour as part of a general design policy.

Specific mitigation measures were given mostly during the adopted policy and masterplan stages of planning. Here the location and some details were known of the new settlement, which allowed for more specific mitigation measures to

REP/601675/001 | Issue | 11 November 2016

⁹ Wealden District Council (2015) Wealden Local Plan Sustainability Appraisal Report – Part A ¹⁰ Uttlesford District Council (2015) Sustainability Appraisal (SA) & Strategic Environmental Assessment (SEA)

¹¹ Uttlesford District Council (2005) Uttlesford Local Plan

improve the SA result. Most improvements related to the design and planning of the settlement to proactively enhance sustainability themes. Regarding location of the new settlement, the most sustainable locations were those on brownfield land close with some existing transport infrastructure, such as on an old airfield in the case of Long Marston Airfield in Stratford-upon-Avon¹², or near a transport hub, such as a main line station in the case of Winchfield in Hart¹³. Additionally, including a settlement buffer while planning is beneficial to prevent sprawl and protect habitat. In addition to existing transport, public transport and active transport paths should be developed to sustainably link the new settlement to other settlements or transport hubs, and reduce private car use.

During early planning, consideration should be given to the integration of green technologies into the new settlement, such as renewable energy and district heating. Waste minimisation measures and recycling should also be included in both construction and design, such as on-site recycling facilities and sustainably sourced construction material, as in the masterplan guidance for Gaydon-Lighthorne in Stratford-upon-Avon¹⁴. When planning residential areas, energy efficiency, low carbon living, and climate change resilience should be prioritised in terms of neighbourhood layout and housing orientation and design, as given in the Blindwells Development Framework for East Lothian Council¹⁵.

Green infrastructure and green spaces would also benefit the new settlement in terms of well-being and ecology, as well as being able to provide visual and noise mitigation, such as from the A1 (T) in East Lothian. The green infrastructure should retain established habitat where possible (e.g. mature trees, hedgerows, and ponds) and increase habitat connectivity via habitat corridors. If habitat is lost due to development, compensatory habitats should be provided on-site for protected and priority species, as in the case of Great Crested Newts for the North Cheshire Growth Village¹⁶. Green space provision can also contribute to SuDS as flood storage and drainage areas, and be incorporated into water efficiency measures and flood pathway planning, as in the West of Stonehouse development in Stroud.

If the new settlement is planned for greenfield land, the character of the new settlement should aim to reduce the impact on the landscape by designing a town sympathetic to the local form, and with planned views both to and from the settlement, as given in the Vision for Long Marston Airfield in Stratford-upon-Avon. The town design should also aim to reduce the impact on the setting of heritage assets, such as the Grade I listed Crewe Hall near the South Cheshire Growth Village.

Due consideration to reducing waste, including requirements for new settlements to provide appropriate measures for waste collection and disposal, are often identified within the local plans. For example Lichfield, specifies that waste

REP/601675/001 | Issue | 11 November 2016 Z'LONDONPT GICL JOBS'60000160167524 - TDC LOCAL PLAN SEA4 INTERNAL PROJECT DAT A44-05 REPORTSINEW SETTLEMENT MITIGATION STUDY\THANET MITIGATION STUDY CLEAN VERSION 20160913.DOCX

¹⁵ East Lothian Council (2010) Development Framework for Blindwells New Settlement

¹⁶ Cheshire East Council (2013) Shaping Our Future – A development Strategy for Jobs and Sustainable Communities

management facilities should be provided in suitable locations. This can extend beyond household waste collection, and incorporate the expectation to minimise waste generation. Where the local plans don't provide initial provision for related matters, the SA often provides recommendations for such like measures to be incorporated into the local plan policies, for example Hart District.

Overall, the many poorly performing sustainability themes are linked to the location of the settlement, especially if it is on greenfield land. Furthermore, transport remains a complex topic for a new settlement, because of the need to maximise sustainable transport without constricting private car use. The main advantage of a new settlement is the ability to design sustainability into the settlement fabric in terms of green technology, climate change resilience, flood risk, ecology, well-being, and resource efficiency. Although there is great opportunity to create a sustainable settlement, the large infrastructure investment required and long lead times are unavoidable.

4 Key Messages and Mitigation

4.1 Introduction

From the literature review undertaken as part of this study, it was evident that consistent themes were

- Transport and access;
- Amenity;
- Housing; and
- Physical environment.

The mitigation relevant to these themes is outlined below in sections 4.2 to 4.5 below.

4.2 Transport & Access

- M1. **Public Transport** There will be a need to increase public transport provision from sites to existing service centres, including Margate, Broadstairs, Ramsgate and Westwood Cross.
- M2. Alternative Transport Where sites perform poorly against Public Transport Accessibility Level (PTAL), it is suggested that cycling / pedestrian provision is promoted to improve accessibility via alternative transport modes including walking / running and cycling. This would increase accessibility to existing centres, increase the viability of site development and enable air pollutants deriving from a particular development to be minimised.
- M3. **Public Access** Public rights of way footpaths should be retained (especially routes of historic importance) or diverted as these will be of community / local importance.

4.3 Amenity

- M4. **Site design** The development should ensure that construction / operation impacts do not adversely affect existing residential amenity, and layout of the site and any associated houses/buildings maximise opportunities provided by the local micro-climate such as those relating to daylight and wind.
- M5. **Landscaping** It would be beneficial to ensure an attractively landscaped stand-off between main roads and new settlement for noise attenuation and to help create an inclusive and attractive environment.
- M6. **Green Corridors** A green 'buffer' should be provided if the new settlement is too close to a neighbouring settlement. This should be incorporated as part of the design process.

- M7. **Green Infrastructure and Open Spaces** the development should promote urban greening and protection and planting of trees by integrating green infrastructure into design, increasing the amount and quality of open spaces and improving access to existing formal and informal open spaces and facilities.
- M8. **Site suitability** Site suitability assessments for air quality and noise should be undertaken to inform settlement development.

4.4 Housing

- M9. **Housing Mix / Tenure** Ensure that a mix of housing types is provided to address local needs need affordable provision, not offsetting in other areas.
- M10. **Housing Mix** Consider housing above retail, and other facilities could be encouraged to reduce land take / maximise development opportunities.
- M11. **Housing Design** The development should incorporate sympathetic, modern and novel designs where appropriate to create new and exciting landscapes and townscapes.
- M12. Security and Safety The development should be designed to be safe, minimise the potential for crime and anti-social behaviour and provide for a mix of uses and natural surveillance of streets and spaces.

4.5 **Physical environment**

- M13. **Surface Water Run-off / Drainage** If feasible, the use of grey water systems in place of grid connections could be encouraged.
- M14. **Biodiversity** Ensure that settlements avoid any priority species / habitats, or incorporate them as protected features within overall site plans.
- M15. **Materials and Waste** careful choice and use of building materials to reduce the generation of waste and help ensure a high quality external environment and healthy internal environment.

5 New Settlement Options

During February 2016, the requirement for approximately 3,660 additional homes to be included as part of the Thanet Local Plan led to TDC revisiting previous options for housing growth. The potential for a new settlement growth scenario was identified, dependant on the sustainability issues identified with Option 9k as part of the issues and options stage of the sustainability appraisal process could be addressed.

The locations of potential new settlement options were identified from sites previously brought forward as part of the TDC SHLAA as well as additional sites that may become available. The locations of the proposed new settlement options are reported below.

5.1.1 NS1

An approximate 68hectare site, bordered by the A299 Hengist Way and Manston Airport to the north; Grinsell Hill and the Lanes, which are unclassified roads, to the south; Laundry Road (an unclassified road) to the west; and agricultural fields to the east. The site consists of a number of agricultural field units and a small number of residential properties on two roads that transect the site, Way Hill and Wayborough Hill. The Wayside Caravan Park is located to the southern perimeter of the site.

5.1.2 NS2

An approximate 34hectare site, located to the west of Manston Airport and north of Minster. The site is bordered by the A299 to the south; agricultural field units to the north; the B2190, Minster Road and the Manston Park business estate to the east; and additional agricultural field units and the village of Acol to the west and north west. The northern part of the site is traversed by Minster Road.

5.1.3 NS3

A site of approximately 95hectare in size, located to the north of Manston Airport to its western end. Bounded by Spitfire Way to the south; Manston Park Business Estate and agricultural field units to the west; agricultural field units and light industrial land to the north; and the site of the former RAF Manston to the east. The site is predominantly green fields, but is split into four sections by Manston Road running north west to south east and Alland Grange Lane running north to south. There are a small number of residential properties located within the site boundary, along with some light industrial units.

5.1.4 NS4

An approximate 60hectare site, situated to the east of site NS3, with which it shares a border. Manston Road runs along the southern and western edges of the site; Manston Court Road is located east of the site. Occupying the majority of the site is grassland and agricultural land, with a small section of airport runway from

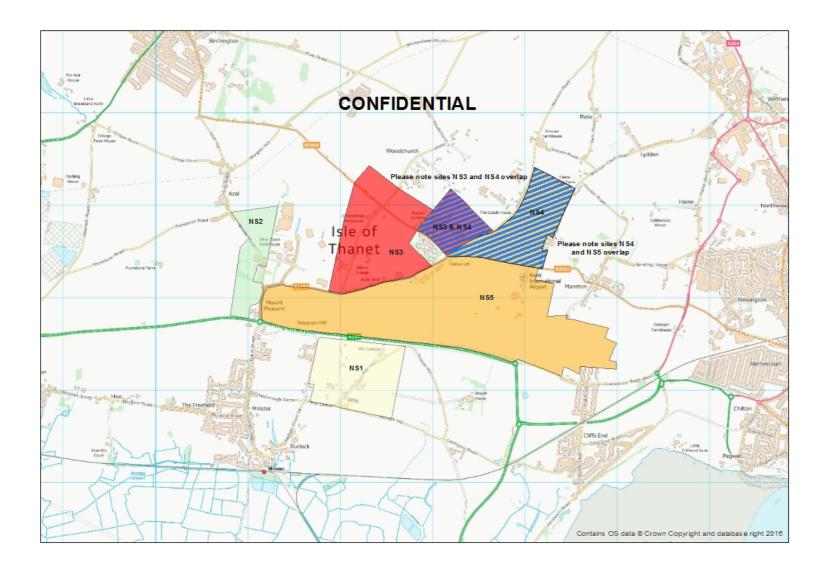

Manston Airport taking up a large section of the site also. In the south west corner of the site, near Spitfire Way there are two museums, the R.A.F. Manston Museum and the RAF Manston Spitfire & Hurricane Memorial Museum. A number of residential properties are located along the eastern edge of the site as well as holiday accommodation.

5.1.5 NS3 and NS4 overlap

A site of approximately 30Ha in size, located between NS3 and NS4. Manston Road is situated along the south eastern and south western borders of the site. Predominantly, buildings make up the site with the Defence Fire Training and Development Centre lying in the south western corner. Besides buildings, vegetation such as grassland and trees make up the rest of the site along with tarmac for walkways and car parks. West of the site, site NS3 is situated which is predominantly agricultural fields and to the east, site NS4 is located which contains mainly grassland. A residential estate is positioned to the south west perimeter of the site, along Esmonde Drive. More agricultural fields and vegetation lay northwards of this site.

5.1.6 NS5

A site approximately 320hectares, situated to the north of NS1, to the south and east of NS3 (with which it shares a border) and overlaps site NS4. It is bordered by the A299 Hengist Way to the south, and Spitfire Way and Manston Road to the west. The land within the site has previously been used for commercial purposes and is therefore denoted as brownfield. Occupying the majority of the site is Manston Airport, including its runway, which runs in the southern portion of the site. A terminal building, aircraft movement areas and taxiways, and car parking and ancillary facilities associated with the airport are also located within the site, with the remainder of the area covered by scattered areas of improved grassland.

19. To ensure appropriate development control procedures in place to manage the risks of coastal erosion, coastal and fluvial flood risk, in accordance development management and NPPF.	Permanent. Indirect. ST/LT 0	Permanent. Indirect. ST/LT	??		Permanent. Indirect. ST/LT +	 Assumptions regarding mitigation: Water / Drainage – If feasible, the use of grey water systems in place of grid connections could be encouraged. For all the potential new settlement sites, there is unlikely to be any specific risk of flooding, due to the separation from coastal areas and the lack of significant water bodies on or adjacent to sites. However, development of greenfield land is likely to promote surface run-off and reduce lag times, as increasing the amount of hard areas will reduce water penetration into the soils and groundwater. For NS1, this increased run off is unlikely to impact on existing residential properties, but for NS2, NS3 and NS4, there is a risk that increased run-off may affect existing residential properties without due consideration of sustainable drainage solutions. The Environment Agency would be unlikely to support a development proposal which did not make a concerted effort to employ sustainable drainage solutions. For NS5, there would be a beneficial effect as the brownfield site of the airport runway and associated hardstanding areas would be developed to higher surface water run-off standards.
20. To conserve and enhance biodiversity.	Permanent. Direct. ST/LT	?			Permanent. Direct. ST/LT +	 Assumptions regarding mitigation: Biodiversity – Ensure that settlements avoid any priority species / habitats, or incorporate them as protected features within overall site plans. Development on greenfield land (NS1, NS2, NS3 and NS4) will reduce levels of habitat locally and may affect specific species. It is therefore important that any new settlement option should be informed by a preliminary ecological appraisal, which helps shape the development of any particular site, especially the mitigation required to reduce effects on biodiversity. As NS5 is a brownfield site, biodiversity could be enhanced with appropriate mitigation measures.
21.To protect and improve the quality of fluvial and coastal water resources, including European designated sites	Permanent. Indirect. ST/L	ГО				Assumptions regarding mitigation: N/A By removing the demand on sites closer to coastal areas, a new settlement option may have a small effect in ensuring that coastal environments are not jeopardised from over-development.
22. To reduce the global, social and environmental impact of consumption of resources by using sustainably produced and local products.	Permanent. Indirect. ST/L	Γ?				Assumptions regarding mitigation: N/A All development will require resources, but it is possible to promote the use of locally resourced and sustainably produced materials in order to reduce the carbon footprint and energy requirements of products.
	Permanent. Direct. ST/LT	+				 Assumptions regarding mitigation: Housing Design – development should incorporate sympathetic, modern and novel designs where appropriate to create new and exciting landscapes and townscapes.

nt development will result in an increase in energy n a particular area, but it is how that energy is efficiently it is used, which is key in terms of nable use of energy.

uildings that reduce the need for heating and educing energy demand, as is ensuring that as street lighting is 'smart', using energy efficient ald potentially be dimmed during the early hours

luction can be achieved using CHP technology also using solar technology, which is common in ce on renewable energy will reduce the demand the National Grid.

6 Summary

The purpose of this study was to explore ways in which potential new settlement options may be made more sustainable through the implementation of robust mitigation. This was to identify how far sustainability could progress from the level achieved during the appraisal of Issues and Options during 2013. As little detail was known at this time regarding the potential locations and types of development constituting new settlements, this option for housing growth in Thanet scored poorly against the sustainability objectives.

The most recent Strategic Housing Needs Assessment⁴ estimates that approximately 3,660 homes need to be provided in addition to those currently identified within the preferred option Local Plan. As such, the consideration of a new settlement option warranted further analysis to understand whether best practice mitigation might improve performance against the sustainability objectives. This best practice mitigation was taken from examples of local plans and masterplans undertaken within the UK, and should be considered integral for consideration within any new settlement development.

The re-evaluation of a new settlement housing option incorporating this mitigation resulted in the following results:

- Two sustainability objectives (objective 10 reuse of previously developed land, and objective 13 to preserve and enhance sites, features and areas of historic archaeological or architectural importance, and their setting) resulted in known adverse effects. This was due to the requirement to develop on greenfield land at sites NS1, NS2, NS3 and NS4, and the presence of a scheduled monument and listed buildings within sites NS2 and NS3. Note that objective 10 resulted in a positive impact at NS5.
- A number of previously negative scoring objectives, were now neutral or unknown effects. This indicated that the manner in which mitigation was secured and implemented played an important role in achieving sustainability within a new settlement development.
- By utilising mitigation measures such as grey water harvesting, dedicated cycle infrastructure, inclusion of renewable energy, etc., sustainability improvements could be achieved. These are likely to be cost-effective and would help secure sustainability credentials for any new settlement development.

For any future new settlement option, development should be fundamentally steered by sustainability principles. This is likely to require effective mitigation, such as that identified in this study and additional mitigation identified through further investigation, to be incorporated into a design guide, should a new settlement option be included within the Local Plan preferred options. European Site Designations Interest Feature Abbreviations Preferred Option Policy Review In Combination Plans

1. Introduction

1.1 The Thanet District Council Local Plan

Thanet District Council (TDC) began preparing a new Local Plan in 2013 following two significant changes in national planning policy:

- The government decision to revoke the Regional Spatial Strategies, including the Regional Spatial Strategy for the South East; and
- The introduction of the National Planning Policy Framework (NPPF), which replaced the previous Planning Policy Statements and Local Development Framework.

These changes substantially altered the requirements for local planning policy documents. TDC's new Local Plan will include **strategic planning guidance**, **development management policies** and **site allocations**; these elements will guide development and regeneration decisions and investment over the period to 2031. Once adopted, the Plan will form the statutory planning framework for determining planning applications and will replace the 'saved' policies from the Thanet Local Plan 2006.

TDC carried out a consultation on the Issues and Options for the new Local Plan between 3 June and 14 August 2013. This consultation considered the level of development needed in Thanet and broadly where this should go, as well as options for detailed policies on housing, employment, environment, quality of life and transport. The results of the Issues and Options consultation were used to inform the development of the Preferred Options, which were subject to public consultation in 2015. Following this [Timeline for additional works TBC].

1.2 Habitats Regulations Assessment

Regulation 102 of the *Conservation of Habitats and Species Regulations 2010* (as amended) (the 'Habitats Regulations') states that if a land-use plan is "(*a*) *is likely to have a significant effect on a European site*¹ *or a European offshore marine site*² (*either alone or in combination with other plans or projects*); *and (b) is not directly connected with or necessary to the management of the site*" then the plan-making authority must "*…make an appropriate assessment of the implications for the site in view of that site's conservation objectives*" before the plan is given effect.

The process by which Regulation 102 is met is known as Habitats Regulations Assessment (HRA)³. An HRA determines whether there will be any 'likely significant effects' (LSE) on any European site as a result of a plan's implementation (either on its own or 'in combination' with other plans or projects) and, if so, whether these effects will result in any adverse effects on the site's integrity. TDC has a statutory duty to prepare the Local Plan and is therefore the Competent Authority for an HRA.

Regulation 102 essentially provides a test that the final plan must pass; there is no statutory requirement for HRA to be undertaken on draft plans or similar developmental stages (e.g. issues and options; preferred options). However, as with Strategic Environmental Assessment (SEA) it is accepted best-practice for the

¹ Strictly, 'European sites' are: any Special Area of Conservation (SAC) from the point at which the European Commission and the UK Government agree the site as a 'Site of Community Importance' (SCI); any classified Special Protection Area (SPA); any candidate SAC (cSAC); and (exceptionally) any other site or area that the Commission believes should be considered as an SAC but which has not been identified by the Government. However, the term is also commonly used when referring to potential SPAs (pSPAs), to which the provisions of Article 4(4) of Directive 2009/147/EC (the 'new wild birds directive') apply; and to possible SACs (pSACs) and listed Ramsar Sites, to which the provisions of the Habitats Regulations are applied a matter of Government policy (NPPF para. 118) when considering development proposals that may affect them. "European site" is therefore used in this report in its broadest sense, as an umbrella term for all of the above designated sites. Additional information on European site designations is provided in Appendix A.

² 'European offshore marine sites' are defined by Regulation 15 of *The Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007* (as amended); these regulations cover waters (and hence sites) over 12 nautical miles from the coast.

³ The term 'Appropriate Assessment' has been historically used to describe the process of assessment; however, the process is now more accurately termed 'Habitats Regulations Assessment' (HRA), with the term 'Appropriate Assessment' limited to the specific stage within the process; see also Box 1.

HRA of strategic planning documents to be run as an iterative process alongside the plan development, with the emerging policies or options continually assessed for their possible effects on European sites and modified or abandoned (as necessary) to ensure that the subsequently adopted plan is not likely to result in significant effects on any European sites, either alone or 'in combination' with other plans. This is undertaken in consultation with Natural England (NE) and other appropriate consultees.

1.3 Purpose of this Report

TDC commissioned AMEC E&I UK Ltd. to assist with the HRA of its Local Plan following the completion of the Issues and Options consultations. This report summarises AMEC's assessment of the Preferred Options for the Local Plan against the conservation objectives of any European sites that may be affected, and summarises the iterative HRA process that has been undertaken to support the plan development and ensure that it meets the requirements of Regulation 102.

As noted, there is no statutory requirement for HRA to be undertaken on the Preferred Options. The report does not therefore provide a formal conclusion to the HRA process; rather, it identifies potential mechanisms by which the Preferred Options could affect European sites and (if necessary) suggests measures that could be employed to avoid significant effects occurring. The report then provides a preliminary conclusion on the likely effects of the Plan, which will inform future stages of the plan development and assessment process.

2. Approach to the HRA of the Local Plan

2.1 Overview

An HRA involves determining whether there will be any LSEs on any European sites as a result of a plan's implementation (either on its own or 'in combination' with other plans or projects) and, if so, whether it can be concluded that there will be no adverse effects on the sites' integrity. European Commission guidance⁴ suggests a four-stage process for HRA, although not all stages will always be required (see Box 1).

Box 1 – Stages of Habitats Regulations Assessment

Stage 1 – Screening:

This stage identifies the likely impacts upon a European Site of a project or plan, either alone or 'in combination' with other projects or plans, and considers whether these impacts are likely to be significant.

Stage 2 – Appropriate Assessment:

Where there are likely significant effects, or where this is uncertain, this stage considers the effects of the plan or project on the integrity of the relevant European Sites, either alone or 'in combination' with other projects or plans, with respect to the sites' structure and function and their conservation objectives. Where it cannot be concluded that there will be no adverse effects on sites' integrity, it is necessary to consider potential mitigation for these effects.

Stage 3 – Assessment of Alternative Solutions:

Where adverse effects remain after the inclusion of mitigation, this stage examines alternative ways of achieving the objectives of the project or plan that avoid adverse impacts on the integrity of European Sites.

Stage 4 – Assessment Where No Alternative Solutions Exist and Where Adverse Impacts Remain:

This stage assesses compensatory measures where it is deemed that the project or plan should proceed for imperative reasons of overriding public interest (IROPI). The EC guidance does not deal with the assessment of IROPI.

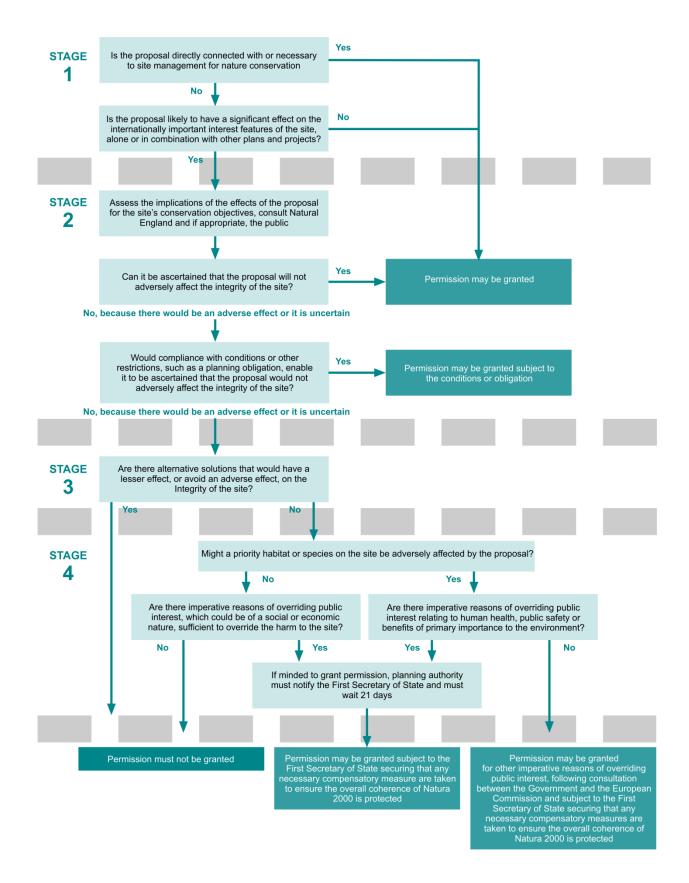

The approach summarised in Box 1 works well at the project-level where the scheme design is usually established and possible effects on European sites can be assessed (usually quantitatively) using a linear stepwise process. In contrast, land-use plans and similar strategies present a number of distinct challenges for HRA and rigid application of the 'staged' approach to assessment suggested by Box 1 is not always appropriate. It is preferable for sustainable policies to be developed from the beginning of the plan-making process rather than HRA being a purely retrospective assessment exercise towards the end. Therefore, it is important to recognise that the *process* of strategic HRA is as much about guiding the development of the plan (and demonstrating that effects on European sites have been considered appropriately) as it is about (ultimately) assessing its effects. The process is summarised in Figure 1.1.⁵

⁴ Methodological guidance on the provisions of Article 6(3) and (4) of the Habitats Directive 92/43/EEC (EC 2002).

⁵ Note, from a strict procedural perspective the 'screening' and 'appropriate assessment' stages can only be formally applied to the finalised plan, and not to its various phases or iterations; therefore the term 'screening' is used advisedly within this document.

2.3 Summary of Approach

Screening and appropriate assessment

The principles of 'screening' are applied to the emerging plan or its components (i.e. policies and allocations) to allow the assessment stage to focus on those aspects that are most likely to have potentially significant or adverse effects on European sites, as well as shape the emerging strategy. Screening aims to determine whether the plan will have any 'likely significant effects' (LSE) on any European site as a result of its implementation. It is intended to be a coarse filter for identifying effects (positive and negative) that may occur, to allow the assessment stage to focus on the most important aspects. A plan should be considered 'likely' to have an effect if the competent authority is unable (on the basis of objective information) to exclude the possibility that the plan could have significant effects on any European site, either alone or in combination with other plans or projects; an effect will be 'significant' if it could undermine the site's conservation objectives. TDC is the competent authority for the purposes of the Habitats Regulations, and is therefore responsible for completing the HRA.

Screening can be used to 'screen-out' European sites and plan components from further assessment, if it is possible to determine that significant effects are unlikely (e.g. if sites or interest features are clearly not vulnerable (both exposed and sensitive) to the outcomes of a plan due to the absence of any reasonable impact pathways). For the TDC plan, the screening process has been used on the plan 'as a whole'; on the European sites themselves; and on the key components of the plan (the policies and allocations). The screening takes account of measures included in the plan to avoid significant effects. The 'appropriate assessment' stage provides a more detailed examination of policies or allocations where the effects are likely to be significant, or they are uncertain. Note that undertaking a more detailed assessment of policies or sites does not necessarily imply a conclusion of 'significant effects' for those sites / aspects that are 'screened in' since controls within the plan (i.e. policy measures) will also operate to minimise these effects and in many cases the assessment is completed due to a residual uncertainty; rather, it allows for the assessment of effects to focus on those issues that are potentially important.

'In combination' assessment

Article 6(3) of the Habitats Directive requires that the potential effects of the plan on European sites must also be considered 'in combination with other plans or projects'. The 'in combination' assessment must also consider within-plan effects (i.e. between policies or allocations). Consideration of 'in combination' effects is not a separate assessment, but is integral to the screening and appropriate assessment stages and the development of avoidance/ mitigation measures. There is limited guidance available on the scope of the 'in combination' element, particularly which plans should be considered. However, the assessment should not necessarily be limited to plans at the same level in the planning hierarchy and there is consequently a wide range of plans that could have potential 'in combination' effects with the TDC plan due to its regional scale. There is also limited guidance on the mitigation that may be appropriate if a European site is already being significantly affected by other plans; this is possible, since some plans will pre-date the requirement for HRA of plans, and therefore cannot be relied on to have no significant effect in their own right.

The plans identified by the SA have provided the basis for the assessment of 'in combination' effects; these plans were reviewed to identify any potential effects and these were then considered (as necessary) within the screening or appropriate assessment. The assessment did not generally include national strategies, national policy or legislation since the Local Plan must be compliant with these. It is considered that in combination effects are most likely in respect of other regional and sub-regional development plans and strategies. The plans considered 'in combination', and the results of the screening, are summarised in Appendix C. Completion of the 'in combination' assessment is directly related to the policy wording, and it will often be possible to remove any risk of 'in combination' effects through careful construction of the policy (inclusion of 'avoidance measures' during policy development).

Mitigation and avoidance

The development of avoidance or mitigation measures is key to the HRA and plan development process. Avoidance measures are those that are incorporated into the plan during its development to prevent significant effects on European sites occurring; mitigation measures are used where significant effects are identified in order to prevent adverse effects on a site's integrity.

Avoidance or mitigation measures should aim to reduce the probability or magnitude of impacts on a European site until 'no likely significant effects' are anticipated, and will generally involve usually the development and adoption of (for example) wording changes or additional policies. Measures must be specific and targeted, and likely to work: it is not appropriate to re-state existing legislation or policy, such as by adding "*and must have no significant effect on any European site*" (or similar) to every policy. The avoidance or mitigation should also account for the limited influence that the CYC can exert on non-planning issues, and should not generally exceed requirements set by national planning policy or guidance.

Uncertainty and 'down the line' assessment

For most policies, even at the strategic level, it will be clear if adverse effects are likely, and in these instances the policy should not be included within the plan since plans should not include proposals which would be likely to fail the Habitats Regulations tests at the project application stage. For other options, however, the effects may be uncertain and it is therefore important that this uncertainty is addressed either through additional investigation or (if this is not possible) appropriate mitigation measures.

It is usually possible to incorporate caveats or 'avoidance measures' within policy text that are sufficient to ensure that significant adverse effects will not occur. However, for other policies this may not be possible because there is insufficient available information about the nature of the development that is being proposed through the policy to enable a robust conclusion to be reached about whether there will be any LSEs. In these instances, current guidance indicates that it may be appropriate and acceptable for assessment to be undertaken 'down-the-line' at a lower tier in the planning hierarchy. For this to be acceptable, the following conditions must be met:

- The higher tier plan appraisal cannot reasonably predict the effects on a European site in a meaningful way; whereas;
- The lower tier plan, which will identify more precisely the nature, scale or location of development, and thus its potential effects, retains enough flexibility within the terms of the

higher tier plan over the exact location, scale or nature of the proposal to enable an adverse effect on site integrity to be avoided; and

 Habitats Regulations Appraisal of the Plan at the lower tier is required as a matter of law or Government policy⁶.

⁶ SNH (2012) *Habitats Regulations Appraisal of Plans: Guidance for plan-making bodies in Scotland*. Scottish Natural Heritage / David Tyldesley Associates

3. Scope of Assessment and Baseline Summary

3.1 Study Area

The spatial scope of any HRA should be based on the likely environmental outcomes of the plan and its 'zone of influence'; and the interest features of the European sites that may be affected and their potential vulnerabilities.⁷ It is therefore not usually appropriate to employ 'arbitrary' spatial buffers to determine those European sites that should be considered within an HRA. However, as distance is a strong determinant of the scale and likelihood of most effects the considered use of a suitably precautionary search area as a starting point for the screening (based on a thorough understanding of both the plan outcomes and European site interest features) has some important advantages. Using buffers allows the systematic identification of European sites using GIS, so minimising the risk of sites or features being overlooked, and also ensures that sites where there are no reasonable impact pathways can be quickly and transparently excluded from any further screening or assessment. It also has the significant advantage of providing a consistent point of reference for consultees following the assessment process, allowing the 'screening' to focus on the potential effects, rather than on explaining why certain sites may or may not have been considered in relation to a particular aspect of the plan.

This study considers potential effects on all European sites within 15km of the TDC boundary, together with any additional sites that may be hydrologically linked to the plan's zone of influence. This is considered to be a suitably precautionary starting point for the assessment of the plan. The sites listed in Table 3.1 are therefore included in the assessment (see also Figure 3.1).

Site	Approximate location relative to TDC area
Blean Complex SAC	Approximately 4.8km west of TDC boundary.
Dover to Kingsdown Cliffs SAC	Approximately 14.9km south of TDC boundary.
Sandwich Bay SAC	On southern boundary of TDC area.
Stodmarsh SAC	Approximately 2.4km south west of TDC boundary.
Thanet Coast SAC	Northern and eastern coastlines of TDC area.
Margate and Long Sands SAC	Offshore SAC approximately 1.1km from northern coast of TDC area.
Tankerton Slopes and Swalecliffe cSAC	Approximately 9.5km west of TDC area, on North Kent Coast.
Outer Thames Estuary SPA	On TDC boundary; offshore SPA extending from northern coast of TDC area.
Stodmarsh SPA	Approximately 2.8km south west of TDC boundary.
Thanet Coast and Sandwich Bay SPA	Northern and eastern coastlines of TDC area, plus Sandwich Bay on the southern boundary.
The Swale SPA	Approximately 12.8km west of TDC area, on North Kent Coast.
Stodmarsh Ramsar	Approximately 2.8km south west of TDC boundary.
Thanet Coast and Sandwich Bay Ramsar	Northern and eastern coastlines of TDC area, plus Sandwich Bay on the southern boundary.
The Swale Ramsar	Approximately 12.8km west of TDC area, on North Kent Coast.

Table 3.1 European sites within study area

⁷ The vulnerability of an interest feature will depend on its 'sensitivity' and 'exposure' to a potential effect.

Data on the European site interest features, their distribution, and their sensitivity to potential effects associated with the plan were obtained from various sources and reports, including the Joint Nature Conservation Committee (JNCC) and Natural England (NE) websites (citations; boundaries; etc.); site condition was based on the NE condition assessments for corresponding SSSI units. Additional information on particular sites or features was obtained from other sources where available, including the Wetland Bird Survey (WeBS).

3.2 European Site Features and Condition

The interest features of the European sites within the study area, and the current factors affecting them, are summarised in Table 3.2. A summary of the Conservation Objectives is provided in the Section 3.2.1. The percentage of the site in favourable or unfavourable condition was estimated using the NE condition assessments for the corresponding SSSI units, although it must be noted that the boundaries of the component SSSI units (to which the condition assessments relate) do not always match the European site boundaries exactly (i.e. the SSSIs are usually larger) and it is not always possible to split SSSI units to determine the precise area of the European site (or interest feature) that is in each condition category⁸.

There are many factors currently affecting the European sites over which the local plan will have no or little influence: analysis of the available site data indicates that the most common reasons for an 'unfavourable' condition assessment of the component SSSI units are inappropriate management of some form (e.g. overor undergrazing, scrub control, water-level management etc.) or secondary effects from agriculture (e.g. local drainage, run-off, grazing pressure etc.). The potential mechanisms by which the Local Plan could affect these sites are discussed in Section 3.3. Note that the following sites are grouped together for presentation purposes due to the similarity of the interest features and/or the factors and processes affecting them:

- Thanet Coast and Sandwich Bay SPA and Thanet Coast and Sandwich Bay Ramsar ('Thanet Coast sites'); and
- Stodmarsh SAC, Stodmarsh SPA and Stodmarsh Ramsar ('Stodmarsh sites');
- The Swale SPA and The Swale Ramsar ('The Swale sites').

⁸ This is evident in Table 3.1, where the proportion of the site area in each condition category does not always total 100%.

Table 3.2 European sites and interest features within 15km of Thanet District

Site and interest features†	Condition (%)**	Summary of current threats and potential vulnerabilities to outcomes of Thanet Local Plan
Blean Complex SAC		
Annex I features: Oak-hornbeam forests*	F: 100.5% UR: 0.2%	This woodland SAC is almost entirely in favourable condition; coppice management is the key issue in the site unit that is unfavourable. The site is an NNR and managed in partnership by NE, RSPB and the Woodland Trust which helps ensure its favourable status. The site is nearly 5km from Thanet and direct impacts on this site as a result of the Thanet plan are likely to be limited; it could potentially be vulnerable to changes in air quality or visitor pressure that may be associated with the overall quantum of development, although it should be noted that neither of these aspects is currently identified as a significant issue for the site.
Dover to Kingsdown Cliffs SAC		
<u>Annex I features</u> : Calcareous dry grassland and scrub; Vegetated sea cliffs*	F: 56.5% UR: 36.4% UF: 7.2%	The SAC citation states that this site " <i>is an 8 km stretch of undefended sea cliff subject to natural coastal erosion. The main pressure is on cliff-top grassland, which is being squeezed between the eroding cliff and arable land behind.</i> " Most of the site SSSI units are in favourable condition; those in unfavourable condition are primarily affected by poor or limited management of encroaching scrub and grazing of the calcareous grassland; as a result, the main issues affecting this site are coastal squeeze and management, which will not, at this site, be influenced by the Thanet plan. The interest features of the site are theoretically vulnerable to visitor pressure and air quality changes also, although neither of these are likely to change substantially as a result of the Thanet plan (the HRA of the Dover District Local Development Framework concluded that this plan would not affect the site).
Margate and Long Sands SAC		
<u>Annex I features</u> : Sub-tidal sandbanks*	Uncertain: 100%	There is limited information on the current condition of this recently designated offshore SAC. The Regulation 35 advice states that "the interest features and associated biological communities of the Margate and Long Sands cSAC are sensitive to physical loss, physical damage, toxic and non-toxic contamination, and biological disturbance". However, it should be noted that the site is at least 1km offshore from Thanet and the Thanet Plan will not generally exert any influence over the most damaging activities (i.e. offshore activities such as dredging): the Regulation 35 advice notes that the exposure of the interest features to aspects associated with land-based activities (e.g. toxic and non-toxic contamination) is low.
Sandwich Bay SAC		
<u>Annex I features</u> : Dunes with creeping willow*; White dunes*; Grey dunes*; Embryonic shifting dunes*; Humid dune slacks	F: 62.2% UR: 27.4% UF: 10.6%	This site supports the most important sand dune system and sandy coastal grassland in south east England. The SAC SSSI units that are in unfavourable condition are affected by management (Unit 22, associated with a golf course) and hydro-ecological changes that have degraded some fixed dunes (Unit 18), the causes of which are currently under investigation (although these are likely to be due to local hydrological changes). The features of the SAC are vulnerable to a range of potential impacts including direct encroachment; coastal squeeze or developments (etc.) that alter the natural geomorphological processes; visitor pressure; management; air quality changes; and local water quality / quantity changes (note, current abstraction and discharges consents are not having an adverse effect on the site, based on Review of Consent data).

