

TREASURY MANAGEMENT STRATEGY STATEMENT AND ANNUAL INVESTMENT STRATEGY – MID YEAR REVIEW REPORT 2018-19

Meeting	Governance and Audit Committee – 5 Dec 2018
Report Author	Tim Willis, Deputy Chief Executive & Section 151 Officer
Portfolio Holder	Councillor Ian Gregory, Cabinet Member for Financial Services and Estates
Status	For Decision
Classification:	Unrestricted
Key Decision	No

Executive Summary:

This report summarises treasury management activity and prudential/ treasury indicators for the first half of 2018-19.

Recommendation(s):

That the Governance and Audit Committee:

- Approves this report and the prudential and treasury indicators that are shown.
- Recommends this report to Cabinet.

CORPORATE IMPLICATIONS

Financial and Value for Money	The financial implications are highlighted in this report.
Legal	Section 151 of the 1972 Local Government Act requires a suitably qualified named officer to keep control of the council's finances. For this council, this is the Deputy Chief Executive, Tim Willis, and this report is helping to carry out that function.
Corporate	Failure to undertake this process will impact on the council's compliance with the Treasury Management Code of Practice.

Equalities Act 2010 & Public Sector Equality Duty	<p>There are no equity and equalities implications arising directly from this report, but the council needs to retain a strong focus and understanding on issues of diversity amongst the local community and ensure service delivery matches these.</p> <p>It is important to be aware of the council's responsibility under the Public Sector Equality Duty (PSED) and show evidence that due consideration had been given to the equalities impact that may be brought upon communities by the decisions made by council.</p>

Promoting inward investment and job creation	
Supporting neighbourhoods	

CORPORATE VALUES (tick those relevant) ✓	
Delivering value for money	✓
Supporting the Workforce	
Promoting open communications	

1 Introduction and Background

- 1.1 This report has been written in accordance with the requirements of the Chartered Institute of Public Finance and Accountancy (CIPFA) Code of Practice on Treasury Management (revised 2017).
- 1.2 Treasury management is defined as:
- “The management of the local authority’s borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”
- 1.3 The primary requirements of the Code include receipt by the full council of an annual Treasury Management Strategy Statement (including the Annual Investment Strategy and Minimum Revenue Provision Policy) for the year ahead, a **Mid-year Review Report** and an Annual Report (stewardship report) covering activities during the previous year.
- 1.4 This mid-year report has been prepared in compliance with CIPFA’s Code of Practice on Treasury Management, and covers the following:
- An economic update for the first half of the 2018-19 financial year;
 - A review of the Treasury Management Strategy Statement and Annual Investment Strategy;
 - The council’s capital expenditure (see also the Capital Strategy) and prudential indicators;
 - A review of the council’s investment portfolio for 2018-19;
 - A review of the council’s borrowing strategy for 2018-19;

- A review of any debt rescheduling undertaken during 2018-19;
- A review of compliance with Treasury and Prudential Limits for 2018-19.

1.5 The Treasury Management Strategy was agreed by council on 8 February 2018, and the Capital Strategy and Non-Treasury Investment Report were both agreed by Cabinet on 18 September 2018. As at 30 September 2018, there have been no key changes to these documents.

2 Link's Interest rate forecasts (issued by Link on 3 October 2018)

2.1 The council's treasury advisor, Link Asset Services, has provided the following forecast:

Link Asset Services Interest Rate View											
	Sep-18	Dec-18	Mar-19	Jun-19	Sep-19	Dec-19	Mar-20	Jun-20	Sep-20	Dec-20	Mar-21
Bank Rate View	0.75%	0.75%	0.75%	0.75%	1.00%	1.00%	1.00%	1.25%	1.25%	1.50%	1.50%
3 Month LIBID	0.75%	0.80%	0.80%	0.90%	1.10%	1.10%	1.20%	1.40%	1.50%	1.60%	1.60%
6 Month LIBID	0.85%	0.90%	0.90%	1.00%	1.20%	1.20%	1.30%	1.50%	1.60%	1.70%	1.70%
12 Month LIBID	1.00%	1.00%	1.00%	1.10%	1.30%	1.30%	1.40%	1.60%	1.70%	1.80%	1.80%
5yr PWLB Rate	2.00%	2.00%	2.10%	2.20%	2.20%	2.30%	2.30%	2.40%	2.50%	2.50%	2.60%
10yr PWLB Rate	2.40%	2.50%	2.50%	2.60%	2.70%	2.70%	2.80%	2.90%	2.90%	3.00%	3.10%
25yr PWLB Rate	2.80%	2.90%	3.00%	3.10%	3.10%	3.20%	3.30%	3.30%	3.40%	3.50%	3.50%
50yr PWLB Rate	2.60%	2.70%	2.80%	2.90%	2.90%	3.00%	3.10%	3.10%	3.20%	3.30%	3.30%

