

## **ANNEX 6 - LINK'S ECONOMIC AND INTEREST RATE FORECAST (ISSUED BY LINK ON 17 NOVEMBER 2023)**

1. The council has appointed Link Group as its treasury advisor and part of their service is to assist the council to formulate a view on interest rates. Link provided the following forecasts on 7 November 2023. These are forecasts for Bank Rate, average earnings and PWLB certainty rates, gilt yields plus 80 basis points (bps).

Link Group Interest Rate View	07.11.23												
	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26
BANK RATE	5.25	5.25	5.25	5.00	4.50	4.00	3.50	3.25	3.00	3.00	3.00	3.00	3.00
3 month ave earnings	5.30	5.30	5.30	5.00	4.50	4.00	3.50	3.30	3.00	3.00	3.00	3.00	3.00
6 month ave earnings	5.60	5.50	5.40	5.10	4.60	4.10	3.60	3.40	3.10	3.10	3.10	3.10	3.10
12 month ave earnings	5.80	5.70	5.50	5.20	4.70	4.20	3.70	3.50	3.30	3.30	3.30	3.30	3.30
5 yr PWLB	5.00	4.90	4.80	4.70	4.40	4.20	4.00	3.80	3.70	3.60	3.50	3.50	3.50
10 yr PWLB	5.10	5.00	4.80	4.70	4.40	4.20	4.00	3.80	3.70	3.70	3.60	3.60	3.50
25 yr PWLB	5.50	5.30	5.10	4.90	4.70	4.50	4.30	4.20	4.10	4.10	4.00	4.00	4.00
50 yr PWLB	5.30	5.10	4.90	4.70	4.50	4.30	4.10	4.00	3.90	3.90	3.80	3.80	3.80

### **2. Additional notes by Link on this forecast table: -**

Link's central forecast for interest rates was previously updated on 25 September and reflected a view that the Monetary Policy Committee (MPC) would be keen to further demonstrate its anti-inflation credentials by keeping Bank Rate at 5.25% until at least H2 2024. Link expects rate cuts to start when both the Consumer Price Index (CPI) inflation and wage/employment data are supportive of such a move, and that there is a likelihood of the overall economy enduring at least a mild recession over the coming months, although most recent Gross Domestic Product (GDP) releases have surprised with their on-going robustness.

Naturally, timing on this matter will remain one of fine judgement: cut too soon, and inflationary pressures may well build up further; cut too late and any downturn or recession may be prolonged.

In the upcoming months, Link's forecasts will be guided not only by economic data releases and clarifications from the MPC over its monetary policies and the Government over its fiscal policies, but also international factors such as policy development in the US and Europe, the provision of fresh support packages to support the faltering recovery in China as well as the on-going conflict between Russia and Ukraine, and Gaza and Israel.

On the positive side, consumers are still anticipated to be sitting on some excess savings left over from the pandemic, which could cushion some of the impact of the above challenges and may be the reason why the economy is performing somewhat better at this stage of the economic cycle than may have been expected. However, most of those excess savings are held by more affluent households whereas lower income families already spend nearly all their income on essentials such as food, energy and rent/mortgage payments.

### **3. PWLB RATES**

Gilt yield curve movements have broadened since Link's last Newsflash. The short part of the curve has not moved far but the longer-end continues to reflect inflation concerns. At the time of writing there is 60 basis points difference between the 5 and 50 year parts of the curve.

### **4. The balance of risks to the UK economy: -**

- The overall balance of risks to economic growth in the UK is to the downside.

## 5. Downside risks to current forecasts for UK gilt yields and PWLB rates include: -

- **Labour and supply shortages** prove more enduring and disruptive and depress economic activity (accepting that in the near-term this is also an upside risk to inflation and, thus, could keep gilt yields high for longer).
- **The Bank of England** has increased Bank Rate too fast and too far over recent months, and subsequently brings about a deeper and longer UK recession than Link currently anticipates.
- **UK / EU trade arrangements** – if there was a major impact on trade flows and financial services due to complications or lack of co-operation in sorting out significant remaining issues.
- **Geopolitical risks**, for example in Ukraine/Russia, the Middle East, China/Taiwan/US, Iran and North Korea, which could lead to increasing safe-haven flows.

## 6. Upside risks to current forecasts for UK gilt yields and PWLB rates: -

- Despite the recent tightening to 5.25%, the **Bank of England proves too timid** in its pace and strength of increases in Bank Rate and, therefore, allows inflationary pressures to remain elevated for a longer period within the UK economy, which then necessitates Bank Rate staying higher for longer than Link currently projects.
- **The pound weakens** because of a lack of confidence in the UK Government's pre-election fiscal policies, resulting in investors pricing in a risk premium for holding UK sovereign debt.
- Longer-term **US treasury yields** rise strongly if inflation remains more stubborn there than the market currently anticipates, consequently pulling gilt yields up higher. (We saw some movements of this type through October although generally reversed in the last week or so).
- Projected **gilt issuance, inclusive of natural maturities and quantitative tightening (QT)**, could be too much for the markets to comfortably digest without higher yields compensating.

7. **Borrowing advice:** Link's long-term (beyond 10 years) forecast for Bank Rate has increased from 2.75% to 3% and reflects Capital Economics' research that suggests artificial intelligence (AI) and general improvements in productivity will be supportive of a higher neutral interest rate. As all PWLB certainty rates are currently significantly above this level, borrowing strategies will need to be reviewed in that context. Overall, better value can generally be obtained at the shorter end of the curve and short-dated fixed Local Authority (LA) to LA monies should be considered. Temporary borrowing rates will remain elevated for some time to come but may prove the best option whilst the market continues to wait for inflation, and therein gilt yields, to drop back later in 2024.

8. Link's suggested budgeted earnings rates for investments up to about three months' duration in each financial year are rounded to the nearest 10bps and set out below. Investment

earnings have been revised somewhat higher for all years from 2025/26 as Bank Rate is forecast to remain higher for longer.

Average earnings in each year	Now	Previously
2023/24 (residual)	5.30%	5.30%
2024/25	4.70%	4.70%
2025/26	3.20%	3.00%
2026/27	3.00%	2.80%
2027/28	3.25%	3.05%
Years 6 to 10	3.25%	3.05%
Years 10+	3.25%	3.05%

- 9. As there are so many variables at this time, caution must be exercised in respect of all interest rate forecasts.
- 10. Link’s interest rate forecast for Bank Rate is in steps of 25 bps, whereas PWLB forecasts have been rounded to the nearest 10 bps and are central forecasts within bands of + / - 25 bps. Naturally, Link continues to monitor events and will update its forecasts as and when appropriate.