Site and interest features†	Condition (%)**	Summary of current threats and potential vulnerabilities to outcomes of Thanet Local Plan
Stodmarsh SAC		
Annex II features: Desmoulin`s whorl snail*	F: 75.8% UR: 21.1% UF: 2.5%	This wetland site is predominantly in 'favourable' condition; the 'unfavourable' SSSI units are in this condition due to localised management issues, either of scrub encroachment or water levels (note, the water level issues are not due to over-abstraction). Most of the site is an NNR or managed under stewardship agreements, and so most potential impact have suitable control mechanisms (e.g. control of water levels; management; visitor pressure; etc.). However, the interest features of the site (and their habitats) are vulnerable to diffuse 'quantum of development' impacts which the Thanet plan may contribute to, notable water abstraction (increases in development may require increased abstraction from local sources, which could affect the SAC) and air quality changes.
Tankerton Slopes and Swalecliffe SAC		
Annex II features: Fisher's estuarine moth*	F: 100%	Fisher's estuarine moth <i>Gortyna borelii lunata</i> has a localised population distribution in the UK, due to its specific habitat requirements; this site supports its food plant hog's fennel (<i>Peucedanum officinale</i>), together with areas of neutral grassland also required by the species for egg laying. The SSSI unit that forms the SAC is in favourable condition but is heavily used by dog walkers and is vulnerable to under-management. The site is approximately 10km outside Thanet and so unlikely to be directly affected by the outcomes of the Thanet plan.
Thanet Coast SAC		
<u>Annex I features</u> : Sea caves*; Reefs*	F: 11.1% UR: 8.0% Uncertain: 80.9%	This site is partly within Thanet and potentially vulnerable to the outcomes of the plan. The condition of most of the site is 'uncertain', since most of the offshore areas are not SSSI units and detailed information on condition is not available; however, the Regulation 33 advice for the site indicates that the features would be vulnerable to physical damage (removal, erosion, smothering); developments (etc.) that alter the natural geomorphological processes; toxic or non-toxic contamination; and invasive species. As a result, the features will be mainly sensitive to direct effects only (i.e. encroachment or factors that alter the geomorphological processes that otherwise dominate the condition of the features).
Outer Thames Estuary SPA		
Article 4.1 qualification: Red-throated diver (W)	Uncertain: 100%	Red throated divers are sensitive to non-physical disturbance by noise and visual presence during the winter; generally they will not be particularly exposed to disturbance associated with the Thanet plan (or within Thanet's control) due to their preference for offshore areas, although some aspects (e.g. recreational boating) may have an effect.

Site and interest features†	Condition (%)**	Summary of current threats and potential vulnerabilities to outcomes of Thanet Local Plan
Stodmarsh sites		
Stodmarsh SPA <u>Article 4.1 qualification</u> : Bittern (W); Hen harrier (W) <u>Article 4.2 qualification</u> : Gadwall (B-,W-); Shoveler (W-); Breeding bird assemblage (B-) Stodmarsh Ramsar <u>Criterion 2</u> - Endangered etc species / communities (6 RDB invertebrates; 2 nationally rare plants; 5 nationally scarce species; a diverse assemblage of rare wetland birds inc. gadwall, bittern, hen harrier, shoveler)	F: 72.7% UR: 24.8% UF: 2.9%	As with Stodmarsh SAC, this wetland site is predominantly in 'favourable' condition; the 'unfavourable' SSSI units are in this condition due to localised management issues, either of scrub encroachment or water levels (note, the water level issues are not due to over-abstraction). There are thought to be local disturbance issues associated with angling and shooting in some units. However, most of the site is an NNR or managed under stewardship agreements, and so most potential impacts have suitable control mechanisms (e.g. control of water levels; management; visitor pressure; etc.). However, the interest features of the SPA(and their habitats) are vulnerable to diffuse 'quantum of development' impacts which the Thanet plan may contribute to, notable water abstraction (increases in development may require increased abstraction from local sources, which could affect the SAC) and air quality changes.
Thanet Coast and Sandwich Bay sites		
Thanet Coast and Sandwich Bay SPA <u>Article 4.1 qualification</u> : Golden plover (W-); Little tern (B-) <u>Article 4.2 qualification</u> : Turnstone (W) Thanet Coast and Sandwich Bay Ramsar <u>Criterion 2</u> - Endangered etc species / communities (15 RDB invertebrates) <u>Criterion 6</u> - 1% of a waterbird population(Turnstone)	F: 68.3% UR: 30.4% UF: 1.7%	The main current threat to the integrity of this site is disturbance of feeding and roosting waders, notably overwintering turnstones, by recreational activities (particularly dog walking, although other activities, such as kite sailing, are thought to have local impacts); this is reflected in the condition assessments for the the SSSI units that are in unfavourable condition (Sandwich Bay SSSI units 3, 35 – 39, 63 and Thanet Coast SSSI units 11, 12, 14, 16, 18 and 20): the SSSI condition assessment for Unit 3 of Sandwich Bay SSSI notes that the " <i>Bird Disturbance Study 2010-11 published by Kent Wildlife Trust Oct 2012 provides strong evidence indicating that recreational and commercial activities including do walking, walking without dogs, bait digging and kite surfing are having a detrimental impact on bird populations in Pegwell Bay. The most disturbing activity, particularly in the north section of the bay, is dog walkers with dogs off leads" the assessments for the unfavourable Thanet Coast SSSI units all state that the units "[remain] <i>unfavourable recovering due to effects of dog walkers on birds feeding and roosting</i>". The habitats of the SPA will be vulnerable to the same aspects as Sandwich Bay SAC and Thanet Coast SAC (see above) although the relationship between the habitat condition and the status of the SPA interest features is complex, and effects on the habitats but probably enhance foraging conditions for tunstone). The main Local Plan issue for this site is therefore the overall quantum of development in Thanet (and neighbouring authorities) and the consequent potential for recreational use of the beaches to increase during key periods. The plan will need to develop mitigating policies and safeguards to minimise the effect of this.</i>

Annex I / II Habitats or species listed on Annex I or II (respectively) of Council Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora (the 'Habitats Directive')

Article 4.1 / 4.2 Bird species qualifying under Article 4.1 or 4.2 of Directive 2009/147/EC on the Conservation of Wild Birds (the 'new Wild Birds Directive')

Criterion 2, 5, 6 Ramsar criteria; there are nine criteria used as a basis for selecting Ramsar sites; see Appendix B

**	Based on the condition assessments of the SSSI units that correspond to the relevant European sites. Note: the total percentage does not always equal 100% as the boundaries of the component SSSI units (which the condition assessments relate to) do not always match the European site boundaries exactly (i.e. the SSSIs are usually larger, but it is not possible to split SSSI units to determine the precise quanity of the European site that is in each condition category).
F	Favourable
UR	Unfavourable recovering
UF	Unfavourable no change
UD	Unfavourable declining
Uncertain	Uncertain (due to absence of data, typically where parts of the site are not associated with an SSSI)

Conservation Objectives

The conservation objectives for all of the sites have been revised by NE in recent years to increase consistency of assessment and reporting. As a result, the high-level conservation objectives for all sites are effectively the same:

For SACs:

- With regard to the SAC and the natural habitats and/or species for which the site has been designated (the 'Qualifying Features'...), and subject to natural change; ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring [as applicable to each site];
 - The extent and distribution of the qualifying natural habitats;
 - The extent and distribution of the habitats of qualifying species;
 - ▶ The structure and function (including typical species) of the qualifying natural habitats;
 - The structure and function of the habitats of qualifying species;
 - > The supporting processes on which the qualifying natural habitats rely;
 - The supporting processes on which the habitats of qualifying species rely;
 - The populations of qualifying species; and,
 - The distribution of qualifying species within the site.

For SPAs:

- With regard to the SPA and the individual species and/or assemblage of species for which the site has been classified (the 'Qualifying Features'...), and subject to natural change; ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the aims of the Wild Birds Directive, by maintaining or restoring:
 - > The extent and distribution of the habitats of the qualifying features;
 - The structure and function of the habitats of the qualifying features;
 - > The supporting processes on which the habitats of the qualifying features rely;
 - The population of each of the qualifying features; and
 - The distribution of the qualifying features within the site.

NE are currently producing Supplementary Advice documents to accompany the conservation objectives, which will provide more detailed advice and information on the application of the objectives, although these are not currently available. The conservation objectives for Ramsar sites are taken to be the same as for the corresponding SACs / SPAs (where sites overlap). The conservation objectives are considered when assessing the potential effects of plans and policies on the sites; information on the sensitivities of the interest features also informs the assessment.

3.3 Outcomes of Local Plan and Impact Pathways

Analysis of the available European site data and the SSSI condition assessments indicate that the most common reasons for an 'unfavourable' condition assessment of the component SSSI units are inappropriate management of some form (e.g. over- or undergrazing, scrub control, water-level management etc.) or secondary effects from agriculture (e.g. local drainage, run-off, grazing pressure etc.). These are aspects over which the TDC local plan will have no or little influence, although it is important to understand the pressures currently experienced (particularly when considering 'in combination' effects).

The main mechanism by which the Local Plan could affect these sites are through spatial allocations that have direct or indirect effects on European sites; or through policies that direct development (or do not control development) such that significant effects are likely. The main environmental aspects, and the pathways by which the Local Plan could potentially affect European sites, are summarised in the following sections together with any available baseline data on those aspects to inform the assessment. European sites that are particularly vulnerable to a particular aspect (i.e. sensitive and likely to be exposed due to the Local Plan) are identified.

Recreational Pressure

Many European sites will be vulnerable to some degree of impact as a result of recreational pressure, although the effects of recreational pressure are complex and very much dependent on the specific conditions and interest features at each site: for example, some bird species are more sensitive to disturbance associated with walkers or dogs than others; some habitats will be more sensitive to trampling or mechanical disturbance than others; some sites will be more accessible than others.

The most typical mechanisms for recreational effects are through direct damage of habitats, or disturbance of certain species. Damage will most often be accidental or incidental, but many sites are particularly sensitive to soil or habitat erosion caused by recreational activities and require careful management of recreational activities to minimise any effects – for example, through provision and maintenance of 'hard paths' (boardwalks, stone slabs etc.) and signage to minimise soil erosion along path margins.

Disturbance⁹ of species due to recreational activities can also be a significant problem at some sites, although the relationship (again) is highly variable and depends on a range of factors including the species, the time of year and the scale, type and predictability of disturbance. Most studies have focused on the effects on birds, either when breeding or foraging. Of particular relevance to this study is a long term monitoring project by Natural England on the Thanet Coast that has found that turnstones (a shoreline-feeding waterbird) are particularly vulnerable to disturbance from dogs, which interrupts their feeding behaviour and can prevent them from gaining sufficient body fat for overwintering or migration. Similarly, Finney et al. (2005) noted that re-surfacing the Pennine Way significantly reduced the impact of recreational disturbance on the distribution of breeding golden plover, by encouraging walkers to remain on the footpath. In contrast, some species are largely unaffected by human disturbance (or even benefit from it) which can result in local or regional changes in the composition of the fauna. The scale, type and predictability of disturbance is also important; species can become habituated to some disturbance (e.g. noise) particularly if it is regular or continuous. Unpredictable disturbance is most problematic.

With regard to sites within the study area, all will be sensitive to recreational pressure to some extent, although the most sensitive to the outcomes of the TDC plan will be **Thanet Coast and Sandwich Bay SPA** and **Thanet Coast and Sandwich Bay Ramsar** (disturbance of bird species, particularly turnstones); and **Sandwich Bay SAC** (disturbance of sand dune habitats).

Most recreational activities with the potential to affect European sites are 'casual' and pursued opportunistically (e.g. walking, walking dogs, riding) rather than structured (e.g. organised group activities or trips to specific discrete attractions), which ensures that it can be harder to quantify or predict either the uptake or the impacts of these activities on European sites and (ultimately) harder to control or manage. It also means it is difficult to explore in detail all of the potential aspects of visitor pressure at the strategic level. However it is possible for plans and strategies to influence recreational use of European sites through the planning process, for example by increasing the amount of green-space required within or near developments if potentially vulnerable European sites are located nearby.

Attempts to predict the effects of increased recreation on European sites that may be associated with development or allocations derived from strategic plans generally aim to identify the distance within which a certain percentage of visits originate. Several studies have used site-specific questionnaire surveys to identify visitor catchments and characterise the typical use of a site; these data are then used to identify 'buffer zones' within which new development would be considered likely to have significant effects on a site, unless appropriately mitigated. Natural England, as part of its input to the County Durham Plan, has noted that it adopts a '75% rule' to determine significance, whereby recreational buffers are based on the distance

⁹ In this case, literal disturbance by human activity; in ecology, 'disturbance' is a more complex concept used in models of ecosystem equilibrium.

within which 75% of visits are made to the site (i.e. taking account of frequency of visits as well as distance travelled); for the Durham Coast SAC, Northumbria Coast SPA / Ramsar and Teesmouth and Cleveland Coast SPA / Ramsar this distance was 6km.

Other studies have identified or used those distances within which approximately 70 - 75% of visitors live when considering recreational buffer areas. Some examples are summarised in Table 3.3, although note that these are necessarily selective as not all studies considering visitor pressure have necessarily reported percentiles; however, they provide some good examples for European sites that have similarities to sites near Thanet, including the presence of nearby urban areas.

Study	European sites and key issues	Summary
Solent Disturbance and Mitigation Project (Fearnley et al. 2010)	Solent Maritime SAC Chichester and Langstone Harbours SPA Pagham Harbour SPA Chichester and Langstone Harbours Ramsar Pagham Harbour Ramsar (Coastal sites; major urban areas; disturbance of birds)	Half of all visitors arriving on foot lived within 0.7km; half of all visitors arriving by car lived more than 4km away. Average travel distance (excluding holidaymakers): 5.04km. 75% of visits from postcodes within 5.6km.
Thames Basin Heaths (Liley et al. 2005)	Thames Basin Heaths SPA (Heathland sites; urban areas; disturbance of birds)	70% of visitors travel 5km or less to access sites
Whitehall and Bordon Ecotown (EPR 2012)	Wealden Heaths SPA Shortheath Common SAC Woolmer Forest SAC Thursley, Ash, Pirbright and Chobham SAC Thursley and Ockley Bogs Ramsar site (Heathland and woodland sites; urban areas; disturbance of birds; damage to heath)	Average travel distance: 6.7km. 70% of visitors travel 4.3km or less to access sites. 70% distance values for following component sites: - Frensham Common: 10.7km - Kingsley Common: 7.4km - Bramshott Common: 4.5km - Woolmer Forest: 3.4km - Longmoor Enclosure: 3.2km - Ludshott Common: 2.9km - Broxhead Common: 2.1km - Hogmoor Inclosure: 0.9km - Shortheath Common: 0.6km - Bordon Enclosure: 0.5km
Ashdown Forest (UE / University of Brighton 2009)	Ashdown Forest SPA (Heathland sites; urban areas; disturbance of birds)	76% of visitors travel 5km or less to access sites

Table 3.3Travel distances for ~70 – 75% of visitors recorded by previous studies

For most sites, the distance that 70 – 75% of visitors travel is typically less than 6 – 7km. Given that most studies have demonstrated that reported visit frequency increases with proximity to a site, it is reasonable to assume that the '75% distance'¹⁰ for visits to most sites is likely to be less than this. However, it is important to recognise that visitor behaviour is complex and generalised statistics can hide important variations in the use of a site (for example, the 75% distance is likely to vary depending on the access point surveyed; this may be particularly relevant for larger sites such as the Thanet Coast and Sandwich Bay SPA / Ramsar). Any derived buffers must be applied cautiously as the precise distance will depend on the site: a remote upland European site favoured by recreational walkers will probably have a substantially larger 75% distance for visits than the Thanet Coast and Sandwich Bay SPA / Ramsar that is adjacent to Margate.

¹⁰ i.e. the distance within which 75% of visits are made

Secondary buffers are also sometimes identified to reflect the variation in visitor behaviour, particularly for those that live in close proximity to a site; for example, the studies supporting the County Durham Plan adopted a 400m buffer also, since 59% of respondents living within the 0 - 400 metre buffer were high risk users, i.e. visit the coast between one and three times a day.

Some visitor survey data are available for Pegwell Bay and Sandwich Bay, based on recent studies for Dover District Council (DDC 2012; Milnes 2012). These data indicate that most visits to Pegwell Bay and Sandwich Bay are made by individuals living within 5km (Ramsgate, Sandwich, Deal, Cliff's End, Broadstairs, Margate). However, the survey methodologies were different in each case and therefore the results must be treated cautiously and are not entirely suitable for the derivation of typical travel distances or distances within which 75% of visits originate. No appropriate visitor survey data are available for the remainder of the Thanet Coast (i.e. Ramsgate to Herne Bay).

Although distance and journey time are major factors influencing recreational use of a site, generic distances for recreational buffer zones are not usually employed, and there is limited consistency between studies when it comes to rationalising buffer zone size largely due to the site-specific variables that are factored in to the assessment. However, in the absence of specific data for the Thanet Coast and Sandwich Bay SPA / Ramsar and Sandwich Bay SAC the available data from other studies can be used as a proxy; therefore, this HRA has identified all allocations within 6km of a site for possible recreational impacts, with allocations within 500m of an access point being considered as potentially high-risk. However, given the size and shape of Thanet all allocations are within 6km of the Thanet Coast and Sandwich Bay SPA / Ramsar, and most are within 6km of Sandwich Bay SAC; therefore all allocations are likely to contribute to increased visitor pressure on these sites 'in combination', even if individually their contribution is minimal.

Urbanisation

Urbanisation is generally used as a collective term covering a suite of often disparate risks and impacts that occur due to increases in human populations near protected sites. Typically, this would include aspects such as fly-tipping or vandalism, although the effects of these aspects again depend on the interest features of the sites: for example, predation of some species by cats is known to be sizeable¹¹ and can be potentially significant for some European sites. Recreational pressure is arguably one type of effect associated with urbanisation, although is usually considered separately as it is less closely associated with proximity: as a broad guide urbanisation effects are more likely when developments (etc) are within 1 km of a designated site, whereas people will typically travel further for recreation. Where sensitive sites are involved development buffers of around 500m are typically used to minimise the effects of urbanisation: for example, the Natural England has identified a 400m zone around the Chichester and Langstone Harbours SPA within which housing development should not be located due to the potential effects of urbanisation (particularly the risk of chick predation by cats, which cannot be mitigated). None of the condition assessments for European sites within the study area identify this as a particular issue and in reality there is sufficient distance between most sites and the nearest settlement boundaries for this to not be a significant threat, with the notable exception of the Thanet Coast and Sandwich Bay sites where the urban areas of Margate, Broadstairs and Ramsgate are immediately adjacent to the sites. Having said that, these are already large urban areas and 'urbanisation' effects are not noted as a significant issue for the European sites. The Local Plan can minimise the effects of this through appropriate policy controls.

Atmospheric Pollution

A number of pollutants have a negative effect on air quality; however, the most significant and relevant to habitats and species (particularly plant species) are the primary pollutants sulphur dioxide (SO_2 , typically from combustion of coal and heavy fuel oils), nitrogen oxides (NOx, mainly from vehicles) and ammonia (NH_3 , typically from agriculture), which (together with secondary aerosol pollutants¹²) are deposited as wet or dry deposits. These pollutants affect habitats and species mainly through acidification and eutrophication. Acidification increases the acidity of soils, which can directly affect some organisms but which also promotes

¹¹ Woods, M. *et al.* 2003. Predation of wildlife by domestic cats *Felis catus* in Great Britain. *Mammal Review* **33 (2)**: 174-188

¹² Secondary pollutants are not emitted, but are formed following further reactions in the atmosphere; for example, SO₂ and NO_x are oxidised to form SO₄²⁻ and NO₂⁻ compounds; ozone is formed by the reaction of other pollutants (e.g. NOx or volatile organic compounds) with UV light; ammonia reacts with SO₄²⁻ and NO₂⁻ to form ammonium (NH₄⁺).

leaching of some important base chemicals (e.g. calcium), and mobilisation and uptake by plants of toxins (especially metals such as aluminium). Air pollution contributes to eutrophication within ecosystems by increasing the amounts of available nitrogen $(N)^{13}$. This is a particular problem in low-nutrient habitats, where available nitrogen is frequently the limiting factor on plant growth, and results in slow-growing low-nutrient specialists being out-competed by faster growing species that can take advantage of the increased amounts of available N.

Table 3.4 Main Air Pollutants, Pathways and Effects

Pollutant	Pathway	Summary of Effects
Ammonia (NH₃)	Primarily from agriculture through decomposition of animal manure and slurry.	Emissions contribute to acidification and (particularly) eutrophication.
Nitrogen oxides (NO _x)	All combustion processes produce oxides of nitrogen (NO_x) in air; road transport is the main source, followed by the electricity supply industry. NO_x emissions have decreased with increased fuel efficiency and catalytic converters	Emissions contribute to acidification and eutrophication; contribute to formation of secondary particles and ground level ozone.
Sulphur Dioxide (SO ₂)	Sulphur dioxide is released when fuels containing sulphur are burnt, especially coal and heavy fuel oils. The energy industry was the primary source, although this has decreased as use of coal has decreased.	SO ₂ dissolves readily in water to form an acid which contributes to acidification of soils and water.

Overall in the UK, there has been a significant decline in SOx and NOx emissions in recent years and a consequent decrease in acid deposition; in England, SO_x and NO_x have declined by 90% and 65% respectively since 1990 (NAEI 2014), the result of a switch from coal to gas and nuclear for energy generation, and increased efficiency and emissions standards for cars. These emissions are generally expected to decline further in future years, although use of coal may begin to increase in the power generation sector in the long-term. In contrast, emissions of ammonia have remained largely unchanged: they have declined by 20% in England since 1990 (NAEI 2014), but have remained largely stable since 2008 (1% decrease from 2008 – 2011; 2.8% increase from 2011 – 2012).

The effect of SO_x and NO_x decreases on ecosystems has been marked, particularly in respect of acidification; the key contributor to acidification is now thought to be deposited nitrogen, for which the major source (ammonia emissions) has not decreased significantly. Indeed, although it is estimated that the proportion of UK semi-natural ecosystems that exceed the critical loads for eutrophication will decline from 40% to 32% by 2010 (NEGTAP 2001), eutrophication from N-deposition (again, primarily from ammonia) is now considered the most significant air quality issue for many habitats.

The UK Air Pollution Information System (APIS) has been interrogated to identify those European sites and features where critical loads¹⁴ for nutrient-N deposition and acidification are met or exceeded. APIS provides a comprehensive source of information on air pollution and the effects on habitats and species and although there are limitations to the data (see SNIFFER 2007), particularly related to the scale at which data can be modelled, this provides the best basis for assessing the impacts of air emissions in the absence of site-by-site monitoring data.

Error! Reference source not found. summarises the APIS data for European sites with features that are ensitive to air quality in the study area. All other sites are either not sensitive to air emissions, or do not have the CL exceeded. It should be noted that CL values are generally provided for habitats rather than species, and that watercourses are not included as eutrophication of most watercourses due to air emissions is negligible compared to run-off from agricultural land.

¹³ Nitrogen that is in a form that can be absorbed and used by plants.

¹⁴ 'Critical Loads' are the threshold level for the deposition of a pollutant above which harmful indirect effects can be shown on a habitat or species, according to current knowledge (APIS 2009).

Table 3.5 Summary of APIS Interrogation

Site	Air quality sensitive features	Over	Over CL?	
		Acid	Ν	
Blean Complex SAC	Oak-hornbeam forests	+	++	
Dover to Kingsdown Cliffs SAC	Calcareous dry grassland and scrub Vegetated sea cliffs	- n/a	+ n/a

Table Notes:				
CL Critical load				
Acid Acidification				
N Eutrophication				

n/a Critical load not set for feature / feature not sensitive

- below minimum CL for that habitat

+ minimum CL for that habitat is exceeded

++ maximum CL for that habitat is exceeded

The proposals within the plan may indirectly contribute to local air pollution and wider diffuse pollution, but quantifying these effects is difficult. In practice, the principal source of air pollution associated with the plan will be associated with changing patterns of vehicle use due to the promotion of new development and housing sites (since the plan does not provide for any new significant point-sources). The Department of Transport's *Transport Analysis Guidance*¹⁵ states that "beyond 200m, the contribution of vehicle emissions from the roadside to local pollution levels is not significant" and therefore this distance is used to determine the potential significance of any local effects associated with the plan. Environment Agency guidance (EA 2007) also states that "Where the concentration within the emission footprint in any part of the European site(s) is less than 1% of the relevant long-term benchmark (EAL, Critical Level or Critical Load), the emission is not likely to have a significant effect alone or in combination irrespective of the background levels". With regard to the sites in **Error! Reference source not found.**, only **Sandwich Bay SAC** is within he TDC boundary, or within 200m of it; within the TDC area, Sandwich Bay has two A- or B-roads within 200m of it (A256 and A299).

More broadly, the plan proposals may indirectly contribute to wider diffuse pollution within and beyond the TDC boundary, in combination with other developments, plans and programmes. There is little guidance on the assessment of diffuse pollution, although NE have previously indicated to Runnymede Borough Council that the HRA of its local plan "can only be concerned with locally emitted and short range locally acting pollutants" as wider diffuse pollution is beyond the control or remit of the authority. This is arguably correct, since trans-boundary air pollution can only be realistically addressed by national legislation or higher-tier plans, policies or strategies. As a result, any assessment must focus on the development of suitable mitigating policy that will minimise the contribution of plan-supported development to overall diffuse pollution.

Water Resources and Flow Regulation

The exploitation and management of water resources is connected to a range of activities, most of which are not directly controlled or influenced by the Local Plan; for example, agriculture, flood defence, recreation, power generation, fisheries and nature conservation. Much of the water supply to water-resource sensitive European sites is therefore managed through specific consenting regimes that are independent of the Local Plan.

¹⁵ http://www.dft.gov.uk/webtag/documents/expert/unit3.3.3.php#013; accessed 15/06/14

It is clear that development promoted or supported by the Local Plan is likely to increase demand for water, which could indirectly affect some European sites. When assessing the potential effects of increased water demand it is important to understand how the public water supply (PWS) system operates and how it is regulated with other water-resource consents. Southern Water (SW) is responsible for supply to the Thanet area, which is within its Eastern Supply Area (Kent Thanet Water Resource Zone (WRZ)). Thanet receives most of its supply from groundwater (75%) with the remainder from the River Medway, River Stour or pipeline transfer from the Kent Medway WRZ.

Under the Water Act 2003 all water companies must publish a Water Resources Management Plan (WRMP) that sets out their strategy for managing water resources across their supply area over the next 25 years. WRMPs use calculations of Deployable Output (DO) to establish supply/demand balances; this enables them to identify those Water Resource Zones (WRZs) with potential supply deficits over the planning period¹⁶. The calculations account for any reductions in abstraction that are required to safeguard European sites¹⁷ and so the WRMP process (with other regulations) helps ensure (as far as is achievable) that future changes in demand will not affect any European sites¹⁸.

SW have accounted for the growth predicted by TDC and other LPAs in its forecasting, and have identified small supply-demand deficits in the Kent Thanet WRZ over the planning period. SW will meet this predicted deficit through a combination of leakage reduction; water efficiency; and catchment management to reduce nitrate levels in abstracted water. The WRMP has been subject to HRA, which has concluded that the preferred options will have no significant effect on any European sites, including those water-resource sensitive sites within the study area (e.g. **Stodmarsh SAC / SPA / Ramsar**). The WRMP provides the best estimate of future water resource demand, and therefore it is reasonable to assume that the growth predicted within the TDC plan can be accommodated without significant effects on any European sites due to PWS abstractions. Furthermore, since the WRMP explicitly accounts for the growth predicted by TDC and other LPAs, 'in combination' effects between the Local Plan and the WRMP are unlikely to occur. Having said that, the Local Plan can obviously help manage demand and promote water efficiency measures through its policy controls.

Water Quality

Most waterbodies and watercourses in Thanet are affected to some extent by point or diffuse sources of pollutants, notably nitrates and phosphates. Point sources are usually discrete discharge points, such as wastewater treatment works (WTW) outfalls, which are generally managed through specific consenting regimes that are independent of the Local Plan; the major treatment works serving the Thanet area are located at Minster and Weatherlees, discharging to the Stour and to sea via a Long Sea Outfall (LSO) at Foreness Point. In contrast, diffuse pollution is derived from a range of sources (e.g. agricultural run-off; road run-off) that cannot always be easily traced or quantified. Development promoted or supported by the Local Plan is likely to increase demand on wastewater treatment works, and potentially increase run-off which could indirectly affect some European sites. The South East River Basin Management Plan identifies are a number of water quality issues in the Thanet area, notably contamination of groundwater sources by diffuse agricultural pollution and control of discharges from Combined Sewer Overflows (CSOs). With regard to effects on European sites, it should be noted that the Environment Agency's Review of Consents

¹⁸ Calculations of DO include for Target Headroom (precautionary 'over-capacity' in available water) to buffer any unforeseen variation in predicted future demand; the WRMP is also reviewed on a five-yearly cycle to ensure it is performing as expected and to account for any variations between predicted and actual demand.

¹⁶ Forecasts are completed in accordance with the Water Resources Planning Guidelines (published by the Environment Agency) and take into account (inter alia) economic factors (economic growth, metering, pricing), behavioural factors (patterns of water use), demographic factors (population growth, inward and outward migration, changes in occupancy rate), planning policy (LPA land use plans), company policies (e.g. on leakage control and water efficiency measures) and environmental factors, including climate change. The WRMP therefore accounts for these demand forecasts based on historical trends, an established growth forecast model and through review of local and regional planning documents.

¹⁷ For example, sustainability reductions required by the Review of Consents (RoC) or the Environment Agency's Restoring Sustainable Abstractions (RSA) programme. It should be noted that, under the WRMP process, the RoC changes (and non- changes to licences) are considered to be valid over the planning period. This means that the WRMP (and its underlying assumptions regarding the availability of water and sustainability of existing consents) is compliant with the RoC and so the WRMP can only affect European sites through any new resource and production-side options it advocates to resolves deficits, and not through the existing permissions regime.

determined that there was no adverse effect on the integrity of any European sites, including the Thanet Coast sites, from nutrient enrichment due to Environment Agency consents (i.e. associated with sewerage treatment). The TDC plan does not promote any developments that are individually likely to result in significant effects due to increased sewerage requirements and, provided that the planning process allows for timely delivery of additional treatment capacity, new developments should not have any 'in combination' quantum of development effects.

Run-off from impermeable surfaces can have considerable effects on waterbodies and watercourses, and is a notable issue in both urban and rural areas. Development has traditionally sought to capture and divert rain and run-off to the nearest watercourse or treatment facility as quickly as possible, and extensive drainage networks have been developed to facilitate this. However, as developed areas have increased so the total volumes and flow rates of run-off have increased also. This has two principal effects: firstly, impermeable surfaces provide very little resistance to the mobilisation and transport of pollutants within run-off; and secondly, flow rates and volumes often exceed the capacity of the receiving drains or watercourses, causing localised flooding or the operation of combined sewer overflows (CSOs)¹⁹. The effect of run-off from developed areas can mitigated or reduced by the use of Sustainable Drainage Systems (SuDS) and by increasing the area of permeable surfaces (both natural and artificial) within developed areas. These measures offer effective attenuation by reducing the volumes of surface run-off. They also increase the retention of pollutants and, in the case of some SuDS, can allow for treatment of pollutants.

With regard to European sites, those most vulnerable to water quality impacts due to development in Thanet will be the 'downstream receptors' – i.e. the Thanet Coast sites and Sandwich Bay SAC. There is no risk of other water quality sensitive sites in the study area being affected (e.g. Stodmarsh SAC / SPA / Ramsar) due to the absence of impact pathways. Having said that, the interest features of the Thanet Coast sites and Sandwich Bay SAC are themselves not especially vulnerable to potential effects of water quality changes associated with population growth, either because they are not particularly sensitive to water quality issues (e.g. Sea Caves), or not likely to be exposed to any effects (e.g. the dune features of Sandwich Bay SAC). Since the water quality effects of the plan are ultimately either controlled by existing consents regimes (which must undergo HRA) or have diffuse 'in combination' effects that are difficult to quantify any assessment must focus on the development of suitable mitigating policy that will minimise the impacts of plan-supported development on water quality.

Flooding and Water Level Management

The implementation of the European Floods Directive (Directive 2007/60/EC) in England and Wales is being co-ordinated with the Water Framework Directive. Catchment Flood Management Plans (prepared by the Environment Agency) and Shoreline Management Plans (prepared by coastal Local Authorities and the Environment Agency) set out long term policies for flood risk management. The delivery of the policies from these long term plans will help to achieve the objectives of this and the River Basin Management Plans.

Much of the TDC area has a relatively high flood risk, although this is generally associated with the flooding of low-lying coastal areas by the sea rather than fluvial flooding. Development supported by the Local Plan is unlikely to significantly alter the regional flood risk levels, but may exacerbate the effects of local flooding: run-off from impermeable surfaces can have considerable effects on waterbodies and watercourses, meaning that flow rates and volumes often exceed the capacity of the receiving drains or watercourses. This can lead to local water quality impacts on European sites. The effect of run-off from developed areas can be mitigated or reduced by the use of Sustainable Drainage Systems (SuDS) and by increasing the area of permeable surfaces (both natural and artificial) within developed areas.

Effects on Critical Habitats Outside of European Sites

The provisions of the Habitats Regulations ensure that 'direct' (encroachment) effects on European sites as a result of land use change (i.e. the partial or complete destruction of a European site) are extremely unlikely under normal circumstances, and this will not occur as a result of the TDC Local Plan. However, many

¹⁹ All sewerage pipes have a certain capacity, determined by the size of the pipe and the receiving WTW. At times of high rainfall this capacity can be exceeded, with the risk of uncontrolled bursts. CSOs provide a mechanism to prevent this, by allowing untreated sewerage to mix with surface water run-off when certain volumes are exceeded. This is then discharged to the nearest watercourse.

European interest features (particularly animal species) may use or be reliant on non-designated habitats outside of a European site during their life-cycle. Developments some way from a European site can therefore have an effect if its interest features are reliant on the habitats being affected by the development.

With regard to the European sites within the study area this is only potentially an issue for the Thanet Coast and Sandwich Bay SPA / Ramsar, where some high-tide turnstone roosts may be outside the boundaries of the designated site (although the known major roosts are all immediately adjacent to the site).

November 2016 Doc Ref. 35099rr004i2

4. Preferred Options Stage Screening

4.1 Initial Screening of European Sites

All European sites within 15km of the TDC boundary have been included in the scope of the HRA. Often, however, sites or interest features within a study area can be excluded from further assessment at an early stage ('screened out') because the plan or project will self-evidently have either 'no effect' or 'no significant effect' on these sites (i.e. the interest features are not sensitive to likely effects of plan or project; or are not likely to be exposed to those effects due to the absence of any reasonable impact pathways). The following sections provide a brief summary of the screening of the European sites and their interest features based on the baseline data summarised above and the preferred options and policies. It should be noted that this aspect of the screening process is a 'low bar', with sites, aspects or features only 'screened out' if they will self-evidently be unaffected by the TDC plan (i.e. it is aiming to identify those aspects that will clearly have 'no effect' or 'no significant effect' (alone or in combination) due to an absence of impact pathways). It does not necessarily imply a conclusion of 'significant effects' for those sites that are 'screened in' since controls within the plan (i.e. policy measures) will also operate to minimise these effects (these are considered in the next section); rather, it allows for the policy development to focus on those effects in addition to the general protective policies.

The screening of the sites and interest features takes account of those general protective policies that are proposed as part of the plan, notably (from the preferred options) Policy SP25 (Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserves). In addition, it is appropriate to assume that all relevant lower tier consents and permissions (etc.) will be correctly assessed and controlled, and that any activities directly or indirectly supported by the plan will adhere to the relevant legislative requirements and all normal best-practice (e.g. it would be inappropriate to assume that normal controls on, say, the installation of new discharge to a watercourse would not be correctly followed).

Blean Complex SAC

Blean Complex SAC is a woodland site approximately 4.8km west of the TDC boundary. The site is an NNR and managed in partnership by NE, RSPB and the Woodland Trust, and is almost entirely in favourable condition; coppice management the key issue in the site unit that is unfavourable. No other factors are identified as having an effect on the site.

Aspect	Screening summary	Consider further?
Recreational pressure	Site over 6.8km from nearest TDC allocation, and further (>10km) taking into account road access routes. Access to the site is managed via footpaths and by the Woodland Trust and visitor pressure is not identified as having any negative effect on the condition of the interest features. People from Thanet will visit the woodland but this is unlikely to result in a a measurable increase in recreational pressure on the site, alone or in combination, such that the interest features could be significantly affected.	No
Urbanisation	No TDC development proposals within 500m of the site, therefore TDC plan wil have no effect via this pathway.	No
Atmospheric pollution	Oak-hornbeam forests are not particularly sensitive to atmospheric pollutants and the major road routes into Thanet (the A299 and A28) which are likely to experience increased traffic volumes are over 2km from the woodland. The TDC plan is unlikely to significantly influence the use of roads within 200m of the site. Effects on air quality at this site as a result of the TDC plan will not be significant and are not considered further.	No
Water resources	Oak-hornbeam forests are not considered to be water-resource sensitive features and therefore will not be affected by growth within the TDC area.	No

Table 4.1 Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Water quality	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Flooding / water management	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Effects on mobile species	Site does not support any mobile interest features.	No

Dover to Kingsdown Cliffs SAC

This site is an undefended sea cliff approximately 14.9km south of TDC boundary. The main issues affecting this site are coastal squeeze and grassland management. The site is mostly in favourable condition; those in unfavourable condition are primarily affected by poor or limited management of encroaching scrub and grazing of the calcareous grassland. Part of the SAC is owned by the National Trust (the 'White Cliffs of Dover' estate); access is well-managed and visitor pressure is not identified as an issue at the site.

Aspect	Screening summary	Consider further?
Recreational pressure	Site over 15km from nearest TDC allocation, and further taking into account road access routes. Access to the site is available by the existing coastal path, although visitor pressure is not identified as having any negative effect on the condition of the interest features. Development within Thanet is unlikely to result in a measurable increase in recreational pressure on the site, alone or in combination, such that the interest features could be significantly affected.	No
Urbanisation	No TDC development proposals within 500m of the site, therefore TDC plan wil have no effect via this pathway.	No
Atmospheric pollution	The minimum critical load for nitrogen deposition is currently exceeded at the site, although data from APIS suggests that the major source for this is shipping (mainly associated with the port at Dover). The majority of the site is well over 200m from the nearest roads; modelling undertaken for the HRA of the Dover Land Allocations Local Plan (DDC 2012) indicated that development in Dover will not result in N deposition over 1% of the long-term benchmark (so no adverse effect) and development within Thanet will not significantly influence the use of roads within 200m of the site. Effects on air quality at this site as a result of the TDC plan will not be significant and are not considered further.	No
Water resources	The Calcareous dry grassland and scrub feature is not considered to be a water- resource sensitive features and so will not be affected by growth within the TDC area. Vegetated sea cliffs are theoretically water-resource sensitive (partly dependent on cliff seepages often associated with local aquifers) but there is no linkage between abstraction in the Dover area and consumption in Thanet, and so there will be no effects on this feature.	No
Water quality	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Flooding / water management	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Effects on mobile species	Site does not support any mobile interest features.	No

Table 4.2 Summary of site screening based on impact pathways

Sandwich Bay SAC

This site is on the southern boundary of TDC area and supports important sand dune systems and sandy coastal grassland, although the interest features (dune habitats) are generally associated with Sandwich Bay rather than Pegwell Bay (which is the closest part of the SAC to Thanet). The site is mostly in favourable condition, with unfavourable areas due to management and hydro-ecological changes that have degraded some fixed dunes (although these are likely to be due to local hydrological changes). The features of the SAC are vulnerable to a range of potential impacts including direct encroachment; coastal squeeze or developments (etc.) that alter the natural geomorphological processes; visitor pressure; management; air quality changes; and local water quality / quantity changes (note, current abstraction and discharges consents are not having an adverse effect on the site, based on Review of Consent data).