2.2 The flow of generally positive economic statistics after the end of the quarter ended 30 June meant that it came as no surprise that the Monetary Policy Committee (MPC) came to a decision on 2 August to make the first increase in Bank Rate above 0.5% since the financial crash, to 0.75%. However, the MPC emphasised again, that future Bank Rate increases would be gradual and would rise to a much lower equilibrium rate, (where monetary policy is neither expansionary or contractionary), than before the crash; indeed they gave a figure for this of around 2.5% in ten years' time but they declined to give a medium term forecast. Link does not think that the MPC will increase Bank Rate in February 2019, ahead of the deadline in March for Brexit. Link also feels that the MPC is more likely to wait until August 2019, than May 2019, before the next increase, to be followed by further increases of 0.25% in May and November 2020 to reach 1.5%. However, the cautious pace of even these limited increases is dependent on a reasonably orderly Brexit.

2.3 The balance of risks to the UK

- The overall balance of risks to economic growth in the UK is probably neutral.
- The balance of risks to increases in Bank Rate and shorter term PWLB rates, are probably also even and are broadly dependent on how strong Gross Domestic Product (GDP) growth turns out, how slowly inflation pressures subside, and how quickly the Brexit negotiations move forward positively.

2.4 Downside risks to current forecasts for UK gilt yields and PWLB rates currently include:

- Bank of England monetary policy takes action too quickly over the next three years to raise Bank Rate and causes UK economic growth, and increases in inflation, to be weaker than Link currently anticipates.
- A resurgence of the Eurozone sovereign debt crisis, possibly Italy, due to its high level of government debt, low rate of economic growth and vulnerable banking system, and due to the election in March of a government which has made a lot of anti-austerity noise. This is likely to lead to friction with the European Union (EU) when setting the target for the fiscal deficit in the national budget. Unsurprisingly, investors have taken a dim view of this and so Italian bond yields have been rising.
- Austria, the Czech Republic and Hungary now form a strongly anti-immigration bloc within the EU while Italy, this year, has also elected a strongly anti-immigration government. In the German general election of September 2017, Angela Merkel's CDU party was left in a vulnerable minority position as a result of the rise of the anti-immigration AfD party. To compound this, the result of the Swedish general election in September 2018 has left an anti-immigration party potentially holding the balance of power in forming a coalition government. The challenges from these political developments could put considerable pressure on the cohesion of the EU and could spill over into impacting the euro, EU financial policy and financial markets.
- The imposition of trade tariffs by President Trump could negatively impact world growth. President Trump's specific actions against Turkey pose a particular risk to its economy which could, in turn, negatively impact Spanish and French banks which have significant exposures to loans to Turkey.
- Weak capitalisation of some European banks.
- Rising interest rates in the US could negatively impact emerging countries which have borrowed heavily in dollar denominated debt, so causing an investor flight to safe havens e.g. UK gilts.
- Geopolitical risks, especially North Korea, but also in Europe and the Middle East, which could lead to increasing safe haven flows.

Upside risks to current forecasts for UK gilt yields and PWLB rates

- President Trump's fiscal plans to stimulate economic expansion causing a significant increase in inflation in the US and causing further sell offs of government bonds in major western countries.
- The Federal Reserve (Fed) causing a sudden shock in financial markets through misjudging the pace and strength of increases in its Fed. Funds Rate and in the pace and strength of reversal of Quantitative Easing (QE), which then leads to a fundamental reassessment by investors of the relative risks of holding bonds, as opposed to equities. This could lead to a major flight from bonds to equities and a sharp increase in bond yields in the US, which could then spill over into impacting bond yields around the world.
- The Bank of England is too slow in its pace and strength of increases in Bank Rate and, therefore, allows inflation pressures to build up too strongly within the UK economy, which then necessitates a later rapid series of increases in Bank Rate faster than Link currently expects.

- UK inflation, whether domestically generated or imported, returning to sustained significantly higher levels causing an increase in the inflation premium inherent to gilt yields.

3 Treasury Management Strategy Statement and Annual Investment Strategy Update

3.1 The Treasury Management Strategy Statement (TMSS) for 2018-19, which includes the Annual Investment Strategy, was approved by the council on 8 February 2018. There are no policy changes to the TMSS; the details in this report update the position in the light of the updated economic position and budgetary changes already approved.

