Mr Thorpe spoke in favour of the application.

Mr Heeney spoke against the application.

It was proposed by the Chair and seconded by the Vice Chair:

‘THAT the officer’s recommendation be adopted, namely:

That the application be approved subject to the following safeguarding conditions:

The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

GROUND:

In accordance with Section 91 of the Town and Country Planning Act 1990 (as amended by Section 51 of the Planning and Purchase Act 2004).

The development hereby approved shall be carried out in accordance with the submitted drawing numbered CT10 2NH-A-03A, received 29 November 2022; drawings numbered CT10 2NH-A-05.1, CT10 2NH-A-05, CT10 2NH-A-04-A, SDL- 033.2,SDL-090.3C, and CYSH-PREM-2250 X 3000 X 2100, received 11 July 2022; and plans numbered AMA/21510/SK002 and AMA/21510/SK/001, received 26 October 2022.

GROUND:

To secure the proper development of the area.

No development shall take place (except for demolition and vegetation clearance) until the applicant, or their agents or successors in title, has secured the implementation of a programme of archaeological work in accordance with a written specification and timetable which has been submitted to and approved by the Local Planning Authority.

GROUND:

To ensure that features of archaeological interest are properly examined and recorded in accordance with Policy HE01 of the Thanet Local Plan and the advice contained within the National Planning Policy Framework.

Development shall not begin in any phase (except for demolition/ site clearance) until a detailed sustainable surface water drainage scheme for the site has been submitted to (and approved in writing by) the local planning authority. The detailed drainage scheme shall demonstrate that the surface water generated by this development (for all rainfall durations and intensities up to and including the climate change adjusted critical 100 year storm) can be accommodated and disposed of without increase to flood risk on or off-site.

The drainage scheme shall also demonstrate (with reference to published guidance):

- That silt and pollutants resulting from the site use can be adequately managed to ensure there is no pollution risk to receiving waters.
- Appropriate operational, maintenance and access requirements for each drainage feature or SuDS component are adequately considered, including any proposed arrangements for future adoption by any public body or statutory undertaker.
- The final discharge rate from the site shall be a minimum of a 50% reduction in the peak runoff rate over the current rate to reduce peak discharge to the receiving sewer.

The drainage scheme shall be implemented in accordance with the approved details.

GROUND:

To ensure the development is served by satisfactory arrangements for the disposal of surface water and to ensure that the development does not exacerbate the risk of on/off site flooding, in accordance with Policy CC02 of the Thanet Local Plan and advice contained within the NPPF.

No building on any phase (or within an agreed implementation schedule) of the development hereby permitted shall be occupied until a Verification Report, pertaining to the surface water drainage system and prepared by a suitably competent person, has been submitted to and approved by the Local Planning Authority. The Report shall demonstrate the suitable modelled operation of the drainage system where the system constructed is different to that approved. The Report shall contain information and evidence (including photographs) of details and locations of inlets, outlets and control structures; landscape plans; full as built drawings; information pertinent to the installation of those items identified on the critical drainage assets drawing; and, the submission of an operation and maintenance manual for the sustainable drainage scheme as constructed.

GROUND:

To ensure the development is served by satisfactory arrangements for the disposal of surface water and to ensure that the development does not exacerbate the risk of on/off site flooding, in accordance with Policy CC02 of the Thanet Local Plan and advice contained within the NPPF.

If, during development, significant contamination is suspected or found to be present at the site, then works shall cease, and this contamination shall be fully assessed and an appropriate remediation scheme agreed with the Local Planning Authority. The approved works shall be implemented within a timetable agreed by the Local Planning Authority and shall be of such a nature as to render harmless the identified contamination given the proposed end use of the site and surrounding environment, including controlled waters.

Prior to first occupation/use and following completion of approved measures, a verification report shall be submitted to the Local Planning Authority for approval.

GROUND:

To ensure that the proposed development will not cause harm to human health or pollution of the environment, in accordance with Policy SE03 of the Thanet Local Plan and the advice contained within the National Planning Policy Framework.

Prior to the commencement of any development on site details to include the following shall be submitted to and approved by the Local Planning Authority and should be carried out in accordance with the approved details.

- (a) Routing of construction and delivery vehicles to / from site
- (b) Parking and turning areas for construction and delivery vehicles and site personnel
- (c) Timing of deliveries
- (d) Provision of wheel washing facilities
- (e) Temporary traffic management / signage
- (f) Measures to control noise affecting nearby residents
- (g) Dust control measures
- (h) Access arrangements

GROUND:

In the interests of highway safety and neighbouring amenity, in accordance with Policy QD03 of the Thanet Local Plan and the advice contained within the NPPF.

GROUND:

To protect air quality, in accordance with Policy SE05 of the Thanet Local Plan and the advice as contained within the NPPF.

No development shall take place (including ground works, vegetation clearance) until a construction environmental management plan (CEMP (Biodiversity)) has been submitted to and approved in writing by the local planning authority. The CEMP (Biodiversity) should incorporate the mitigation measures detailed in the Native Ecology Preliminary Ecological Appraisal dated 29th April 2022. The CEMP shall include the following:

- a) Risk assessment of potentially damaging construction activities;
- b) Identification of 'biodiversity protection zones';
- c) Practical measures (both physical measures and sensitive working practises) to avoid or reduce impacts during construction (may be provided as a set of method statements);
- d) The location and timing of sensitive works to avoid harm to biodiversity features;
- e) The times during construction when specialist ecologists need to be present on site to oversee works;
- f) Responsible persons and lines of communication;
- g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person;
- h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP (Biodiversity) shall be adhered to and implemented throughout the construction period in accordance with the approved details.

GROUND:

In order to limit the impact upon protected species that may be present, in accordance with Policy SP30 of the Thanet Local Plan and the advice as contained within the NPPF.

Prior to the installation of any external lighting a "lighting design strategy for biodiversity" for the site boundaries has been submitted to and approved in writing by the local planning authority. The lighting strategy shall:

- a) Identify those areas/features on site that are particularly sensitive for badgers and bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory;
- b) Show how and where external lighting will be installed so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory.
- c) Details of the types of lighting to be used including their fittings, illumination levels and spread of light All external lighting shall be installed in accordance with the specifications and locations set out in the strategy and these shall be maintained thereafter in accordance with the strategy.