Aspect	Screening summary	Consider further?
Recreational pressure	Interest features are vulnerable to recreational pressure, particularly trampling / damage of dune habitats. There is limited data on the effects of this on the SAC but this aspect may require more detailed consideration in the HRA.	Yes
Urbanisation	There are few TDC allocations within 500m of the site and none are near the more sensitive dune habitats, and therefore the TDC plan is unlikely to have any significant effects via this pathway.	No
Atmospheric pollution	The minimum critical load for nitrogen deposition is currently exceeded at the site for all of the features, although the majority of the site is over 200m from the nearest roads.	Yes
Water resources	Some of the dune features (e.g. humid dune slacks) are water-level sensitive terrestrial ecosystems, although current abstraction and discharges consents are not having an adverse effect on the site, based on Review of Consent data, and source protection zones for the abstractions that partly supply Thanet do not intersect the most sensitive areas of the site; it is therefore considered that the TDC plan is unlikely to affect this SAC via this mechanism.	No
Water quality	Development in Thanet could potentially affect the lower reaches of the Great Stour, which forms part of the SAC through diffuse pollution and discharges from WTWs; and through direct run-off and discharges to the Pegwell Bay section of the site. The management of this is largely determined by Southern Water and the EA, although the Thanet plan policies should allow for the early identification of infrastructure requirements to minimise the risks of sewerage headroom being compromised.	Ensure policies reflect need to plan for sewerage provision.
Flooding / water management	Development in Thanet could potentially affect the lower reaches of the Great Stour although most development is located outside this catchment and significant effects as a result of changes to the flooding regime would not be expected; however, the Thanet plan policies should allow for flood risk to be mitigated.	No
Effects on mobile species	The SAC does not have any mobile interest features.	No

Table 4.3 Summary of site screening based on impact pathways

Stodmarsh SAC / Stodmarsh SPA / Stodmarsh Ramsar

Stodmarsh SPA and Stodmarsh Ramsar are approximately 2.8km south west of the TDC boundary; Stodmarsh SAC is larger and so approximately 2.4km south west. Stodmarsh is a wetland site associated with the River Great Stour, and supports a range of wetland habitats including open water, extensive reedbeds, grazing marsh and wet woodland. The site supports a number of uncommon wetland invertebrates and plants, and provides wintering habitats for wetland bird species. The interest features of the sites are all water-resource dependent to some extent. The site is predominantly in 'favourable' condition; the 'unfavourable' SSSI units are in this condition due to localised management issues, either of scrub encroachment or water levels (note, the water level issues are not due to over-abstraction). Most of the site is an NNR or managed under stewardship agreements, and so most potential impacts have suitable control mechanisms in place (e.g. control of water levels; management; visitor pressure; etc.).

Table 4.4 Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Recreational pressure	The site is within 6km of the nearest TDC allocation. Visitor pressure is not identified as an issue affecting the site, and the wetland nature of the site and controlled access ensures visitor pressure is appropriately managed; increasing the population of Thanet is likely to increase visitors to this site, but this will not increase damage to the habitats supporting the SAC / Ramsar interest features, or increase direct disturbance of the SPA features due to these controls. Development within Thanet is unlikely to result in a measurable increase in recreational pressure on the site, alone or in combination, such that the interest features could be significantly affected.	No
Urbanisation	No TDC development proposals within 500m of the site, therefore TDC plan wil have no effect via this pathway.	No
Atmospheric pollution	No critical loads are set for the features at this site; effects on air quality at this site as a result of the TDC plan will not be significant and are not considered futher.	No
Water resources	The site features are water resource sensitive, and potentially vulnerable to increased abstraction (although this is not currently affecting the site). However, the WRMP for Southern Water will not have any significant effects on this site, based on its HRA and therefore growth within Thanet can be accommodated. The Thanet plan will have no significant effect on this aspect, although policies should allow for the early identification of infrastructure requirements.	Ensure policies reflect need to plan for water resource provision.
Water quality	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Flooding / water management	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Effects on mobile species	Some of the mobile interest features will use habitats outside the site, potentially including some reedbed habitats associated with parts of the Thanet Coast and Sandwich Bay Ramsar. However, it is not thought that there is significant interdependency between these sites and development in Thanet will therefore have only weak indirect effects on the mobile interest features of this SPA. This is considered further but it is likely that the mitigation required for the Thanet Coast and Sandwich Bay SPA / Ramsar will be sufficient to prevent indirect effects on Stodmarsh SPA / Ramsar also. The feature of the SAC (Desmoulin's whorl snail) will not be affected.	Yes (in association with effects on Thanet Coast and Sandwich Bay Ramsar)

Thanet Coast SAC

The Thanet Coast SAC covers the northern and eastern coastlines of the TDC area. The site features are essentially marine or intertidal habitats (sea caves, reefs) and are mainly sensitive to direct effects only (i.e. encroachment or factors that alter the geomorphological processes that otherwise dominate the condition of the features). As a result they will have a limited exposure and sensitivity to the effects of the TDC plan despite their proximity.

Table 4.5Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Recreational pressure	Recreational impacts are theoretically possible although the marine and intertidal nature of the interest features and their location ensures that they are neither particularly exposed or sensitive. Any effects are unlikely to be significant, although the measures required for the Thanet Coast and Sandwich Bay SPA / Ramsar will also benefit the SAC.	No
Urbanisation	There several TDC allocations within 500m of the site and so urbanisation impacts are possible, although the marine and intertidal nature of the interest features and their location ensures that they are unlikely to be exposed to any significant urbanisation pressures, or be particularly sensitive.	No

Aspect	Screening summary	Consider further?
Atmospheric pollution	Features are not sensitive to air quality effects.	No
Water resources	Features are not sensitive to effects on water resources.	No
Water quality	Some reef features are potentially sensitive to water quality changes, particularly if this results in eutrophication or smothering although the tidal fluxes attenuate local effects to some extent. Impacts from WTW discharges are very unlikely (these enter the sea via LSOs) and so effects on this feature are only really possible from diffuse pollution or local point sources such as CSOs or unconsented discharges. These will largely be controlled by the EA although the Thanet plan policies should aim to ensure that run off is managed appropriately.	No, although ensure policies reflect need to manage run-off.
Flooding / water management	Features not sensitive to changes in flooding regime etc.	No
Effects on mobile species	The SAC does not have any mobile interest features.	No

Margate and Long Sands SAC

This is a marine SAC approximately 1.1km offshore from northern coast of the TDC area designated for its sub-tidal sandbanks. It will not be exposed or sensitive to the likely effects of the TDC plan (no effects) and therefore is not considered in further detail; the general protective policies of the TDC plan will be sufficient to ensure the integrity of this site is not affected.

Tankerton Slopes and Swalecliffe SAC

This coastal grassland site is approximately 9.5km west of TDC area, on the North Kent Coast. It is designated for its population of Fisher's estuarine moth *Gortyna borelii lunata* which has a localised population distribution in the UK due to its specific habitat requirements; this site supports its food plant hog's fennel (*Peucedanum officinale*), together with areas of neutral grassland also required by the species for egg laying. The SSSI unit that forms the SAC is in favourable condition but is heavily used by dog walkers and is vulnerable to under-management.

Aspect	Screening summary	Consider further?
Recreational pressure	Site over 10km from nearest TDC allocation, and further taking into account road access routes. Access to the site is available by the existing footpaths and the site is vulnerable to visitor pressure due to its location within Herne Bay, although it is a small site the will not attract significant additional recreation from Thanet. Development within Thanet is unlikely to result in a measurable increase in recreational pressure on the site, alone or in combination, such that the interest features could be significantly affected.	No
Urbanisation	No TDC development proposals within 500m of the site, therefore TDC plan wil have no effect via this pathway.	No
Atmospheric pollution	No critical loads are set for the features at this site; effects on air quality at this site as a result of the TDC plan will not be significant and are not considered futher.	No
Water resources	The feature is not water resource sensitive (the food plant, hog's fennel <i>Peucedanum officinale</i> is a coastal plant favouring moist conditions) and the Thanet plan will have no effect on this aspect.	No
Water quality	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No

Table 4.6Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Flooding / water management	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Effects on mobile species	Interest feature is particularly sedentary, and rarely found more than 10m from its food plant which itself is uncommon; the integrity of this population will not be dependent on any habitats in Thanet.	No

Outer Thames Estuary SPA

This site is an offshore SPA extending from northern coast of the TDC area. The site is designated for its red throated divers, which are sensitive to non-physical disturbance by noise and visual presence during the winter; however, this is very much an offshore species and the they will not be particularly exposed to disturbance associated with the Thanet plan (or within Thanet's control) due to their preference for offshore areas.

Table 4.7 Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Recreational pressure	Site on TDC boundary but interest features will not be exposed to disturbance (etc) effects due to the TDC plan, or within the control of TDC. Effects on the site integrity will not occur.	No
Urbanisation	Features not exposed to urbanisation effects.	No
Atmospheric pollution	No critical loads are set for the features at this site; features not sensitive to changes in air quality that may occur due to development in the TDC area.	No
Water resources	The feature is not water resource sensitive.	No
Water quality	Site receives discharges from the Thanet area which may affect prey species, although this is a weak effect and water quality effects associated with pollution from shipping are far more notable. Impacts due to the Thanet plan are unlikely, based on available information, and general policy protections will be sufficient to protect this site.	No
Flooding / water management	Features not vulnerable.	No
Effects on mobile species	Interest feature is mobile but not reliant on terrestrial habitats during winter, and so will not be vulnerable to effects due to the TDC plan.	No

Thanet Coast and Sandwich Bay SPA / Thanet Coast and Sandwich Bay Ramsar

The Thanet Coast and Sandwich Bay SPA and Thanet Coast and Sandwich Bay Ramsar cover most of the coastal areas of Thanet, extending from north of Deal to Herne Bay on the North Kent coast. The sites are not entirely concurrent, mainly south of Sandwich Bay where the Ramsar site includes some local wet grasslands in the Lydden Valley, although they are effectively the same within the Thanet area.

Table 4.8 Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Recreational pressure	The main current threat to the integrity of these sites is the disturbance of feeding and roosting waders, notably overwintering turnstones, by recreational activities (particularly dog walking, although other activities, such as kite sailing, are thought to have local impacts). The habitats of the SPA and Ramsar will be vulnerable to the same aspects as Sandwich Bay SAC and Thanet Coast SAC (see above) although the relationship between the habitat condition and the status of the SPA / Ramsar bird interest features is complex, and effects on the habitats will not always directly and negatively affect these features (for example, nutrient enrichment would degrade some habitats but probably enhance foraging conditions for tunstone). The main Local Plan issue for this site is therefore the overall quantum of development in Thanet (and neighbouring authorities) and the consequent potential for recreational use of the beaches to increase during key periods. The plan will need to develop mitigating policies and safeguards to minimise the effect of this.	Yes
Urbanisation	As for recreational pressure	Yes (with recreational pressure)
Atmospheric pollution	No critical loads are set for the features at this site; the bird interest features and the Ramsar habitats are not sensitive to changes in air quality that may occur due to development in the TDC area.	No
Water resources	The Ramsar habitat features are water resource sensitive. The site features are water resource sensitive, and potentially vulnerable to increased abstraction (although this is not currently affecting the site). However, the WRMP for Southern Water will not have any significant effects on this site, based on its HRA and therefore growth within Thanet can be accommodated. The Thanet plan will have no significant effect on this aspect, although policies should allow for the early identification of infrastructure requirements.	Ensure policies reflect need to plan for water resource provision.
Water quality	Development in Thanet could potentially affect some features of these sites (particularly the Ramsar habitats) through diffuse pollution and discharges from WTWs; and through direct run-off and other discharges. The management of this is largely determined by Southern Water and the EA, although the Thanet plan policies should allow for the early identification of infrastructure requirements to minimise the risks of sewerage headroom being compromised.	Ensure policies reflect need to plan for sewerage provision and water quality management.
Flooding / water management	Development in Thanet could potentially affect the lower reaches of the Great Stour although most development is located outside this catchment and significant effects as a result of changes to the flooding regime would not be expected; however, the Thanet plan policies should allow for flood risk to be mitigated.	No
Effects on mobile species	The bird interest features are mobile and some high-tide turnstone roosts may be outside the boundaries of the designated site, although the known major roosts are all immediately adjacent to the site.	Yes (with recreational pressure)

The Swale SPA / The Swale Ramsar

These sites are approximately 12.8km west of TDC area at their closest point. The sites are a large complex of brackish and fresh water, floodplain grazing marsh with ditches, and intertidal saltmarshes and mud-flats extending. They are potentially vulnerable to a range of environmental aspects, including visitor pressure (thought to be having a significant effect); abstraction and water quality associated with point discharges (not thought to adversely affect the sites, based on the EA Review of Consents); water quality associated with diffuse pollution (possible significant effect on terrestrial components); coastal squeeze and erosion of intertidal habitat; and management.

Table 4.9 Summary of site screening based on impact pathways

Aspect	Screening summary	Consider further?
Recreational pressure	Sites over 12km from the TDC boundary at its closest point; the majority of the sites is substantially futher. Recreational pressure is considered a significant issue at these sites although visitor surveys by Footprint Ecology (2012) recorded only two visitors from Thanet out of 521 visitors surveyed. Development in Thanet is unlikely to result in a measurable increase in recreational pressure on the sites, alone or in combination (note, it is thought that proposed development in North Kent area will have a significant effect on the sites, but this cannot be made 'more significant' in combination with other development).	No
Urbanisation	No TDC development proposals within 500m of the site, therefore TDC plan wil have no effect via this pathway.	No
Atmospheric pollution	The terrestrial features of the Ramsar site are potentially sensitive to atmospheric pollutants although the major road routes into Thanet (the A299 and M2) which may experience increased traffic volumes as a result of development in Thanet are over 200m from the sites, with the exception of a very small part of the Seasalter Level, west of Whitstable). Effects on air quality at this site as a result of the TDC plan will not be significant and are not considered futher.	No
Water resources	Features are water-resource dependent and potentially linked to the Thanet area since abstractions in North Kent can be used to support Thanet through transfer from the Kent Medway WRZ.	Yes (in combination)
Water quality	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Flooding / water management	The site is not hydrologically connected to the Thanet area and so will not be affected by the outcomes of the TDC plan.	No
Effects on mobile species	Some of the mobile interest features will use habitats outside the site, including some intertidal habitats around Thanet; golden plover are an interest feature of both The Swale SPA and the Thanet Coast and Sandwich Bay SPA. However, it is not thought that there is significant interdependency between these sites and development in Thanet will therefore have only weak indirect effects on the mobile interest features of The Swale SPA. This is considered further but it is likely that the mitigation required for the Thanet Coast and Sandwich Bay SPA / Ramsar will be sufficient to prevent indirect effects on The Swale also.	Yes (in association with effects on Thanet Coast and Sandwich Bay SPA / Ramsar)

Summary

Most sites and features within the study area will not be significantly affected by the TDC plan, due either to the feature or site not being exposed and/or sensitive to the likely effects of the plan; or because the standard protective policies included within the plan, and operation of lower tier legislative and consenting regimes, can be relied on to ensure that significant effects will not occur. The main exceptions to this are:

- The Thanet Coast sites, which are exposed and sensitive to recreational pressure particularly as well as general proximity effects; and
- The water resource sensitive sites (the Stodmarsh sites and The Swale sites), which may be sensitive to increased water resource demands (although it must be noted that the Southern Water WRMP does not predict a deficit within Thanet that would require resolution with additional abstraction).

4.2 Site Allocations

The possible allocation sites considered by TDC, and their proposed uses, were reviewed to identify those which (if developed) could result in significant effects on a European site. The review largely focused on the identification of specific effects that might be associated with specific allocations (and which may therefore require the inclusion of allocation-specific mitigation within the plan) rather than the broader 'quantum of

development' effects²⁰. The risk of effects is obviously strongly dependent on how a particular development is implemented at the project stage and in most cases potential effects can be avoided using best-practice and standard scheme-level avoidance measures which do not necessarily need to be specified for each allocation (for example, scheduling construction works near the Thanet Coast and Sandwich Bay SPA for the summer period to avoid potential disturbance of over-wintering turnstones). However, in some instances there may not be sufficient flexibility or safeguards provided within the plan to ensure that a particular allocation could be delivered without significant effects, if bought forward.

The review of the allocations concluded that most of the allocation sites would not, if developed, have any significant effects on their own that could not be avoided or mitigated using standard measures, and that the plan provided sufficient flexibility (and protective policies) to ensure this. However, the larger residential allocation sites (e.g. Westwood (SHLAA references S511, S553, S447); Birchington (S515, S498, S499, ST3); Westgate (ST1, ST2); Manston Green (no reference) could arguably, due to their size, result in significant effects on their own due to increases in recreational pressure, particularly on the Thanet Coast and Sandwich Bay SPA. However, all of the Thanet allocations are within 6km of the Thanet Coast sites and therefore will have 'in combination' effects due to recreational pressure. Bespoke mitigation within the plan (or referred to by it), rather than general protective policies, is therefore appropriate to help prevent this occurring. Other 'quantum of development' in combination effects may occur in respect those aspects that operate regionally, notably water resources and water quality. Plan policies will need to include suitable mitigation to prevent adverse effects occurring as a result of allocation development.

4.3 Policies

Overview of Screening

The emerging policies were reviewed during their development (see Appendix X), and again at the preferred options stage (Section 4.3.4 below). The review and screening process considered the European sites potentially vulnerable to the TDC plan and the likely outcomes of the policies as drafted. Policies may have effects in their own right, or they may be used to control potential effects or prevent them occurring. A policy should be considered 'likely' to have an effect if the competent authority is unable (on the basis of objective information) to exclude the possibility that the plan could have significant effects on any European site, either alone or in combination with other plans or projects; an effect will be 'significant' if it could undermine the site's conservation objectives. However, it is important that the policy assessment focuses on effects that are objectively possible, rather than just imaginable; furthermore, it is not appropriate for policies to simply re-state existing legislation.

When considering the likely effects of a policy, it is recognised that some policy 'types' cannot result in impacts on any European sites. Different guidance documents suggest various classification and referencing systems to help identify those policies that can be safely screened out; the general characteristics of these policy types are summarised in Table 4.10.

Broad Policy Type	Notes
General statements of policy / aspiration	The European Commission recognises* that plans or plan components that are general statements of policy or political aspirations cannot have significant effects; for example, general commitments to sustainable development.
General design / guidance criteria or policies that cannot lead to or trigger development	A general 'criteria based' policy expresses the tests or expectations of the plan-making body when it comes to consider proposals, or relates to design or other qualitative criteria which do not themselves lead to development (e.g. controls on building design); however, policies with criteria relating to specific proposals or allocations should not be screened out.

Table 4.10 Policy 'types' that can usually be screened out

²⁰ Effects due to the overall quantum of development are essentially a within-plan 'in combination' effect.

Broad Policy Type	Notes
External plans / projects	Plans or projects that are proposed by other plans and are referred to in the plan being assessed for completeness (for example, Highways Agency road schemes; specific waste development proposals promoted by a County Minerals and Waste Plan).
Environmental protection policies	Policies designed to protect the natural or built environment will not usually have signifcant or adverse effects (although they may often require modification if relied on to provide sufficient safeguards for other policies).
Policies which make provision for change but which could have no conceivable effect	Policies or proposals the which cannot affect a European site (no impact pathways and hence no effect; for example, proposals for new cycle path several kilometres from the nearest European site) or which cannot undermine the conservation objectives, either alone or in combination, if impact pathways exist (no significant effect).
General statements of policy / aspiration	The European Commission recognises* that plans or plan components that are general statements of policy or political aspirations cannot have significant effects; for example, general commitments to sustainable development.

* EC, 2000, Managing Natura 2000 sites: the provisions of Article 6 of the 'Habitats' Directive 92/43/EEC April 2000 at 4.3.2

It must be noted that it is inappropriate to apply a policy classification tool uncritically to all policies of a certain type: there will obviously be some occasions when a policy or similar may have potentially significant effects, despite being of a 'type' that would normally be screened out. The criteria in Table 4.10 were applied critically to the screening of the draft policies within the Local Plan to identify the following policy groups:

- 'No effect' policies: policies that will have 'no effect' (i.e. policies that, if included as drafted, self-evidently would not have any effect on a European site due to the type of policy or its operation; for example, a policy controlling town centre shop signage; a policy setting out sustainable development criteria that developments must meet). Note that 'no effect' policies cannot have in combination effects;
- 'No likely significant effect' policies: policies where impact pathways exist but the effects will not be significant (alone or in combination);
- 'Uncertain effect' policies: policies where the precise effects on European sites (either alone or in combination) are uncertain, and hence additional investigation (appropriate assessment) or policy modification is required. Note that further investigation will often demonstrate that there is no significant effect or allow suitable mitigation or avoidance measures to be identified to ensure this;
- 'Likely significant effect' policies: policies which are likely to have a significant effects (either alone or in combination) and hence which require additional investigation (appropriate assessment) or policy modification. Note that 'likely significant effect' policies are more likely to require that the policy be amended, abandoned or re-worked to avoid significant effects.

Overarching Protective Policies

The screening of the draft and preferred option policies accounts for overarching or cross-cutting protective policies that may potentially be relied on to ensure that other policies, particularly those that promote or support development but which do not specify the scale or location of that development, do not have significant effects. Note that these policies will not automatically be sufficient to prevent significant effects for all policies, and some policies may require bespoke measures to ensure that significant effects do not occur.

Draft Policy Review

The review of the draft policies is detailed in Appendix C. This review was undertaken during the policy development phase to assist TDC with the drafting of the policies and any appropriate mitigation or

avoidance measures; suggestions for policy changes or amendments were made although these were not intended to be prescriptive and a number of approaches for ensuring 'no significant effects' would be acceptable (for example, a policy with a potential significant effect could have been abandoned; or modified; or cross-referenced to an over-riding protective policy). The colour coding used in the Appendix X tables is as follows:

Table 4.11 Colour coding for initial review of policies

No LSE – policy will not or cannot affect any European sites and can therefore be screened out (subject to brief review of final policy)
No LSE, but amendments recommended; policies that will not affect any European sites but which could be enhanced or strengthened
Policy requires changes to avoid significant effects (e.g. minor re-wording; referencing mitigating policies), or effects are uncertain.
Significant effects likely; policy should be abandoned or re-worked to include specific mitigation (may apply to groups of policies)

Note that the inclusion of a policy in the 'red' or 'yellow' categories does not mean that significant effects are certain since in many instances the assessments reflected an uncertainty that needs to be explored through further assessment (and it would be possible to undertake an appropriate assessment stage and still conclude (following a further screening) that there will be no significant effects). The review also included an assessment of 'in combination' effects between policies. In summary, the vast majority of the draft policies were categorised as 'no effect' or 'no significant effect' policies.

Preferred Options Review

The strategic and non-strategic policies proposed at the preferred options stage have been reviewed and screened using the same principles, taking into account the outcomes of the draft policy review; this screening is summarised in Table 4.12 and Appendix X. This included a review of the Strategic Priorities for Manston Airport document, which was not previously available. The preferred options review accounts for the key mitigating policies, notably [POLICY NOS TBC]:

- SP23 (Green Infrastructure) requires provision / enhancement of green infrastructure in developments;
- SP24 (Biodiversity Enhancements) protects Biodiversity Opportunity Areas and Green Wedges from development;
- SP25 (Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserve) – sets out requirements and expectations regards effects on European sites, including the need for development to meet the requirements of the SPA Mitigation Strategy (agreed with Natural England);
- SP26 (Protection of Open Space); and
- SP27 (Provision of Accessible Natural and Semi Natural Green Space, Parks, Gardens and Recreation Grounds) – requires that developments include suitable green space or access to this.

In summary, the key issues for European sites (effects of recreational pressure on the Thanet Coast sites) will be mitigated through the SPA Mitigation Strategy.

Table 4.12Summary of review of strategic and non-strategic policies[TO BE UPDATED TO REFLECTRECENT CHANGES – NOTE, MOST OF THESE RECOMMENDATIONS ADOPTED BY PLAN]

Policy status	Policies	s / Groups of policies	Notes and recommendations
No LSE, but amendments	SP02	Economic Growth	General statement of aspirations; no significant effect but policy could be strengthened to reference environmental protection also.
recommended			Recommendations: e.g. "Development is supported that enhances the rural economy subject to protecting the character, quality and function of Thanet's rural settlements and natural environments "
	SP08	Margate	The policy will direct development to within the existing developed areas of Margate. These are inevitably close to the Thanet Coast and Sandwich Bay SPA and effects are therefore possible although the protective policies elsewhere should be sufficient to prevent incidental significant effects. More broadly, it is a general statement of policy rather than a specific direction or allocation, although it is possible that Dreamland will be developed residentially; the policy includes safeguards re. visitor pressure but these could be strengthened as per the protective cross reference in the Westwood policy. Recommendations: amend policy to refer to SP25 and the SPA mitigation strategy.
	SP09	Ramsgate	As for SP08
	SP10	Broadstairs	As for SP08
	SP17	Land fronting Nash and Haine Roads (site reference S141)	Policy should reference SP25 as per SP13 – SP16

Table 4.13 Summary of review of strategic and non-strategic policies

Policy status	Policies	: / Groups of policies	Notes and recommendations
	SP25	Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserve	Protective policy; no significant effects. Note this is the key protective policy to which all developmental policies refer and therefore it is important that the safeguards currently required by it are not diluted or reduced.
			Recommendations:
			- The policy refers to SP23 but should refer to the requirements of SP27 also.
			- The second paragraph could be modified to emphasise the importance of the quantum of development in affecting the sites, for example: "Planning permission <i>will</i> only be granted when it can be demonstrated that any <i>potential</i> harm to internationally and nationally designated sites resulting from that development on its own, or cumulatively with other developments, will be avoided or suitably mitigated."
	SP27	Provision of Accessible Natural and Semi Natural Green Space, Parks, Gardens and Recreation Grounds	Protective policy; no significant effects. The policy could usefully be strengthened to encourage the integration of new greenspace with existing networks to maximise its value. Recommendations: "to accommodate the demands for passive recreation generated by residential development. <i>New</i> greenspace provision must be linked to existing greenspace, green wedges and / or the wider countryside and PrOW network away from the coast to maximise its value."
	CC02	Coastal development	Requirement for SuDS in new developments; mitigating policy; no significant effects; policy could be strengthened by requiring that new developments on greenfield sites maintain greenfield levels of run-off etc with SuDS or similar.
LSE possible; re- wording required	H02C	Land fronting Park Lane, Birchington. (site reference	General statement of policy / criteria; should include reference to Policy SP25 to protect European sites from recreational pressure

Policy status	Policies	s / Groups of policies	Notes and recommendations
		ST3)	
	H02G	Land at Melbourne Avenue, Ramsgate (site reference SS22)	As H02C
	CC03	Coastal development	Policy sets criteria for development near the coast; this should be strengthened to include potential effects on European sites as a specific criteria requiring consideration, for example:
			"3) will not adversely affect the interest features of any designated nature conservation sites, particularly by exacerabating coastal squeeze or othewise restricting the capacity of the coastline to adjust to sea-level rise and climate change."
'No effect' or 'no significant effect'	All other	policies	All other policies, as drafted, as considered unlikely to result in significant effects on any European sites or their interest features (alone or in combination), primarily due to the nature of the policy; most, in this regard, are 'no effect' policies.
Significant effects likely	No polici	es	None of the policies are likely to result in significant adverse effects based on the incorporated mitigation measures including, notably, the commitment to the SPA mitigation strategy.

5. Additional Assessment

5.1 Sandwich Bay SAC

Recreational Pressure

Sandwich Bay SAC is designated for its sand dune habitats, which will be mainly sensitive to direct damage (trampling, erosion etc.) and localised eutrophication (e.g. associated with dog faeces) although the sensitivity of the habitats to direct disturbance varies. To some extent, the dune systems rely on disturbance to maintain the various successional stages, and the early successional stages are essentially disturbance communities; however, the later successional stages are more sensitive to trampling and localised erosion since this can result in otherwise stable dune habitats being re-mobilised. Kent Wildlife Trust, which manages parts of the SAC, has noted that cars are frequently parked on the dunes, damaging some of the habitats, as official car parking is limited.

Having said that, public access to the dune systems is limited by the number of public footpaths and the presence of private golf clubs, which ensure that there are restrictions to off-track usage. Natural England note that the SSSI units that are in unfavourable condition within the SAC are affected primarily by management (Unit 22, associated with a golf course) and hydro-ecological changes that have degraded some fixed dunes (Unit 18); recreational pressure is identified as a risk, but not as a factor currently affecting the integrity of the site.

The growth of Thanet will increase visitor numbers to the site, although it is likely that any increase will be relatively easily to manage since the site is not access land and the effects will generally be local to the existing PRoWs and Permissive Paths; the absence of open access therefore limits the exposure of the interest features to effects associated with visitor pressure. Consequently, there are a number of factors that are likely to limit the exposure of the interest features to additional recreational pressure, and significant effects are not likely.

With regard to mitigation, the plan includes a number of policies that will help minimise additional recreational pressure, such as SP23 (Green Infrastructure) and SP27 (Provision of Green Space). There may also be opportunities to enhance the management of the SAC alongside the delivery of the SPA Mitigation Strategy, since there will be many areas of overlap, although identifying specific additional funding mechanisms for the protection of the SAC from visitor pressure is not necessarily supported by the available data.

Atmospheric Pollution

The minimum critical load for nitrogen deposition is currently exceeded at the site for all of the air quality sensitive features (**Dunes with creeping willow; White dunes; Grey dunes; and Embryonic shifting dunes**). The Local Plan does not include any proposals for developments that are likely to result in potentially significant new point-sources of emissions, therefore the main mechanism by which the Local Plan may influence the baseline air emissions locally will be through changes in patterns of vehicle use associated with the growth promoted by the Plan²¹. Having said that, it is important to note that there has been a significant decline in NOx emissions in recent years, partly due to increased efficiency standards for cars, and this decline is expected to continue.

In practice, the Department of Transport's Transport Analysis Guidance²² states that "beyond 200m, the contribution of vehicle emissions from the roadside to local pollution levels is not significant" and therefore

²¹ The plan proposals may indirectly contribute to wider diffuse pollution within and beyond the TDC boundary, in combination with other developments, plans and programmes, by requiring new energy generation. However, diffuse and trans-boundary air pollution can only be realistically addressed by national legislation or higher-tier plans, policies or strategies; this been confirmed by NE, which indicated to Runnymede Borough Council that the HRA of its local plan "*can only be concerned with locally emitted and short range locally acting pollutants*" as wider diffuse pollution is beyond the control or remit of the authority. ²² http://www.dft.gov.uk/webtag/documents/expert/unit3.3.3.php#013; accessed 15/06/14

this distance is used to determine the potential significance of any local effects associated with the plan. There are two A- or B-roads within Thanet and within 200m of Sandwich Bay SAC, the A256 between Sandwich and Cliff's End, and the A299 in Ramsgate. However, these roads are some distance from the emissions-sensitive features of the SAC: the dune systems are primarily associated with the section of coast between the Great Stour estuary and Deal, and so are at least a kilometre from the nearest section of main road. In addition, none of the major allocations are within 2km of the dune systems, so local air quality changes associated with these developments are unlikely to affect the integrity of the SAC. It is therefore unlikely that any increases in emissions from vehicles that could be associated with the Thanet plan (alone, or in combination with other local plans) would adversely affect the integrity of this SAC²³.

5.2 Thanet Coast and Sandwich Bay SPA / Thanet Coast and Sandwich Bay Ramsar

Recreational Pressure

Summary of Issues

Recent investigations by the Kent Wildlife Trust have provided evidence that some recreational and commercial activities around the Thanet coastline may be having a detrimental effect on the populations of overwintering waders associated with the Thanet Coast and Sandwich Bay SPA, especially overwintering turnstones, due to disturbance. The most notable disturbing activity, particularly in the north section of Sandwich Bay, is thought to be dog walking where the dog is off the lead (although other activities such as walking, bait digging, and kite surfing are thought to have local impacts): studies have shown that turnstones are particularly vulnerable to disturbance from dogs, which interrupt their feeding behaviour so affecting their ability to gain sufficient body fat for overwintering or migration.

Population increases associated with new housing provision in Thanet and its neighbouring districts will increase recreational pressure on the SPA as more people are likely to make use of the coastline for leisure and work; however, most recreational activities are 'casual' and pursued opportunistically (e.g. walking, walking dogs, bike riding) rather than structured (e.g. organised group activities or trips to specific discrete attractions), which ensures that it can be difficult to quantify the impacts of these activities on European sites and (ultimately) harder to control or manage. Natural England have suggested that, in the absence of mitigation, the quantum of growth facilitated by the Thanet Plan is likely to have a significant effect on the interest features of the SPA (notably turnstone) which could adversely affect the integrity of the site.

Current and Predicted Effects

Turnstone population surveys undertaken in 2013 and 2014 by the Sandwich Bay Bird Observatory Trust (SBBOT) for NE recorded notable declines in turnstone numbers, compared to surveys undertaken between 2001 and 2010. This appears to be reflected in WeBS sector count data. Although recreational disturbance has been cited as a potential factor in this decline, the studies of recreational disturbance on the Thanet Coast and Sandwich Bay SPA have not established a relationship between the observed disturbance levels and reduced productivity or increased mortality of the SPA interest features (although for many migratory and passage species it would be very difficult (in reality) to isolate local disturbance effects on the Thanet Coast from wider pressures on populations). However, that is not to say that recreational disturbance is not a potentially significant factor that needs to be appropriately managed and addressed, or that potential increases in visitor pressure are not an issue.

With regard to the prediction of effects, it is not possible to accurately model the likely increase in the number of visits to the site without substantial investigations into the current behaviour of residents in the Thanet area (including those that do not regularly visit the sites). As noted, most attempts to predict the significance of increased recreation on European sites generally aim to identify the distance within which a certain

²³ It is worth noting that modelling undertaken for the Dover Land Allocations Local Plan (DDC 2012) indicated that development in Dover will not result in N deposition over 1% of the long-term benchmark (so no adverse effect) on the Dover to Kingsdown Cliffs SAC, which is substantially closer to main population areas and roads than the emissions-sensitive features of Sandwich Bay.

percentage of visits originate (i.e. taking account of frequency of visits as well as distance travelled), typically 75%. Analysis of the literature suggests that, for most European sites studied, this distance is usually around 5 – 7km from the site boundary. However, the merits of this for Thanet are limited: all of Thanet is within 6km of the Thanet Coast and Sandwich Bay SPA and, as the peninsula is only around 6km from north to south and the main population centres are clustered around the coast, the majority of the population is within 2km. The vast majority of visitors during winter will therefore originate from Thanet, and all of the allocations will be within the typical travel distance for casual recreation. It is possible that some allocations may have a disproportionate effect due to their proximity; the allocations that are closer to the SPA (within 1 – 2 km) may be of more concern, partly as many of these are within existing urban areas and so there will be limited space to provide alternative local recreational opportunities, and partly as they are so close to the SPA that the site will almost always be the first choice location for casual recreation.

This is not to say that additional visits cannot be controlled and managed: for example, Guillemain *et al.* (2007) investigated the effects of ecotourism in the Camargue and found that waterbodies with more tourists did not support fewer birds in the medium-term; and that in the long term, wildfowl numbers were not related to the number of visitors. Obviously there will always be site-specific variations, but it is known that management can minimise disturbance, provided sufficient funds are available. It is therefore important that the Local Plan provides control mechanisms for monitoring, managing and mitigating any potential effects. Other plans have adopted a range of measures in similar situations, but most commonly these involve developer contributions to site management; and the provision of well-designed green infrastructure that integrates with the developments and allows easy walking access to local greenspace and the wider countryside (i.e. attractive local areas that are more convenient than protected areas). Studies have repeatedly shown that the most important factors influencing dog owners' choice of recreational area are the ability to take their dog off its lead; the proximity to home; and it being traffic-free. Measures that reduce the attractiveness of the Thanet Coast in this regard and increase the accessibility and value of local greenspace are likely to be successful in mitigating potential increases in recreational pressure.

Proposed Mitigation

As noted, one of the most common approaches to mitigation for recreational impacts involves developer contributions, usually linked to catchment areas and development size. Natural England has indicated to TDC that provision of a wardening scheme would provide a suitable approach to mitigation, supported by funding for other access management measures such as rationalisation of access points, car park location, and the provision of interpretation.

Dover District Council (DDC) has, within its Land Allocations Document, proposed a Mitigation Strategy for the Thanet Coast and Sandwich Bay SPA that is funded from a tariff system of developer contributions. DDC is drafting a charging schedule setting out four different residential contribution rates based on location, although the employment of similar contribution catchment areas for Thanet are likely to be of little value due to the proximity of all allocations to the SPA.

There are several policies within the Thanet Local Plan that will help minimise or manage additional recreational pressure on the SPA. The most notable of these is SP25, which refers to an SPA Mitigation Strategy which Thanet is drafting, and requires that developers demonstrate how they are meeting this. The Mitigation Strategy is still in draft, but assuming it is agreed with Natural England it will help ensure that significant effects are avoided or mitigated as part of the Local Plan. The policies within the Local Plan are appropriately geared to the Mitigation Strategy. Financial contributions will address the cumulative 'in combination' impact of the smaller developments allocated for development in this Plan. For developments requiring EIA, project-level HRA will be required in order to confirm any site specific details that may trigger a requirement for additional measures, notwithstanding the requirements of the Mitigation Strategy.

Urbanisation

[TO BE UPDATED WITH INFO ON KNOWN GOLDER PLOVER ROOSTING AREAS – ALTHOUGH THESE DO NOT COINCIDE WITH ALLOCATIONS A PRECUATIONARY APPROACH TO POLICY WOULD REQUIRE DEVELOPERS CONFIRM THIS AS PART OF THEIR ENV. ASSESSMENTS TO ENSURE THAT NO BASELINE CHANGES HAVE OCCURRED POST-ADOPTION].

Water Resources

Southern Water (SW) is responsible for supply to the Thanet area, which is within its Eastern Supply Area (Kent Thanet Water Resource Zone (WRZ)). Thanet receives most of its supply from groundwater (75%) with the remainder from the River Medway, River Stour or pipeline transfer from the Kent Medway WRZ. Some of the features of the Thanet Coast and Sandwich Bay SPA Swale SPA / Ramsar are water-resource dependent, notably those associated with the Ramsar site and the lower reaches of the River Stour; they are therefore potentially exposed to growth within the Thanet area.

However, it is important to note that Southern Water's WRMP for the next 25 years explicitly accounts for any reductions in abstraction that are required to safeguard European sites (see Section 0) and for the growth predicted by TDC and other LPAs in its forecasting. Therefore, the future water resource requirements of Thanet are factored into the abstraction regime, such that they will not affect European sites (i.e. the growth provided for by the Thanet plan is in line with SW predictions and will not increase water resources pressure on any European sites, alone or in combination).

Water Quality

Some of the non-avian Ramsar features are associated with the lower reaches of the Great Stour, and the nearby marshes. Development promoted or supported by the Local Plan is likely to increase demand on wastewater treatment works, and potentially increase run-off which could indirectly affect some European sites. The major treatment works serving the Thanet area are located at Minster and Weatherlees, discharging to the Stour and to sea via a Long Sea Outfall (LSO) at Foreness Point; these are managed through specific consenting regimes that are independent of the Local Plan, although it is important that the plan requires that suitable wastewater infrastructure and capacity be in place prior to the occupation of any developments. This is achieved through policies in the plan. With regard to effects on European sites, it should be noted that the Environment Agency's Review of Consents determined that there was no adverse effect on the integrity of any European sites, including the Thanet Coast sites, from nutrient enrichment due to Environment Agency consents (i.e. associated with sewerage treatment). The effect of run-off from developed areas can mitigated or reduced by the use of Sustainable Drainage Systems (SuDS) and by increasing the area of permeable surfaces (both natural and artificial) within developed areas.