4 The Council's Capital Position (Prudential Indicators)

4.1 This part of the report is structured to update:

- The council's capital expenditure plans;
- How these plans are being financed;
- The impact of the changes in the capital expenditure plans on the prudential indicators and the underlying need to borrow; and
- Compliance with the limits in place for borrowing activity.

4.2 Prudential Indicator for Capital Expenditure

This table shows the revised estimates for capital expenditure and the changes since the capital programme was agreed at the Budget.

The revised estimate includes net reprofiling of £7.2m General Fund and £3.5m HRA.

Capital Expenditure	2018-19 Original Estimate £m	Current Position – Actual at 30-09-18 £m	2018-19 Revised Estimate £m
General Fund	4.689	5.974	13.512
HRA	4.484	2.218	7.408
Total	9.173	8.192	20.920

4.3 Changes to the Financing of the Capital Programme

The table below draws together the main strategy elements of the capital expenditure plans (above), highlighting the original supported and unsupported elements of the capital programme, and the expected financing arrangements of this capital expenditure. The borrowing element of the table increases the underlying indebtedness of the council by way of the Capital Financing Requirement (CFR), although this will be reduced in part by revenue charges for the repayment of debt (the Minimum Revenue Provision). This direct borrowing need may also be supplemented by maturing debt and other treasury requirements.

Capital Expenditure	2018-19 Original Estimate £m Total	Current Position – Actual at 30-09-18 £m	2018-19 Revised Estimate £m GF	2018-19 Revised Estimate £m HRA	2018-19 Revised Estimate £m Total
Total spend	9.173		13.512	7.408	20.920
Financed by:					
Capital receipts	0.941		4.161	0.655	4.816
Capital grants	3.425		4.511	1.857	6.368
Reserves	4.257		0.202	4.486	4.688
Revenue	0.300		0.006	0.410	0.416
Total financing	8.923		8.880	7.408	16.288
Borrowing need	0.250		4.632	0.000	4.632

4.4 Changes to the Prudential Indicators for the Capital Financing Requirement, External Debt and the Operational Boundary

The table shows the CFR, which is the underlying external need to incur borrowing for a capital purpose. It also shows the expected debt position over the period, which is termed the Operational Boundary.

Prudential Indicator – Capital Financing Requirement

We are on target to achieve the forecast Capital Financing Requirement.

Prudential Indicator – the Operational Boundary for external debt

	2018-19 Original Estimate £m	Current Position – Actual at 30-09-18 £m	2018-19 Revised Estimate £m
Prudential Indicator – Capital Financing Requirement			
CFR – non housing	29.850		27.086
CFR – housing	26.321		20.786
Total CFR	56.171		47.872
Net movement in CFR	11.572		3.273
	2018-19 Original Indicator £m	Current Position – Actual at 30-09-18 £m	2018-19 Revised Indicator £m
Prudential Indicator - the Operational Boundary for External Debt			
Borrowing	55.000	30.771	55.000
Other long term liabilities*	22.000	2.447	22.000
Total debt	77.000	33.218	77.000

* Any 'on balance sheet' PFI schemes and finance leases etc (including the leisure centre deferred credit). Both the Operational Boundary and Authorised Limit Indicators include an estimate for the recognition of leases under International Financial Reporting 16 (IFRS 16). The impact of IFRS 16 has not been reflected in the Actual or elsewhere in this report, pending further information from CIPFA.

4.5 Limits to Borrowing Activity

The first key control over the treasury activity is a prudential indicator to ensure that over the medium term, borrowing will only be for a capital purpose. Gross external borrowing should not, except in the short term, exceed the total of CFR in the preceding year plus the estimates of any additional CFR for 2018-19 and next two financial years. This allows some flexibility for limited early borrowing for future years. The council has approved a policy for borrowing in advance of need which will be adhered to if this proves prudent.

	2018-19 Original Estimate £m	Current Position – Actual at 30-09-18 £m	2018-19 Revised Estimate £m
Gross borrowing	41.274	30.771	35.133
Plus other long term liabilities*	2.290	2.447	2.277
Total gross borrowing	43.564	33.218	37.410
CFR (year end position)	56.171		47.872

The Section 151 Officer reports that no difficulties are envisaged for the current or future years in complying with this prudential indicator.

A further prudential indicator controls the overall level of borrowing. This is the Authorised Limit which represents the limit beyond which borrowing is prohibited, and needs to be set and revised by Members. It reflects the level of borrowing which, while not desired, could be afforded in the short term, but is not sustainable in the longer term. It is the expected maximum borrowing need with some headroom for unexpected movements. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003.