In combination effects

[TBC following review of current plans and programmes]

5.3 The Swale SPA / The Swale Ramsar

Recreational Effects

Some of the mobile interest features of the Swale SPA will use habitats outside the site, including some intertidal habitats around Thanet; golden plover are an interest feature of both The Swale SPA and the Thanet Coast and Sandwich Bay SPA. Disturbance on the Thanet coast could therefore have indirect effects on the integrity of the The Swale SPA / The Swale Ramsar. The SPA populations in Thanet and the Swale are part of a wider North Kent. However, it is not thought that there is significant interdependency between these sites and development in Thanet will therefore have only weak indirect effects on the mobile interest features of The Swale SPA.

The mitigation employed to minimise disturbance to the interest features of the Thanet Coast and Sandwich Bay SPA (e.g. SP25 and the SPA Mitigation Strategy) will also help mitigate or avoid potential indirect effects on mobile interest features of the The Swale SPA / The Swale Ramsar that may use the site. Significant adverse effects would not therefore be expected as a result of the Thanet plan.

Water Resources

The features of The Swale SPA / Ramsar are water-resource dependent and so potentially exposed to growth within the Thanet area since abstractions in North Kent can be used to support Thanet through transfer from the Kent Medway WRZ. However, as with the Thanet Coast and Sandwich Bay SPA / Ramsar,

effects on this site are unlikely to occur due to the long-term planning and assessment in Southern Water's WRMP: the future water resource requirements of Thanet are factored into the abstraction regime, such that they will not affect European sites (i.e. the growth provided for by the Thanet plan is in line with SW predictions and will not increase water resources pressure on any European sites, alone or in combination).

In combination effects

Special Area of Conservation	SAC	Designated under the EU Council Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora, and implemented in the UK through the Conservation of Habitats and Species Regulations 2010 (as amended), and the Conservation (Natural Habitats, & c.) Regulations (Northern Ireland) 1995 (as amended).
Sites of Community Importance	SCI	Sites of Community Importance (SCIs) are sites that have been adopted by the European Commission but not yet formally designated by the government of each country. Although not formally designated they are nevertheless fully protected by <i>Council Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora</i> , the <i>Conservation of Habitats and Species Regulations 2010</i> (as amended), and the <i>Conservation (Natural Habitats, & c.) Regulations (Northern Ireland) 1995</i> (as amended).
Candidate SAC	cSAC	Candidate SACs (cSACs) are sites that have been submitted to the European Commission, but not yet formally adopted as SCIs. Although these sites are still undergoing designation and adoption they are still fully protected by <i>Council Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora</i> , the <i>Conservation of Habitats and Species Regulations 2010</i> (as amended) and the <i>Conservation (Natural Habitats, & c.) Regulations (Northern Ireland) 1995</i> (as amended).
Possible SACs	pSAC	Sites that have been formally advised to UK Government, but not yet submitted to the European Commission. As a matter of policy the Governments in England, Scotland and Wales extend the same protection to these sites in respect of new development as that afforded to SACs.
Draft SACs	dSAC	Areas that have been formally advised to UK government as suitable for selection as SACs, but have not been formally approved by government as sites for public consultation. These are not protected (unless covered by some other designation) and it is likely that their existence will not be established through desk study except through direct contact with the relevant statutory authority; however, the statutory authority is likely to take into account the proposed reasons for designation when considering potential impacts on them.
Special Protection Area	SPA	Designated under <i>EU Council Directive 79/409/EEC on the Conservation of Wild Birds</i> (the 'old Wild Birds Directive') and <i>Directive 2009/147/EC on the Conservation of Wild Birds</i> (the 'new Wild Birds Directive, which repeals the 'old Wild Birds Directive'), and protected by Article 6 of <i>Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora.</i> These directives are implemented in the UK through the <i>Wildlife & Countryside Act 1981</i> (as amended), the <i>Conservation of Habitats and Species Regulations 2010</i> (as amended), the <i>Wildlife (Northern Ireland) Order 1985</i> , the <i>Nature Conservation and Amenity Lands (Northern Ireland) Order 1985</i> and <i>The Conservation (Natural Habitats, &C.) (Northern Ireland) Regulations 1995</i> (as amended) and the <i>Offshore Marine Conservation (Natural Habitats & c.) Regulations 2007</i> .
Potential SPA	pSPA	These are sites that are still undergoing designation and have not been designated by the Secretary of State; however, ECJ case law indicates that these sites are protected under Article 4(4) of <i>Directive 2009/147/EC</i> (which in theory provides a higher level of protection than the Habitats Directive, which does not apply until the sites are designated as SPAs), and as a matter of policy the Governments in England, Scotland and Wales extend the same protection to these sites in respect of new development as that afforded to SPAs, and they may be protected by some other designation (e.g. SSSI).
Ramsar		The Convention on Wetlands of International Importance especially as Waterfowl Habitat (Ramsar Convention or Wetlands Convention) was adopted in Ramsar, Iran in February 1971. The UK ratified the Convention in 1976. In the UK Ramsar sites are generally underpinned by notification of these areas as Sites of Special Scientific Interest (SSSIs) (or Areas of Special Scientific Interest (ASSIs) in Northern Ireland). Ramsar sites therefore receive statutory protection under the Wildlife & Countryside Act 1981 (as amended), and the Nature Conservation and Amenity Lands (Northern Ireland) Order 1985. However, as a matter of policy the Governments in England, Scotland and Wales extend the same protection to listed Ramsar sites in respect of new development as that afforded to SPAs and SACs.

Appendix B Interest Feature Abbreviations

Table B.1 Interest Feature Abbreviations

Abbreviation	Interest Feature Formal Name
Calcareous dry grassland and scrub	Semi-natural dry grasslands and scrubland facies: on calcareous substrates (<i>Festuco-Brometalia</i>)
Desmoulin's whorl snail	Vertigo moulinsiana
Dunes with creeping willow	Dunes with Salix repens ssp. argentea (Salicion arenariae)
Embryonic shifting dunes	Embryonic shifting dunes
Grey dunes	Fixed dunes with herbaceous vegetation ("grey dunes")
Humid dune slacks	Humid dune slacks
Oak-hornbeam forests	Sub-Atlantic and medio-European oak or oak-hornbeam forests of the Carpinion betuli
Reefs	Reefs
Sea caves	Submerged or partially submerged sea caves
Vegetated sea cliffs	Vegetated sea cliffs of the Atlantic and Baltic coasts
White dunes	Shifting dunes along the shoreline with Ammophila arenaria ("white dunes")
Avocet	Recurvirostra avosetta
Bar-tailed godwit	Limosa lapponica
Bittern	Botaurus stellaris
Black-tailed godwit	Limosa limosa islandica
Breeding bird assemblage	Breeding bird assemblage
Dark-bellied brent goose	Branta bernicla bernicla
Dunlin (ssp. alpina)	Calidris alpina alpina
Gadwall	Anas strepera
Golden plover	Pluvialis apricaria
Hen harrier	Circus cyaneus
Knot	Calidris canutus
Little tern	Sterna albifrons
Marsh harrier	Circus aeruginosus
Mediterranean gull	Larus melanocephalus
Pintail	Anas acuta
Shoveler	Anas clypeata
Turnstone	Arenaria interpres
Waterfowl assemblage	Waterfowl assemblage

Appendix C Preferred Option Policy Review

Table 6.2Strategic Policies Review

Strategic Policy		Draft text	Review and recommendations	
SP01	National Planning Policy Framework	Policy SP01 - National Planning Policy Framework – Presumption in favour of sustainable development When considering development proposals the Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the National Planning Policy Framework. It will always work proactively with applicants jointly to find solutions which mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area. Planning applications that accord with the policies in this Local Plan (and, where relevant, with polices in neighbourhood plans) will be approved without delay, unless material considerations indicate otherwise. Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise – taking into account whether: • Any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole; or • Specific policies	General statement of policy	
SP02	Economic Growth	A minimum of 5,000 additional jobs is planned for in Thanet to 2031. The aim is to accommodate inward investment in job creating development, the establishment of new businesses and expansion and diversification of existing firms. Sufficient sites and premises suited to the needs of business are identified and safeguarded for such uses. Manston Business Park will be the key location for large scale job creating development. Land is identified and allocated to accommodate at least 65ha of employment space over the period to 2031. Land and premises considered suitable for continued and future employment use will be identified and protected for such purpose. Thanet's town centres are priority areas for regeneration and employment generating development, including tourism and cultural diversification, will be encouraged. The growth of the Port of Ramsgate is supported as a source of employment and as an attractor of inward investment. New tourism development, which would extend or upgrade the range of tourist facilities particularly those that attract the staying visitor, increase the attraction of tourists to the area and extend the season, will be supported. Development is supported that enhances the rural economy subject to protecting the character, quality and function of Thanet's rural settlements.	General statement of aspirations; no significant effect but policy could be strengthened to reference environmental protection also. Recommendations: e.g. "Development is supported that enhances the rural economy subject to protecting the character, quality and function of Thanet's rural settlements and natural environments "	
SP03	Land Allocated for Economic Development	At the following sites land is allocated for business and employment generating purposes: 1. Manston Park, Manston 2. Eurokent Business Park, Ramsgate 3. Thanet Reach Business Park, Broadstairs 4. Hedgend Industrial Estate, St Nicholas At Manston Park and Hedgend Industrial Estate development will be restricted to use classes B1 (business), B2 (general industry) and B8 (storage and distribution). Thanet Reach Business Park is also suitable for education uses.	Allocations unlikely to have significant effects on their own, although may operate in combination with residential developments to increase recreational pressure on European sites; this is avoided by Policy SP25.	

Strate	gic Policy	Draft text	Review and recommendations
SP04	Manston Business Park	 Manston Business Park is allocated and safeguarded for business purposes within classes B1 (business), B2 (general industry) and B8 (storage and distribution). Development proposals will need to comply with all of the following criteria: Provide green infrastructure to create an attractive environment compatible with its location and boundaries adjoining the countryside. Be accompanied by a transport assessment and travel plan unless the development is considered too small to have a significant impact. This should specifically consider improvements to public transport to enable access from Thanet's main residential areas to Manston Business Park by a range of means of transport. Safeguard land traversing the site to accommodate a new road alignment from Columbus Avenue to the Airport and to take account of the need to safeguard the operational capability of Manston Airport. 	Site specific policy; however, site is located at least 3km from the nearest designated sites and the proposed development for this site is unlikely to have any significant effects on any European site interest features. Recommendations: None
SP05	Manston Airport	The site of Manston Airport and the adjoining area will be designated as an "Opportunity Area" for the purposes of preparing the Manston Airport Area Action Plan" Development Plan Document. The Manston Airport AAP will explore through the development plan process the future development options for the site of the airport and the adjoining area. A consideration of the AAP should be the retention, development and expansion of the airport and aviation operations where supported by a feasibility study and a viable Business Plan, while exploring alternative options for the future development of the area for mixed-use development. While the Manston Airport Area Action Plan is being prepared and until adopted by the Council as a development plan for the Manston Airport area, the following policy for the Manston Airport will apply. Proposals at the airport, that would support the development, expansion and diversification of Manston Airport, will be permitted subject to all of the following requirements.	Policy includes safeguards

Strate	egic Policy	Draft text	Review and recommendations
SP06	Thanet's Town Centres	Provision is made for a range of town centre uses reflecting the individual role, character and heritage of the town centres, including provision for retail development as referred in Table 1 above.	General criteria policy / statement of expectations; no significant effects.
SP07	Westwood	The Council will seek to support the evolution and development of Westwood as a mixed use business and residential community in line with the following area based policies, indicated on Map 7. Development (in the vicinity of Westwood) will be required to have regard to and contribute towards implementation of a Westwood Relief Scheme. Development that would prejudice implementation of the Scheme will not be permitted. New development should also seek to improve pedestrian connectivity. 1) Westwood Town Centre Retail development will be directed to the core town centre area at Westwood and complementary town centre uses will be accommodated within the wider town centre boundary, as defined by the primary and secondary frontages. Any development proposals should ensure there is no net loss in overall commercial floorspace. 2) Eurokent Mixed Use Area Development of Eurokent will be for a mix of residential and business purposes, in accordance with a comprehensive development and trenkent will be for a mix of residential and business purposes, in accordance with a comprehensive development and trenkent will be for a mix of residential and business uses. Town centre uses that cannot be accommodated within the designated town centres due to format and scale can be located here. The masterplan linking and integrating the development into the wider Westwood of the community. Scale convenience retail provision required to accessible serve the day to day needs of the community - A minimum of 30% of all dwellings will be affordable homes in accordance with Policy SP19. The design brief should feature and reflect investigation of the need to incorporate an element of housing to meet should exceed as much as possible that in Policy SP18 developments to existing community facilities at Newington - Liaison with service providers to investigate the need to upgrade the capacity of any utility services and infrastructure - Archaeological assessment and the need to preserve and enhance the setting of heritage assets adjoining the	The policy will direct development to the Westwood town centre area (or the proposed Eurokent employment allocation) and hence away from any European sites. Direct effects are therefore unlikely as a result of the policy. The policy reflects the wider strategic issue of 'total quantum of development' and possible impacts on (particularly) the Thanet Coast and Sandwich Bay SPA with reference to the SPA mitigation strategy and Policy SP25. Recommendations: None

Strategic Policy	Draft text	Review and recommendations
SP08 Margate	The Council will seek to support the continued regeneration and development of Margate as a contemporary seaside resort in line with the following area based proposals, indicated on Map 8. 1) Margate Town Centre The focus for retail development will be in and around the High Street as defined by the Primary and Secondary Frontages. 2) Margate Odd Town Margate's Old Town area will continue in its complementary role, contributing to the vitality and viability of Margate's town centre, increasing footfall and enhancing quality and choice of facilities in the town centre. It will be a focal location for creative and cultural industries. Residential development will be permitted above ground floor level only and the Council will resist the loss of existing commercial premises in the area. 3) Margate Seafront and Harbour Arm Within the seafront area of Margate and the Harbour Arm as indicated on Map 8, leisure and tourism uses will be permitted, including retail, where they enhance the visual appeal of these areas and protect the seafront character and heritage. Residential development above ground floor will be permitted. 4) Dreamland Dreamland will be developed as an amusement park and be a significant visitor attraction supporting the regeneration of the town. Proposals that seek to extend, upgrade or improve the attractiveness, leisure or tourist potential will be permitted. Development that would lead to a reduction in the attractiveness, leisure or tourist potential will be resulted. Exceptionally, development of a limited part of the site may be accepted as a part of a comprehensive scheme for the upgrading and improvement park are carried out in parallel. In the event that evidence, in the form of an independent professional assessment, is submitted (and accepted by the Council) as demonstrating that it is not economically viable to operate an amusement park and the agreed investment in the amusement park are carried out in parallel. In the event that evidence, in the feeling of the site may be accepted subje	The policy will direct development to within the existing developed areas of Margate. These are inevitably close to the Thanet Coast and Sandwich Bay SPA and effects are therefore possible although the protective policies elsewhere should be sufficient to prevent incidental significant effects. More broadly, it is a general statement of policy rather than a specific direction or allocation, although it is possible that Dreamland will be developed residentially; the policy includes safeguards re. visitor pressure but these could be strengthened as per the protective cross reference in the Westwood policy. Recommendations: amend policy to refer to SP25 and the SPA mitigation strategy.
SP03 Margate	 5) Opportunity Sites There are Opportunity Sites identified on Map 8 which are considered suitable for mixed use town centre development. Residential development will be considered acceptable where this does not conflict with the area based criteria above. 6) The Lido Proposals for leisure and tourism related uses will be supported at the Lido. Any development must respect and restore the site's status as a significant heritage asset. Any development permitted by this policy must not adversely affect any designated nature conservation sites either directly or as a result of increased visitor pressure. 	

SP09 Policy SP09 – Ramsgate The Council will seek to support the continued regeneration and development of Ramsgate focusing on its maritime heritage and developing leisure role, in line with the following area based proposals, indicated on Map 9. As for Policy SP08 The main focus for retail shall be the central High Street/Queen Street/King Street/Harbour Street area of the town, and complementary town centres uses will be permitted in the wider town centre area, as defined by the primary and secondary frontages. 2) Ramsgate Watefront and Royal Harbour Land at and adjacent to Ramsgate Royal Harbour, as indicated on Map 9, is identified for development for a mixture of leisure, tourism, retail and residential purposes. Any such proposals should have regard to the emerging Ramsgate Maritime Plan or any subsequent plan adopted by the Council. The following activities and development will be supported: • Eastern Underofff - mixed leisure, tourism and residential uses; and • Ramsgate Royal Harbour - continued development of mixed leisure and marina facilities, in particular at the Military Road arches. All proposals must: • Take particular care in the design, location, use of materials and relationship of land-based facilities with open water, such as to protect important views and preserve or enhance the historical character of the Royal Harbour and seafront. • Sinsteal advelopment will be considered acceptable where this does not conflict with the area based criteria above. 4) Ramsgate Port There are Opportunity Sites identified on Map 9 which are considered suitable for mixed use tow centre development. Residential development will be considered acceptable where this does not conflict with the area based criteria above. 4) Ramsgate Port	Strategic Policy	Draft text	Review and recommendations
	SP09	The Council will seek to support the continued regeneration and development of Ramsgate focusing on its maritime heritage and developing leisure role, in line with the following area based proposals, indicated on Map 9. 1) Ramsgate Town Centre The main focus for retail shall be the central High Street/Queen Street/King Street/Harbour Street area of the town, and complementary town centres uses will be permitted in the wider town centre area, as defined by the primary and secondary frontages. 2) Ramsgate Waterfront and Royal Harbour Land at and adjacent to Ramsgate Royal Harbour, as indicated on Map 9, is identified for development for a mixture of leisure, tourism, retail and residential purposes. Any such proposals should have regard to the emerging Ramsgate Maritime Plan or any subsequent plan adopted by the Council. The following activities and development will be supported: • Eastern Undercliff - mixed leisure, tourism and residential uses; and • Ramsgate Royal Harbour - continued development of mixed leisure and marina facilities, in particular at the Military Road arches. All proposals must: • Take particular care in the design, location, use of materials and relationship of land-based facilities with open water, such as to protect important views and preserve or enhance the historical character of the Royal Harbour and seafront. • Ensure that the integrity of nature conservation interests within the adjacent SSSI-SPA-SAC-Ramsar site is maintained. 3) Opportunity Sites identified on Map 9 which are considered suitable for mixed use town centre development. Residential development will be considered acceptable where this does not conflict with the area based criteria above. 4) Ramsgate Port The Council supports further development at Ramsgate Port which would facilitate its improvement as a port or shipping, increase traffic through the port, and introduce new routes and complementary land based facilities including marine engineering, subject to:- • a demonstrable port-related need	As for Policy SP08

Strategic Policy	Policy Draft text	
SP10 Broadstairs	 The Council will seek to support proposals that maintain and enhance the role and character of Broadstairs as a popular attractive small seaside town in line with the following area based proposals, indicated on Map 10. 1) Broadstairs Town Centre The focus for retail will be the lower High Street and Albion Street with complementary town centre uses in the wider area, in accordance with the Primary and Secondary Frontages. New retail development will be acceptable on the edge of Broadstairs town centre, subject to Policy E05. Proposals will be required to provide direct pedestrian links to the High Street, be well related to the retail core, centres of population and be accessible by a range of means of transport. 2) Broadstairs Promenade and Beach Front Opportunities to enhance the use and attractiveness of the promenade, seafront and beach are welcomed, particularly where they achieve improved connectivity between the town centre and beach front. Within this area, small scale leisure and tourism uses will be permitted, including retail, where they do not harm the character and heritage interest of the surrounding area. Within Victoria Gardens, open space policies will prevail. Change of use of existing commercial premises in this area will be resisted. Any development permitted by this policy must not adversely affect any designated nature conservation sites either directly or as a result of increased visitor pressure. 	As for Policy SP08
SP11 Housing Provisio	n Provision is made for a total of 12,000 additional homes in the period to 2031, with notional delivery across the period as indicated below.	General statement of policy; the quantum of development proposed is achievable without significant effects on the SPA, assuming implementation of SP25 and the SPA Mitigation Strategy. Recommendations : None
SP12 Strategic Housin Site Allocations	 g The sites listed below are identified as Strategic Housing Sites. Applications to develop such sites shall be accompanied by a detailed development brief including an illustrative site masterplan featuring all elements of the proposal and indicating phasing of development and supporting infrastructure. Applications will be determined in light of the following site specific policies: A - Westwood B - Birchington C - Westgate on Sea D - Manston Green 	The strategic housing allocation sites have been reviewed and it is considered that none, on their own, are likely to result in significant effects on any European sites with the possible exception of the larger allocations. The key issue is the overall quantum of development in the area rather than single sites; thi is thought toproposed is achievable without significant effects on the SPA, assuming implementation of SP25 and the SPA Mitigation Strategy. The Strategic Housing Sit policies (SP13 - SP16) reference SP25, although SP17 should do this also. Recommendations: SP17 to reference SP25

Strategic Policy	Draft text	Review and recommendations
SP13 Strategic Housing Sites - Manston Green (sites referenced SS33)	Land is allocated for up to 700 new dwellings at a maximum density of 35 dwellings per hectare net at land known as Manston Green. Built development will be focused at the northern part of the site taking account of the considerations below. Proposals will be judged and permitted only in accordance with a development brief and masterplan for the whole site incorporating 1) a minimum of 9 ha of open space in accordance with the standards set out in Table 7. 2) a fully serviced area of 2.05 ha (to be provided at the cost of the developer) to accommodate a new two-form entry primary school, 3) small scale convenience retail provision required to accessibly serve day to day needs of the development. Phasing of development will be in accordance with Policy H01(1). The development shall provide for construction of the school to one-form entry at such stage of development as required by the County Council as education authority. Masterplanning will be informed by and address: 1) pre-design archaeological assessment taking account of presence of significant and sensitive remains, 2) the setting of listed buildings at Ozengell, 3) the need for disposition of development and landscaping to enable a soft edge between the site and open countryside and minimise impact on long views southwards toward Pegwell Bay, 4) predicted aircraft noise, 5) the alignment of the runway and the operational needs of the airport, 6) sustainable urban drainage taking account of the site's location in the Groundwater Source Protection Zone, 7) the need to clearly demonstrate how the SPA mitigation strategy as set out in Policy SP25 is being met and how it will ensure that development does not increase recreational pressure on designated sites, 8) a wintering and breeding bird survey to assess impact on bird populations within the district and the need to mitigate/compensate, 9) liaison with service providers to investigate the need to upgrade the capacity of any utility services and infrastructure, 10) a statement of social impacts arising fro	See Policy SP12

Strategic Policy Draft text	Review and recommendations
 SP14 Strategic Housing Site at Birchington (comprising sites referenced S51, S498 & S499) Land is allocated for up to 1,000 new dwellings at a maximum density of 35 dwellings per hectare net at Birchington. Proposals within the site of: 1) a new link road to serve the development and extending from Minnis Road and the A28, 2) a minimum of 11 ha of open space in accordance with the standards set out in Table 7, 2) a minimum of 11 ha of open space in accordance with the standards set out in Table 7, 2) a minimum of 11 ha of open space in accordance with the standards set out in Table 7, 2) a fully serviced site of 2.05 ha (to be provided at the cost of the developpin or a two-form entry primary school, 4) small scale convenience retail provision required to accessibly serve day to day needs of the development. Phasing of development will be in accordance with Policy H01(1). The access road and serviced school site shall be programmed for delivery as agreed by the county council as highway and education authority respectively. Masterplanning will be informed by and address: 1) the need to clearly demonstrate how the SPA mitigation strategy as set out in Policy SP25 is being met and how it will ensure that development does not increase recreational pressure on designated sites, 2) a wintering and breeding bird survey to assess impact on bird populations within the district and the need to mitigate/compensate, 3) pre-design archaeological evaluation, 4) liaison with service providers to investigate the need to upgrade the capacity of any utility services and infrastructure including gas supply. 5) a statement of social impacts arising from the development and how any increased demand on community facilities will be addressed, 6) the need to represerve the listed buildings on the site and respect the setting of Quex Park, 7) the need for disposition of development and landscaping to enable a soft edge between the site and open countryside. A minimum of 30% of all dwellings	See Policy SP12

 SP15 Strategic Housing Site at Westgateon-Sea (comprising sites referenced ST1 & ST2) Land to the east and west of Minster Road, Westgate is allocated for up to 1,000 new dwellings at a maximum density of 35 dwellings per hectare net. Phasing of development will be in accordance with Policy H01(1). Proposals will be judged and permitted only in accordance with a development brief and masterplan for the whole site including provision within the site of: 1) a minimum of 11.1 ha of open space in accordance with the standards set out in Table 7, 2) provision for small scale convenience retail provision required to accessibly serve day to day needs of the development, 3) a fully serviced area of 2.05 ha (to be provided at the cost of the developer) to accommodate a new two-form entry primary school. Development will be expected to provide an appropriate contribution to off-site highway improvements. A minimum of 30% of all dwellings will be affordable homes in accordance with Policy SP19. The design brief should feature and reflect investigation of the need to incorporate an element of housing to meet the needs of particular groups including specifically sheltered and extra care homes. The proportion of houses as opposed to flats should exceed that in policy SP18 as much as possible. Masterplanning will be informed by and address 1) a transport assessment (including modelling of junctions of the A28 with Minster Road, Briary Close and Garlinge High 	See Policy SP12
 Street, the junction of Minster Road with Shottendane Rd the junction of Brooke Avenue with Maynard Avenue), and incorporate: measures to promote multi-modal access, including footway and cycleway connections, and an extended bus service accessible to the new dwellings, appropriate road and junction improvements and signalling, an archaeological evaluation, the need to safeguard the setting of scheduled ancient monuments and the listed Dent de Lion Gateway, the need to clearly demonstrate how the SPA mitigation strategy as set out in Policy SP25 is being met and how it will ensure that development does not increase recreational pressure on designated sites, a wintering and breeding bird survey to assess impact on bird populations within the district and the need to mitigate/compensate, liaison with service providers to investigate the need to upgrade the capacity of any utility services and infrastructure including gas supply, a statement of social impacts arising from the development and how any increased demand on community facilities will be addressed, appropriate arrangements for surface water management in line with Margate Surface Water Management Plan, the need for disposition of development and landscaping to take account of public rights of way and enable a soft edge between the site and open countryside. 	

	gic Policy	Draft text	Review and recommendations
SP16	Policy SP16 Westwood Strategic Housing (comprising sites referenced S511, S553 & S447)	 Land is allocated for up to 1,450 new dwellings at a maximum density of 40 dwellings per hectare net at Westwood. This allocation adjoins land already subject to planning permission for 1,020 dwellings at the junction of Nash Lane/Haine Road. Proposals will be judged and permitted only in accordance with a development prior and masterplan for the whole site integrating with development at the adjoining site. The masterplan shall incorporate: 1) highway improvements including widening of Nash Road and links to Nash Road and Manston Road, 2) a minimum of 16.63 ha of open space in accordance with the standards set out in Table 7, 3) small scale convenience retail provision required to accessibly serve day to day needs of the development. Phasing of development will be in accordance with Policy H01(1). The access road shall be programmed for delivery as required by the county council as highway authority. Masterplanning will be informed by and address: 1) pre-design archaeological assessment, 2) the need to clearly demonstrate how the SPA mitigation strategy as set out in Policy SP25 is being met and how it will ensure that development does not increase recreational pressure on designated sites, 4) a wintering and breeding bird survey to assess impact on bird populations within the district and the need to mitigate/compensate, 5) liaison with service providers to investigate the need to upgrade the capacity of any utility services and infrastructure, 6) a statement of social impacts arising from the development and how any increased demand on community facilities will be addressed, 7) appropriate arrangements for surface water management in line with Margate Surface Water Management Plan. A minimum of 30% of all dwellings will be affordable homes in accordance with Policy SP19. The design brief should feature and reflect investigation of the need to incorporate an element of housing to meet the needs of parti	See Policy SP12

Strate	gic Policy	Draft text	Review and recommendations
SP17	Policy SP17 - Land fronting Nash and Haine Roads (site reference S141)	Land fronting Nash and Haine Roads is allocated for residential development with a notional capacity of 1,020 new dwellings or such capacity as may be demonstrated appropriate in light of the need to provide a school on site and/or any subsequent masterplan reflecting a maximum notional density of 40 dwellings per hectare net. The proportion of houses as opposed to flats should exceed that in policy SP18 as much as possible. The development will incorporate an element of affordable housing in line with policy SP19. Development shall be permitted only in accordance with an agreed masterplan for the whole site and shall: 1) Provide for any highway improvements identified as necessary in a traffic assessment and the development masterplan. Individual phases of development will be required to make provision pro-rata towards such improvements, 2) as required provide a fully serviced area of 2.05 ha (to be provided at the cost of the developer) for a new two form entry school as an integral part of the development, 3) incorporate and provide for connections and improvements to footpath and cycle networks facilitating walking, cycling and public transport to, from and within the site, including provision of or contribution to improvements to public transport services, 4) reserve and provide a minimum of 1.75 ha as local open space (including an equipped play area and casual/informal play space) together with an area of usable amenity space as an integral part of the development. Where feasible, the area of local open space should be larger than the minimum indicated above having regard to the standards set out in Table 7, 6) incorporate landscaped buffer zones adjacent to any new road infrastructure and along the boundaries to adjacent to open farmland, 7) provide and maintain appropriate equipment for continuous monitoring of local air quality to inform the Council's ongoing air quality review and assessment programme. Applications for successive phases of development will have regard to the need to integrate as far	See Policy SP12; this policy should also reference SP25
SP18	Type and Size of Dwellings	Proposals for housing development will be expected to address the SHMA recommendations regarding the make-up of market and affordable housing types and sizes needed to meet requirements. The Council will encourage proposals incorporating a higher proportion of houses as opposed to flats than recommended in the SHMA. Proposals for developments incorporating a higher proportion of flats than recommended in the SHMA will be expected to include site specific justification for the proportion and mix proposed. Proposals to revert or convert properties currently used as flats to use as single family or single household accommodation will be permitted where a satisfactory standard of accommodation can be provided. Residential development proposals involving the net loss of dwelling houses suited to modern living requirements will not be permitted, unless the proposal complies with Policy H9 (Houses in Multiple Occupation). In the event of conflict between this policy and the Cliftonville DPD the latter shall prevail.	General statement of policy re. housing mix; no significant effects
SP19	Affordable Housing	Residential development schemes will be expected to include an element of affordable housing of 30%.	General statement of policy; no effects
SP20	Development in the Countryside	Development in the countryside outside of the urban and village confines, as identified in the Thanet Local Plan 2006, and not otherwise allocated for development, will not be permitted unless there is a need for the development that overrides the need to protect the countryside and any adverse environmental effects can be avoided or fully mitigated.	General statement of policy; will not negatively affect any European sites; has been strengthened following review of draft.

Strate	egic Policy	Draft text	Review and recommendations
SP21	Safeguarding the Identity of Thanet's Settlements	 Within the Green Wedges new development (including changes of use) will not be permitted unless it can be demonstrated that the development is: 1) not detrimental or contrary to the stated aims of the policy; or 2) essential for the proposed development to be located within the Green Wedges. Open sports and recreational uses will be permitted subject to there being no overriding conflict with other policies, the wider objectives of this plan and the stated aims of this policy. Proposals for development that include measures that will create or enhance wildlife habitats and biodiversity within the Green Wedges, or will improve the quality of the green wedges by providing high quality public amenity space will be supported. 	Protective policy; no significant effects
SP22	Protection and Enhancement of Thanet's Historic Landscapes	 Development proposals should demonstrate that their location, scale, design and materials will protect, conserve and, where possible, enhance: Thanet's local distinctiveness including historical, biodiversity and cultural character, gaps between Thanet's towns and villages, visually sensitive skylines and seascapes, Within the landscape character areas identified, the following policy principles will be applied: At Pegwell Bay, priority will be given to the conservation and enhancement of the natural beauty of the landscape over other planning considerations; In the former Wantsum Channel North Shore Area, development will not normally be permitted; In the Wantsum Channel North Shore Area, development will only be permitted that would provide opportunities for enhancement and would not damage the setting of the Wantsum Channel, and long views of Pegwell Bay, the Wantsum Channel, the adjacent marshes and the sea; On the Central Chalk Plateau, a number of sites are identified for various development will take advantage of and engage with these views; At Quex Park, new development that does not respect the historic character of the parkland and gardens; and At the Urban Coast, development that does not respect the traditional seafront architecture of the area, maintain existing open spaces and long sweeping views of the coastline will not be permitted. 	Protective policy; no significant effects
SP23	Green Infrastructure	 Thanet's green infrastructure network is an integral part of the design of all major development. Opportunities to improve Thanet's green infrastructure network by protecting and enhancing existing green infrastructure assets and the connections between them, should be included early in the design process for major developments. Development should make a positive contribution to Thanet's green infrastructure network by: Creating new wildlife and biodiversity habitats Providing and managing new accessible open space Mitigating against the loss of any farmland bird habitats Providing private gardens and play space; and/or Contributing towards the enhancement of Thanet's Biodiversity Opportunity Areas or the enhancement of the Green Wedges Investment and developer contributions should be directed to improve and expand green infrastructure and provide connecting links where opportunities exist. 	Enhancement policy; no significant effects; will operate with SP25 and SP27 to reduce impacts on SPA

Strate	gic Policy	Draft text	Review and recommendations
SP24	Biodiversity Enhancements	Biodiversity Opportunity Areas and the Green Wedges are protected from inappropriate development, and proposals which would provide enhancements and contribute to a high quality biodiverse environment will be supported.	Protective policy; no significant effects
SP25	Protection of the European Sites, Sites of Special Scientific Interest and National Nature Reserve	Development that would have a detrimental impact on the European Sites, Sites of Special Scientific Interest or National Nature Reserve will not be permitted. Planning permission may only be granted when it can be demonstrated that any harm to internationally and nationally designated sites resulting from that development will be suitably mitigated. Proposals for residential development must include an assessment of significant effects and measures to mitigate against the effects of potential increased recreational pressure on protected sites. Proposals for major residential developments must include provision of open space suitable for dog walking and general recreation, in accordance with policy SP23. In developing these measures, regard must be had to the SPA Mitigation Strategy which requires a financial contribution towards wardening, and applicants must demonstrate clearly how they are meeting the strategy and how they will ensure that development will mitigate against any increase in recreational pressure on designated sites.	 Protective policy; no significant effects. Note this is the key protective policy to which all developmental policies refer and therefore it is important that the safeguards currently required by it are not diluted or reduced. Recommendations: The policy refers to SP23 but should refer to the requirements of SP27 also. The second paragraph could be modified to emphasise the importance of the quantum of development in affecting the sites, for example: "Planning permission will only be granted when it can be demonstrated that any potential harm to internationally and nationally designated sites resulting from that development on its own, or cumulatively with other developments, will be avoided or suitably mitigated."
SP26	Protection of Open Space	 Built development or change of use will not be permitted on areas of open space identified as part of Thanet's green infrastructure network (including Public Rights of Way) unless: 1) It is for an open recreation or tourism uses and is of appropriate scale and design for its setting. Any related built development should be kept to the minimum necessary to support the open use, and be sensitively located. 2) There is an overriding need for development that outweighs the need to protect open space and cannot be located elsewhere, in which case provision of alternative open space of an equivalent size must be made elsewhere. New development that is permitted by virtue of this policy should make a positive contribution to the area in terms of siting, design, scale and use of materials. Built development in any areas designated as Local Green Spaces will only be permitted if the proposal meets the exception criteria set out in the National Planning Policy Framework. 	Protective policy; no significant effects

Strate	gic Policy	Draft text	Review and recommendations
SP27	Provision of Accessible Natural and Semi Natural Green Space, Parks, Gardens and Recreation Grounds	The Council will require suitably and conveniently located areas of usable amenity space, adequate to accommodate the demands for passive recreation generated by residential development. Sites of 50 dwellings or more will be required to provide natural and semi natural green space and local parks, formal gardens, allotments and recreation grounds to meet the standards set out in Table 7. The Council will expect appropriate arrangements for maintenance and management, responsibility for which will be vested in a particular individual,or, subject to commuted payment to meet such costs, in the district, town or parish council. Such arrangements will be secured by entering into a planning agreement. Any areas of accessible natural and semi natural green space, parks, gardens and recreation grounds created by virtue of this policy will be protected from development by policy SP26 – Protection of Open Spaces.	Protective policy; no significant effects. The policy could usefully be strengthed to encourage the integration of new greenspace with existing networks to maximise its value. Recommendations: "to accommodate the demands for passive recreation generated by residential development. New greenspace provision must be linked to existing greenspace, green wedges and / or the wider countryside and PrOW network away from the coast to maximise its value."
SP28	Quality Development	New development will be of a high quality inclusive design. Developers will be required to seek an independent Design Review for development proposals on sites with a prominent visual impact, or which are of national significance.	Design criteria; no significant effects
SP29	Conservation and Enhancement of Thanet's Historic Environment	 The Council will support, value and have regard to the significance of Heritage Assets by: 1) protecting the historic environment from inappropriate development, 2) encouraging new uses where they bring listed buildings back into use, encouraging their survival and maintenance without compromising the conservation of the building, 3) seeking the provision of appropriate research for all applications relating to the historic environment on key sites as identified through the Heritage Strategy, 4) facilitating the review of Conservation Areas and the opportunities for new designations, 5) recognising other local assets through Local Lists, 6) offering help, advice and information about the historic environment by providing guidance to stakeholders, producing new guidance leaflets, reviewing existing guidance leaflets and promoting events which make the historic environment accessible to all, 7) agreeing Article 4 Directions which will be introduced and reviewed as appropriate, 8) supporting development that is of high quality design and supports sustainable development. All reviews and designations will be carried out in consultation with the public in order to bring a shared understanding of why asset and areas are being designated. 	Protective policy; no significant effects
SP30	Climate Change	New development must take account of: · Adapting to climate change by minimising vulnerability, providing resilience to the impacts of climate change and complying with the Government's Zero Carbon Policy · Mitigating against climate change by reducing emissions	Protective policy; no significant effects

Strate	gic Policy	Draft text	Review and recommendations
SP31	Healthy and Inclusive Communities	 The Council will work with relevant organisations, communities and developers to promote, protect and improve the health of Thanet's residents, and reduce health inequalities. Proposals will be supported that: 1) bring forward accessible community services and facilities, including new health facilities, 2) safeguard existing community services and facilities, 3) safeguard or provide open space, sport and recreation and enable access to nature, 4) promote healthier options for transport including cycling and walking, 5) improve or increase access to a healthy food supply such as allotments, markets and farm shops, 6) create social interaction and safe environments through mixed uses and the design and layout of development, 7) create a healthy environment that regulates local climate 	General statement of policy; no effects
SP32	Community Infrastructure	Development will only be permitted when provision is made to ensure delivery of relevant and sufficient community and utility infrastructure. Where appropriate, development will be expected to contribute to the provision of new, improved, upgraded or replacement infrastructure and facilities.	General statement of policy; no effects
SP33	Expansion of Primary and Secondary Schools	The Council will support the expansion of existing and development of new primary and secondary schools in Thanet to meet identified needs and will work with Kent County Council in identifying, allocating and safeguarding land as appropriate.	General statement of policy; no effects
SP34	Safe and Sustainable Travel	The Council will work with developers, transport service providers, and the local community to manage travel demand, by promoting and facilitating walking, cycling and use of public transport as safe and convenient means of transport. Development applications will be expected to take account of the need to promote safe and sustainable travel. New developments must provide safe and attractive cycling and walking opportunities to reduce the need to travel by car.	General statement of policy; no effects
SP35	Accessible location	Development generating a significant number of trips will be expected to be located where a range of services are or will be conveniently accessible on foot, by cycle or public transport. The Council will seek to approve proposals to cluster or co-locate services at centres accessible to local communities by public transport and on foot.	General statement of policy; no effects
SP36	Transport Infrastructure	Development proposals will be assessed in terms of the type and level of travel demand likely to be generated. Development will be permitted only at such time as proper provision is made to ensure delivery of relevant transport infrastructure. Where appropriate, development will be expected to contribute to the provision, extension or improvement, of walking and cycling routes and facilities and to highway improvements. Subject to individual assessments, schemes may be required to provide or contribute to: • Capacity improvements/connections to the cycle network • Provision of pedestrian links with public transport routes/interchanges • Improvements to passenger waiting facilities • Facilities for display of approach time information at bus stops along identified quality bus corridors • Improvement and expansion of public transport services • Improvements to the road network in line with schemes identified through the Transport Strategy.	General statement of policy; no effects
SP37	Connectivity	The Council will continue to lobby for investments to secure further improvements to rail journey times for CTRL including domestic services between Ashford and Ramsgate.	General statement of policy; no effects

Strate	egic Policy	Draft text	Review and recommendations
SP38	Strategic Road Network	In conjunction with neighbouring districts, the Council will prepare a joint assessment of planned development and the expected volume and direction of road traffic movement it would generate, to understand its potential impact on these junctions and how this may, if appropriate, be mitigated.	General statement of policy; no effects
SP39	New Rail Station	 Planning permission will be granted for a new railway station at a suitable location on land west of Ramsgate alongside the existing railway line. Land west of Cliffsend (shown on Map 15) is safeguarded for this purpose. Proposals will be required to specifically demonstrate all of the following: Satisfactory vehicular access arrangements from East Kent Access Suitable level of car parking Integration with wider public transport services Mitigation of any noise impacts on sensitive receptors Compatibility with the landscape character of its location Located to minimise the loss of best and most versatile agricultural land 	The precise location of the Parkway Station is not stated, but it is likely to be within 1km of the Thanet Coast and Sandwich Bay SPA. The interest features of this site are unlikely to be particularly vulnerable to direct disturbance (etc) as a result of this development but the policy should ideally include reference to the need for scheme-level HRA (or cross-reference other relevant protective policies regarding HRA). However, there is nothing to suggest that this development could not be accommodated without significant effects on the SPA.

E18	Best and Most Versatile Agricultural Land		General statement of policy / criteria; no effects
E19	Agricultural Related Development		General statement of policy / criteria; no effects
H01	Housing Development		General statement of policy / criteria; includes provision to protect European sites from recreational pressure

Develo	opment Policy	Draft text	Review and recommendations
H02A	Land on west side of Old Haine Road, Ramsgate (comprising site references S535 & S549)		General statement of policy / criteria; includes provision to protect European sites from recreational pressure
H02B	Land fronting Nash Road and Manston Road (site reference S540)		General statement of policy / criteria; includes provision to protect European sites from recreational pressure
H02C	Land fronting Park Lane, Birchington. (site reference ST3)		General statement of policy / criteria; should include reference to Policy SP25 to protect European sites from recreational pressure
H02D	Land south of Brooke Avenue Garlinge (site reference S505)		General statement of policy / criteria; includes provision to protect European sites from recreational pressure
H02E	land at Haine Road and Spratling Street, Ramsgate (site reference SR60)		General statement of policy / criteria; includes provision to protect European sites from recreational pressure
H02F	Land south of Canterbury Road East, Ramsgate (site reference S415)		General statement of policy / criteria; includes provision to protect European sites from recreational pressure
H02G	Land at Melbourne Avenue, Ramsgate (site reference SS22)		General statement of policy / criteria; should include reference to Policy SP25 to protect European sites from recreational pressure
H03	Cliftonville West and Margate central		General statement of policy / criteria; no effects
H04	Housing at Rural Settlements		General statement of policy / criteria; refereences H01 which includes requirement to meet Policy SP25, therefore no significant effects will occur.
H04A	Land at Tothill Street, Minster		Subsidiary to H04 and so safeguards provided by H04, H01 and SP25
H04B	Land at Manor Road, St Nicholas at Wade		Subsidiary to H04 and so safeguards provided by H04, H01 and SP26
H04C	Land at 71-75 Monkton Street, Monkton		Subsidiary to H04 and so safeguards provided by H04, H01 and SP27

Devel	opment Policy	Draft text	Review and recommendations
H04D	Land at Walter's Hall Farm, Monkton		Subsidiary to H04 and so safeguards provided by H04, H01 and SP28
H04E	Land south side of A253, Cliffsend		Subsidiary to H04 and so safeguards provided by H04, H01 and SP29
H04F	Land north of Cottington Rd, Cliffsend		Subsidiary to H04 and so safeguards provided by H04, H01 and SP30
H04G	Land south side of Cottington Rd, Cliffsend		Subsidiary to H04 and so safeguards provided by H04, H01 and SP31
H05	Rural Housing Need		Criteria based policy associated with exceptions for affordable housing in rural areas; no significant effects
H06	New agricultural dwellings		Criteria based policy associated with exceptions for agricultural housing; no significant effects
H07	Care and Supported Housing		Support for care homes and supported housing; no signifcant effect
H08	Accessible Homes		Requirements for accessible homes in developments; no effects
H09	Non self-contained residential accommodation		Criteria for non-self contained residential accommodation; no effects
H10	Accommodation for Gypsy and Travelling Communities		General statement of policy / criteria; no effects
H11	Residential use of empty property		Criteria for making residential use of vacant homes; no effects
H12	Retention of existing housing stock		General statement of policy re. retention of existing housing; no effects
GI01	Locally Designated Wildlife Sites		Protective policy; no significant effects
GI02	Regionally Important Geological Sites (RIGS)		Protective policy; no significant effects
GI03	Protected Species and other significant species		Protective policy; no significant effects

Develo	opment Policy	Draft text	Review and recommendations
GI04	Amenity Green Space and Equipped Play Areas		Policy re. provision of green space within new developments; will work with other mitigating policies to help reduce effects of development on European sites.
GI05	Protection of Playing Fields and Outdoor Sports Facilities		Policy re. provision of green space within new developments; will work with other mitigating policies to help reduce effects of development on European sites.
GI06	Landscaping and Green Infrastructure		Criteria for landscaping on developments; no significant effects
GI07	Jackey Bakers		Proposals for Jackey Bakers sports ground; no significant effects
QD01	General design principles		General design criteria / principles; no significant effects
QD02	Living Conditions		General design criteria / principles; no significant effects
QD03	Advertisements		General design criteria / principles; no significant effects
QD04	Telecommunications		General design criteria / principles; contains protective clauses; no significant effects
HE01	Archaeology		General statement of policy re. archaeology requirements for developments; no effects
HE02	Development in Conservation Areas		General statement of policy re. developments in conservation areas; no effects
HE03	Local Heritage Assets		General satement of policy; no effects
HE04	Historic Parks and Gardens		Protective policy; no effects
HE05	Works to a heritage asset to address climate change		Policy supporting works to heritage assets to improve performance re. climate change; no effects.
CC01	Fluvial and Tidal Flooding		Re-iterates NPPF sequential and exception tests re. fluvial or coastal flooding; requires flood risk assessments; no effects.

Develo	opment Policy	Draft text	Review and recommendations
CC02	Surface Water Management		Requirement for SuDS in new developments; mitigating policy; no significant effects; policy could be strengthened by requiring that new developments on greenfield sites maintain greenfield levels of run- off etc with SuDS.
CC03	Coastal Development		Policy sets criteria for development near the coast; this should be strengthened to include potential effects on European sites as a specific criteria requiring consideration, for example: "3) will not adversely affect the interest features of any designated nature conservation sites, particularly by exacerabating coastal squeeze or othewise restricting the capacity of the coastline to adjust to sea-level rise and climate change.
CC04	Sustainable Design		General design criteria / principles; no significant effects
CC05	Renewable energy installations		Criteria for renewable energy installations on existing buildings; no significant effect.
CC06	District Heating		General statement of policy re. district heating; no effects.
CC07	Solar Parks		Criteria for solar farms; includes protective elements; no significant effect.
CC08	Richborough		Support for renewable energy at Richborough; includes protective clauses; no significant effects.
SE01	Potentially Polluting Development		Criteria for permitting potentially polluting development; provides protective clauses and safeguards; any development associated with this policy will be subject to other consenting regimes; no significant effect.
SE02	Landfill Sites and Unstable Land		Policy relating to development near landfills and risk of gas etc.; general statement of policy; no significant effects.
SE03	Contaminated Land		Policy relating to development of potentially contaminated sites; no significant effects.

Develo	opment Policy	Draft text	Review and recommendations
SE04	Groundwater Protection		Policy protecting groundwater; no significant effects
SE05	Air Quality		Policy safeguarding air quality; requires consideration of cumulative effects; no significant effects.
SE06	Noise Pollution		Policy protecting against noise pollution; no significant effects.
SE07	Noise Action Plan Important Areas		Requirement for noise action plan; no effect
SE08	Aircraft Noise		Policy relating to residential development in areas potentially affected by aircraft noise; no significant effects
SE09	Aircraft Noise and Residential Development		Policy relating to residential development in areas potentially affected by aircraft noise; no significant effects
SE10	Light Pollution		Policy providing safeguards against light pollution from ew development; no significant effects.
CM01	Provision of New Community Facilities		General design criteria / principles; no significant effects
CM02	Protection of Existing Community Facilities		General design criteria / principles; no significant effects
CM03	Expansion of Margate Cemetery		Allocation for expansion of cemetary; no effects
CM04	Expansion of Minster Cemetery		Allocation for expansion of cemetary; no effects
TP01	Transport assessments and Travel Plans		Requirements for Travel Plans; no significant effects
TP02	Walking		Policy requiring provision for pedestrians; no significant effects
TP03	Cycling		Policy requiring provision for cyclists; no significant effects
TP04	Public Transport		Policy requiring provision for public transport; no significant effects

Develo	opment Policy Draft text	Review and recommendations
TP05	Coach Parking	Allocation of coach parking; no signifcant effects
TP06	Car Parking	Car parking requirements for new developments; no significant effects
TP07	Town Centre Public Car Parks	Retention of existing car parking and criteria; no significant effects
TP08	Freight and service delivery	Requirement for off-street servicing for new development; no significant effects.
TP09	Car parking provision at Westwood	Criteria for car parking provision at Westwood; no significant effects.
TP10	Traffic Management	General statement of policy re. traffic management; no effects

Appendix D In Combination Plans

Agenda Item 3 Annex 8

Thanet District Council

Working Draft Infrastructure Delivery Plan

[November 2016]

Please note that this is a first working draft of the Infrastructure Delivery Plan, and will continue to be updated and amended as it develops. The Council is working with the relevant agencies and organisations to seek to ensure that the appropriate social and physical infrastructure is delivered alongside new development. Some funding is provided directly by these agencies and organisations in line with their own programmes.

Contents	
Title	F
Introduction	
Planning for Infrastructure	
Funding & Delivery	
Key Infrastructure	

Draft Infrastructure Delivery Plan

Introduction

- The draft Local Plan sets out the proposed levels of development for the Plan period to 2031. Ensuring that proposed development is supported by adequate physical and social infrastructure (as set out in this draft IDP) is fundamental to achieving the wider social, environmental and economic goals of the draft Thanet Local Plan to 2031 and the Council's Corporate Plan objectives.
- 2. The delivery of necessary infrastructure at this scale can only be achieved through plan-led development. The Council has been working with a wide range of organisations, including Kent County Council, Highways England, Natural England, utilities providers, Homes and Communities Agency, East Kent Opportunities and East Kent Spatial Development Company amongst others to understand the need for new infrastructure through the period of the Local Plan, so that a robust Infrastructure Delivery Plan (IDP) is produced.
- 3. This long-term partnership working has sought to assess the quality and capacity of all key infrastructure in the district. This includes infrastructure such as schools, roads, sewers, education and health provision and open space. The Council has sought to understand with its partners the ability of such infrastructure to meet the demands placed upon it in the future, and the nature and scale of additional capacity needed.
- 4. The draft IDP summarises the required new and enhanced infrastructure projects. It identifies broad time periods for delivery, the nature of the priority, the key delivery partners and the likely costs of projects that are known at this time. The infrastructure projects listed include some funded by the public finances, by private sector companies and other organisations, as all sectors contribute to delivering the infrastructure that is required through the draft Local Plan.
 - The IDP reflects the relationship between the draft Local Plan and the draft
 Transport Strategy. However, other areas, such as Education, also have significant
 future requirements to serve the development proposed in the draft Local Plan.
- 6. This schedule does not include projects which are already funded and under construction, unless they are directly related to the Plan's infrastructure requirements, in which case they are included to present a complete picture of

infrastructure provision.

- 7. The infrastructure provision that is required to serve the development set out in the draft Local Plan has been subject to initial viability testing by Peter Brett Associates.
- 8. The Council is considering the preparation of a draft Community Infrastructure Levy (CIL) schedule in the near future, following quickly the draft Local Plan, if the principles set out in the draft Local Plan are agreed.

Planning for Infrastructure

- 9. The draft Local Plan revisions document sets out the proposed approach to infrastructure funding. In simple terms, the draft Plan indicates that, based on the research undertaken so far, the Council is proposing to use s106 Agreements, bonds and other mechanisms to deliver key infrastructure on strategic development sites. It is envisaged that the infrastructure, affordable housing and other requirements on larger sites will be significant, so the Council is considering whether a reduced (or even nil) CIL should be applied to those sites.
- 10. On smaller allocated sites, or non-allocated sites that come forward as "windfalls", CIL could then be used to fund other projects which are considered important to the implementation of the wider planning strategy, such as local traffic management improvements and open space provision. The Council will keep this position under review as the CIL is prepared and infrastructure planning moves forward.
- 11. After considerable research and assessment (including Sustainability Appraisal and Habitat Regulations Assessment, transport modelling, viability assessment and so on), the draft Local Plan identifies a series of strategic sites, which would play a fundamental role in the delivery of key infrastructure for the district.
- 12. The purpose of this IDP document is to set out the infrastructure investment that has been identified as being required over the Local Plan period, related to the proposed levels of development. The IDP sets out an assessment of the likely required infrastructure improvements, including what, where and when new infrastructure is likely to be required, as well as further details such as the estimated costs and known and potential delivery partners.
- 13. The process of planning for infrastructure has been iterative. Opportunities for a variety of developments and the implications for infrastructure have been discussed

with partner organisations over several years. A list of the key organisations is provided at the end of this document.

- 14. The Infrastructure Delivery Plan is a supporting document to the Local Plan. It is intended to be a working document, to be reviewed and amended as necessary as infrastructure is delivered, opportunities for new development are presented and as pressures change over time.
- 15. This document identifies a wide range of infrastructure required to support the development proposed in the draft Local Plan, including:
 - Affordable housing
 - Public transport measures
 - Walking and cycling measures
 - New/improved roads
 - Employment land provision
 - Education and social provision
 - Health facilities
 - New open space provision
 - Utilities
- 16. This document outlines the infrastructure requirements that correspond to the sustainability objectives and level and distribution of growth set out in the draft Local Plan up to 2031.
- 17. In assessing the infrastructure schedule, projects have been identified through assessments of the policies and allocations in the draft Local Plan. Additional work has been ongoing on assessing existing provision and identification of requirements and possible shortfalls in current infrastructure provision.

18. All infrastructure proposals have demonstrated links to national or local guidance and standards and/or direct links to the Corporate Plan/Local Plan objectives as set out below and the Council's draft Transport Strategy:

- Supporting economic growth
- Homes in the right places
- Tackling congestion
- Tackling disadvantage
- Clean and green environment

19. The Council has also taken account of Kent County Council's (KCC) infrastructure delivery planning requirements, and has also worked closely with KCC on the viability assessment work.

Affordable housing

- 20. The need to achieve 30% affordable housing across the mix of developments is set out in the draft Local Plan. Therefore, whilst the need to deliver affordable housing has a direct impact on delivering the objectives of the draft Local Plan goals and budgets and development viability, there is only a brief summary position set out in the draft IDP.
- 21. The cumulative cost impacts of affordable housing along with infrastructure requirements have been considered as part of the development of the Council's initial CIL work and the viability assessment work undertaken by Peter Brett Associates, and will be reviewed through viability testing for specific developments.

Employment Land

- 22. The draft Local Plan identifies some 65ha of employment land.
- 23. The Council considers that it is essential for the economic strategy set out in the draft Local Plan that serviced land and premises are brought forward alongside housing development, not only to support the creation of new jobs, but also to ensure that existing and new companies have sufficient land available for expansion and to meet changing needs.
- 24. The delivery of employment land has proved challenging in the past, and a number of initiatives have been carried out over the years to try to ensure that allocated sites do come forward and are available to business. These have been partially successful, but the Council is exploring new approaches to employment site delivery.

Transport Strategy

25. The Transport Strategy is a framework to guide the development of transport improvements across the District for the period up to 2031. It identifies priority schemes and projects that are deliverable but whose implementation is likely to be dependent on the availability of resources. It is therefore a fluid document which can be adjusted in line with resource availability, and will be used to facilitate effective engagement with Government, stakeholders and the local community; lobby for transport improvements, and support bids for funding. The strategy is

being prepared jointly by Kent County Council and Thanet District Council with public consultation to be undertaken in the near future.

- 26. It will primarily support, guide and be developed further through future Local Transport Plans (LTPs) and the District Council's Local Plan. The transport strategy will aim to achieve a balance between a range of transport and development issues at local and strategic level. The horizon period for the strategy is 2031, which is consistent with the emerging Local Plan.
- 27. The general Objectives of the Strategy are to:
 - Minimise the need to travel or use private cars to access services, employment and amenities
 - Inform the Local Plan in identifying and delivering sustainable development options
 - Focus development at sustainable locations to reduce the need to use private cars
 - Tackle congestion and reduce the impacts of transport pollution on air quality
 - More direct walking and cycling routes to reduce isolation and potential noise and pollution
 - Efficient, convenient and safe public transport system alongside expansion of larger scale infrastructure
 - Promote the internalisation of trips and reducing the need to travel as well as measures to support modal shift away from the car
 - Enhanced integration of HS1 with the wider public transport network
 - A further decrease in rail journey time between Ramsgate and London
 - Enhance bus services to rural areas
 - Ensure that car based journeys are as free as possible of congestion and direct to ensure reliability of journey time
- 28. There are also a number of place-specific Objectives:
 - Improved traffic circulation around Westwood Cross
 - Further pedestrian links around Westwood Cross
 - Reduction in congestion along A254 corridor, particularly in the vicinity of the Victoria Traffic Lights junction
 - Improved accessibility for pedestrians, cyclists and public transport along Margate seafront
 - A car parking strategy for Broadstairs, Ramsgate and Margate town centres in order to maintain sufficient, quality and well located provision reflecting the needs of their business and residential communities
 - Further accommodation of visitor parking at Broadstairs during peak season

Habitat Regulations Assessment mitigation

- 29. The Council has agreed a mitigation strategy with Natural England in relation to the potential effect of additional recreational activity at the coast arising from new development. This is recognised in the draft Local Plan. The measures include wardening and management of the coast, and information and education regarding the value and importance of the coast.
- 30. This mitigation is not regarded as "infrastructure" in the traditional sense, but is included in this Plan for the sake of completeness. The mitigation measures agreed with Natural England are required on all housing sites in order for them to be considered acceptable within the context of the Habitat Regulations.
- 31. The Strategic Access Management & Monitoring report for the Council (prepared by Hyland & Bayne, 2016) indicates that an average charge of £542 per dwelling is required in order to cover the long-term costs of the measures agreed with Natural England.

Utilities

- 32. The development identified in the draft Local Plan requires the provision of new utilities infrastructure water, gas, electricity and digital infrastructure.
- 33. The Council has liaised with the various providers regarding the need for new and improved infrastructure and sought to identify "pinch points" in the networks that need to be addressed.

Prioritisation of infrastructure provision

- 34. In undertaking this work, the Council has sought to provide a clear position on the priority to be given to different aspects of infrastructure.
- 35. In the Council's view, there are a number of clear priorities for development funding and funding from other sources:
 - Affordable housing
 - Employment land provision
 - Transport Strategy measures
 - Habitat Regulations Assessment mitigation measures
 - Open space provision
 - Education/Health provision

Funding and Delivery

- 36. Infrastructure to support growth identified in the draft Local Plan will also be funded from a number of sources including developer contributions, CIL and Government spending and grants (such as the South East Local Enterprise Partnership).
- 37. The research and viability assessment work for this IDP indicates that a combination of public funding, development funding via s106 and CIL, and specific grant aid programmes should be sufficient to meet potential total infrastructure costs in the Plan period.
- 38. To be acceptable, planning obligations and CIL requirements need to be:
 - necessary to make the development acceptable in planning terms;
 - directly related to the development; and
 - fairly and reasonably related in scale and kind to the development.
- 39. The Council considers that all the requirements set out in this paper are necessary to be able to properly implement the draft Local Plan. Any decision regarding the priorities for infrastructure will be considered at the application stage.
- 40. The Infrastructure schedule includes costs for projects known at this stage. Where possible projects have been costed based on design-driven quantities or on benchmarks and comparable projects. The schedule provides an indication of potential partners in delivery and possible funding partners.
- 41. The projects listed are directly linked to the needs of new development. This infrastructure will be delivered through developer obligations; for example, via s106 or s278 conditions and agreements. There may also be funding from other sources; such as the Local Enterprise Partnership. As this infrastructure is to be delivered primarily through the development of the identified strategic sites, it is proposed in the draft Local Plan that these sites should be low (or possibly zero) CIL. An adjustment will need to be made to the CIL to recognise that some key infrastructure is provided by strategic sites. The initial viability assessments for CIL have taken into consideration a residual site infrastructure cost to account for this.
- 42. For additional infrastructure, including some specific localised projects (such as public space improvements) funding will come from a number of potential sources. The principal source of this will be CIL, but could also be supported by specific central

government grants (where available) and private sector delivery.

- 43. The ongoing work of delivering necessary infrastructure will involve continued partnership working and coordination. Council Departments will work together to coordinate project requirements and delivery. This will include officers from Strategic Planning, Planning Applications Team, Housing, Regeneration, Economic Development, Estates and other relevant sections as needed as well as partner organisations and site developers.
- 44. Where appropriate the delivery team will work with developers and other infrastructure providers to pursue opportunities for funding and financing and ensure development is accompanied by the required services and infrastructure.

Key Infrastructure

- 45. Paragraph 15 sets out the key infrastructure required to support the implementation of the draft Local Plan.
- 46. The table below sets out the general requirements for infrastructure through the Plan period.

Schedule of Local Pla	ichedule of Local Plan key infrastructure							
Theme	Requirements/Projects	Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing		
Affordable Housing	The draft Local Plan includes a requirement for 30% affordable housing on all sites of 10 units and above (Policy SP19).	Affordable housing is to be provided as part of the development mix of the site.	TDC	Developers should liaise directly with registered Providers on the delivery of affordable housing, and Registered Providers will seek funding from the relevant sources, such as the Homes & Communities Agency.	Developers/Registered Providers/HCA.	Affordable housing shall be provided as an integral part of each phase of development, subject to CIL viability.		
Lifetime/wheelchair housing (national standards)	The draft Local Plan includes a requirement (on sites of 15 or more dwellings) for 20% of homes across all tenures to be constructed to Lifetime Homes standard, and (on sites of 100 or more dwellings), 2% to be constructed to Wheelchair Accessible standards (Policy H08).	Lifetime/wheelchair housing is to be provided as part of the development mix of the site.	Developers	Integral part of scheme.	To be funded by developers.	Lifetime/wheelchair housing is to be provided as an integral part of each phase of development.		
Employment Land	The draft Local Plan identifies 65ha to provide employment floorspace on strategic sites and a number of smaller areas/sites for employment (some linked to the strategic sites and some "stand- alone" sites).	The employment land on the strategic sites needs to be provided in a serviced form alongside new housing development to ensure that the Council's Economic Growth Strategy can be delivered (Eurokent and Thanet Reach). Employment land-only sites can come forward at any point in the Plan period, subject to the acceptability of individual proposals and mitigation measures.	TDC	To be determined.	Serviced sites need to be provided by the developer in partnership with a relevant commercial developer as appropriate. Potential partners: Local Enterprise Partnership, Homes and Communities Agency, East Kent Opportunities, East Kent Spatial Development Company.	Needs to be phased through the period of the Local Plan in parallel with and to serve housing development.		

Schedule of Local Pla	Schedule of Local Plan key infrastructure							
Theme	Requirements/Projects	Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing		
Open Space (Subject to review)	Provision of new open space to meet the needs generated by new housing development. The draft Plan indicates a requirement for a total of 75.65 ha of all types of open space.	It is anticipated that the total amount of open space to be provided through strategic sites will be 49.48ha (Additional housing sites will need to provide requisite level of open space on strategic sites). This means that the remaining 26.17ha will need to be provided through contributions from smaller sites possibly via CIL.	Developers/ TDC	To be determined.	Developers/other agencies.	To be provided as required as each site is developed.		
Open Space (Subject to review)	Play areas/playing pitches.	To be determined.	Developers/ TDC	To be determined.	Sport England/developers.	To be provided as required as each site is developed.		
Transport	Road network improvements – Birchington Bypass (part of Inner Circuit).	Road link between A28 Brooksend Hill and Acol Hill/B2050.	КСС	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Birchington Bypass (part of Inner Circuit).	Widen B2050 Manston Road between junction with Acol Hill and Shottendane Road.	ксс	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Westgate Relief Road (part of Inner Circuit).	Widen Shottendane Road as far as the vicinity of Firbank Gardens, Margate and improve junctions with Park Road, Minster Road and High Street Garlinge.		Up to £30 million depending on requirement.	Largely development funded (but also seeking LEP funding).	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Manston- Shottendane Link (part of Inner Circuit).	Create new link between Shottendane Road and Manston Road opposite Crematorium access and close off Shottendane Road with its junction of Manston Road.		To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Salmestone Link (part of Inner Circuit).	Create new road link between Manston Road and Nash Road behind Salmestone Grange and close off Nash Road at its junction of Coffin House Corner.		To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Nash road Improvements (part of Inner Circuit).	Widen Nash Road along its existing alignment.	КСС	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		

Schedule of Loca	Schedule of Local Plan key infrastructure							
Theme	Requirements/Projects	Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing		
Transport	Road network improvements – Inner Circuit.	Potential link from Enterprise Road to Nash Road, Margate.	ксс	To be determined.	Largely development funded. Other funding may need to be sought.	To be determined.		
Transport	Road network improvements – Inner Circuit.	Create new road between Toby Carvery Roundabout and Manston Court Road (in vicinity of Valley Road).		To be determined.	Largely development funded.	To be determined.		
Transport	Road network improvements – Westwood Access Road (part of Inner Circuit).	To widen Manston Court Road between Valley Road and B2050.	КСС	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Westwood Access Road (Inner Circuit).	To widen B2050 Manston Road between Spitfire junction and Manston Court Road.	KCC	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Westwood Access (Inner Circuit).	To improve Spitfire junction.	ксс	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Inner Circuit.	To widen Spitfire Way between Spitfire junction and Columbus Avenue.	КСС	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements – Inner Circuit.	To extend Columbus Avenue to Manston Road Birchington.	КСС	To be determined.	Largely development funded (but also seeking LEP funding).	To be determined.		
Transport	Road network improvements – Westwood Relief Scheme.	Upgrade Tesco internal link road to adoptable standard between Westwood Road and Margate Road.		To be determined.	Largely by LEP funding.	Subject of a current LEP bid.		
Transport	Road network improvements – Westwood Relief Scheme.	Improvements to Westwood main junction and adjacent roads to improve bus and cycle provision and improve accessibility and movement for pedestrians between different areas of Westwood Town Centre.		To be determined.	Largely development funded.	To be determined.		

Schedule of Loca	Schedule of Local Plan key infrastructure							
Theme	Requirements/Projects	Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing		
Transport	Road network improvements.	To reconfigure Coffin House Corner traffic signal junction.	КСС	To be determined.	Development funded.	To be delivered in parallel with development. Projects to be allocated to specific housing sites.		
Transport	Road network improvements.	To reconfigure Victoria Traffic Signal junction.	ксс	To be determined.	Largely development funded.	To be determined.		
Transport	Road network improvements.	To re-route tourist traffic away from Margate seafront.	КСС	To be determined.	To be determined.	To be determined.		
Transport	Road network improvements.	To reconfigure roundabout at Queens Avenue/Tivoli Road/Grosvenor Gardens and introduce one-way flow on Queens Avenue.		Scheme completed.	Scheme completed.	Scheme completed.		
Transport	Road network improvements.	To investigate High Street, St. Lawrence/ Newington Road junction to improve air quality and address congestion.	КСС	To be determined.	Largely development funded.	To be determined.		
Transport	Rail Network	High Speed 1 train service from Ramsgate to London via Ashford and Ebbsfleet.	Network Rail	Nil	Network Rail.	Network Rail Programme to be determined.		
Transport	Rail Network	Thanet to Ashford railway line: track and signalling improvements.	Network Rail	Nil	Network Rail.	Network Rail Programme to be determined.		
Transport	Rail Network	Thanet Parkway – New station with 300 parking spaces to be located at Cliffsend; sustainable travel links to new Station.	КСС	To be determined.	KCC Local Growth Fund Development funding Other funding streams	2020		
Transport	Walking	Implement measures to encourage walking such as street seats, improved street lighting, signage and removing obstacles and trip hazards. Improvements to definitive public footpaths, where appropriate and adding new paths through development sites to extend network.	TDC/KCC	To be determined.	KCC/Developers.	2012-31		
Transport	Cycling* ¹	Construct shared facility on Sloe Lane, Margate.	ксс	To be determined.	KCC/Developers.	2012-31		

¹ *These cycle routes will also incorporate pedestrian routes.

Water Resources South East and Water Resources Management Plan processes.infrastructure will be required to serve the development proposed in the Local Plan.by site developers (and SWS, where appropriate, through the regular investment programme).parallel with o agreement w Water.The housing and other proposals set out in the draft Local Plan were provided as part of the WRSE modelling work and the preparation of the WRMP.Water distribution capacity needs improvement on the following sites:by site developers (and SWS, where appropriate, through the regular investment programme).water.	
new reservoir at Broad Oak (in Canterbury district), although this is not scheduled until just beyond the period of the draft Local Plan. The necessary measures will be funded through the South East Water and Southern Water regular investment programmes. Developers will need to agree/fund new connections to the water supply network directly with Southern Water.	31. To be phased in el with development, ment with Southern :

chedule of Local Plan key infrastructure						
Theme	Requirements/Projects	Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing
Wastewater/ sewerage	Development sites require a connection to the sewerage system at the nearest point of adequate capacity, as advised by Southern Water. The sites should also ensure future access to the existing sewerage infrastructure for maintenance and upsizing purposes, as required by SWS.	New and improved wastewater infrastructure will be required to serve the development proposed in the Local Plan, or to meet stricter quality standards in the treatment of water and wastewater. This is likely to include improved local sewers and water mains, and potentially strategic assets such as trunk sewers, pumping stations and treatment works. Southern Water has a statutory duty to serve new development and is committed to providing the right infrastructure in the right place at the right time in collaboration with the planning authority and developer. However, it is not possible to identify, in a complete and precise manner, all water and wastewater infrastructure schemes required up to the end date of the Local Plan (i.e. 2031). Instead, investment schemes will be identified and delivered in parallel with development through the water industry's regulatory price review process on a five year investment plan basis.		To be funded wholly by site developers (and SWS, where appropriate, through the regular investment programme).		To 2031. To be phased in parallel with development, in agreement with Southern Water.

Power networks: Electricity	Richborough Connections Project	The Richborough Connection is a project to join the Nemo Link [®] (an electricity link between Belgium and the UK) of approximately 1,000mW (or 1 gW) to National Grid's high voltage National Electricity Transmission System (NETS). To make this connection, National Grid is promoting a new high voltage (400,000 volt or 400 kilovolt [kV]) overhead line connection of approximately 20.7km between Richborough and Canterbury North substations in Kent.	National Grid	Nil cost to developers/TDC	To be funded through National Grid investment programme.	2018-19
Digital infrastructure	District-wide development of broadband communication; reinforcements and connections.	The draft Local Plan contains a Policy (E03), which requires proposals for the provision of new digital infrastructure on allocated sites. This is intended to complement existing infrastructure and bring it up to latest standards.	Developers	Nil through Local Plan process (estimated cost c. £12m).	KCC, Developers, BDUK	2012-31
Habitat Regulations Assessment mitigation measures	Increased wardening at the Thanet Coast (to include information/education; site management; management of volunteers; access management).	Thanet Coast: existing wardening programme established by Thanet District Council. Proposal (agreed with Canterbury City Council) is that this programme is extended into parts of Canterbury district, so as to avoid any significant effect on sensitive designated coastal areas.	TDC	Thanet coast: extension to the warden programme would be funded by developers of sites within the Zone of Influence as set out in the Council's evidence. The proposed contribution per dwelling would vary, but it is likely to average £542 per dwelling.	Contributions will need to begin as developments begin, to extend the Thanet Coast Project as soon as possible to ensure that any significant effects from new development are properly mitigated. Partners: TDC, Thanet Coast Project, Natural England	Throughout Plan period.

Schedule of Local Plan key infrastructure						
Theme	Requirements/Projects	Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing
Health facilities	Hospital provision	The adopted Local Plan includes a site which allows for expansion at QEQM and this will be carried forward into the new Local Plan. The Trust has indicated that this will be sufficient to meet any additional demand during the Plan period.	NHS/CCG/KCC	Current allocation sufficient.	Current allocation sufficient.	Current allocation sufficient.
Health facilities	Medical Centres/doctor's surgeries/other medical facilities	 In December 2015, Thanet was successfully chosen by the National Association of Primary Care as being 1 of 15 National Rapid Test Sites for the Primary Care Home (PCH). The PCH model focuses on the provision of care and management of a whole population budget for a registered population of between 30,000 – 50,000 people. It brings together services and support for patients that are currently provided through primary and community, mental health, social and secondary care providers. Working together at this scale ensures staff within the PCH know each other and more importantly share an understanding of the patients to improve the quality of care and patient experience. In this way, the PCH creates the environment for multidisciplinary teams to provide the right care in the right setting. To deliver this model of care the practices in Thanet have formed 4 PCH's – Broadstairs, Margate, Quex (Birchington, Minster and Westgate) and Ramsgate with each currently 	NHS/CCG/KCC	£15 million	Limited funding through NHS budgetary arrangements and developer contributions. Under the Estates, Technology and Transformation Fund bidding process CCG have submitted 4 bids covering 4 sites. Substantial extensions to 2 existing sites (Margate and Ramsgate) and 1 / 2 potential new builds (Garlinge / Westgate area and Westwood Cross). In total £ 21.5 million has been requested. Outcome of this process was the successful award of capital monies to support the Margate PCH which will be the physical expansion of Bethesda	

Schedule of Local Plan key infrastructure							
Theme	Requirements/Projects		Nature of Provision	Lead Organisation	Estimated cost (yet to be funded)	Funding/Known and potential partners	Phasing
			nursing teams, more effective use of IT and new models of care especially for those that are frail. In terms of structure, the 4 PCH's form the foundations of the emerging Thanet Integrated Accountable Care Organisation (IACO). This organisation will develop integrated working relationships with all health and social care providers including the hospital so that professionals work as one team, providing one service with one budget. Over the next 12 - 18 months the model of care will be developed further to ensure that local resources are used effectively, are sustainable and create an environment that attracts resources and workforce to the area. A key element of this will be to look at infrastructure requirements for premises which is a mixture of purpose built sites and converted bungalows / houses. At present the sites are not able to cope with current patient needs and therefore would not be able to meet the increased services required for the planned housing growth in the area. A number are also no longer fit for purpose in terms of delivering integrated healthcare services for the future.			Margate. In addition the funding of an options appraisal/feasibility study on Westwood Cross and in particular the significant housing development. Sadly the other submissions regarding Ramsgate and Quex were not successful. There are no other funding opportunities on this scale for at least the next 3 years (from 2016).

BUDGET STRATEGY 2017-18

Extraordinary Overview & Scrutiny Panel	21 November 2016
Report Author	Director of Corporate Resources and s151 officer
Portfolio Holder	Cllr-John Townend, Finance and Estates
Status	For Information
Classification:	Unrestricted
Key Decision	No
Ward:	All Wards

Executive Summary:

This is a covering report to present the Budget Strategy which was considered by Cabinet on 17 November.

Recommendation(s):

Overview and Scrutiny Panel is invited to comment on the attached report.

CORPORATE IM	PLICATIONS
Financial and Value for Money	There are no financial implications arising directly from this report other that those highlighted in the Cabinet report attached.
Legal	There are no legal implications arising directly from this report other that those highlighted in the Cabinet report attached.
Corporate	There are no corporate implications arising directly from this report other that those highlighted in the Cabinet report attached.
Equalities Act 2010 & Public Sector Equality Duty	There are no equalities implications arising directly from this report other that those highlighted in the Cabinet report attached.

Decision Making Process

This is a covering report to present the Budget Strategy which would be considered by Cabinet on 17 November. Overview and Scrutiny Panel is invited to comment on the attached report. If need be, an extraordinary Cabinet meeting could be arranged to present any views from the Panel. This page is intentionally left blank

Agenda Item 4 Annex 1

BUDGET STRATEGY 2017-18

Cabinet	17 November 2016
Report Author	Director of Corporate Resources and s151 officer
Portfolio Holder	Cllr-John Townend, Finance and Estates
Status	For Information
Classification:	Unrestricted
Key Decision	Νο
Reasons for Key	Budget and Policy Framework
Ward:	All Wards

Executive Summary:

To present the draft budget strategy for:

- 1. The General Fund revenue budget 2017-18, together with:
 - a. Proposed fees and charges policy;
 - b. Assumptions for the medium term from 2018-19 to 2020-21;
- 2. Capital programme for 2017-18 and the provisional estimates for the following years to 2020-21;
- 3. Housing Revenue Account 2017-18 and the estimates for the HRA capital programme up to 2020-21.

Recommendation(s):

That Members note the report.

CORPORATE IM	PLICATIONS
Financial and	The financial implications of the budget are laid out within the body of the
Value for	report.
Money	
Legal	Section 151 of the 1972 Local Government Act requires a suitably qualified named officer to keep control of the Council's finances. For this Council, this is the Director of Corporate Resources, and this report is helping to carry out that function. The requirements of other relevant statute have been referenced within the body of this report, where relevant.
Corporate	Corporate priorities can only be delivered with robust finances. Both the draft budget and the level of reserves recommended in this report are believed to be sufficient to meet these priorities and develop Services.
Equalities Act 2010 & Public Sector Equality Duty	Members are reminded of the requirement, under the Public Sector Equality Duty (section 149 of the Equality Act 2010) to have due regard to the aims of the Duty at the time the decision is taken. The aims of the Duty are: (i) eliminate unlawful discrimination, harassment, victimisation and

other conduct prohibited by the Act, (ii) advance equality of opportunity between people who share a protected characteristic and people who do not share it, and (iii) foster good relations between people who share a protected characteristic and people who do not share it. Protected characteristics: age, gender, disability, race, sexual orientation, gender reassignment, religion or belief and pregnancy & maternity. Only aim (i) of the Duty applies to Marriage & civil partnership.
Please indicate which aim is relevant to the report.Eliminate unlawful discrimination, harassment, victimisation and other conduct prohibited by the Act,Advance equality of opportunity between people who share a protected characteristic and people who do not share itFoster good relations between people who share a protected characteristic and people who do not share it.
There are no equity and equalities implications arising directly from this report, but the Council needs to retain a strong focus and understanding on issues of diversity amongst the local community and ensure service delivery matches these.
It is important to be aware of the Council's responsibility under the Public Sector Equality Duty (PSED) and show evidence that due consideration had been given to the equalities impact that may be brought upon communities by the decisions made by Council, as a result a full equality impact assessment will be undertaken for any specific service changes where appropriate.