Authorised limit for external debt	2018-19 Original Indicator £m	Current Position – Actual at 30-09-18 £m	2018-19 Revised Indicator £m
Borrowing	60.000	30.771	60.000
Other long term liabilities*	27.000	2.447	27.000
Total	87.000	33.218	87.000

** Any 'on balance sheet' PFI schemes and finance leases etc (including the leisure centre deferred credit). Both the Operational Boundary and Authorised Limit Indicators include an estimate for the recognition of leases under International Financial Reporting 16 (IFRS 16). The impact of IFRS 16 has not been reflected in the Actual or elsewhere in this report, pending further information from CIPFA.*

5 Investment Portfolio 2018-19

- 5.1 In accordance with the Code, it is the council's priority to ensure security of capital and liquidity, and to obtain an appropriate level of return which is consistent with the council's risk appetite. As shown by forecasts in Section 2, it is a very difficult investment market in terms of earning the level of interest rates commonly seen in previous decades as rates are very low and in line with the current 0.75% Bank Rate. The continuing potential for a re-emergence of a Eurozone sovereign debt crisis, and its impact on banks, prompts a low risk and short term strategy. Given this risk environment and the fact that increases in Bank Rate are likely to be gradual and unlikely to return to the levels seen in previous decades, investment returns are likely to remain low.
- 5.2 The council held £47.497m of investments as at 30 September 2018 (£40.882m at 31 March 2018) and the investment portfolio yield for the first six months of the year is 0.60% against a benchmark (average 7-day LIBID rate) of 0.44%. The constituent investments are:

Sector	Country	Up to 1 year £m	1 year – 370 days £m	Total £m
Banks	UK	13.771	0.000	13.771
Banks	Sweden	4.516	0.000	4.516
Money Market Funds	UK	29.210	0.000	29.210
Total		47.497	0.000	47.497

- 5.3 The Section 151 Officer confirms that the approved limits within the Annual Investment Strategy were not breached during the first six months of 2018-19.
- 5.4 The council's budgeted investment return for 2018-19 is £0.062m and performance for the first half of the financial year is above budget at £0.136m.

5.5 Investment Risk Benchmarking

Investment risk benchmarks were set in the 2018-19 Treasury Management Strategy Statement (TMSS) for security, liquidity and yield. The mid-year position against these benchmarks is given below.

5.5.1 Security

The council's maximum security risk benchmark for the current portfolio, when compared to historic default tables, is:

- 0.05% historic risk of default when compared to the whole portfolio.

The security benchmark for each individual period is:

	370 days	2 years	3 years	4 years	5 years
Maximum	0.05%	0.00%	0.00%	0.00%	0.00%

Note: This benchmark is an average risk of default measure, and would not constitute an expectation of loss against a particular investment.

The Section 151 Officer can report that the investment portfolio was maintained within this overall benchmark for the first half of this financial year.

5.5.2 Liquidity

In respect of this area the council seeks to maintain:

- Bank overdraft - £0.5m
- Liquid short term deposits of at least £10m available with a week's notice.
- Weighted Average Life benchmark is expected to be 0.5 years, with a maximum of 1.0 year.

The Section 151 Officer can report that liquidity arrangements were adequate for the first half of this financial year.

This authority does not currently place investments for more than 370 days due to the credit, security and counterparty risks of placing such investments.

5.5.3 Yield

Local measures of yield benchmarks are:

- Investments – Internal returns above the 7 day LIBID rate

The Section 151 Officer can report that the yield on deposits for the first half of the financial year is 0.60% against a benchmark (average 7-day LIBID rate) of 0.44%.

5.6 Investment Counterparty criteria

The current investment counterparty criteria selection approved in the TMSS is meeting the requirement of the treasury management function.

6 Borrowing

- 6.1 The council's capital financing requirement (CFR) original estimate for 2018-19 is £56.171m. The CFR denotes the council's underlying need to borrow for capital purposes. If the CFR is positive the council may borrow

from the PWLB or the market (external borrowing) or from internal balances on a temporary basis (internal borrowing). The balance of external and internal borrowing is generally driven by market conditions. The council has borrowings of £30.771m (table 4.5) and has utilised an estimated £25.400m of cash flow funds in lieu of borrowing. This is a prudent and cost effective approach in the current economic climate but will require ongoing monitoring in the event that upside risk to gilt yields prevails.

6.2 No new external borrowing was undertaken from the PWLB during the first half of this financial year.

6.3 Borrowing may be undertaken during the second half of this financial year and options will be reviewed in due course in line with market conditions.

6.4 The graph and table below show the movement in PWLB certainty rates for the first six months of the year to 30 September 2018.