1.0 Introduction and purpose of report

- 1.1 To outline the process and assumptions for developing the budget for 2017-18 and the provisional assumptions for the following years to 2020-21. The paper also proposes the fees and charges policy for 2017-18.
- 1.2 To present the draft General Fund Capital budget for 2017-18 and the provisional estimates for the following years to 2020-21.
- 1.3 To present the provisional assumptions for the HRA budget for 2017-18 and the estimates for the HRA capital programme up to 2020-21.

2.0 Background

National Planning Context

- 2.1 Following the June Referendum, there is a new national political landscape. This could affect local government and the Chancellor is to update the Government's spending plans for 2017-18 and beyond in the Autumn Statement, which will provide the general direction of financial support for local authorities.
- 2.2 The detail of what grant each Council will receive should be announced in early December in the Provisional Settlement. This will be confirmed in the Final Settlement in late-January/early-February.
- 2.3 During the summer, the Government consulted on changes to the income that local authorities receive from Business Rates. All these changes bring uncertainty, firstly to how much businesses will pay, and secondly to local authorities. They include:
- Retention moving to local authorities retaining all their Business Rates, but taking on additional responsibilities and ceasing to receive Revenue Support Grant by 2020;
- Revaluation altering the distribution of how much businesses pay to better reflect their ability to pay;
- Appeals making the appeals process quicker. Initially, a backlog of cases will be cleared at the same time as the new cases are processed quicker, producing a bulge of decisions.
- 2.4 As part of the Spending Review in November 2015, Councils were invited to submit a Four Year Efficiency Plan by 14th October in order receive assurance of future funding. TDC has made such a submission.

TDC budget planning process and framework

2.5 The Committee calendar sets out a timeline of meetings around which the budget process can be built - see Table 1 overleaf:

Table 1: Budget and service planning timetable

Activity/Milestone	Time frame	
The start of the public examination of the budget	31 October to 25	
for wider views and comment.	November	
Cabinet considers this report and gives direction.	17 November	
Overview and Scrutiny Panel (OSP) considers the Cabinet report and makes recommendations to Cabinet	21 November	
Autumn Statement	23 November	
Consultation closes	25 November	
Council considers proposals on the level of fees and charges to enable any changes to be in place from April	1 December	
Governance and Audit Committee considers the Treasury strategy, with recommendations to the 17 January Cabinet.	7 December	
Provisional Settlement announced	Early December	
Cabinet considers the views of OSP, Governance and Audit, consultation and the Provisional Settlement, together with detailed budget proposals comprising Treasury Strategy, the Budget report (Revenue, Capital and HRA), Medium Term Financial Strategy (MTFS), Council Tax Base, Adequacy of Reserves and Robustness of Estimates.	17 January	
OSP considers the Cabinet papers of 17 January and makes any recommendations to 31 January Cabinet.	26 January	
Final Settlement	Late January (or early Feb)	
Cabinet reviews the outcome of the Final Settlement, other risk and impact assessments and OSP views and makes recommendations to Council.	31 January	
Council agrees the Treasury Strategy, the Budget report, Medium Term Financial Strategy, Council Tax Base, Adequacy of Reserves and Robustness of Estimates.	9 February	
Council agrees the level of Council Tax	23 February	

2.6 The MTFS 2016-20 was agreed by Council in February 2015 and set out the actions required to address the projected funding gap for 2017-18:

Action	Detail	000's
Savings considered as part of the previous Medium Term Financial Strategy	Including previously identified Director savings including a review of Assets, the Port, contract arrangements and service efficiency along with efficiencies from review of the Shared Service arrangement.	-900
Targeted organisational efficiencies	Budgets were to be scrutinised and it was anticipated that this would lead to targeted savings across the organisation.	-364
Fees and Charges	Basic Fees and charges increase	-204
Total		-1,468

Table 2, 2017-18 Original Savings

2.7 The latest forecasts of Government funding, estimates of expected increased costs such as inflation, volume changes from increased demand and demographics, the costs of legislative changes and slippage on the delivery of savings have resulted in an updated projection for 2017-18, as set out in Table 3 below:

Table 3, 2017-18 Revised Savings

Action	Detail	000's
Income generation initiatives	Income generation opportunities in respect of car parking, the port and a lottery	-440
Comprehensive review of Fees and Charges income	A complete review of fees and charges including new fees and benchmarking of old fees in order to gauge the impact on customers and comparison against the wider market.	-490
Remaining Savings agreed as part of the previous Medium Term Financial Strategy	Revised savings including a review of assets, contract arrangements and service efficiencies including from Shared Services.	-770
Total		-1,700

2.8 A review of the Council's reserve holdings has been undertaken. The proposed reserve balances were considered to be adequate for supporting the Council's ongoing needs and plans. However, the level of risk associated with the low level of reserves can be mitigated by making additional contributions over the life of the

MTFS.

3.0 The Budget Process

Service priorities in 2017-18

- 3.1 The new Corporate Plan for 2016-2019 was adopted at Full Council on 15 October 2015 for the next four years. The key priorities are:
 - A clean and welcoming environment
 - Supporting neighbourhoods
 - Promoting inward investment and job creation
- 3.2 These priorities have been taken forward in developing the 2017-21 MTFS as set out in the sections below.
- 3.3 A clean and welcoming environment The Council is keen to encourage pride in our district by keeping Thanet clean. As part of the continuing improvement to frontline services a seven year capital investment programme is planned to review and replace vehicles, plant and equipment. This will ensure that the service has efficient plant and equipment to deliver an improved service. It is proposed to undertake a review of the options available for these facilities and to consider repair/improvement, transfer, disposal and charging.
- 3.4 **Supporting neighbourhoods** The Council will continue to support the Margate Housing Intervention programme and New Build Housing programme. Better regulation and enforcement in the Private Sector is also receiving priority along with consideration for continuing Selective Licencing areas.
 - 3.5 **Promoting inward investment and job creation -** The Council has taken the opportunity to generate economic development by continuing to be a member of the Kent business rates pool in 2016-17 and beyond, with an element of retained growth being available for facilitating schemes that will help promote this.

Exploratory themes for delivering the Medium Term Financial Strategy

3.6 Projected funding for 2017-18 onwards, whilst remaining uncertain in light of the Government's plans for the localisation of business rates, is clearly going to diminish over the medium term. In light of this, some broad themes are being pursued which will enable the Council to produce balanced budgets and a robust MTFS.

Income generation

3.7 A range of reviews are under way to generate new and additional income. These reviews are: creation of a housing company; fundamental review of car parking; power generation on Council owned sites; commercial charging for minor works and workshop; and a review of Planning.

Digitalisation

3.8 The Implementation of a digital strategy will help achieve efficiencies by streamlining back-office processes and improve front line services by providing them in a modern form more relevant to today's digital age. Work is under way with various partners to review in real terms the benefits of this moving forward.

Making the most of the assets we own

3.9 A revised Asset Management Strategy will be key to working with partners to maximise the benefits of the buildings and land we own. We will seek commercial opportunities for key assets including changing use, sharing facilities and disposal as well as investing in assets to earn a return.

Alternative Delivery Vehicles

3.10 All services will be reviewed and considered for alternative models, including outsourcing, shared services or partnerships. Action will be targeted towards those services that are the most expensive relative to peers. By drawing in wider investment and market opportunities it is possible to reduce the cost of mainstream council services. Working with partners would give access to new skills and experience and help ensure an appropriate share of risk between parties.

Efficiency gains and the four year settlement

3.11 By accepting the offer of Government for a four-year settlement, it is hoped that there will be greater certainty of external funding in the medium term, even if that certainty is for an ever-decreasing level of funding.

4.0 Government Funding And Council Tax

4.1 When drawing up budget proposals, the Council needs to consider its primary government funding streams. These are detailed below.

Business Rates Retention

- 4.2 The Government introduced a new Business Rates Retention Scheme from 1st April 2013. The scheme provides an incentive to councils to grow their local economy by allowing them to retain a proportion of the business rates collected. In return, authorities also now share the risk of a fall in yield, subject to a safety net mechanism.
- 4.3 The first 50% of any new business rate yield goes to the Treasury with the balance being split 80% to the district and 20% to the county and major preceptors. The safety net mechanism ensures that no authority's income falls by more than 7.5% of their baseline funding level.
- 4.4 During 2015-16 the Council joined with other Kent authorities in applying to operate a business rates retention pool and this arrangement continued for 2016-17. Business rates income is highly volatile and forecasts should be treated with caution as they are impacted by the closure of businesses, appeals, changes in valuation methodology applied and unforeseen changes.
- 4.5 The Chancellor advised that Councils are to retain all locally raised business rates by the end of the decade under local government reforms. The changes will also end the distribution of core grant from Whitehall to town halls, the first phase of this consultation has now been concluded, the outcome of which will not be known for some time.

4.6 Proposals to localise business rates by 2020-21 will place significant responsibility in local areas along with significant risk, but with this comes opportunity. This will also drive the authority forward in terms of taking control of its financial future, removing the reliance on Central Government funding.

4.7 Local Government Settlement Funding

- 4.8 In addition to business rates, authorities receive Revenue Support Grant (RSG) from Central Government as support towards the cost of running Council services.
- 4.9 In 2016-17 RSG was £2.645m, but in 2017-18 is estimated to fall to £1.446m (subject to our application for 4-year settlement funding).
- 4.10 The 2016-17 Medium Term Financial Strategy assumed cuts of 38.6% across all funding sources from Central Government for 2016-20, this being based on the 4 year spending review. The details of the continuation of New Homes Bonus at current levels has still to be confirmed and remains uncertain. The budget strategy currently assumes that the balance of RSG will be removed in 2020-21 and that Business Rates will remain unchanged.

Council Tax Support Scheme funding

- 4.11 The Revenue Support Grant also includes funding to compensate for the impact of the Council Tax Support Scheme (CTSS) on the Council Tax base. This funding is no longer distinguished as a separate component.
- 4.12 The CTSS was introduced from 1st April 2013 to replace the Council Tax benefit system. The scheme is localised, although there are a number of criteria that are nationally determined. The scheme has been subject to review and consultation and is the subject of a separate item on this agenda.
- 4.13 The current scheme adopted by the Council reflects a county-wide agreement, with local discretion. Currently a contribution of £125k p.a. is received towards the funding of the administration of the scheme and this is currently under review by KCC, as is a potential incentivisation scheme for 2017-18 and beyond.

Council Tax Base Adjustments for Minor Preceptors

4.14 The Council shares the RSG with parish councils to reflect that parishes do not have direct funding for Council Tax support and a reduced tax base. This was paid at the level of £130k in 2016-17. It is proposed that the level of this support should be reduced by the commensurate reduction in Council RSG funding and should therefore be £117k.

Council Tax and Collection Fund

- 4.15 The current Medium Term Financial Strategy assumes a Council Tax increase of 1.99% every year for the next 4 years as agreed by Council in February 2016. The tax base will be taken to Cabinet on 17 January 2017 for agreement, with the Statutory Resolution being taken to Council for agreement on 23 February 2017.
- 4.16 For the purpose of the budget build, it is assumed the Council Tax base for 2017-18 is 2% higher than the 2016-17 level and a 2% increase is expected for future years.
- 4.17 Council Tax is calculated by dividing the Precept by the Council Tax Base. The Council Tax Base is the number of properties within the district adjusted to account for different valuation bands, various discounts and an assumed collection rate. The assumed collection rate for 2017-18 is 97.25%, this is the same rate used in 2016-17.

4.18 Each year Council Tax is calculated based on assumed levels of collection rates. At the end of the year any surplus achieved in the collection fund is available to be shared proportionately between the Council and major preceptors (The Police and Crime Commissioner for Kent, Kent County Council and Kent & Medway Fire & Rescue). It is expected that a small surplus will be achieved in 2016-17 of which £100,000 would be available in 2017-18.

5.0 Budget Pressures

5.1 Given the economic context in which the Council finds itself, the overarching approach to developing the budget is to minimise budget pressures wherever possible, to reduce the need to find savings to deliver a balanced budget. Main pressures are set out in Table 4 below:

Growth	Detail	£000's
The Economy Including Inflation	Budget assumes on-going impact of Pay for Contribution, Pay inflation and contractual increases for such items as Insurance, Utilities, Business Rates and service contracts.	700
Demography	Increased contribution in Pension costs resulting from previous revaluation.	340
Policy	Ongoing reduction in settlement funding as announced in November 2015 offset against changes in Council tax and business rates	660
Total		1,700

Table 4, 2017-18 Budget Pressures

6.0 Fees and Charges:

The fees and charges policy is presented at Annex 4, which sets out the process followed when reviewing increases. Given the substantial budget gap for 2017-18 it will be vital that the council considers increases in fees and charges, to avoid too much pressure being placed on the need to severely reduce costs and so potentially adversely impact on services.

7.0 Budget Consultation

- 7.1 The budget consultation will be launched in November and will identify the priorities of the district's residents. These will be considered as part of the draft budget process for January Cabinet.
- 7.2 The Council's housing budget is due to be discussed at the East Kent Housing Tenant and Leasehold Board with representatives of our residents and leaseholders in attendance on 23th November 2016.

8.0 Housing Revenue Account Budget and Housing Capital Programme

8.1 The Council's responsibilities in respect of the need to keep a Housing Revenue Account (HRA) are contained within Section 74 of the Local Government and Housing Act 1989 ('The Act') and its use is heavily prescribed through statute. The HRA records all of the revenue expenditure and income relating to land, dwellings and other buildings provided under Part II of the Housing Act 1985 and corresponding earlier legislation. It must be kept separate from the General Fund Revenue Account and therefore is to all intents and purposes ring-fenced. Although the HRA for an individual year may result in a deficit, it is a requirement of 'The Act' that overall it must maintain a surplus, which means that expenditure must be carefully planned to remain within the limits of the anticipated income streams over the medium term.

8.2 The Operation of the Housing Revenue Account

Before the estimates are able to be calculated, the context in which the budget is to be built must be considered.

8.3 **HRA Service Expenditure** - As explained above, the HRA is a separate record of all of the Council's expenditure on its social/affordable housing provision (i.e. Council Houses). This includes the following expenditure:-

<u>Repairs & Maintenance</u> – Spend in relation to the day to day repair and maintenance and those works that cannot be deemed as capital repairs such as painting and decorating and contractor repair costs.

<u>Supervision and Management General</u> – Supervision and management costs that are applied across the whole stock e.g. Arm's Length Management Organisation (ALMO) Management Fee and support costs from other services.

<u>Supervision and Management Special</u> – Supervision and management costs that are applied to only specific homes e.g. communal lighting and grounds maintenance.

<u>Depreciation and Impairment</u> – A charge to reflect the use of HRA assets in the delivery of services.

<u>Rents, Rates Taxes and Other Charges</u> – All other costs that the HRA incurs as landlord e.g. insurance costs and Council Tax costs for empty HRA properties.

<u>Increased Provision for Bad Debts</u> – To reflect that not all rents and charges will be recoverable.

8.4 **HRA Service Income** – Income received from the running of the Council housing stock is allocated under the following headings:

<u>Gross Rental Income</u> – Income from rents on council houses, shared ownership properties and leaseholder ground rents

Non-Dwelling Rents – Income from shops at Newington Centre, aerials and garages

<u>Charges for Services and Facilities</u> – Tenant service charges and heating service charges

<u>Contributions towards Expenditure</u> – Leaseholder re-charges and rechargeable repairs

8.5 **HRA Non-Service Expenditure and Income** - These include an apportionment of the investment income that is achieved on balances and any grants and contributions receivable.

8.6 As part of the changes to self-financing, the Council opted to split the one loan pool and move to a two loan pool approach, where loans are charged directly to the Housing Revenue Account or General Fund and where each fund is charged their costs of borrowing directly determined by their loan portfolio. Therefore, debt interest costs for the charges associated with the repayment of loan interest are also charged here.

8.7 **The Housing Revenue Strategy**

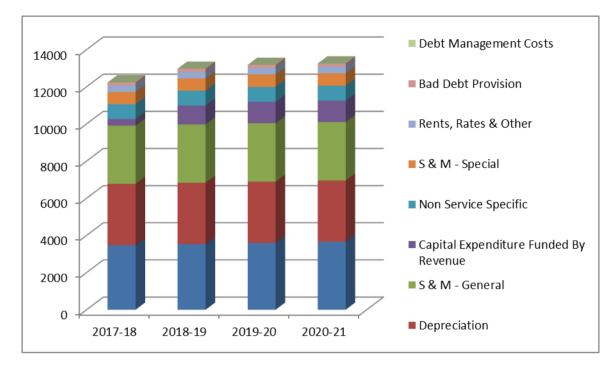

The main strategic objectives of the Housing Revenue Account, which provide the underlying principles for financial planning, and allow the Council to remain within the legislation, are as follows:

- ➢ To maintain a Housing Revenue Account that is self-financing and reflects both the requirements of residents and the strategic visions and priorities of the Council.
- > To maintain current Housing Stock at Decent Homes Plus standard
- To increase or improve the Council's housing stock through new build and bringing empty properties back into use.
- To consider the disposal of stock that is not viable to generate capital receipts for reinvestment in new or existing stock.
- To maximise the recovery of rental incomes by moving void properties to "target rent", reducing the number of void properties and minimising the level of rent arrears and debt write offs.
- To maintain a minimum level of HRA reserves of £800k but with a target level of reserves of £1m.
- 8.8 In April 2015 the government announced a proposal to require that Councils sell high value stock to fund the extension of Right to Buy to housing association tenants. As detailed in the Housing and Planning Act 2016, the Secretary of State has the power to make a Council sell a proportion of their vacant stock to pay a 'high value asset levy' which will reflect the high value homes they are expected to sell. To finance the payment, a Local Authority must consider selling its interest in any higher value housing that has become vacant. In November 2015 Councils had to provide detailed stock data. However, the determination defining higher value and the method for calculating the amount of payment due to the Secretary of State has yet to be determined.
- 8.9 Until further information is made available as to how the scheme will be administered it has not been possible to reflect this within the current budget estimates. Once the guidance has been issued this will need to be reflected in the budget and the 30 Year HRA Business Plan.

8.10 **Details of the HRA estimates**

Expenditure Budgets

8.11 The main assumptions that have been applied to the HRA for the 2017-18 expenditure budgets are summarised below:

8.12 **Contract and Price Inflation** - For direct expenditure budgets, price increases have been included at 2%, which is the best estimate of the level of inflation at this point in time, unless there is a known within a specific contract, in which case this has been used.

8.13 **Repairs and Maintenance**

Day to Day Repairs Contract	A new 4 year contract started in January 2017. The contract includes new services that were previously contracted on an ad-hoc basis. This has assisted in generating an overall saving to the repairs and maintenance budgets.
Refuse Chute & Paladin Bin cleaning	The day to day repairs contract now includes these services and has generated a saving of £2k.
Door Entry Systems	The day to day repairs contract now includes these repairs and maintenance works. Growth of £45k will be required from 2017-18.
Cleaning Contract	A new 3 year contract started in July 2016 with an option to extend for a further 2 years. This has resulted in a saving of £23k.
Cyclical External Refurbishment and Repairs Contract	A new 7 year contract started in April 2016. This has generated a saving of £92k in 2017-18 and a saving of £17k from 2018/19.
Gas Servicing	The contract is due to be re-tendered in 2016-17. The new contract is due to include properties with storage heaters as well as gas boilers.
Rodent Control and Damp Proofing Works	Works have increased and growth of £14k has been factored in from 2016-17 onwards.
Housing Officer	Housing Officer funds will be reduced by £20k as this is a

Funds	demand led budget. The £20k will be used to fund the growth required for asbestos removal.
Asbestos Removal	Asbestos removal is now being undertaken while the property is void. Growth of £45k will be required from 2017-18 onwards, however other revenue budgets have been reduced where possible.

- 8.14 A stock condition survey was commissioned in 2016-17 to re-evaluate the Council's stock to ensure that we continue to meet Decent Homes Plus standard. The survey results are due in March 2017. An Asset Management Strategy and Stock Options Appraisal will follow in 2017-18.
- 8.15 **Supervision and Management General** The Council agreed at its meeting in February 2010 that an ALMO was the preferred option for sharing Landlord Services in East Kent. The East Kent Housing ALMO (EKH) was formed and from 1 April 2011 it commenced the management of the Council's social housing.

The ALMO management fee is calculated on an activity based costing basis, in that the Council's charge is based on the amount of staff provided to deliver the service and their supporting budgets. The 2017-18 management fee base budget is currently under review by East Kent Housing and will be finalised by November 2016. However in the interim it is assumed that the core management fee will remain the same.

The number of court application referrals has increased. This has impacted on the budget and growth of £15k has been applied from 2017-18.

- 8.16 **Supervision and Management Special** Gas and electricity contracts are due for review in September 2017. For 2017-18 an assumed percentage increase of 1% for electricity and 3% for gas has been applied.
- 8.17 **Rents, Rates, Taxes and Other Charges** The Empty Homes Programme and Ramsgate Intervention Programme are complete and a number of sites in the Margate Intervention programme are close to completion. The budgets that the Council holds as a landlord have been reviewed and reduced for running costs. These include Council Tax and utility standing charges on void properties and has generated a saving of £11k.
- 8.18 **Provision for Bad or Doubtful Debts** The provision for bad or doubtful debts for 2017-18 will remain the same at £170k. Last year the actual provision utilised was £224k, whilst it is anticipated that there could be an impact on debt collection due to the Welfare changes based on current debt levels it is anticipated that the current provision is sufficient. An increase in court intervention, evictions and rechargeable works order are having a significant impact on former tenant arrears and recovery.
- 8.19 **Depreciation for Fixed Assets** In accordance with the statutory requirements, the Council has to make a depreciation charge to reflect the use of the HRA assets over their useful lives. Depreciation is the decline in the value of asset over time due to wear and tear. The estimated depreciation charge for dwellings is calculated at £3.08m in 2017-18, the depreciation charge for other HRA assets is estimated to be at £210k.

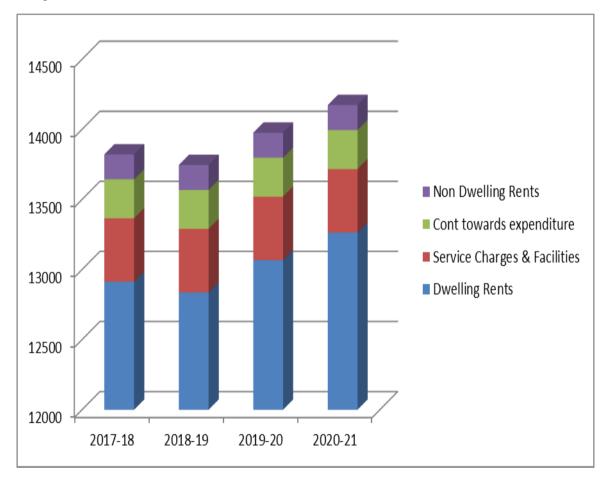

As part of the self-financing settlement, substantial changes were made to the accounting treatment of capital assets. A five year transitional period was put in place to help local authorities manage the impact of these changes. The transitional period ends on 31 March 2017 and in preparation the Government began consulting on the

effect of its proposed treatments during May 2016. The findings from the consultation are yet to be published and may impact on the calculation of the depreciation or impairment charges to the HRA from April 2017.

8.20 **Debt charges** – Since the self-financing settlement, the Council has operated a two loan pool approach whereby the HRA and GF are each responsible for the repayment of their own apportionment of loans. As part of the self-financing settlement, the HRA had its debt capped at £27.792m. As at the 1 October 2016 the HRA had £20.041m of loans outstanding.

Income Estimates

8.21 The main assumptions that have been applied to the HRA for the 2017-18 Income budgets are summarised below:

- 8.22 **Rent Increases** –Since April 2002, most rents for social housing have been set based on a formula set by Government. The intention was to align council rents with those of housing associations by adopting a formulaic approach to calculating rents, known as rent restructuring. Landlords were expected to move the actual rent of a property to the formula rent over staged increases through applying the guidance set by Government of Retail Price Index plus 0.5% plus up to an additional £2 where the rent is below the formula rent for the property.
- 8.23 As part of the Summer Budget 2015 the Government announced that both Social and Affordable Rents would be reduced by 1% a year for four years resulting in a 12% reduction in average rents by 2020-21. The rent baseline for the reductions is the rent payable on 8th July 2015.
- 8.24 The financial impact of the 1% baseline reduction in rents continues to reduce the available income within the Housing Revenue Account. As a result the Council's New Build Programme has been reviewed and scaled back to ensure affordability and a report was taken to Cabinet on 3rd March 2016 to agree this.
- 8.25 In the 2013 guidance the Government confirmed that Social landlords could charge tenants with an income of over £60,000 a market rent. The 'Pay to Stay' policy was discretionary. As detailed in the Housing and Planning Act 2016, the 'Pay to Stay' scheme is now compulsory. Tenants with a household income of £30,000 or more must pay rent equal to the market rent. Increases will be applied on a tapering system until the rent is equal to the market rent. Local Authorities will be expected to pay the additional rental income to the Exchequer. Details of how the Local Authority will be expected to monitor and enforce this policy have still yet to be confirmed.
- 8.26 Rental estimates are based on the new government guidance for rental decrease of 1% for 2017-18 to 2019-20 and a 1% inflationary increase from 2020-21 onwards until further guidance is received.
- 8.27 Social rents will be decreased by 1% in line with the Summer Budget 2015 announcement and government rent guidance. Across the whole stock the average rent is £81.13, this is an average decrease of £0.83p per property.

HRA TABLE 1 – AVERAGE Social Housing PROPERTY RENTS			
Property Est. Ave Rent			
Bedsits	£56.87		
1 Bed Flat	£67.11		
1 Bed House	£77.72		
2 Bed Flat	£75.28		
2 Bed House	£83.70		
3+ Bed Flat	£87.11		
3 Bed House	£93.72		
4 Bed Flat	£89.95		
4 Bed House	£102.57		
5 Bed House	£110.76		

8.28 New units created as part of the Margate Intervention Programme and Empty Homes Programme come under the Affordable Rent Programme. Affordable rents are calculated at up to 80% of the market rental income and are inclusive of service charges. They will be decreased by 1% in line with the Summer Budget 2015 announcement and government rent guidance.

HRA TABLE 2 – AVERAGE AFFORDABLE RENTS INC OF SERVICE CHARGES

Property Type	Average Actual Rent		
1 Bed House	£77.72		
1 Bed Flat	£73.62		
2 Bed House/ Bungalow	£92.46		
2 Bed Flat	£100.69		
3 Bed House	£111.22		
3 Bed Flat	£129.09		
4 Bed House	£140.67		
4 + Bed Flat	£146.34		

- 8.29 Affordable rent guidance requires that on each occasion that an affordable tenancy is issued, whether let to a new tenant or if an existing tenancy is re-issued, the rent must be re-set based on a new valuation. The only exception is where the property is re-let to the same tenant following a probationary period coming to an end
- 8.30 **Non Dwelling Rents** Income generated from aerials on tower blocks is expected to increase as a number of leases are due for renewal; £8k is anticipated in extra income. Garage rents will be increased in line with market rents.
- 8.31 Service Charge Increases Service charges are calculated based on actual cost.
- 8.32 **Heating Charges** Heating charges will be recovered on actual cost based on usage and contract price and then apportioned across the block dependant on bedroom size.
- 8.33 **Investment Income** This consists of interest accruing on mortgages granted in respect of Right to Buy sales and interest on HRA balances. The base rate remains low which in turn means that investment interest will be low. The budget for 2017-18 of £55k is based on achieving an average interest rate of 0.25%.

The Housing Revenue Account Reserves

- 8.34 The Council operates three HRA reserves: a HRA Major Repairs Reserve, the HRA Balance Reserve and the HRA New Properties reserve, each of which is discussed in turn:
- 8.35 **Housing Revenue Account Major Repairs Reserve** –. An amount equivalent of the actual depreciation charge for dwellings is transferred to the Major Repairs Reserve to fund capital works to the existing stock. The estimated transfer to the Major Repairs Reserve for 2017-18 is £3.08m.
- 8.36 This funding, together with previous allocations of supported borrowing and revenue contributions, with good management, has enabled the Council to maintain the housing stock in a good condition. The Council currently maintains its social housing to Decent Homes Plus standard. As at 1 April 2016 this reserve balance was £7.1m.
- 8.37 **Housing Revenue Account Balance Reserve** This reserve holds the balance of the HRA Account and is used to draw down to balance the revenue budget and smooth out any peaks and troughs within the 30 year business plan. It is maintained

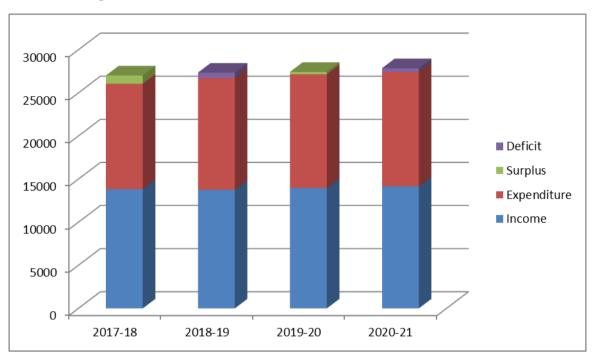

by annual contributions from the HRA. As at 1 April 2016 this reserve balance was ± 5.29 m.

8.38 **HRA New Properties Reserve** – This reserve holds funds set aside to fund either new build properties or the acquisition of suitable properties for use within the HRA. Earmarked match funding for the Margate Intervention and New Build Programme has been set aside in this reserve as agreed by Cabinet. As at 1 April 2016 this reserve balance was £5.46m and is due to be drawn down during the 2017-18 and 2018-19 programmes. Income generated from affordable rents will continue to be set aside in this reserve for re-investment in a new build programme.

HRA TABLE 3 - DRAFT - HOUSING REVENUE ACCOUNT BUDGET					
	2017-18 £'000	2018-19 £'000	2019-20 £'000	2020-21 £'000	
Expenditure

Draft Housing Revenue Account 2017-2021

9.0 The HRA Capital Budget

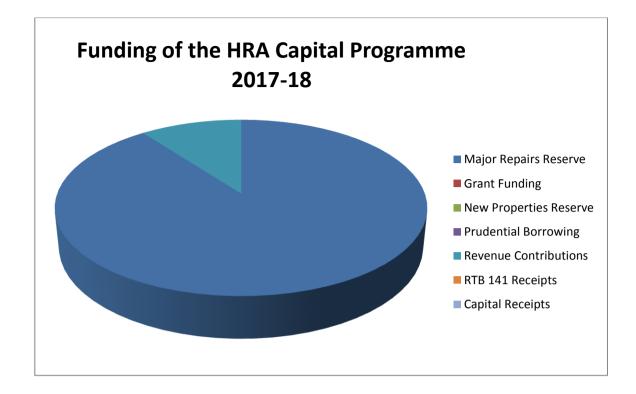

- 9.1 A minimum level of £10k has been set for capital expenditure on a fixed asset which is expected to be in use for more than one year. Capital expenditure below this value is not treated as capital and is therefore not recorded on the asset register or funded from capital resources. Capital expenditure can be met from loans, capital receipts, capital grants or revenue contributions.
- 9.2 Due to the complex and large scale nature of capital projects, the original budgets have to be based on estimations that often need revising as the project advances.

The HRA Asset Management Strategy

- 9.3 The Strategic Housing Team is currently developing a new HRA Asset Strategy. Ongoing work has been undertaken to identify underutilised garage areas and a programme of New Build sites have been identified for development. The Council continues to review the land holdings within the HRA to develop a long-term new build programme. As part of the review, those small areas of land that no longer meet housing requirements and are not considered suitable for development will be reviewed for disposal to generate further capital receipts for re-investment into the new build programme.
- 9.4 The existing housing stock is continually reviewed for its suitability to provide good quality housing. Where stock is identified that requires considerable capital investment which far exceeds its worth to the authority, and or it has a greater market value consideration, will be given to disposal in order to generate capital receipts to fund new developments to increase the number of units or re-investment into the existing stock. The disposal of Coast Guard Cottages has recently been identified as falling into this category and the sale of some of these units is underway.

Available Capital Funding

- 9.5 Capital expenditure can be financed from revenue resources, capital grants, usable capital receipts and borrowing. The General Fund can only be used to fund General Fund related capital expenditure, and the HRA can only finance expenditure on HRA assets; there can be no cross subsidisation between accounts. In both cases, the revenue resources are limited.
- 9.6 **Capital Grants** These are offered by Government Departments to assist with certain types of expenditure. The HRA has been awarded £1.37m funding towards the delivery of a new build programme for 58 new affordable units within the district from the Homes and Communities Agency (HCA) Affordable Homes Programme 2015-18.
- 9.7 **Housing Capital Receipts** On the 26 July 2012 Cabinet gave approval to enter into an agreement with the Secretary of State for Communities and Local Government which allows the Council to retain additional Right to Buy receipts over and above that budgeted by Treasury. Under this regime, Treasury receive 75% of income on sales for approximately the first four right to buy properties and the Council is able to keep all of the sales income over and above.
- 9.8 **Unsupported Borrowing** The Local Government Act 2003 gave local authorities the ability to borrow for capital expenditure above the level supported by Government Grant, provided that such action complies with the Chartered Institute of Public Finance and Accountancy (CIPFA) Code of Prudential Borrowing ("The Prudential Code"); the objectives of which are to ensure that capital investment plans are affordable, prudent and sustainable. Essentially, it provides a number of controls to ensure that the Council does not incur additional debt without fully understanding the financial implications both now, and in the future. A housing debt cap of £27.792m has been set for the Council, being the maximum amount the HRA can borrow which must not be exceeded. This differs from the way the maximum debt levels are set within the General Fund, which are governed by the Prudential Code and the setting of a number of indicators.
- 9.9 **HRA Capital Reserves** A summary of the HRA reserves has been detailed in para (8.34). The major repairs reserve is used to fund expenditure on the council housing stock and debt repayment, whilst the new properties reserve is utilised to fund the creation of new affordable homes.
- 9.10 **Revenue Contribution to Capital** Revenue contributions from surpluses generated from rental income can be utilised to fund any budgetary shortfall within the capital programme. Over the longer term, this resource could be under threat because of the requirement to reduce rents.

The Capital Programmes for 2017-18 to 2019-20

- 9.11 **Housing Revenue Account Capital Programme** The Housing Revenue Account Capital Programme has been set to ensure that the Council's social housing stock meets Decent Homes Standard Plus and to provide a continuing maintenance scheme to the Council's housing stock. The programme has been set based on existing stock data, however, East Kent Housing have recently commissioned a stock condition survey over the entire housing stock, the results of which may require a revision to the programme to be brought back to Members if the findings vary greatly from the existing budget set.
- 9.12 The Roofing programme is due to be re-tendered in 2016-17. A number of blocks have been surveyed and are in need of roof replacements in 2017-18 and 2018-19. These properties also require structural works and so both works will be carried out at the same time to make best use of scaffolding costs. Some properties have also been identified from the stock condition database as needing roof replacement surveys to be carried out.
- 9.13 A number of properties have been identified as needing window and door replacements. Some of these properties require specialist works and the budget has been increased by £40k to carry out these replacements. A new contract is due to be tendered in 2017-18.
- 9.14 Kitchen and Bathroom replacement budgets have been reduced as the previous backlog is now complete.
- 9.15 A report was carried out to review fire safety in 2015-16. The three year programme will complete in 2017-18 and the budget reflects the remaining contract works to be carried out.
- 9.16 A number of properties have been identified as needing structural and repointing works. Where applicable these works will be carried out at the same time along with

any roofing works required to make best use of scaffolding costs. Due to the scale of the works, the programme and budget will be split over 2017-18 and 2018-19.

- 9.17 Thermal Insulation works are currently being carried out when the property becomes void. The properties in rural locations are due for a review and are most likely to require works to be carried out following the survey. As a result the budget has been increased by £30k in 2017-18.
- 9.18 The lift programme is currently under review. Two lifts have been completed. The budget has been reduced for the remaining lifts based on the costs of the completed works.
- 9.19 Disabled adaptions will remain the same for 2017-18. This is a demand-led budget and will be reviewed annually.
- 9.20 Estate Improvements has been reduced to £50k for 2017-18 and 2018-19. The budget will resume to £125k once the large scale structural programme has been completed.
- 9.21 The Margate Housing Intervention Programme sets out to transform the housing market in two of England's most deprived wards, Cliftonville West and Margate Central. The properties that are currently in the programme will continue to be developed. The programme will continue to be closely monitored and the rental income generated re-invested to continue the programme.
- 9.22 With the flexibilities now available as part of the self-financing changes, the Council is currently developing an HRA Asset Management Strategy to review land and buildings within the HRA, including garage sites to ensure they are being put to best use and obtaining value for money for the tenants. This has been the driving factor towards the first tranche of a new development programme for the HRA consisting of 58 new units. The new build development programme is funded by HCA grant funding, HRA reserve balances and prudential borrowing and the programme is scheduled to complete in 2018-19.
- 9.23 A detailed breakdown of the HRA capital programme is provided in Annex 1.

10.0 The Draft Capital Budgets 2017-18 to 2020-21

10.1 The draft Housing Revenue Capital Programme for 2017-18 that is proposed for Members' approval is £3.255m, which will be funded from the HRA reserves and revenue contributions to capital. A summary of this programme and the proposed funding sources are shown in the following table:

TABLE 4 – HRA CAPITAL PROGRAMME				
	2017-18	2018-19	2019-20	2020-21
	£'000	£'000	£'000	£'000
Total HRA Capital Programme Expenditure	3,255	4,160	3,325	3,225
HRA Capital Resources Used:				
HRA Major Repairs Reserve	2,905	3,145	2,175	2,075
HRA Revenue Contributions	350	350	425	425
New Properties Reserve		665	725	725
Total Funding	3,255	4,160	3,325	3,225

11.0 General Fund Capital Programme

- 11.1 A minimum level of £10k has been set for capital expenditure on a fixed asset which is expected to be in use for more than one year. Expenditure below this value is not treated as capital and is therefore not recorded on the asset register or funded from capital resources. Capital expenditure also includes qualifying grants, such as those provided for the enhancement of buildings to increase the extent to which they can be used by a disabled or elderly person. Capital expenditure can be met from loans, capital receipts, capital grants or revenue contributions.
- 11.2 Due to the complex and large scale nature of capital projects, the original budgets have to be based on estimations that often need revising as the project advances. This in turn leads to re-phasing of the capital programme, in order to keep the overall costs within the agreed bottom line.

11.3 The Asset Management Plan

11.4 By far the largest element of the Council's capital worth (as represented by the fixed asset values on the Balance Sheet) is in its property holdings, with a total of £210 million showing as the net book value of all property assets as at 31 March 2016 (after depreciation has been applied). In line with Government and best practice guidelines, the Council is required to have prepared and published an Asset Management Plan (AMP) which outlines its approach to its material asset holdings. This is to ensure that it acts responsibly in terms of undertaking a stewardship role

over valuable public assets whilst deriving the maximum use from them in terms of service delivery so that value for money is able to be evidenced.

11.5 The Council's Asset Management Plan outlines the principles, criteria and processes that form the cornerstone of the draft Capital Programme. This requires a continuous assessment of the relative value of an asset (both financial and non-financial) in order to ensure that the Council's investment in its assets is working to optimum effect. This is especially important in the current financial climate, where assets that are no longer viable or surplus to requirements need to be disposed of in order to reduce the Council's liabilities and to generate capital receipts to fund new developments or be transferred for Community benefit.

11.6 Capital Receipts

- 11.7 The level of capital receipts available from the sale of surplus assets has been very constrained over the last few years. Reasons for this have included the economic situation, assets being removed from the disposal list following consultation, and capital funding being switched from reserves to capital receipts wherever possible due to significant pressures on the Council's revenue budget. Members should note that capital receipts will be monitored closely during the 2017-18 financial year, as it may be necessary to adjust the programme in year depending on asset disposal and funding outcomes.
- 11.8 The capital receipt from the Royal Sands Development has not yet been allocated to capital project(s) within the capital bid process and scoring regime.

12.0 The Capital Budget Strategy

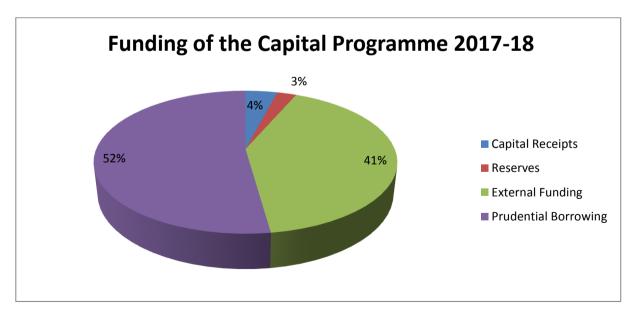

- 12.1 Although the Asset Management Plan is used to inform the contents of the Capital Budget, it is only one element. In order to ensure that the Capital Budget is able to meet the Council's needs in the wider sense and to manage the impact on the revenue budget, the development and use of the Capital Programme is underpinned by a Capital Strategy as follows:
 - > To maintain an affordable four-year rolling capital programme.
 - To ensure capital resources are aligned with the Council's strategic vision and corporate priorities.
 - To undertake Prudential Borrowing only where there are sufficient monies to meet in full the implications of capital expenditure, both borrowing and running costs.
 - To maximise available resources by actively seeking external funding and disposal of surplus assets
 - > To engage local residents in the allocation of capital resources where appropriate
- 12.2 Due to the limited availability of capital receipts and the need to contain the level of borrowing undertaken to minimise the revenue impact, it has been necessary to review the Capital Programme. This is to ensure sufficient funding is available for existing schemes that have commenced and that any new projects are of the highest corporate priority and/or reduce the pressure on the revenue account.
- 12.3 Applications for Capital Bids have been reviewed by the Capital Programme Group and are scored against a weighted matrix to ensure they focus on the Council's core priorities, health and safety requirements, the generation or protection of income streams and affordability.

- 12.4 The level of resources available raises a number of issues and risks for future years, which need to be addressed. Over the past few years the Council has seen significant constraints in its available capital receipts. It is difficult to estimate the funding level achievable as a number of changes often arise to the asset disposal programme once the consultation process has been completed. In the event that sufficient disposals cannot be realised in 2017-18 onwards this will result in a further need to borrow, thus increasing the revenue pressure on the General Fund. Regular monitoring will need to be reported back to members and the Capital Programme adjusted accordingly.
- 12.5 There is limited scope for future investment in new assets or making improvements to existing buildings. The Asset Management Plan is key in delivering resources to the Capital Strategy and reducing the size of the Council's asset and property portfolio. It is imperative that limited resources do not damage the Council's ability to maintain its significant income streams as assets deteriorate from lack of investment. The current portfolio is not maintainable with the current funding available for repairs and maintenance and resources available and given the Council's funding position this is unlikely to improve. It is likely that over the next four years some difficult decisions will need to be made on some of the asset holdings. There are limited capital resources to fund any overspends/new requirements which could occur during the financial year. Any additional schemes during the financial year will require an existing scheme to be deferred or funds re-allocated unless there is headroom in the General Fund to borrow.

12.6 Available Capital Funding

12.7 Capital expenditure can be financed from revenue resources, capital grants, usable capital receipts and borrowing. The General Fund can only be used to fund General Fund related capital expenditure, and the Housing Revenue Account (HRA) can only finance expenditure on HRA assets; there can be no cross subsidisation between accounts. In both cases, the revenue resources are limited.

A summary of the 2017-2021 capital resources utilised to fund the Capital programme is detailed in Annex 3, but shown graphically below.

12.8 **Capital Grants** – these are offered by external funders to assist with certain types of expenditure. Capital grants include: Environment Agency, Lottery funding and European grants. The Better Care Fund allocation for 2017-18 is estimated at £2.342m of which £1.6m has been set aside to fund the Disabled Facilities Grants

within the capital programme. Plans are still being agreed for the remainder of the determination.

12.9 **Capital Receipts** – When a fixed asset is sold, provided that the sale receipt is over £10k, the income has to be treated as a "capital receipt", which means that it can only be used to fund capital expenditure. All of the monies received from the disposal of General Fund assets are available to the Council for use.

Before the start of each financial year, a Flexible Use of Capital Receipts Strategy should be prepared as part of the Annual Budget documents. This sets out the rare occasions the Council can apply to Government to capitalise expenditure that would normally be deemed as revenue. Government have advised that the Council can apply to capitalise the costs of transformational revenue reform projects. The Capital Receipts Strategy is set out in Annex 2 and details the criteria where this may be considered as per guidance issued by Government.

- 12.10 **Unsupported Borrowing** The Local Government Act 2003 gave local authorities the ability to borrow for capital expenditure above the level supported by Government Grant, provided that such action complies with the Chartered Institute of Public Finance and Accountancy (CIPFA) Code of Prudential Borrowing ("The Prudential Code"); the objectives of which are to ensure that capital investment plans are affordable, prudent and sustainable. Essentially, it provides a number of controls to ensure that the Council does not incur additional debt without fully understanding the financial implications both now and in the future. It is anticipated that borrowing of £4.275m will be required to support the General Fund Capital Programme in 2017-18.
- 12.11 **Capital Projects Reserve** Balances in this reserve were materially reduced in 2015-16 due to significant pressures on the Council's budget, and it is anticipated this will continue in 2017-18 onwards.

13.0 The Capital Programmes for 2017-18 to 2020-21

- 13.1 The following budget amount has been re-profiled from the 2016-17 capital programme to 2017-18: Port Low Carbon Plan (£239k).
- 13.2 Existing Programmes already agreed Programmes already agreed from previous years within the four year programme are the Disabled Facilities Grant, Jackey Bakers Enhancements, Margate Pedestrian Connections, Marina Management System, Boat Wash Separator, Property Enhancement Programme, Sea Wall Work East of Epple to Westgate Bay (now Minnis Bay to Grenham Bay), Operational Services Vehicle Replacement Programme, Thanet Crematorium Memorial Chapel Area, Ramsgate Port & Harbour Low Carbon Plan and Ramsgate Main Beach Timber Groyne Installation. Previously agreed projects that have been removed are the Sea Wall Refacing Work West of Westgate Bay (this work was done as part of the North Thanet Coastline project which is now completed) and the Thanet Crematorium Columbaria Provision (alternatives have now been introduced).
- 13.3 **Funding position** Due to continuing pressure on the Council's funding position, the new capital projects below are predominantly 'spend to save', income generation, health and safety and externally funded projects. The absence of a new Asset Management Plan and disposals programme has made it difficult to project the estimated capital receipt income anticipated over the next 4 years. Those capital projects that have no identified funding source and are reliant on capital receipts will need to be reconsidered by Cabinet and Council once capital receipts have been received and the projects funded.

13.4 New Capital Projects

In-Cab & Back Office System for Refuse Collection – To allow better management of service delivery and a reduction of missed bins and hence complaints.

Ramsgate Harbour Installation of Aquastores – To provide an innovative combination of bespoke storage containers and access solution from their tops to adjacent boats.

Ramsgate Harbour Replacement of Self Storage Containers – To replace the existing containers which have reached the end of their service lives.

Dreamland Car Park Enhancement – To improve the layout, drainage and lighting in the Dreamland car park.

Louisa Bay to Dumpton Gap Sea Wall Work, Westbrook to St Mildred's Sea Wall Work, Viking Bay Flood Defence Scheme, Stone Bay Sea Wall Work – Replacement/new defence measures against flooding and erosion risks.

Thanet Groyne Reconstruction – For sand retention on the beaches of Thanet.

Mill Lane and Leopold Street Multi-Storey Car Parks – To purchase these two car parks, of which the Council is currently the lessee.

Better Care Fund – For the provision of services and investment that co-ordinate health, housing and social care services and help to ensure that vulnerable and disabled people are better able to remain living within their own home.

13.5 The Draft Capital Budgets 2017-18 to 2020-21

13.6 The draft General Fund Capital Expenditure Budget for 2017-18 that is proposed for Members' approval is £8.186m (including 2016/17 re-profiling identified below), which will be funded in the main from capital grants, usable capital receipts and prudential borrowing. This is shown in summary format below.

	2016-2017 Slippage £'000	2017-18 £'000	2018-19 £'000	2019-20 £'000	2020-21 £'000
Statutory and Mandatory Schemes		1,600	1,600	1,600	1,600
Schemes continuing from prior years	239	250			
Annual Enhancement Schemes		580	330	580	2,285

Capital Grants and Contributions		3,379	2,995	2,500	4,300
Contributions from Revenue		0	0	0	0
Prudential Borrowing	239	4,036	250	500	5,050
Total Funding	239	7,947	3,400	3,155	9,660

14.0 Reserves

14.1 General Reserve

14.2 The Local Government Finance Act 1992 requires precepting authorities, such as Thanet District Council, to have regard to the level of reserves needed for future expenditure when calculating the budget requirement. Each year the Council reviews its level of reserves and a draft proposal of the recommended levels of reserves will be completed for the January Cabinet report. No change in the general reserve is currently proposed.

14.3 Earmarked Reserves

- 14.4 It is good practice to use reserves to 'save' funds over a period of time to spread the impact on the Council Tax of large fluctuating expenditures. The projected level of reserves is in the order of £4.5m.
- 14.5 At the end of the financial year 2015-16, the Council had to utilise some funds set aside in earmarked reserves to provide a provision for liabilities in relation to Hand Arm Vibrations Syndrome (HAVS) and the ongoing Court Case.
- 14.6 The Council carries significant risk by holding such low levels of reserves. A 2015 review by the Chartered Institute of Public Finance & Accountancy showed the level of reserves held across the country and it suggested that a local authority the size of Thanet would normally hold in excess of £20m of reserves. This level of reserves is also mirrored amongst neighbouring districts. However, Thanet is projected to hold £2.1m general reserves plus £4.5m earmarked reserves, i.e. a total of £6.6m which represents less than a third of the reserves typical of a similar authority, based on the CIPFA analysis. Comparing Thanet to other districts carries a degree of uncertainty, as every local authority has its own set of risks. However, the Council has suffered a number of unexpected, unbudgeted events in recent years, including Transeuropa, live animal exports, HAVS and a sizeable overspend on Dreamland heritage park. This suggests Thanet carries certain inherent risks – it owns and runs a port, it issued a CPO on a heritage theme park and it retains an in-house direct labour workforce. No other district has all these characteristics. This implies Thanet carries far more risk than average and so, even the £20m average reserves of a typical district may be on the low side.
- 14.7 The council achieved a clean audit of its 2015-16 accounts. However, the external auditor, when commenting on the council's year-end reserves position, recommended that the council should replenish its reserves by over-achieving its income generation and cost saving targets.
- 14.8 The council's joint highest corporate risk is Limited Resources, specifically: "Within the context of limited ongoing resources and minimal reserves, the council will face a substantial liability which cannot be funded without unplanned actions that could damage services. Also, lack of resources could undermine the council's ability to exploit opportunities and/or develop services."
- 14.9 In light of the council's track record, its continued risk profile, external audit views and its relatively low level of reserves, consideration will be given to the use of any earmarked reserve to be subject to the approval of the S151 Officer or his nominee. This arrangement will be reflected in the scheme of delegation and remain in force until such time as reserves are significantly replenished.

15.0 Options

The scenario presented in this report, and the recommendations following, have been drafted to meet the requirements of agreed budget strategies and to take account of prevailing economic conditions. Any of the assumptions could be varied; however, there would be too many possible permutations to present in this report.

HRA Capital Programme 2017-18 to 2021-22

SCHEME	Unit Number	2016-17 Slippage	2017-18	2018-19	2019-20	2020-21	2021-22	Scheme of Works 2017-18
	2017-18	£'000	£'000	£'000	£'000	£'000	£'000	
Major Works								
Re – Roofing	TBD	400	300	300	100	100	100	4-15 Royal Crescent roofing works deferred from 16/17 to combine with Structural Works in 17/18. Richard Court, Loughborough Court, Leona Court, Rebecca Court and Turner Court roofing due in 17/18 and 18/19.
Replacement Windows & Doors	TBD		150	110	110	110	110	An extra £40k needed for timber windows in 17/18.
Kitchen Replacements	TBD		400	400	700	700	700	Backlog complete. To be reviewed once stock condition data received.
Bathroom Replacements	TBD		200	200	300	300	300	Backlog complete. To be reviewed once stock condition data received.
Electrical Re – wiring	TBD		150	150	150	150	150	To be reviewed once stock condition data received.
Heating	TBD		415	415	415	415	415	New contract to be tendered in 16/17.
Fire Precaution Works	TBD		120	40	40	40	40	The 3 year programme will complete in 17/18.
Planned Refurbishments	TBD		50	50	50	50	50	Door entry systems identified.
Structural Repairs/ Repointing	TBD		1,050	1,050	180	180	180	Structural repairs including balconies at Balmoral Court, Janice Court, Turner Court, Rebecca Court, Chatham Court and Loughborough Court. Churchfields will need further review but structural repairs due in 17/18. Royal Crescent structural and roofing repairs due in 17/18.
ບ ຜູ້ Thermal Insulation Φ	TBD		40	10	10	10	10	Increased to £40k as works carried out when property becomes void
10 Rainwater goods	TBD		20	20	20	20	20	Ad hoc works
Lift Replacement	TBD	200	0	200	100	0	0	Programme currently under review. Two lifts have been completed. The budget has been reduced for the remaining lifts based on the costs of the completed works. Trove and Kennedy have been identified for 17/18.
Soil Stack	TBD		10	200	0	0	0	Trove Court and Kennedy House
Total Major Works		600	2,905	3,145	2,175	2,075	2,075	

Revenue Contribution to Capital								
			300	300	300	300	300	
Disabled Adaptations								This is a demand led budget and will be reviewed annually.
Estates Improvements	TBD		50	50	125	125	125	Reduced to £50k for 17/18 and 18/19. The budget will resume to £125k once the large scale structural programme has been completed.
Margate Housing Intervention			0	665	725	725	725	
								Affordable rent income to be re-invested
Total HRA Capital Expenditure		600	3,255	4,160	3,325	3,225	3,225	Stock condition surveys may identify additional works. The budget proposal is based on current stock condition data.

Agenda Item 4 Annex 3

Thanet District Council – Flexible Use of Capital Receipts Strategy

To support local authorities deliver more efficient and sustainable services, under the Local Government Act 2003 section 15(1)the government allows local authorities to spend up to 100% of their capital receipts on the revenue costs of reform projects (revenue reform costs) and subsequently issued revised guidance in March 2016.

Accordingly the Council can treat as capital expenditure, any expenditure that is designed to generate ongoing revenue savings in the delivery of public services and/or transform service delivery to reduce costs and/or transform service delivery in a way that reduces costs or demand for services for any of the public sector delivery partners.

Revenue Reform Costs must be properly incurred by 31 March 2019 and can only be met from capital receipts which have been received from 1 April 2016 to 31 March 2019. Revenue Reform Costs cannot be financed from (i) Right to Buy receipts, (ii) pre 1 April 2016 capital receipts, and/or (iii) borrowing.

Revenue Reform Costs that generate ongoing savings may be funded from the Council's capital receipts for the following:

- Sharing back-office and administrative services with one or more other council or public sector bodies;
- Investment in service reform feasibility work, e.g. setting up pilot schemes;
- Collaboration between local authorities and central government departments to free up land for economic use;
- Funding the cost of service reconfiguration, restructuring or rationalisation (staff or nonstaff), where this leads to ongoing efficiency savings or service transformation;
- Sharing Chief-executives, management teams or staffing structures;
- Driving a digital approach to the delivery of more efficient public services and how the public interacts with constituent authorities where possible;
- Aggregating procurement on common goods and services where possible, either as part of local arrangements or using Crown Commercial Services or regional procurement hubs or Professional Buying Organisations;
- Improving systems and processes to tackle fraud and corruption in line with the Local Government Fraud and Corruption Strategy;
- Setting up commercial or alternative delivery models to deliver services more efficiently and bring in revenue; and
- Integrating public facing services across two or more public sector bodies to generate savings or to transform service delivery.

On a project by project basis details of the expected savings/service transformation will be provided.

The impact on the Council's Prudential Indicators from Revenue Reform Costs being treated as capital expenditure are:

• Estimated and actual capital expenditure will increase by the amount of the Revenue Reform Costs;

- Balance Sheet resources (capital receipts) will decrease by the amount of the Revenue Reform Costs;
- The 'incremental impact on capital investment decisions on the band D council tax' and the
 ratio of 'financing costs to net revenue stream' may increase or decrease depending on
 whether the reduction in treasury interest income from the utilisation of capital receipts is
 greater or less than any relevant revenue savings/enhancements achieved from successful
 implementation of the reform project(s).

Effect

Utilisation of capital receipts to fund expenditure that would usually be funded from revenue resources diverts the receipts available for re-investment in existing assets or the creation of new ones.

To date the Council has not utilised capital receipts to fund revenue reform costs.

Agenda Item 4 Annex 5

Fees and Charges

Policy

Fees and Charges Policy

1. Purpose

This policy establishes corporate principles for charging for services provided by the Council. It aims to recognise the competing priorities the Council faces when charging residents, businesses and other users for its services, as well as the democratic environment in which the Council operates.

This policy will be reviewed at regular intervals to ensure that it continues to meet the Council's requirements.

All services must comply with this policy when setting and reviewing charges.

2. Scope & Application

Charges can be statutory or discretionary:

Statutory charges - Central Government sets the level of some charges and restricts the extent of charging in other areas. Statutory charges are identified separately in the fees and charges schedule.

Discretionary charges - The Policy for discretionary fees and charges is either full recovery of costs or maximisation of income. The Council uses discretionary charges where it believes that users should bear the cost of the service and to keep the Council Tax at an acceptable level.

This policy covers all services that can apply charges to external customers including residents, businesses and partner agencies. It excludes:

- Council tax;
- Housing rents and service charges; and
- Fees and charges where the amount is fixed by statute or are otherwise outside the Council's control.

3. Principles for Setting Charges

The Council has three key principles for setting charges:

- 1. The Council must comply with all legal requirements for setting charges and income generation. Where appropriate, this will override other factors to ensure the Council is not exposed to the risk of legal challenge.
- 2. The charging arrangements for any service must meet the full cost of providing the service and include sound arrangements for income collection. The full cost of provision includes a share of central costs and a forecast for the effects of inflation.
- 3. The appropriateness of charges set may be dependent on the wider aims and context of the service and as a result other aspects, such as the impact on service users, must be considered rather than just financial gain when setting fees and charges.

The Council will apply the following key principles in setting fees and charges each financial year.

- Charging decisions will be taken in the context of the Council's Priorities as set out in its Corporate Plan;
- Access, affordability and elasticity of demand will be considered;
- Charges will be consistent with the Council's policies e.g. consideration will be given to any disproportionate impact on vulnerable groups and those least able to pay;
- Where services are provided on a trading basis, charges will be set at the maximum level the market can bare without eroding demand such that the overall financial position of the service offering is weakened;
- Charges will be benchmarked with comparable service providers and where they are identified as being significantly lower than in other comparable authorities, increases will be fast tracked in order to bring them in line;
- Any exemptions and concessions on standard charges will be clearly justified. They will only be provided for services where benefits to the recipient groups are clearly evidenced and are consistent with the Corporate Plan. The Council will consider the adoption of a concessions policy as part of the review of fees and charges to help address inequalities within the district. Any approved policy will be included on the Council's website; and
- Enforcement charges will be set at a level proportionate to the nature of the offence and comparable charges in comparable authorities.

Application of these guiding principles aims to ensure that the Council's fees and charges are set within a framework of value for money management; whereby financial, performance, access and equity are considered fully and appropriately and decisions taken represent a transparent and balanced approach.

4. Reviewing & Increasing Charges

- Inflationary cost increases will be included in the cost of service provision (see section 3 above).
- Charges will be reviewed at least annually as part of the budget setting process.
- In order to make informed decisions, Directors and/or Service Managers will ensure that appropriate information on service users, service usage costs and benchmarking is kept and reviewed on an annual basis.
- Proposals to introduce or to amend charges will take into account the potential impact on different types of customer groups and service usage, and associated communication plan.
- Where there is no fee for a service that can be charged for or current charges represent less than the full cost of providing the service, the reasons should be reconsidered and justified under this policy as part of the annual review.
- Service users and other relevant stakeholders must be informed in advance of all proposals to introduce or to amend charges above inflation or where required by statute. Appropriate vehicles for informing service users should include service advisory groups, service user groups, customer surveys and focus groups.
- Consultation with service users and other relevant stakeholders on above inflationary prices increases will be undertaken when required by law and considered in all other cases and prior to any decisions being made.
- Care will be exercised in facilitating and interpreting consultation in view of the potential reluctance to support any increases in fees or charges. Emphasis will be placed on demonstrating that fee and charge levels set represent good value for money, considering the quality of the services provided and charge levels applied in other comparable authorities.
- Customer Equality Impact Assessments will be carried out to establish whether the Public Sector Equality Duty is engaged in the setting or review of fees and charges.
- The Directors and/or Service Managers will maintain clear records of any charging review with clear evidence justifying decisions and/or recommendations made.

5. New Charges and Trading

The Local Government Act 2003 gives the Council power to charge for discretionary services, with some limited exceptions. This may include charges for new and innovative services utilising the power to promote environmental, social and economic well-being under section 2 of the Local Government Act 2000. The income from charges, taking one

\$jthfxhs5.doc

financial year with another, must not exceed the costs of provision. The Council promotes and welcomes the use of these powers.

Services should consider whether they may utilise this power to provide a service that may benefit residents, businesses and other service users, meet the Council priorities and generate income.

The Council has powers to trade with other prescribed public bodies under the Local Government (Goods & Services) Act 1970 for goods and services and general powers to trade under Local Government Act 2003 Trading allows the Council to make a profit but there are some significant restrictions. Where a Director/Service Manager considers a service may be in a position to trade, they will first seek legal and financial advice.

Proposals for new fees and charges or to amend existing ones must be considered within the service and financial planning process or, where necessary, following appropriate consultation with service users and consultation with the portfolio holder, submitted to the Director for approval as an in-year change.

6. Management and Decision Making Framework

Questions on fees and charges will be included within the Budget Consultation exercise and the responses taken into consideration when setting the fee levels.

Decisions on setting charges and fees are subject to the Council's decision-making structures. Most charging decisions are the responsibility of the Cabinet, where they are key decisions. Some fees, particularly relating to regulatory matters, are set by full Council. Charging decisions that are politically sensitive – which may often be the case – will also be a Cabinet decision.

Advice will be taken from the Corporate Legal Team as to whether an individual decision is a key decision for Cabinet but under the Constitution, planned changes to charges where the total impact of the change would be in excess of over \pounds 50,000 are key decisions for Cabinet.

An annual schedule of fees and charges will be agreed by Cabinet as part of the budget setting process and the approved Fees and Charges pricing schedule made available on the website.

All other decisions are delegated to officers according to their Directorate's Scheme of Delegation. Directors are responsible for compliance with this policy within their area. Legal and financial advice should be sought where appropriate.

7. Income Collection & the Council's Credit Management Policy

It is vital that the Council receives the charges that it makes for its services. The following principles will apply to all charges and Heads of \$jthfxhs5.doc

Service must ensure that all contractual documentation and marketing information is available to support these:

- Wherever possible, customers should be required to pay charges in advance of the service being provided, on entry, or prior to making delivery, to minimise the risk of non-payment and to assist customers in managing their liabilities to the Council.
- Multiple payment methods will be made available to the customer, although e-payments and (where appropriate) setting up of direct debits through Thanet Gateway Plus or Contact Centre will be promoted as the preferred method. In accordance with the Council's Anti-Fraud and Corruption Policy Services offering a cash payment option will be underpinned by a robust reconciliation process.
- Where customers fail to pay for fees and charges they will be made liable for the additional costs of enforcement and Customers must be clearly aware of this additional liability.
- A lawful and reasonable refund policy will be adopted and Service users made aware of this policy.

8. Charging Policy

Each fee or charge should be identified to one of the categories in the following table;

Charging Policy	Policy Objective			
Full Commercial	The Council seeks to maximise revenue within an overall objective of generating as large a surplus (or a minimum loss) from this service			
Full commercial with discounts	As above, but with discounted concessions being given to enable disadvantaged groups to access the service			
Fair Charging	The Council seeks to maximise income but subject to a defined policy constraint. This could include a commitment made to potential customers on an appropriate fee structure. Alternatively, a full commercial rate may not be determinable or the Council may be a monopoly supplier of services.			
Cost Recovery	The Council wishes to make the service generally available, but does not wish to allocate its own resources to the service.			
Cost recovery with discounts	As above, but the Council is prepared to subsidise the service to ensure disadvantaged groups have access to the service			
Subsidised	Council policy is to make the service widely accessible, but believe users of the service should make some contribution from their own resources. Could also be due to the adverse impact a cost recovery or commercial charging policy would have on other council services.			
Nominal	The Council wishes the service to be fully available, but sets a charge to discourage frivolous usage.			
Free	Council policy is to make the service fully available			
Statutory	Charges are set in line with legal obligations.			

In applying the appropriate charging policy, the issues which may need to be considered in setting the level of fee and charge for any particular service are set out below;

Charging Policy	Points for Consideration	
Full Commercial	 Are the charges high enough for the business to be profitable? If not, consider whether we should be providing this service. Are competitors charging similar prices? Do we offer any premium in terms of service levels that customers would be prepared to pay more for? How would changes in pricing structure affect demand for the service and potentially its profitability? How does the proposed fee structure fit in with the long-term business plan for this service? 	
Fair Charging	 How do our charges compare to other providers of similar services? Has the loss of income from not charging on a full commercial basis been evaluated? Is the policy constraint justifying this charging policy still valid? 	
Cost Recovery	 Do charges recover the full costs, including overheads, capital charges, recharges and cost of collection? Is it possible to charge on a full commercial basis and if so has the loss of income from not charging on a full commercial basis been evaluated? Are members aware of the effect on demand for this service from this charging policy? What would be the effect of changing to a different policy e.g. subsidised? 	
Subsidised	 Has the cost of the subsidy been evaluated? What has been the impact on demand and on service levels from adopting this approach? 	
Nominal Free	 Does this approach fit in with the requirements of other funding streams i.e. grants? Is this approach legally required? 	
	Is there a problem of frivolous use of the service?	
Statutory	Are charges in line with statutory requirements?Are they set at the maximum permitted levels?	

FEES AND CHARGES 2017-18

Extraordinary Overview & Scrutiny Panel	21 November 2016
Report Author	Director of Corporate Resources and s151 officer
Portfolio Holder	Cllr-John Townend, Finance and Estates
Status	For Information
Classification:	Unrestricted
Key Decision	No
Ward:	All Wards

Executive Summary:

This is a covering report to present the Fees and Charges which was considered by Cabinet on 17 November.

Recommendation(s):

Overview and Scrutiny Panel is invited to comment on the attached report.

Decision Making Process

This is a covering report to present the Budget Strategy which would be considered by Cabinet on 17 November. Overview and Scrutiny Panel is invited to comment on the attached report. If need be, an extraordinary Cabinet meeting could be arranged to present any views from the Panel.

Agenda Item 5 Annex 1

2017-18 FEES AND CHARGES

Cabinet	17 November 2016
Report Author	Tim Willis, Director of Corporate Resources
Portfolio Holder	Cllr John Townend, Portfolio Holder (Financial Services & Estates)
Status	For Recommendation
Classification:	Unrestricted
Key Decision	Budget and Policy Framework
Ward:	All

Executive Summary:

A review of Fees and Charges has now been completed as part of the budget process. They are proposed to increase by a composite 5.4% on average, generating additional income of \pounds 490K in 2017/18; this excludes items such as Selective Licensing, On Street Parking and changes agreed as part of 2016-2017 ongoing savings.

Recommendation(s):

1. That Cabinet approve the Fees and Charges listed in **Annex 1** and recommend the agreed Fees and Charges to Council for approval.

CORPORATE IM	IPLICATIONS
Financial and Value for Money	The financial implications have been reflected within the body of the report. However, were members to decide to reject any of the proposals, then additional savings of the same value would be required to deliver a balanced budget.
Legal	 Section 151 of the 1972 Local Government Act requires a suitably qualified named officer to keep control of the Council's finances. For this Council, it is the Director of Corporate Resources (S151 Officer), and this report is helping to carry out that function. Local authorities have a variety of powers to charge for specific statutory services as set out in section 42 The Local Government Act 2003. The power to charge for discretionary services is not available to local authorities if there is a statutory duty to provide the service or if there is a specific power to charge for it or if there is a prohibition on charging. The Localism Act 2011 provides local authorities with a general power of competence that confers on them the power to charge for services but again subject to conditions/limitations similar to those noted above.
	Any decision made by the council must give due regard to the Public

	Sector Equality Duty section 140 the Equality Act 2010		
	Sector Equality Duty section 149 the Equality Act 2010.		
Corporate	Corporate priorities can only be delivered with robust finances and this report gives Members the opportunity to review the Council's proposed Fees and Charges for 2017-18, as part of the budget process.		
Equalities Act 2010 & Public Sector Equality Duty	Members are reminded of the requirement, under the Public Sector Equality Duty (PSED) (section 149 of the Equality Act 2010) to have due regard to the aims of the Duty at the time the decision is taken. The aims of the Duty are: (i) eliminate unlawful discrimination, harassment, victimisation and other conduct prohibited by the Act, (ii) advance equality of opportunity between people who share a protected characteristic and people who do not share it, and (iii) foster good relations between people who share a protected characteristic and people who do not share it. Protected characteristics: age, gender, disability, race, sexual orientation, gender reassignment, religion or belief and pregnancy & maternity. Only		
	Please indicate which aim is relevant to the report. Eliminate unlawful discrimination, harassment, victimisation and other conduct prohibited by the Act,		
	Advance equality of opportunity between people who share a protected characteristic and people who do not share it	✓	
	Foster good relations between people who share a protected characteristic and people who do not share it.	√	
	aim (i) of the Duty applies to Marriage & civil partnership.		
	Fees and charges where the responsible manager deems that the Sector Equality Duty has been engaged, a Customer Impact Asses has been completed.		

CORPORATE PRIORITIES (tick those relevant)√	
A clean and welcoming	✓
Environment

Supporting the Workforce	
Promoting open communications	

1. Introduction and Background

1.1 This report seeks Cabinet approval to set fees and charges for 2017-18. Fees and Charges have historically been agreed early in the budget cycle to build into individual service estimates. This covering report summarises the main points, with the detail being provided in the annexes.

- 1.2 A rigorous review of all the Council's fees and charges was undertaken by the service managers, using techniques such as benchmarking and other in-depth reviews as per the Fees and Charges policy.
- 1.3 Managers completed Customer Impact Assessments as per the requirement of the PSED and hence informed their design of the service and price.

2. The Financial Implications

2.1 Annex 1 to this report sets out the proposed level of Fees and Charges for 2017-18 in respect of services provided by the Council. As a result of reviewing all the Council's fees and charges, additional income of £490K is anticipated in 2017-18. Table 1 compares 2016/17 to the proposed 2017/18 Fees and Charges. The proposals represent a composite average price increase of 5.4% and an increase in income of 7.2%. Some charges have remained at 2016-17 prices; others have increased to reflect parity with other authorities and some to cover cost of providing the service.

Table 1				
2016/17 Total Income Increase				
£345,900	£518,610	7.2%	5.4%	
Note: 2016-17 figure is adjusted for Green Waste and Refuse to compare with 2017-18.				

2.2 The Major Changes proposed to Fees and Charges 2017-18 can be summarised in **Table 2** overleaf:

	Table 2

_	Note: A tick shows that there has been a change. A blank means no change.			

3. Options

- 3.1 Cabinet accept the Fees and Charges submitted, or Cabinet notify officers of any changes required.
- 3.2 That Cabinet recommend the agreed Fees to Council for Decision.

4. Next Steps

4.1 If Cabinet accepts the recommendations then these proposals will be considered by Overview and Scrutiny Panel on 21 November, then Council on 1 December 2016.

Decision Making Process

This is a covering report to present the Budget Strategy which would be considered by Cabinet on 17 November. Overview and Scrutiny Panel is invited to comment on the attached report. If need be, an extraordinary Cabinet meeting could be arranged to present any views from the Panel.

Council Tax Reduction Scheme 2017-18

Cabinet	17 November 2016
Report Author	Tim Willis, Director of Corporate Resources and Mark Emery, Acting Head of Customer Delivery, EK Services
Portfolio Holder	Cllr John Townend, Cabinet Member for Financial Services and Estates
Status	For Decision
Classification:	Unrestricted
Key Decision	Yes
Reasons for Key	Significant impact on communities
Ward:	All Wards

Executive Summary:

The existing Council Tax Reduction Scheme (referred to locally as the Council Tax Support Scheme (CTS)) has been in place since 1st April 2013 and has remained largely unchanged since that date. Reductions in the Revenue Support Grant have resulted in a significant shortfall in CTS funding. A new more affordable scheme from April 2017 has been subject to consultation. This report seeks approval for the final Thanet District Council Tax Reduction scheme taking into account the recent consultation exercise.

Recommendations:

The recommendations are that the existing scheme is modified to reduce the level of expenditure within the scheme by £875k (of which Thanet's reduction would be £119k) and maintain alignment with the Housing Benefit rules whilst protecting the principles of the original scheme relating to protecting the most vulnerable where possible.

- 1. That the current minimum contribution towards their Council Tax made by recipients of Council Tax Support is increased from 5.5% to 10.0%;
- 2. That the maximum savings that a customer can have and still claim Council Tax Support is reduced from £16,000 to £6,000;
- 3. That a minimum income is used within the calculation for Self Employed Customers after 12 months of self-employment;
- 4. That the maximum level of Council Tax support is restricted to the equivalent of a Band D property charge;
- 5. That only the first two children in a family will be included in the calculation for children born after April 2017 (some exceptions will apply for adoptions and multiple births);
- 6. That the Family Premium is not included in the calculation of Council Tax Support for all new working age customers;
- 7. That the period for which a late claim can be backdated is reduced to one month;
- That the period for which a customer can be absent from Great Britain and still claim Council Tax Support is reduced to 4 weeks (with some exclusions for certain occupations);

- That the element of the work-related component of Employment and Support 9. Allowance is not included in the Council Tax Support Calculation;
- 10. That TDC works towards an exceptional hardship scheme that will be introduced from April 2017 in order to provide a safety net for customers experiencing extreme difficulty paying their Council Tax; 11. That Cabinet notes the equalities impact as detailed in Annex 1.

CORPORATE IM	IPLICATIONS							
Financial and	The Council Tax Reduction scheme is funded through the Revenue							
Value for	Support Grant. The scheme has not materially changed since inception,							
Money	but the Revenue Support Grant will have reduced by approximately 30%							
-	by 2017-18. To leave the scheme un-reviewed will risk the financial							
	stability of the authority and increase the cross-subsidisation of claimants							
	from non-claimants. The CTS scheme in its current form would cost in							
	excess of £400k more in 2017-18 than the RSG funding originally							
	identified in 2013.							
Legal	Thanet District Council must approve its local CTRS at full Council by 31st							
	January 2017. If it does not do this then it is forced to adopt the previous							
	scheme (that is in force during 2016-17). The obvious disadvantage to this							
	is continuing to pay previous levels of CTRS with an increasing funding							
	gap. The financial impact is shared by Thanet District Council and the							
Corporata	major preceptors pro-rata to their share of Council Tax receipts.							
Corporate There is a risk to the provision of other services funded via the RSG should the affordability of the CTS Scheme not be reviewed.								
Equalities Act	Members are reminded of the requirement, under the Public Sector							
2010 & Public	Equality Duty (section 149 of the Equality Act 2010) to have due regard to							
Sector	the aims of the Duty at the time the decision is taken. The aims of the							
Equality Duty	Duty are: (i) eliminate unlawful discrimination, harassment, victimisation							
	and other conduct prohibited by the Act, (ii) advance equality of							
	opportunity between people who share a protected characteristic and							
	people who do not share it, and (iii) foster good relations between people							
	who share a protected characteristic and people who do not share it.							
	Protected characteristics: age, gender, disability, race, sexual orientation,							
	gender reassignment, religion or belief and pregnancy & maternity. Only							
	aim (i) of the Duty applies to Marriage & civil partnership.							
	Please indicate which aim is relevant to the report.							
	Eliminate unlawful discrimination, harassment, victimisation and							
	other conduct prohibited by the Act,							
	Advance equality of opportunity between people who share a							
	protected characteristic and people who do not share it							
	Foster good relations between people who share a protected							
	characteristic and people who do not share it.							
	Peducing the maximum level of current for working age applicants							
	Reducing the maximum level of support for working age applicants from 95% to 90%							
	This option will apply to all working age claimants regardless of their							
	protected characteristics. The primary mitigating factor will be the							
	introduction of an exceptional hardship fund (Option 13) which would be							
	available to provide assistance for those adversely affected by the							
	reduction to 90%.							
	Reducing the maximum level of support for working age applicants							

from 95% to 85% This option will apply to all working age claimants regardless of their
protected characteristics. The primary mitigating factor will be the introduction of an exceptional hardship fund (Option 13) which would be available to provide assistance for those adversely affected by the reduction to 85%.
Using a set income for self-employed earners after 1 year's self- employment
This option will only apply to working age claimants who have been self- employed for more than a year. The concern that this option has the potential to stifle entrepreneurialism is mitigated by the fact that claimants will still have a year in which to determine whether or not their self- employment is viable and will be able to generate sufficient income for their needs.
Claimants with protected characteristics will benefit from the two-tiered income floor; one for part-time, one for full-time. This will mitigate against any potential impact on any claimants (including those with protected characteristics) that are deemed to be suitable for part-time self-employment due to disability, childcare, caring responsibilities etc. and would therefore be subject to the lower income floor than those who work full-time.
In addition to this the introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.
Reduce the capital limit from the existing £16,000 to £6,000 This option will only apply to working age claimants who exceed the capital limit of £6,000 regardless of their protected characteristics. It is not expected to affect many claimants and those that would be affected are unlikely to suffer financial hardship.
The mitigating factor is that claimants with over £6,000 in capital will have the finances available to pay their council tax. At such point that any claimant affected has capital below £6,000 they would then be eligible to apply for CTS (providing that there is no evidence of intentional deprivation of capital).
In addition to this the introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.
Restrict the maximum level of Council tax support payable to the equivalent of a Band D property charge This option will only apply to working age claimants who live in band E-H properties. It will apply to these working age claimants regardless of their protected characteristics. There is concern that this option is more likely to affect claimants with larger families. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.
Removing the Family Premium for all new working age applicants

r	
p a tr tc	This option will only apply to new working age claimants who would have previously received the Family Premium. It will not affect existing working age claimants. It will apply to new working age claimants regardless of heir protected characteristics. Single females and couples are more likely to be affected, as over 95% of those currently eligible for the Family Premium are in those groups.
s w o	The mitigating factor is that it will only affect new claimants who will not suffer financial hardship as a result of this. The reason for this is that they vill not have received the Family Premium for it to be taken away. The only way that this will affect existing claimants is if they have a break in heir claim.
T b to c w A p s ((Reducing Backdating to 1 month This option will only apply to new working age claimants that apply for backdating or existing claimants that have a break in their claim and need o reclaim with backdating (the latter is an unlikely scenario due to existing claimants already being familiar with the process). It will apply to these working age claimants regardless of their protected characteristics. Aligning the backdating period from six months to one month means the potential entitlement period changes, but there is no actual reduction in support to the claimant. The introduction of an exceptional hardship fund Option 13) would be available to provide assistance for those adversely affected by this option.
B T a e	Reducing the period for which a person can be absent from Great Britain and still receive Council Tax Reduction to 4 weeks This option will apply to all working age claimants who are temporarily absent from Great Britain for more than 4 weeks. A mitigating factor is that exemptions will apply in certain circumstances such as bereavements and or certain professions such as the armed forces.
ci e a (0	t will apply to all working age claimants regardless of their protected characteristics however Government analysis has suggested that certain ethnicities such as Black/ British Black and Asian may be more likely to be affected by this option. The introduction of an exceptional hardship fund Option 13) would be available to provide assistance for those adversely affected by this option.
C A T E ir if tc	To remove the element of a Work Related Activity Component in the calculation of the current scheme for new Employment and Support Allowance applicants This option will only apply to working age claimants who are in receipt of ESA and receive the Work Related Activity Component. Households that include someone with a protected characteristic will be affected this policy if they receive this component. Overall, those groups who are more likely to be in receipt of affected benefits are more likely to see notional impacts rom this option.
b w	On an individual basis an equal number of men and women are likely to be affected. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by his option.
Т	o limit the number of dependant children within the calculation for

This option will only apply to new working age claimants who have more than two children or existing claimants only if they have a break in their claim and have to reclaim. Households that include someone with a protected characteristic will be affected by this policy if this applies to them. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.
To introduce a scheme, in addition to Council Tax Reduction, to help applicants suffering exceptional hardship This option is the primary mitigating factor for all of the options that could have a financial impact on claimants to such an extent that one or more of

1.0 Introduction and Background

- 1.1 Council Tax Reduction (referred to locally as Council Tax Support) is a means tested locally defined Council Tax discount and replaced Council Tax Benefit in April 2013. The current Thanet District Council scheme closely mirrors the former Council Tax Benefit and is administered in a similar way (and often at the same time) as an award of Housing Benefit. In 2015-16 Thanet District Council awarded £13.9m in Council Tax Reduction on behalf of all precepting bodies. The cost to Thanet District Council of those awards was £1.9m.
- 1.2 Each local authority is required is set its own Council Tax Reduction scheme on an annual basis. The Thanet District Council working age schemes agreed since 2013 have been amongst the most generous in the country, recognising the outcome of the previous consultation where there was a consensus of protecting the most vulnerable in local society.
- 1.3 Each annual scheme must be agreed by Council by 31st January to come into effect from 1st April of that year. In the event that a new scheme is not agreed, the previous year's scheme will roll forward to the next year.
- 1.4 Whilst Council Tax Reduction is a local discount, the rules around pension age customers are defined and the local authority has no discretion to vary that element of the scheme. However the scheme for working age customers is <u>not</u> defined and the local authority has full discretion over the design and generosity (cost) of the scheme. This means that where there is a need to reduce scheme cost, that burden can only be borne by the working age recipients.
- 1.5 When Council Tax Benefit was abolished in 2013, responsibility for Council Tax Reduction was passed to Local Authorities. The funding for Council Tax Reduction was

added to the Revenue Support Grant (RSG), but was subject to an arbitrary 10% reduction from the previous amount paid under Council Tax Benefit. The amount included within the RSG has not been separately identified since 2013 and since then, central government has reduced the overall RSG by 30%, whilst expenditure on the CTS scheme has remained largely static.