6.5 PWLB certainty rates, half year ended 30th September 2018

	1 Year	5 Year	10 Year	25 Year	50 Year
3.4.18	1.48%	1.84%	2.22%	2.55%	2.27%
30.9.18	1.55%	1.93%	2.33%	2.74%	2.56%
Low	1.28%	1.67%	2.09%	2.50%	2.25%
Date	01/06/2018	29/05/2018	20/07/2018	20/07/2018	29/05/2018
High	1.57%	1.99%	2.43%	2.83%	2.64%
Date	17/04/2018	25/09/2018	25/04/2018	25/09/2018	25/09/2018
Average	1.46%	1.84%	2.25%	2.64%	2.41%

6.6 Debt rescheduling opportunities have been very limited in the current economic climate given the consequent structure of interest rates, and following the increase in the margin added to gilt yields which has impacted PWLB new borrowing rates since October 2010. No debt rescheduling has

therefore been undertaken to date in the current financial year. The council is currently under-borrowed to address investment counterparty risk and the differential between borrowing and investment interest rates. This position is carefully monitored.

- 6.7 The council's budgeted debt interest payable for 2018-19 is £1.507m and performance for the first half of the financial year is below budget at £0.576m. The revised estimate for 2018-19 is £1.206m.

7 Treasury Management Indicators

7.1 Ratio of financing costs to net revenue stream

This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream.

%	2018-19 Original Indicator	2018-19 Revised Indicator
Non-HRA	10.5%	8.6%
HRA	7.6%	6.0%

- 7.2 **Upper Limits on Variable Rate Exposure** – This identifies a maximum limit for variable interest rates based upon the debt position net of investments.

Upper Limits on Fixed Rate Exposure – Similar to the previous indicator, this covers a maximum limit on fixed interest rates.

Both of these are shown in the below table:

	2018-19 Original Indicator £m	Current Position – Actual at 30-09-18 £m	2018-19 Revised Indicator £m
Upper limits on fixed interest rates			
Debt only	87.000	30.771	87.000
Investments only	45.000	13.381	45.000
Upper limits on variable interest rates			
Debt only	87.000	0.000	87.000
Investments only	50.000	34.116	50.000

7.3 Maturity Structures of Borrowing

These gross limits are set to reduce the council's exposure to large fixed rate sums falling due for refinancing.

	2018-19 Original Upper Limit	Current Position – Actual at 30-09-18	2018-19 Revised Upper Limit
Maturity structure of fixed rate borrowing			
Under 12 months	50%	20%	50%
1 year to under 2 years	50%	15%	50%
2 years to under 5 years	50%	16%	50%
5 years to under 10 years	55%	9%	55%
10 years to under 20 years	50%	21%	50%
20 years to under 30 years	50%	10%	50%
30 years to under 40 years	50%	6%	50%
40 years to under 50 years	50%	3%	50%
50 years and above	50%	0%	50%

The current position shows the actual percentage of fixed rate debt the authority has within each maturity span. None of the upper limits have been breached.

8 UK Banks - Ring Fencing

- 8.1 The largest UK banks, (those with more than £25bn of retail / Small and Medium-sized Enterprise (SME) deposits), are required, by UK law, to separate core retail banking services from their investment and international banking activities by 1st January 2019. This is known as “ring-fencing”. Whilst smaller banks with less than £25bn in deposits are exempt, they can choose to opt up. Several banks are very close to the threshold already and so may come into scope in the future regardless.
- 8.2 Ring-fencing is a regulatory initiative created in response to the global financial crisis. It mandates the separation of retail and SME deposits from investment banking, in order to improve the resilience and resolvability of banks by changing their structure. In general, simpler, activities offered from within a ring-fenced bank, (RFB), will be focused on lower risk, day-to-day core transactions, whilst more complex and “riskier” activities are required to be housed in a separate entity, a non-ring-fenced bank, (NRFB). This is intended to ensure that an entity's core activities are not adversely affected by the acts or omissions of other members of its group.
- 8.3 While the structure of the banks included within this process may have changed, the fundamentals of credit assessment have not. The council will

continue to assess the new-formed entities in the same way that it does others and those with sufficiently high ratings, (and any other metrics considered), will be considered for investment purposes.

9 Options

9.1 The recommended option (to ensure regulatory compliance as set out in section 1 of this report) is that the Governance and Audit Committee:

- Approves this report and the prudential and treasury indicators that are shown.
- Recommends this report to Cabinet.

9.2 Alternatively, the Governance and Audit Committee may decide not to do this and advise the reason(s) why.

10 Next Steps

10.1 This report is to go to Cabinet (January 2019) and then council for approval.

11 Disclaimer