1.6 Thanet District Council previously agreed to lessen the impact of the 10% funding cut in 2013 by increasing the amount of Council Tax it collected from the general population through the removal of some of discounts that were available at that time. This additional revenue reduced the amount that needed to be saved from the Council Tax Reduction scheme and for Thanet District Council, working age customers have been required to pay a minimum of 5.5% towards their Council Tax. This has not previously been reviewed despite the increasing funding shortfall.

2.0 The current situation and the need for review

- 2.1 Council Tax Reduction for Thanet District Council is managed by EK Services (EKS) alongside the schemes for Canterbury City Council and Dover District Council. The existing scheme was developed jointly with the EK partner authorities and benefits from shared principles, modelling and methodology. The principles of the schemes are common across all the authorities in Kent, with the main exception that the three East Kent districts raised additional funding through the earlier removal of certain alternative discounts in order to have a lower CTS customer contribution rate.
- 2.2 Following the previous consultation, the CTS scheme at Thanet District Council was decided to be broadly based upon the previous Council Tax Benefit scheme rules with the following broad changes:
 - Minimum 5.5% contribution towards the Council Tax charge for all working age recipients
 - Removal of Second Adult Rebate.
- 2.3 The major preceptors have provided each authority with an additional £125k of funding to contribute towards the additional costs incurred during the recovery of Council Tax payable by CTS recipients. This funding has been used by EKS to fund a number of posts focused on Council Tax collection and compliance. Major preceptors are currently negotiating an equivalent scheme for the 2017-18 financial year.
- 2.4 The financial gap between scheme expenditure and RSG funding has been growing since 2013 and currently stands at over £400k per annum. Ongoing monitoring has highlighted the risk in continuing with the current arrangements without significant reform or identification of alternative funding streams.
- 2.5 The major preceptors across Kent agreed to fund consultancy to review the viability of the existing scheme and to recommend options for change, in order to increase the affordability of the scheme. Based upon the recommendations from that consultancy, Thanet District Council undertook public consultation to gain views on those options.
- 2.6 The consultation ran from 27th June to 16th September 2016 and the following activity was undertaken:
 - Explanatory information and a survey were made available online.
 - Explanatory 'You Tube' videos explained each option in further detail.

- All working age customers (9557) were sent a covering letter, paper information booklet and paper answer booklet with an invitation to complete either the form or complete an online survey.
- 5% of the remaining households (3334) were sent a covering letter inviting them to complete an online survey.
- Copies of the information booklet and answer booklet were available for pick up at Council face to face outlets.
- Four 'Drop In' sessions were held where members of the public could ask questions about the consultation.
- A statement was added to every Housing Benefit Notification letter and every CTS notification letter issued between 26th June and 14th September 2016 advising customers that the consultation was running.
- Community groups were invited to take part in the consultation
- The consultation was promoted in the Council's Twitter feed.
- The consultation was promoted on the Council's Facebook page.

3.0 Options

- 3.1 The council consulted on fourteen different options. Some of these related to direct alterations to the scheme. Others related to structural changes to keep the scheme closely aligned to the known changes to the Housing Benefit rules.
- 3.2 The options consulted on were:
 - 1) Increase the minimum contribution working-age recipients will need to pay towards their council tax charge from 5.5% to 10%.
 - 2) Increase the minimum contribution working-age recipients will need to pay towards their council tax charge from 5.5% to 15%.
 - 3) Use a minimum set income for self-employed earners after one year.
 - 4) Reduce the savings, capital and investment limit from £16,000 to £6,000
 - 5) Introduce a standard weekly charge of £10 for all new claimants who have a nondependant living in their property.
 - 6) Restrict the maximum level of council tax support payable to the equivalent of an average Band D property charge.
 - 7) Restrict the maximum level of council tax support payable to the equivalent of a Band C property charge.
 - 8) Remove the family premium for all new working-age claimants.
 - 9) Reduce backdating of new claims to one month.
 - 10) Reduce the period for which a person can be absent from Great Britain and still receive council tax support to four weeks.
 - 11) Remove the element of a Work Related Activity Component in the calculation of the current scheme for new Employment and Support Allowance applicants.
 - 12) Limit the number of dependent children within the calculation for council tax support to a maximum of two.
 - 13) Introduce a scheme, in addition to council tax support, to help applicants suffering exceptional hardship.
 - 14) To take any Child Benefit paid to a claimant or partner into account in full in the calculation of Council Tax Support.
- 3.3 As well as seeking views on each of those options and leaving the scheme unchanged, residents were asked to identify their top four options. Residents were also invited to comment on the options or put forward their own ideas.

- 3.4 Residents were advised that three further options had been considered but were not likely to be suitable in the long term. Comments were sought on these options. They were:
 - Increase the levels of Council Tax This was not considered viable because Thanet District Council is already planning to increase its Council Tax by the amounts allowed without triggering a local referendum. To increase Council Tax further in order to supplement the CTS scheme would require a district wide referendum for which TDC would be liable to bear the cost. This cost would outweigh any likely increase in revenue that would be raised by such a move
 - Reduce funding on other Council services This activity is already ongoing with each service that Thanet DC delivers being subject to budget restrictions
 - Use Council reserves This was not considered to be a viable approach because it does not address the structural issues caused by a lack of underfunding within the scheme. Additionally, TDC has very low levels of useable reserves.
- 3.5 Some 970 responses were received from the consultation, representing a 7.5% return rate of the invitation to give views. Residents were asked whether they agreed with, and were invited to add comments for, each option. All comments were captured and collated. The highest number of responses were from existing Council Tax Support customers, with their responses forming 86% of the total.
- 3.6 The numeric results from the consultation are shown below. The % in agreement is the % of respondents who indicated that they did agree, compared with the number that didn't agree. It excludes any respondent who selected 'do not know' or did not provide a response. A full numerical breakdown and all comments made during the consultation are available on request.

*£397k is a maximum figure for self employed customers and assumes no change in employment status for those affected customers.

- 3.7 Residents were asked whether the Council should keep the existing scheme unchanged. Of the respondents that expressed an opinion, 78% considered that the scheme should remain unchanged. Although there was strong support for this option, this would only be achievable on a long term basis through the redirection of funding from other services or the raising of Council Tax, with the latter triggering a district wide referendum on raising the level of Council Tax. The cost of holding a referendum would fall to the district and would be disproportionate to the additional income that would be raised should the general public support the move. It is therefore **not** recommended to take this option forward.
- 3.8 Residents were asked about Option 1 Whether every customer's minimum contribution towards their Council Tax should increase from 5.5% to 10%. Of the 775 respondents that expressed an opinion, 32% (247) agreed with this option. This approach, whilst not the most popular, is widely accepted as the fairest way to reduce funding with all working age households impacted by the same percentage and no

community group unfairly disadvantaged. Analysis of the 247 responses revealed that there was a favourable response from 21% of the respondents in receipt of CTS, and a 61% favourable response from customers not in receipt of CTS. There was greater support for this option than Option 2 (increasing the minimum contribution to 15%) and it **is** recommended that this is taken forward in conjunction with other options as part of a package of savings.

- 3.9 Residents were asked about Option 2 Whether every customer's minimum contribution towards their Council Tax should increase from 5.5% to 15%. Of the respondents that expressed an opinion, 14% agreed with this option. Whilst this would reduce scheme expenditure significantly, there was little support for this approach. It would also have a greater impact on the Council Tax collection rate as greater amounts would need to be collected from all working age claimants. It is therefore <u>not</u> recommended to take this option forward.
- 3.10 Residents were asked about Option 3 Whether every self-employed customer should be treated as having a minimum set income after 12 months. Of the respondents that expressed an opinion, 54% agreed with this option. Whilst there was strong support for this approach, there is a need to consider the balance between supporting developing businesses and the potential for stifling entrepreneurs within the district. However it is considered that the 'grace' period of 12 months does give time for a business to become more established and the proposed income is based on the national minimum wage. This would also complement the approach taken to Self Employed income taken within Universal Credit. It <u>is</u> therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.11 Residents were asked about Option 4 Whether the maximum level of savings and investments a customer could hold whilst still receiving Council Tax Support should reduce from £16,000 to £6,000. Of the respondents that expressed an opinion, 51% agreed with this option. It was generally felt that customers with access to capital over £6,000 should not receive assistance from the other tax payers. It **is** therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.12 Residents were asked about Option 5 Whether there should be a reduction in Council Tax Support of £10 per week for each non dependant in the property. Of the respondents that expressed an opinion, 43% agreed with this option. However, there is a risk with this approach that some vulnerable households with more than one non-dependant would have all of their assistance removed. This option may also lead to greater incidences of non-dependants being forced to leave their homes and a corresponding increase in use of Housing Options resource, which would outweigh the savings this option would generate. It is therefore <u>not</u> recommended to take this option forward.
- 3.13 Residents were asked about Option 6 Whether the maximum amount of Council Tax Support payable would be restricted to the equivalent of a Band D property. Of the respondents that expressed an opinion, 48% agreed with this option. The feeling from respondents was that residents in larger properties should downsize. This is difficult to achieve where there is little money to support such a move as many recipients may be capital rich and cash poor; however on balance and considering the consultation responses, it **is** recommended to take this option forward.
- 3.14 Residents were asked about Option 7 Whether the maximum amount of Council Tax Support payable would be restricted to the equivalent of a Band C property. Of the respondents that expressed an opinion, 33% agreed with this option. This would impact

significantly on recipients who were previously able to support themselves and for whom downsizing is problematic. This would have an impact on a larger number of households than option 6 and is supported by fewer respondents. It is therefore <u>not</u> recommended to take this option forward.

- 3.15 Residents were asked about Option 8 Whether the family premium should not be used in the calculation of Council Tax Support for all new customers (to maintain alignment with the Housing Benefit calculations). Of the respondents that expressed an opinion, 37% agreed with this option. There was lower support for this option but many of the respondents were referring to a reduction in ongoing payments. The removal of the family premium is a change that will be taking place within the Housing Benefit rules from April 2017 and this proposal is one of those that have been made to maintain the alignment between Council Tax Support and the Housing Benefit rules. Existing customers will be protected from these changes, and to remove the premium in one benefit but allow it in Council Tax Support is likely to result in significant confusion and ongoing contact from worried customers which will increase rather than decrease the cost to the authority of providing the service. It <u>is</u> therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.16 Residents were asked about Option 9 Whether the period of backdating allowed be reduced to one month. Of the respondents that expressed an opinion, 58% agreed with this option. This option was presented to maintain the alignment between Council Tax Support and the Housing Benefit rules. It received strong support from respondents. It <u>is</u> therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.17 Residents were asked about Option 10 Whether the period for which a customer can be absent from Great Britain and still receive CTS be reduced to four weeks (to maintain alignment with the Housing Benefit calculations). Of the respondents that expressed an opinion, 78% agreed with this option. This option was presented to maintain the alignment between Council Tax Support and the Housing Benefit rules. It received very strong support from respondents. It <u>is</u> therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.18 Residents were asked about Option 11 Whether the element of the Work Related component of Employment & Support Allowance should be removed from new applicants (to maintain alignment with the Housing Benefit calculations). Of the respondents that expressed an opinion, 54% agreed with this option. This option was presented to maintain the alignment between Council Tax Support and the Housing Benefit rules. It received support from respondents and would not have any impact on existing customers. It <u>is</u> therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.19 Residents were asked about Option 12 Whether the number of dependants used in the calculation of CTS should be restricted to two (to maintain alignment with the Housing Benefit calculations). Of the respondents that expressed an opinion, 61% agreed with this option. This option was presented to maintain the alignment between Council Tax Support and the Housing Benefit rules. It received strong support from respondents. Existing customers would be protected and exemptions would apply for adoptions and multiple births. It <u>is</u> therefore recommended that this is taken forward in conjunction with other options as part of a package of savings.
- 3.20 Residents were asked about Option 13 Whether the Council should introduce an exceptional hardship fund to help customers impacted by restrictions to CTS. Of the respondents that expressed an opinion, 87% agreed with this option. There was very

strong support for this option and it <u>is</u> therefore recommended that this is taken forward to help reduce the impact of the recommended options for the most vulnerable customers experiencing extreme hardship.

- 3.21 Residents were asked about Option 14 Whether Child Benefit and Child Maintenance should be included as income in the calculation of the CTS award. Of the respondents that expressed an opinion, 51% agreed with this option. There was strong support for this, but there was concern that this approach would result in increased child poverty. As this is contrary to stated Council intentions, it is therefore <u>not</u> recommended to take this option forward.
- 3.22 When looking at the recommended options as part of a package of changes, options 8, 9, 10, 11 and 12 do not generate specific savings but as part of the alignment with the changes to Housing Benefit will result in an avoidance of additional scheme costs for new claimants after 1st April 2017. Existing customers will not be affected by these changes while they remain continuously entitled to Council Tax Support.
- 3.23 Options 1, 3, 4 and 6 when modelled together would impact on existing customers and would reduce scheme expenditure by approximately £875k. This reduction in expenditure is made directly by increasing the Council Tax payable of those affected and therefore is shared between all the preceptors on the established pro-rata basis. Thanet's pro rata share of the council tax is currently 13.67% and on this basis, Thanet's expenditure would decrease by around £119k.
- 3.24 Option 13 would provide the necessary safety net for customers disproportionately affected by increases in Council Tax payable and will have an as yet unknown cost.

4.0 Next Steps

4.1 It is recommended that Cabinet note the Equalities Impact Assessment in Annex 1 and approve the combination of options 1, 3, 4, 6, 8, 9, 10, 11, 12 and 13 detailed above in the new Council Tax Support scheme and refer to full Council.

ANNEX 1

Name of Policy/Strategy/Service/Function Proposal

The Council Tax Reduction Scheme for 2017-18

The Aims, Objectives and Expected Outcomes:

Since 1st April 2013, the Council has maintained a local Council Tax Reduction scheme. This replaced the national Council Tax Benefit scheme, which ended on 31st March 2013. Council Tax Reduction helps provide support to council taxpayers who have a low income. It supports the taxpayers by providing a reduction in the actual amount in Council Tax payable.

The Council has the ability to determine the level of support given to working age applicants only. The scheme for pension age applicants is determined by Central Government and therefore the ability of the Council to vary that part of the scheme is limited and can only enhance the national scheme in any event.

When Council Tax Reduction was first introduced, Central Government provided a specified level of grant, which was approximately 10% lower than the amounts previously given (pre 1st April 2013). This has now been replaced by a general duty to provide a scheme and funding is not separately identified within the grants given to the Council.

After the original consultation, the Council decided to introduce a Council Tax Reduction scheme that differed from the original Council Tax Benefit in that instead of granting a maximum level of support of 100% it would limit the maximum support to 94.5%.

Changes since 2013

Page

Since the introduction of Council Tax Reduction, the overall scheme adopted by the Council has remained broadly the same, with only applicable amounts and nondependant charges being uprated as well as minor changes being made to mirror changes to the Housing Benefit scheme. Central Government has also continued to uprate changes to applicable amounts for pension age applicants, again to mirror the changes in Housing Benefit.

The Proposed Scheme for 2017-18

A full review has been undertaken of the effectiveness of the current Council Tax Reduction scheme and a public consultation has been undertaken to gather views as to whether the current scheme should be changed. A summary of the results of the consultation are provided together with this Equality Impact Assessment. The Council is minded to make changes to the working age scheme to meet the following:

- The more accurate targeting of support to those working age applicants who most need it;
- The need to change the scheme, not only to align with proposed changes to Housing Benefit, but also to align the scheme with the approach taken by the Department for Work and Pensions in the creation, introduction and roll out of Universal Credit; and

To address potential shortfalls in funding due to the continued reduction in Central Government grants.

It should be noted that the changes, if made, would only apply to the working age scheme although the consultation will be open to all Council Taxpayers.

The main proposals of the scheme are as follows. Any changes if adopted will be effective from 1st April 2017:

- Option 1 Reducing the maximum level of support for working age applicants from 94.5% to 90%
- Option 2 Reducing the maximum level of support for working age applicants from 94.5% to 85%
- Option 3 Using a set income for self-employed earners after 1 year's self-employment
- Option 4 Reduce the capital limit from the existing £16,000 to £6,000
- Option 5 To introduce a standard level of non dependant deduction of £10 for all claimants who have non dependants resident with them
- Option 6 To restrict the maximum level of Council Tax Reduction payable to the equivalent of a Band D charge
- Option 7 To restrict the maximum level of Council Tax Reduction payable to the equivalent of a Band C charge
- Option 8 Removing the Family Premium for all new working age applicants
- Option 9 Reducing Backdating to 1 month
- Option 10 Reducing the period for which a person can be absent from Great Britain and still receive Council Tax Reduction to 4 weeks
- Option 11 To remove the element of a Work Related Activity Component in the calculation of the current scheme for new Employment and Support Allowance applicants
- Option 12 To limit the number of dependant children within the calculation for Council Tax Reduction to a maximum of two
- Page 1127 Option 13 – To introduce a scheme, in addition to Council Tax Reduction, to help applicants suffering exceptional hardship
 - Option 14 To take any Child Benefit or Child Maintenance paid to a claimant or partner into account in full in the calculation of Council Tax Reduction
 - The Council also consulted on whether they should maintain the current scheme for working age applicants or whether it should consider the following alternatives: Increase the Council Tax; or find the additional income by cutting other services; or use reserves to provide the income

Scope of the Equality Impact Assessment

The following identifies the potential impact on claimants and particularly groups of claimants. It should be noted that Pensioners will continue to be protected under the rules prescribed by Central Government. These broadly replicate council tax benefit scheme, which existed prior to 1st April 2013.

Central Government has not been prescriptive in how it does this but points to the Council's existing responsibilities including the Child Poverty Act 2010, the Disabled Person Act 1986 and the Housing Act 1996 as well as the public sector equality duty in section 149 of the Equality Act 2010.

Decision-makers are reminded of the requirement under the Public Sector Equality Duty (s149 of the Equality Act 2010) to have due regard to (i) eliminate unlawful discrimination, harassment, victimisation and other conduct prohibited by the Act, (ii) advance equality of opportunity between people from different groups, and (iii) foster good relations between people from different groups.

A review of the impact of the current CTR Scheme in April 2016 is based on a 5% reduction of the original council tax benefit. Data has been analysed for those protected characteristics where we hold data: disability, carers, sex and age. The review has found that:

- 39% of claimants have a disability.
- 5% of claimants have a carer in the household.
- 62% of claimants are female and 38% are male.
- 8% of claimants are aged 18-24, 23% are aged 25-34, 24% are aged 35-44, 26% are aged 45-54 and 18% are aged 55-64.

Pension age claimants have not been included in the analysis as they are protected.

Page 1 Disability and Carer Characteristics • All claimants (including thos

- All claimants (including those with protected characteristics) have received a reduction in their benefit amount.
- People with disabilities now receive more per week, on average, than people without disabilities.
- Claimants with a carer in the household continue to receive more per week, on average, than claimants without a carer in the household.

These factors are probably as a result of our scheme treating people with disabilities and carers more favourably by disregarding some incomes, resulting in a higher council tax reduction.

Sex and Age Characteristics

- Eligibility for council tax support is not based on a person's sex or age. Any differences between the average weekly amounts received by these claimant groups are likely to be as a result of other factors.
- Males continue to receive more per week, on average, than females.
- The difference in average weekly amounts received across age groups appears to have reduced.
- Those aged 45-54 receive the highest weekly amount, on average.
- Those aged 18-24 receive the lowest weekly amount, on average.

We do not collect information about the following characteristics from claimants as it is not relevant to the calculation of council tax reductions:

- Religion or belief
- Sexual orientation
- Gender reassignment
- Marital or civil partnership status
- Pregnancy or maternity

Actions to mitigate any identified impacts

The possible introduction of an Exceptional Hardship Scheme has been included as an option for consideration by the Council. The design of the Exceptional Hardship Scheme is that it will allow any claimant to apply for additional support. It will examine their overall circumstances; examine both income and expenditure with a view to determining whether exceptional hardship exists. Under the scheme, claimants will potentially be able to receive additional support up to the full level of their Council Tax. The individual mitigations for each option are below:

Option 1 – Reducing the maximum level of support for working age applicants from 95% to 90%

This option will apply to all working age claimants regardless of their protected characteristics. The primary mitigating factor will be the introduction of an exceptional hardship fund (Option 13) which would be available to provide assistance for those adversely affected by the reduction to 90%.

Option 2 – Reducing the maximum level of support for working age applicants from 95% to 85%

This option will apply to all working age claimants regardless of their protected characteristics. The primary mitigating factor will be the introduction of an exceptional hardship fund (Option 13) which would be available to provide assistance for those adversely affected by the reduction to 85%.

Option 3 – Using a set income for self-employed earners after 1 year's self-employment

This option will only apply to working age claimants who have been self-employed for more than a year. The concern that this option has the potential to stifle entrepreneurialism is mitigated by the fact that claimants will still have a year in which to determine whether or not their self-employment is viable and will be able to generate sufficient income for their needs.

Claimants with protected characteristics will benefit from the two-tiered income floor; one for part-time, one for full-time. This will mitigate against any potential impact on any claimants (including those with protected characteristics) that are deemed to be suitable for part-time self-employment due to disability, childcare, caring responsibilities etc. and would therefore be subject to the lower income floor than those who work full-time.

In addition to this the introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 4 - Reduce the capital limit from the existing £16,000 to £6,000

This option will only apply to working age claimants who exceed the capital limit of £6,000 regardless of their protected characteristics. It is not expected to affect many claimants and those that would be affected are unlikely to suffer financial hardship.

The mitigating factor is that claimants with over £6,000 in capital will have the finances available to pay their council tax. At such point that any claimant affected has capital below £6,000 they would then be eligible to apply for CTS (providing that there is no evidence of intentional deprivation of capital).

In addition to this the introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 5 - To introduce a standard level of non dependant deduction of £10 for all claimants who have non dependants resident with them

This option will only apply to working age claimants who have a non dependant living in the household. It will apply to these working age claimants regardless of their protected characteristics. The mitigating factor is that most non-dependants will have some form of income, from benefits or employment. It is reasonable to expect them to contribute some of this income to the household which would go some way towards lessening the financial impact on the claimant.

There is concern that this option is more likely to affect claimants with larger families. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 6 - To restrict the maximum level of Council Tax Reduction payable to the equivalent of a Band D charge

This option will only apply to working age claimants who live in band E-H properties. It will apply to these working age claimants regardless of their protected characteristics.

There is concern that this option is more likely to affect claimants with larger families. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 7 - To restrict the maximum level of Council Tax Reduction payable to the equivalent of a Band C charge

This option will only apply to working age claimants who live in band D-H properties. It will apply to these working age claimants regardless of their protected characteristics.

There is concern that this option is more likely to affect claimants with larger families to a greater extent than Option 6. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 8 - Removing the Family Premium for all new working age applicants

This option will only apply to new working age claimants who would have previously received the Family Premium. It will not affect existing working age claimants. It will apply to new working age claimants regardless of their protected characteristics. Single females and couples are more likely to be affected, as over 95% of those currently eligible for the Family Premium are in those groups.

The mitigating factor is that it will only affect new claimants who will not suffer financial hardship as a result of this. The reason for this is that they will not have received the Family Premium for it to be taken away. The only way that this will affect existing claimants is if they have a break in their claim and then reclaim. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 9 - Reducing Backdating to 1 month

This option will only apply to new working age claimants that apply for backdating or existing claimants that have a break in their claim and need to reclaim with backdating (the latter is an unlikely scenario due to existing claimants already being familiar with the process). It will apply to these working age claimants regardless of their protected characteristics.

Aligning the backdating period from six months to one month means the potential entitlement period changes, but there is no actual reduction in support to the claimant. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 10 - Reducing the period for which a person can be absent from Great Britain and still receive Council Tax Reduction to 4 weeks

This option will apply to all working age claimants who are temporarily absent from Great Britain for more than 4 weeks. A mitigating factor is that exemptions will apply in certain circumstances such as bereavements and for certain professions such as the armed forces.

It will apply to all working age claimants regardless of their protected characteristics however Government analysis has suggested that certain ethnicities such as Black/ British Black and Asian may be more likely to be affected by this option. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 11 - To remove the element of a Work Related Activity Component in the calculation of the current scheme for new Employment and Support Allowance applicants

This option will only apply to working age claimants who are in receipt of ESA and receive the Work Related Activity Component. Households that include someone with a protected characteristic will be affected this policy if they receive this component. Overall, those groups who are more likely to be in receipt of affected benefits are more likely to see notional impacts from this option.

On an individual basis an equal number of men and women are likely to be affected. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 12 - To limit the number of dependant children within the calculation for Council Tax Reduction to a maximum of two

This option will only apply to new working age claimants who have more than two children or existing claimants only if they have a break in their claim and have to reclaim. Households that include someone with a protected characteristic will be affected by this policy if this applies to them.

Analysis undertaken by the Government suggests that of those households currently in receipt of any welfare benefit those which contain someone with a disability are less likely to have children, relative to those households which do not. Therefore of households in receipt of welfare those containing someone with a disability are less likely to be affected.

Ethnic minority households may be more likely to be impacted by these changes. This is because they are, on average, more likely to have larger families. The introduction of an exceptional hardship fund (Option 13) would be available to provide assistance for those adversely affected by this option.

Option 13 – To introduce a scheme, in addition to Council Tax Reduction, to help applicants suffering exceptional hardship

This option is the primary mitigating factor for all of the options that could have a financial impact on claimants to such an extent that one or more of the options causes exceptional hardship.

Option 14 - To take any Child Benefit or Child Maintenance paid to a claimant or partner into account in full in the calculation of Council Tax Reduction

This option will only apply to working age claimants who receive Child Benefit and/ or Child Maintenance. Households that include someone with a protected characteristic will be affected by this policy if this applies to them.

Analysis undertaken by the Government suggests that of those households currently in receipt of any welfare benefit those which contain someone with a disability are less likely to have children, relative to those households which do not. Therefore of households in receipt of welfare those containing someone with a disability are less likely to be affected.

Ethnic minority households may be more likely to be impacted by these changes. This is because they are, on average, more likely to have larger families. The introduction of an exceptional hardship fund (Option 13) will be there to provide assistance for those adversely affected by this option.

Appendix A – Full Analysis of the effects of proposed changes

The following tables provide details of the expected effects of the changes (where available) on the working age claimants within the Council's area.

Census 2011

Population data - Working Age	Female	Male	20-24	25-34	35-44	45-54	55-64
(Census 2011)							
Number	37,900	35,400	7,400	14,100	16,200	17,800	17,700
Proportion (of working age)	52%	48%	10%	19%	22%	24%	24%

2015/16 CTS caseload overview

Working Age	All	Disability	No	Carer	Non	Female	Male	18-24	25-34	35-44	45-54	55-64
	Claimants		Disability		Carer

2	Average difference between actual CT liability and notional Band D liability (per week)	£4.15	£8.26	£3.25	£10.05	£3.23	£2.83	£6.09	-£4.64	£0.15	£0.68	£5.44	£6.75
2	Differences between groups		£5.	01	£6	.82	£3	.26					

Option 7 - To restrict the maximum level of Council Tax Reduction payable to the equivalent of a Band C charge

	All Claimants	-	No Disability		Non Carer	Female	Male	18-24	25-34	35-44	45-54	55-64
	Claimants		Disability		Carci							
Number of claimants (above band C)	384	97	287	37	347	245	139	8	42	111	132	91
Proportion of claimants		25%	75%	10%	90%	64%	36%	2%	11%	29%	34%	24%
Average benefit paid (per week)	£23.20	£25.42	£22.57	£27.76	£22.72	£22.44	£24.54	£14.11	£21.47	£21.85	£24.15	£25.07
Average difference between actual CT liability and notional Band C liability (per week)	£4.64	£6.86	£4.01	£9.20	£4.16	£3.88	£5.98	-£4.45	£2.91	£3.29	£5.59	£6.51
Differences between groups		£2.	85	£5	.04	£2	.10					

Option 8 - Removing the Family Premium for all new working age applicants

The table below shows the total number of claimants with the Family Premium but this option applies to new claimants only so would not affect this many people.

Working Age	All Claimants	,	No Disability		Non Carer	Female	Male	18-24	25-34	35-44	45-54	55-64
Number of claimants	2462	203	2259	189	2273	1814	648	186	936	846	424	70
Proportion of claimants		8%	92%	8%	92%	74%	26%	8%	38%	34%	17%	3%
Average benefit paid (per week)	£14.44	£18.52	£14.07	£17.89	£14.15	£13.60	£16.78	£12.22	£14.04	£14.90	£15.12	£15.85
Differences between groups		£4.	£4.45		.74	£3	.18					

With this in mind a more accurate number of claimants likely to be affected by this option is 27% of new working age claims. The number of new working age claims for 2015/16 was 2,420. Therefore an estimated 653 new working age claimants will not receive the £17.45pw Family Premium that existing claimants continue to receive as part of their entitlement. This should not be considered as a loss to the claimants as they have not received this for it to be taken away, but it can be considered as a saving.

Working Age	Yearly impact
Estimated loss to existing claimant regardless of whether or not they currently receive the Family Premium	£0.00
Estimated loss to new claimant if they would have received the Family Premium based on their circumstances	£181.48

Option 9 - Reducing Backdating to 1 month

Taking an assumed average period of backdating for 2015/16 as 8 weeks and <u>an average weekly CTS entitlement of £15.97</u>, a claimant would currently receive backdating totalling £127.76. By reducing the period of backdating to 1 month that claimant would now receive £69.20 resulting in a loss of £58.56. In 2015/16 there were <u>207</u> <u>backdated claims</u> meaning that based on these assumptions there could be <u>a saving of just over</u> £12,000.00 by reducing the period of backdating to 1 month.

Working Age	Yearly impact
Estimated loss to existing claimant that doesn't have a break and doesn't have to claim backdating in future	£0.00
Estimated loss to new claimant that applies for backdating or existing claimant that has a break and has to reclaim in future	£58.56

Option 10 - Reducing the period for which a person can be absent from Great Britain and still receive Council Tax Reduction to 4 weeks

Taking an assumed <u>average absence of 10 weeks</u>, a claimant would currently continue to receive a total of £159.70 in CTS whilst being absent from Great Britain. Under the reduced period of 4 weeks a claimant would instead receive £63.88 which would result in a loss of £95.82. There were an estimated <u>48 claims for which CTS was paid for a temporary absence</u> (0.5% of claims) meaning that based on these assumptions there could be <u>a saving of around £4,600</u> for reducing temporary absence to 4 weeks.

Working Age	Yearly impact
Estimated loss to existing claimant that doesn't have a temporary absence from Great Britain of more than 4 weeks	£0.00
Estimated loss to all claimants that have one period of temporary absence from Great Britain of more than 4 weeks	£95.82

Page 1137

Option 11 - To remove the element of a Work Related Activity Component in the calculation of the current scheme for new ESA applicants

1	Working Age	Yearly impact
	Estimated loss to existing claimant that doesn't receive ESA or receives ESA but doesn't receive this component	£0.00
	Estimated loss to new claimant that receives ESA and would have received this component	£0.00

Taking an assumed average weekly CTS entitlement of £14.05 based on a family of five with one adult working and three dependants they would currently receive annual CTS of £730.60. However if this family made a new claim and only two of the three dependants were included in the calculation then they would not be entitled to any CTS.

Working Age	Yearly impact
Estimated loss to existing claimant with or without dependant children, irrespective of the number of dependant children	£0.00
Estimated loss to new claimant with more than two dependant children or existing claimant with more than two dependant	
children, only if there is a break in the claim and they have to reclaim in future	£730.60

Option 13 – To introduce a scheme, in addition to Council Tax Reduction, to help applicants suffering exceptional hardship

Available to all recipients of council tax reduction subject to a successful application

Option 14 - To take any Child Benefit or Child Maintenance paid to a claimant or partner into account in full in the calculation of Council Tax Reduction

Child Benefit

	All Claimants	,	No Disability		Non Carer	Female	Male	18-24	25-34	35-44	45-54	55-64

THANET DISTRICT COUNCIL DECLARATION OF INTEREST FORM

Do I have a Disclosable Pecuniary Interest and if so what action should I take?

Your Disclosable Pecuniary Interests (DPI) are those interests that are, or should be, listed on your Register of Interest Form.

If you are at a meeting and the subject relating to one of your DPIs is to be discussed, in so far as you are aware of the DPI, you <u>must</u> declare the existence **and** explain the nature of the DPI during the declarations of interest agenda item, at the commencement of the item under discussion, or when the interest has become apparent

Once you have declared that you have a DPI (unless you have been granted a dispensation by the Standards Committee or the Monitoring Officer, for which you will have applied to the Monitoring Officer prior to the meeting) you **must:-**

- 1. Not speak or vote on the matter;
- 2. Withdraw from the meeting room during the consideration of the matter;
- 3. Not seek to improperly influence the decision on the matter.

Do I have a significant interest and if so what action should I take?

A significant interest is an interest (other than a DPI or an interest in an Authority Function) which:

- Affects the financial position of yourself and/or an associated person; or Relates to the determination of your application for any approval, consent, licence, permission or registration made by, or on your behalf of, you and/or an associated person;
- 2. And which, in either case, a member of the public with knowledge of the relevant facts would reasonably regard as being so significant that it is likely to prejudice your judgment of the public interest.

An associated person is defined as:

- A family member or any other person with whom you have a close association, including your spouse, civil partner, or somebody with whom you are living as a husband or wife, or as if you are civil partners; or
- Any person or body who employs or has appointed such persons, any firm in which they are a partner, or any company of which they are directors; or
- Any person or body in whom such persons have a beneficial interest in a class of securities exceeding the nominal value of £25,000;
- Any body of which you are in a position of general control or management and to which you are appointed or nominated by the Authority; or
- any body in respect of which you are in a position of general control or management and which:
 - exercises functions of a public nature; or
 - is directed to charitable purposes; or
 - has as its principal purpose or one of its principal purposes the influence of public opinion or policy (including any political party or trade union)

An Authority Function is defined as: -

- Housing where you are a tenant of the Council provided that those functions do not relate particularly to your tenancy or lease; or
- Any allowance, payment or indemnity given to members of the Council;
- Any ceremonial honour given to members of the Council
- Setting the Council Tax or a precept under the Local Government Finance Act 1992

If you are at a meeting and you think that you have a significant interest then you <u>must</u> declare the existence **and** nature of the significant interest at the commencement of the

matter, or when the interest has become apparent, or the declarations of interest agenda item.

Once you have declared that you have a significant interest (unless you have been granted a dispensation by the Standards Committee or the Monitoring Officer, for which you will have applied to the Monitoring Officer prior to the meeting) you **must:-**

- 1. Not speak or vote (unless the public have speaking rights, or you are present to make representations, answer questions or to give evidence relating to the business being discussed in which case you can speak only)
- 2. Withdraw from the meeting during consideration of the matter or immediately after speaking.
- 3. Not seek to improperly influence the decision.

Gifts, Benefits and Hospitality

Councillors must declare at meetings any gift, benefit or hospitality with an estimated value (or cumulative value if a series of gifts etc.) of £25 or more. You **must**, at the commencement of the meeting or when the interest becomes apparent, disclose the existence and nature of the gift, benefit or hospitality, the identity of the donor and how the business under consideration relates to that person or body. However you can stay in the meeting unless it constitutes a significant interest, in which case it should be declared as outlined above.

What if I am unsure?

If you are in any doubt, Members are strongly advised to seek advice from the Monitoring Officer or the Committee Services Manager well in advance of the meeting.
